

Muon · state 10 · block 1: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

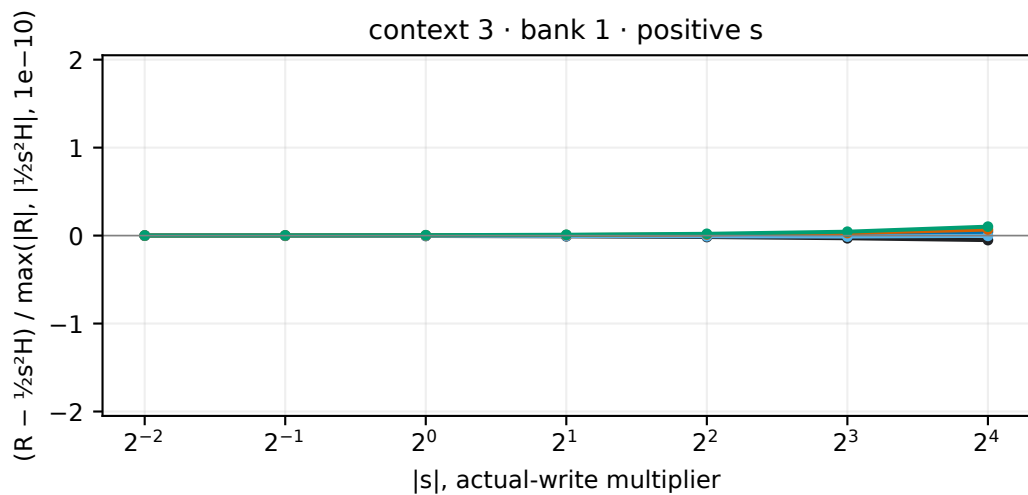

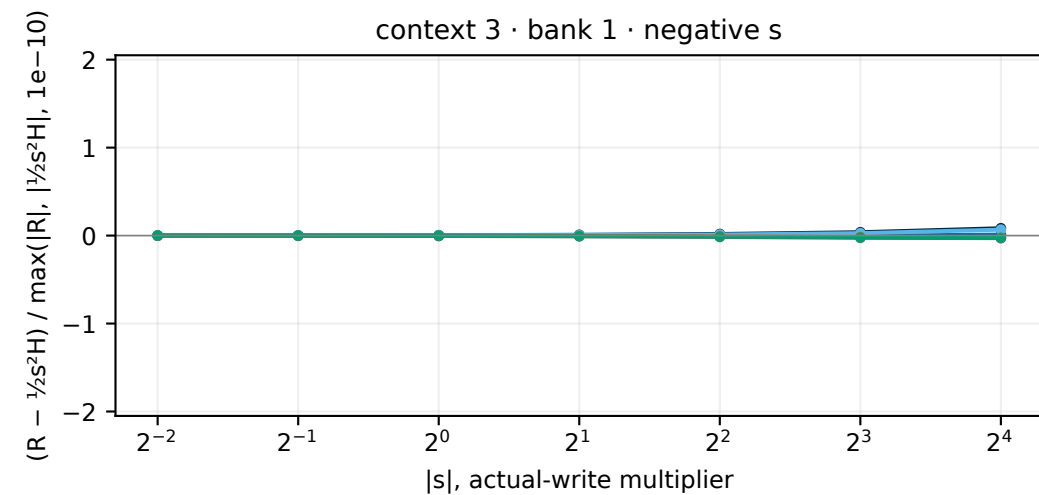

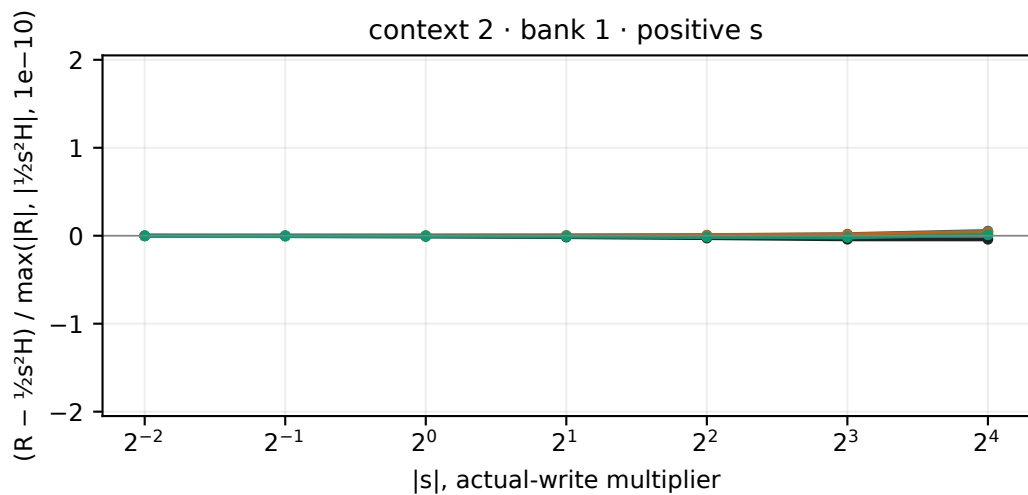

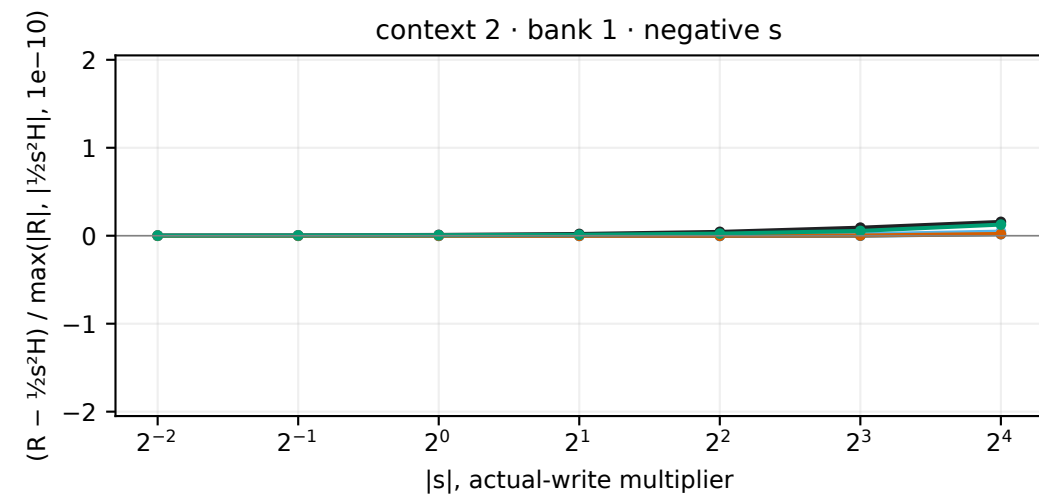

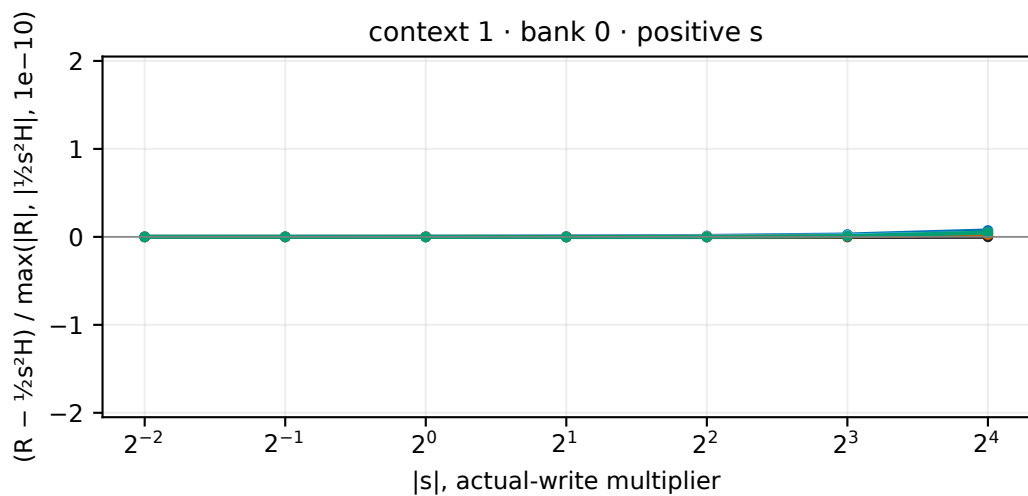

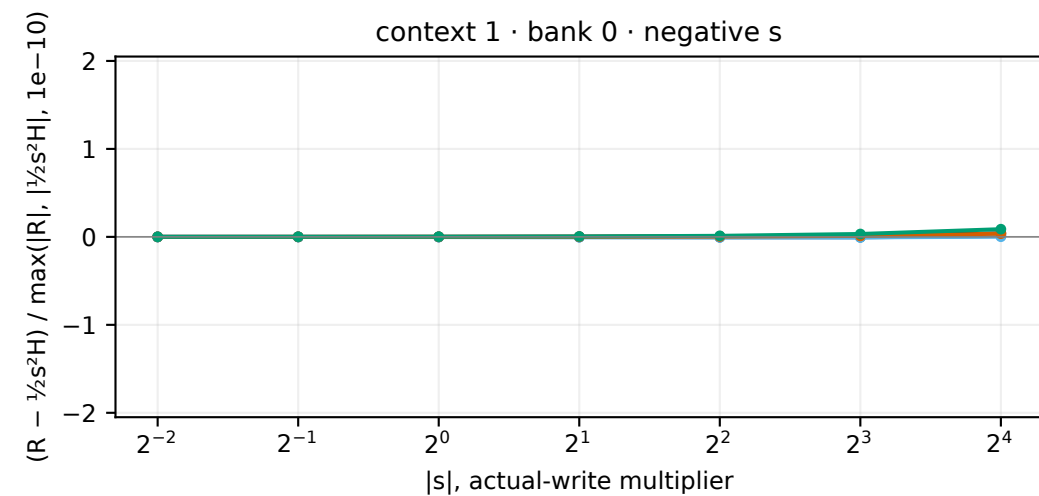

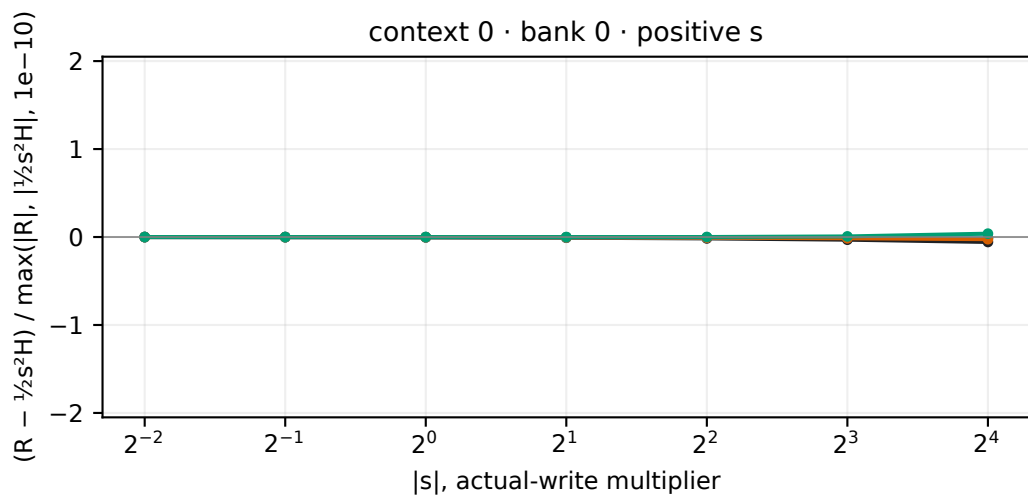

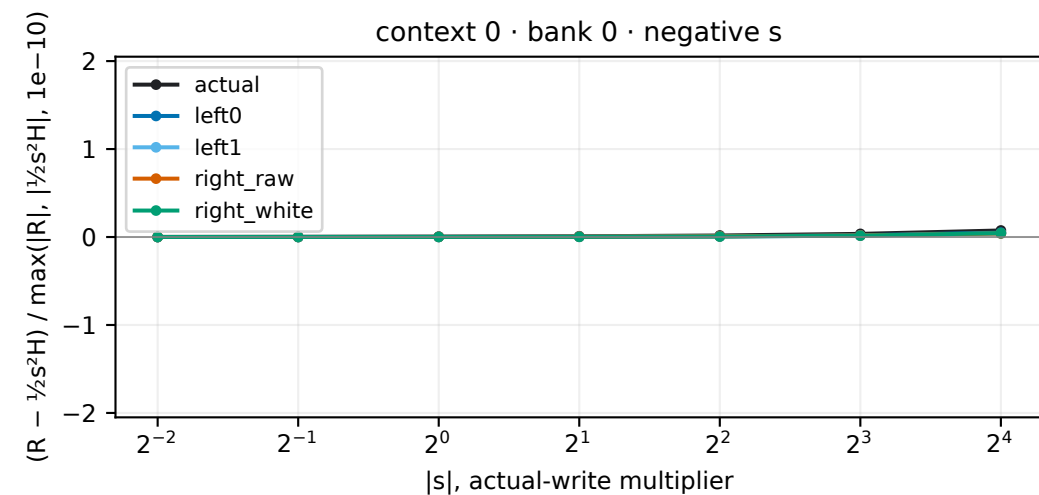

Muon · state 10 · block 4: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

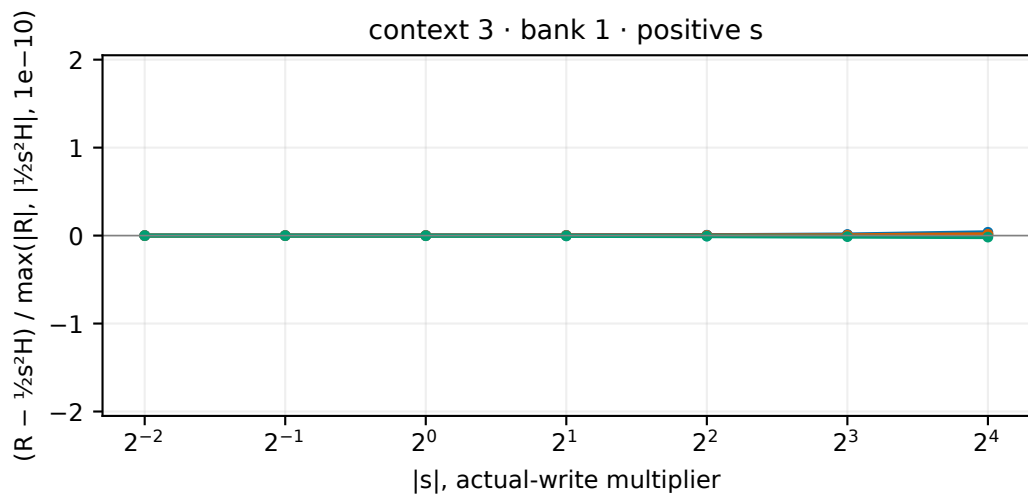

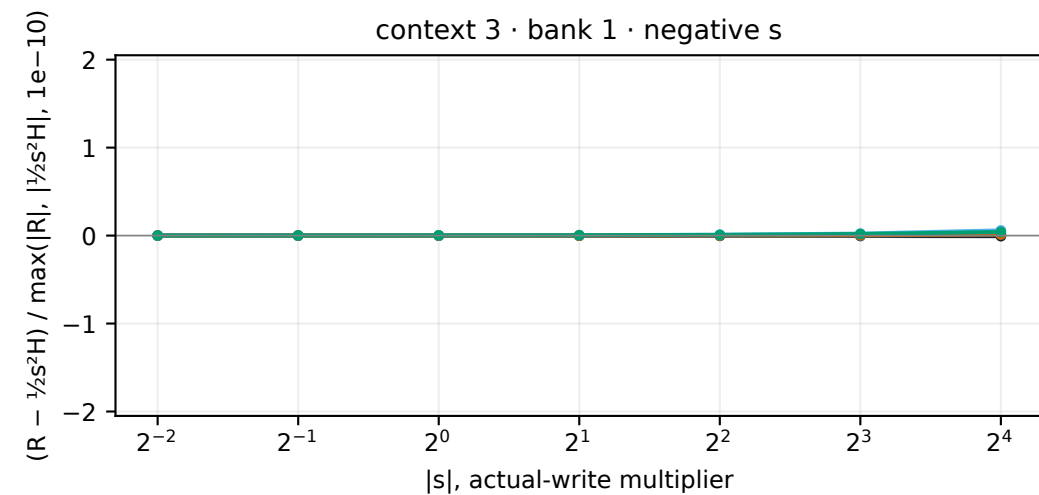

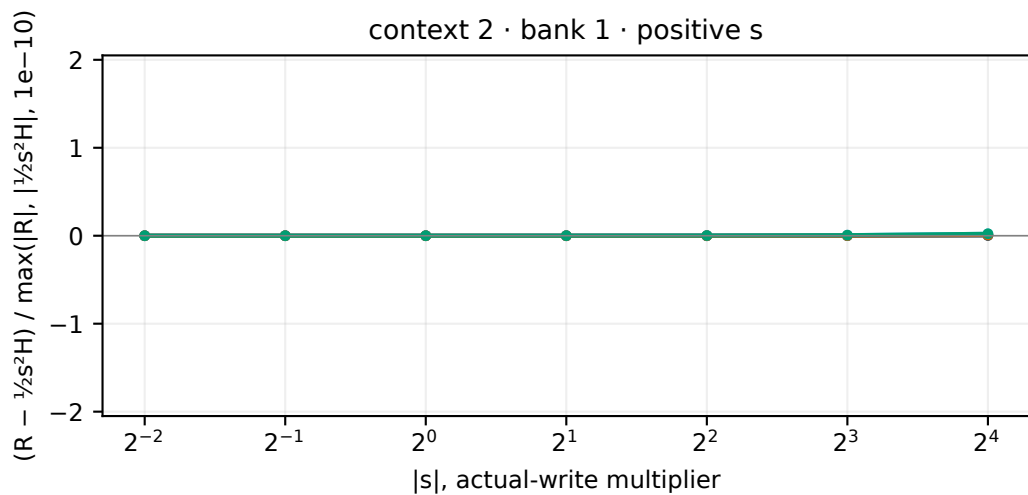

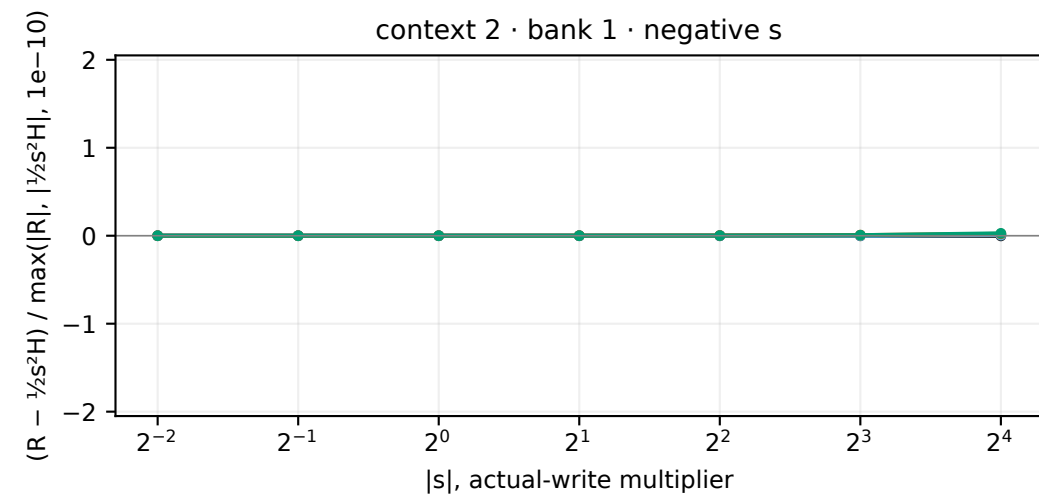

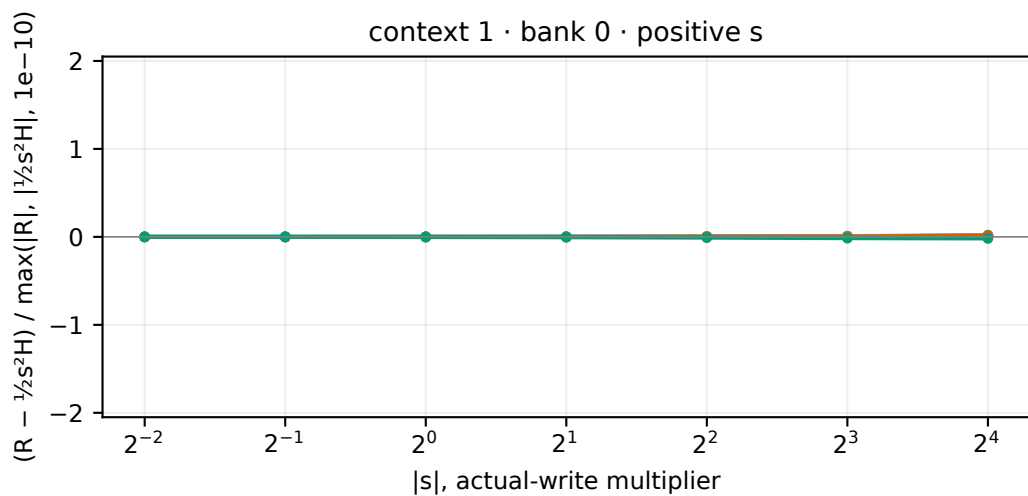

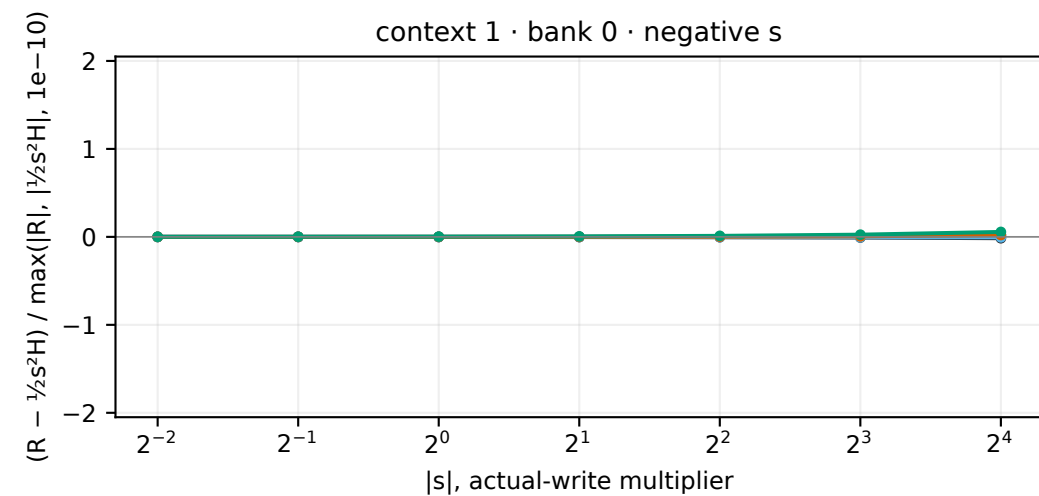

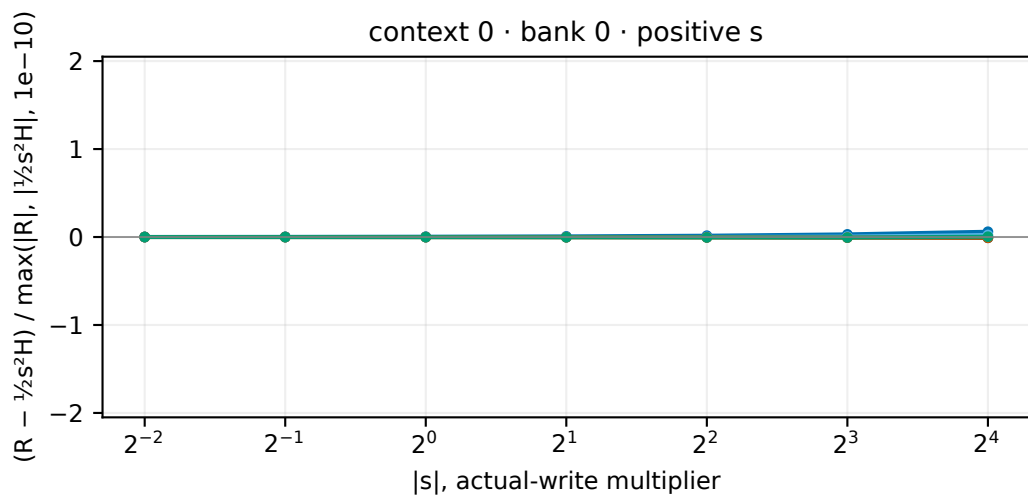

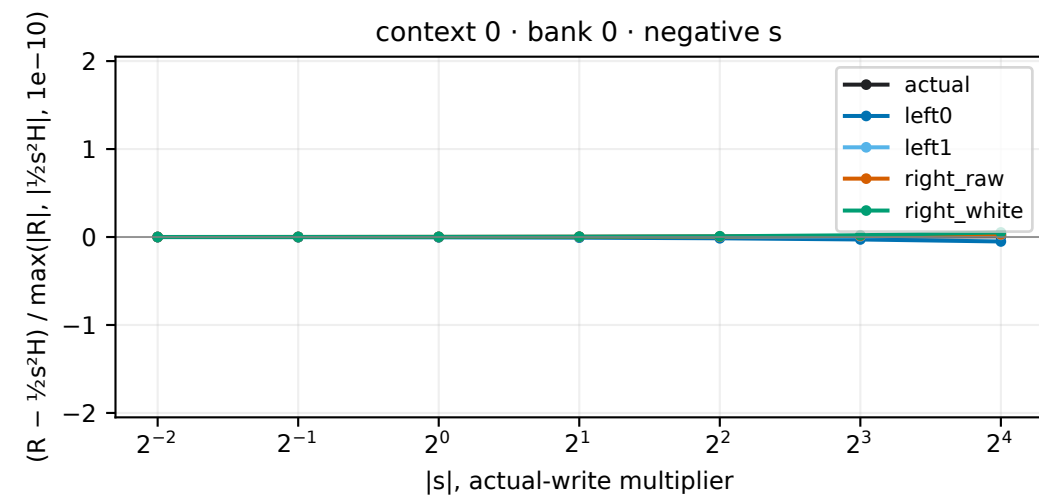

Muon · state 10 · block 8: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

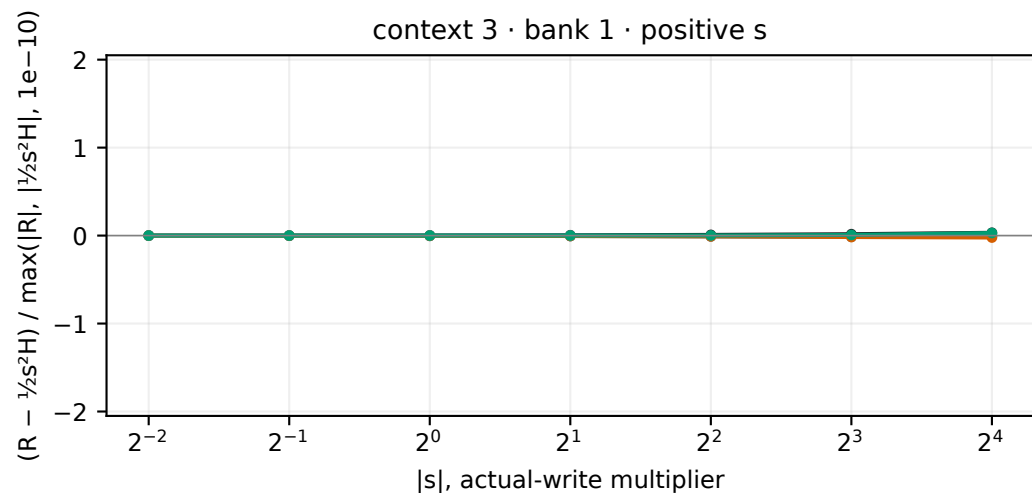

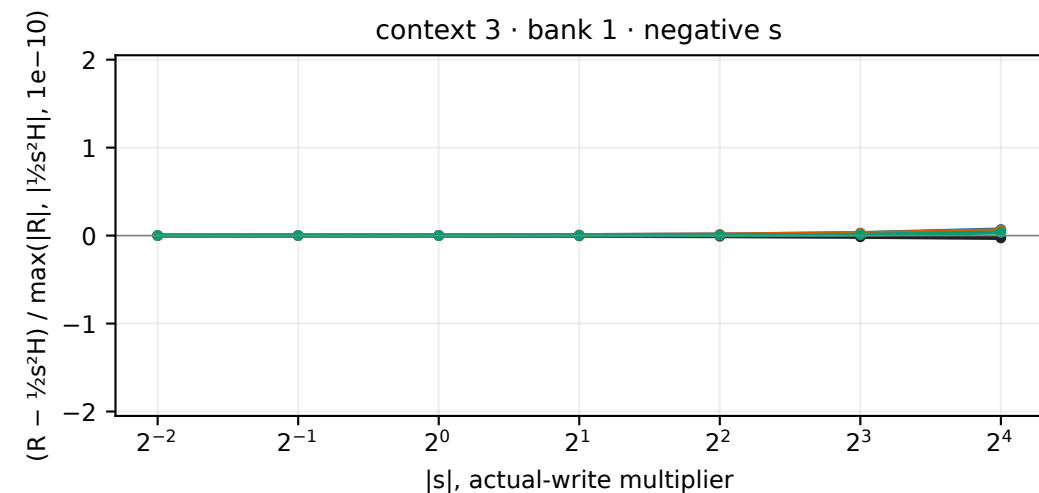

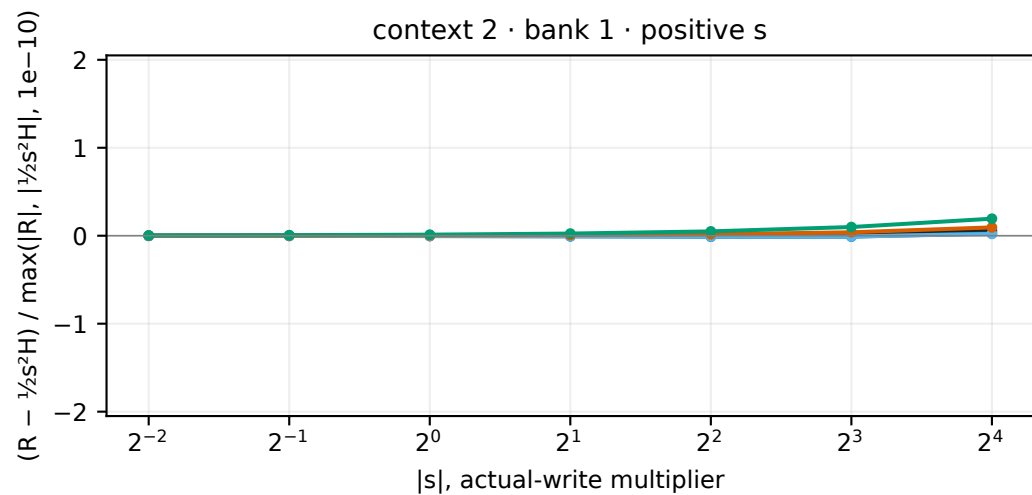

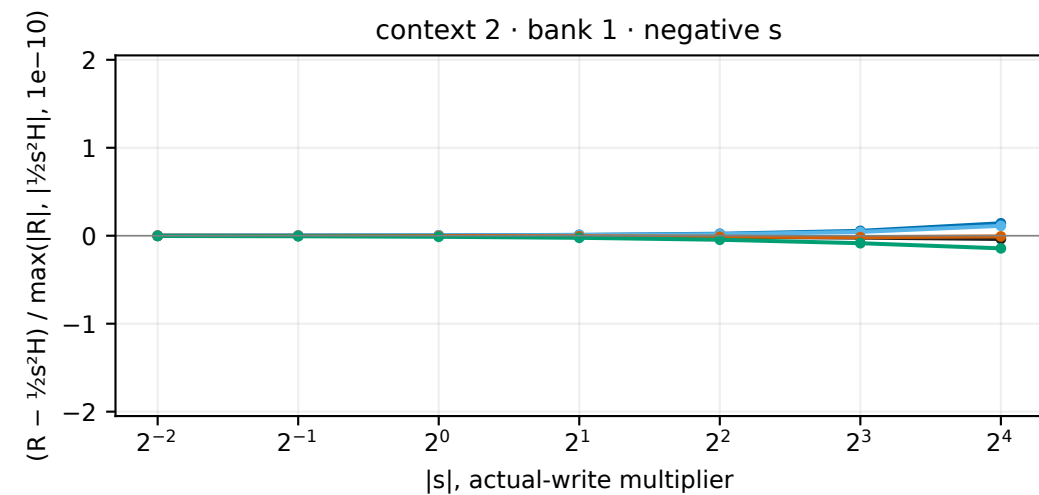

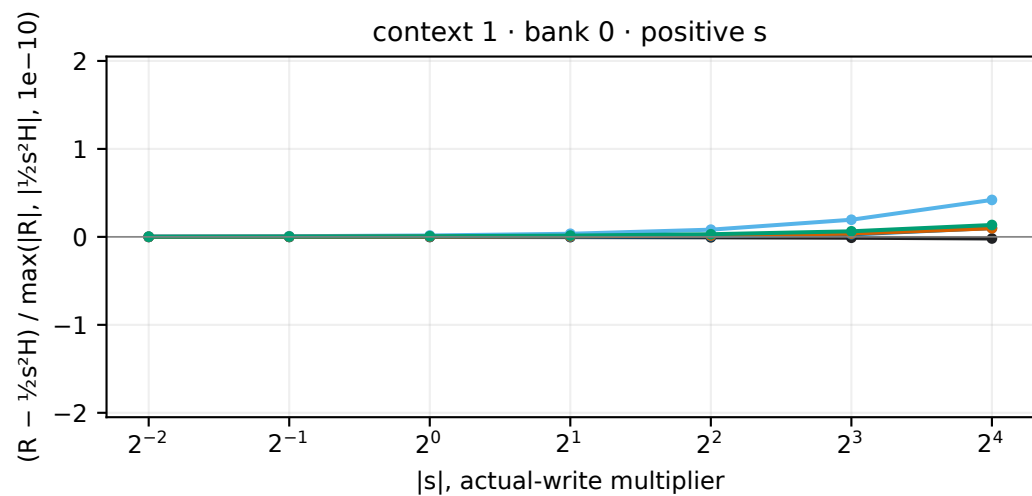

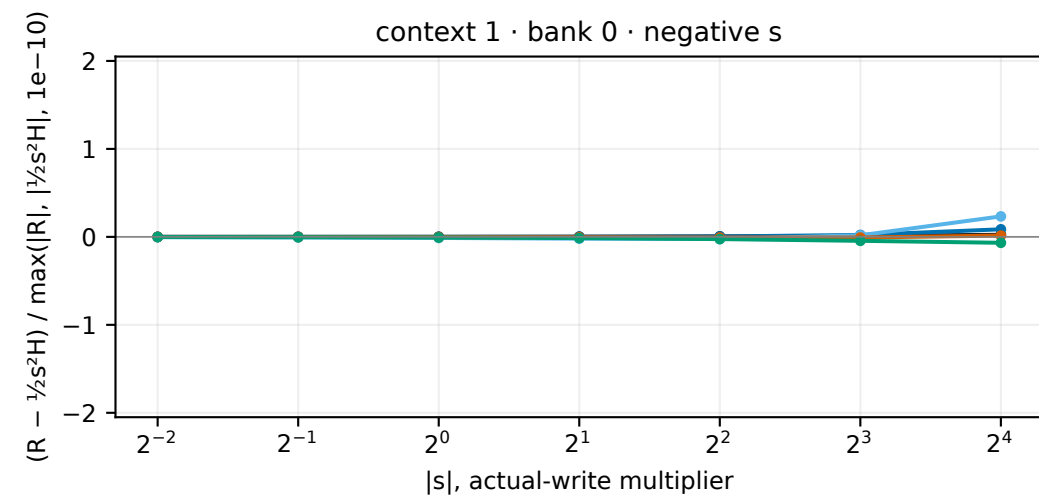

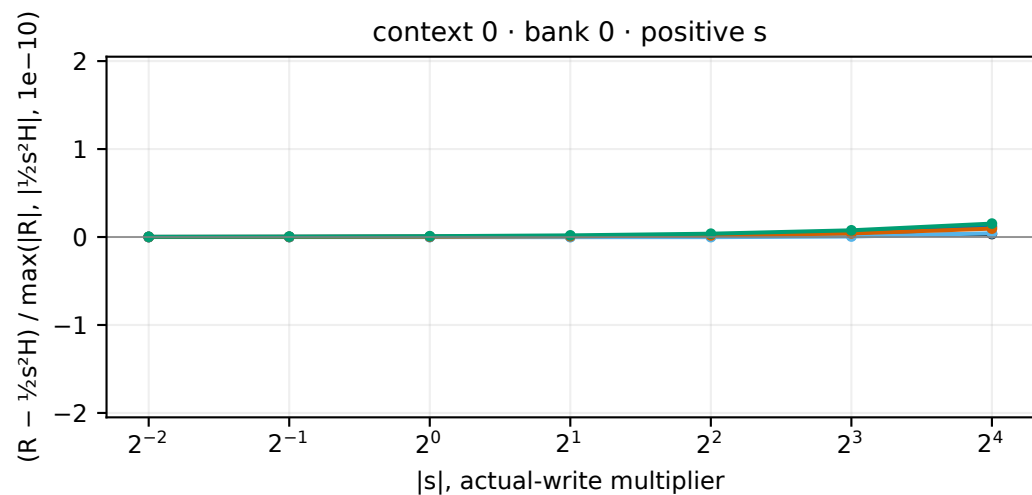

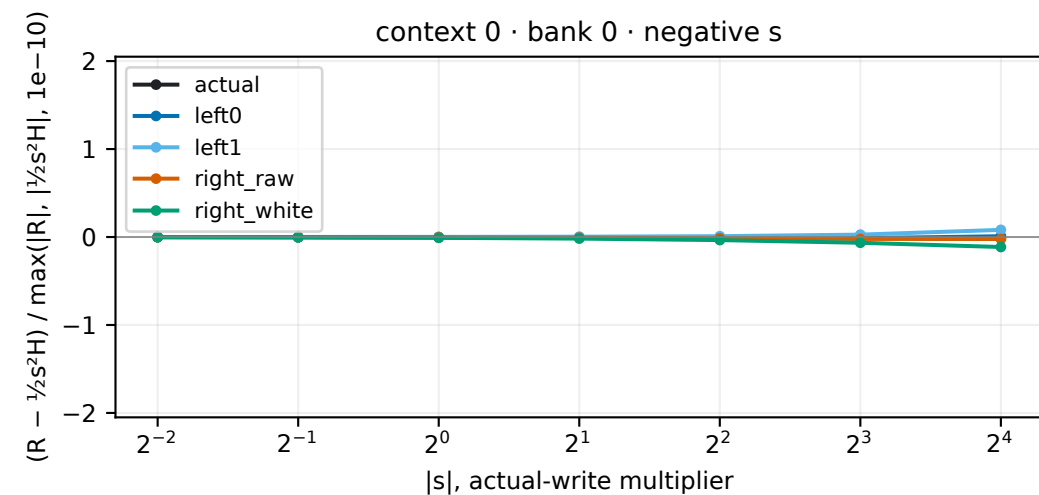

Muon · state 500 · block 1: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

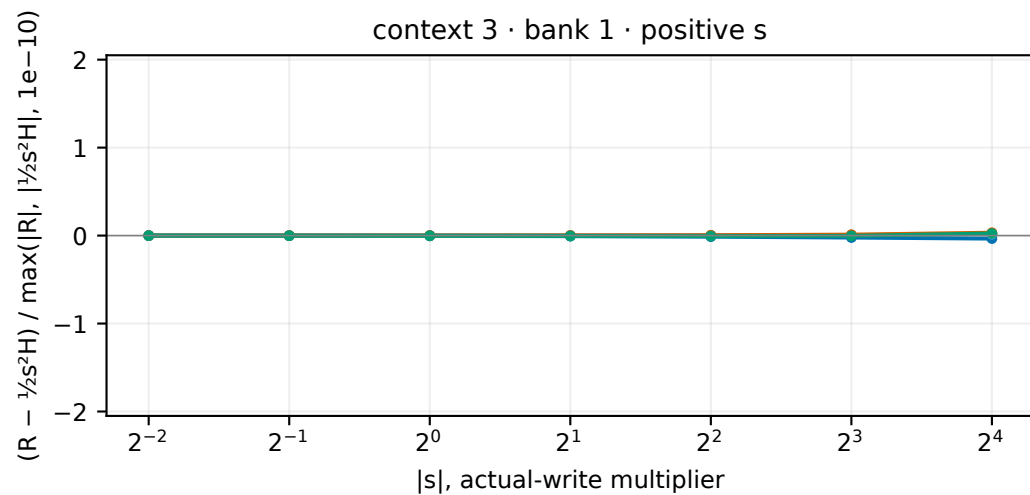

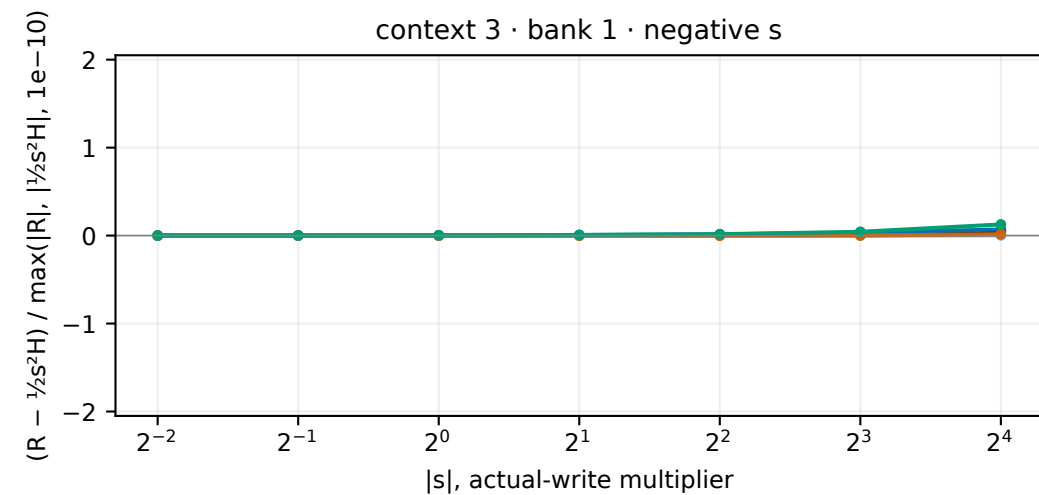

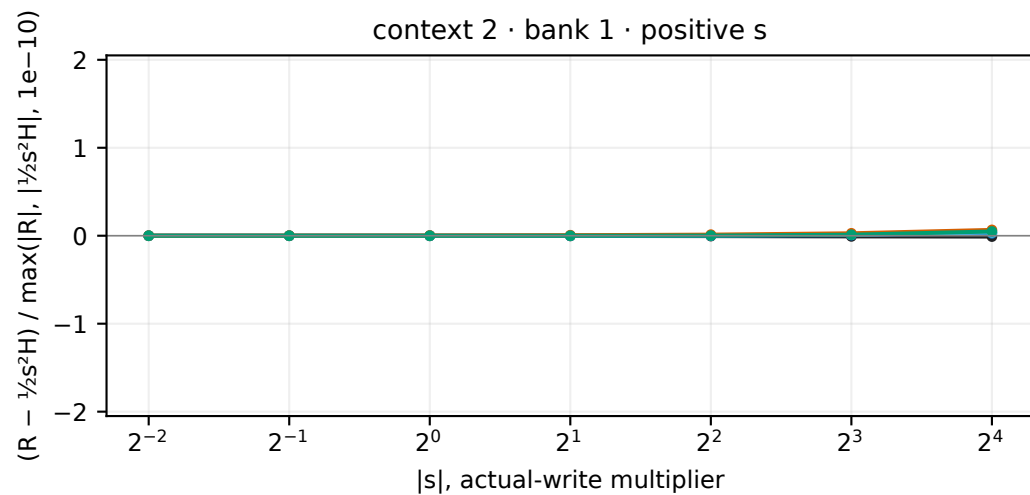

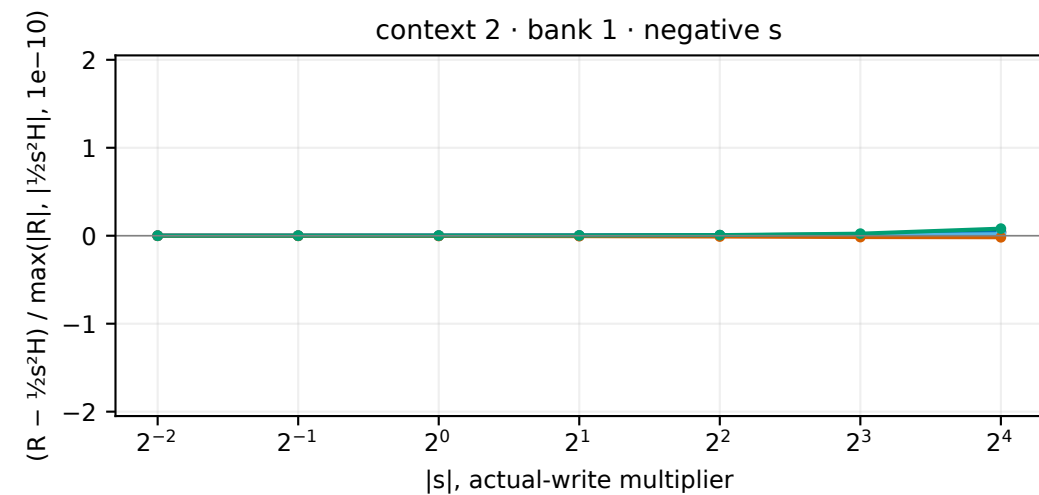

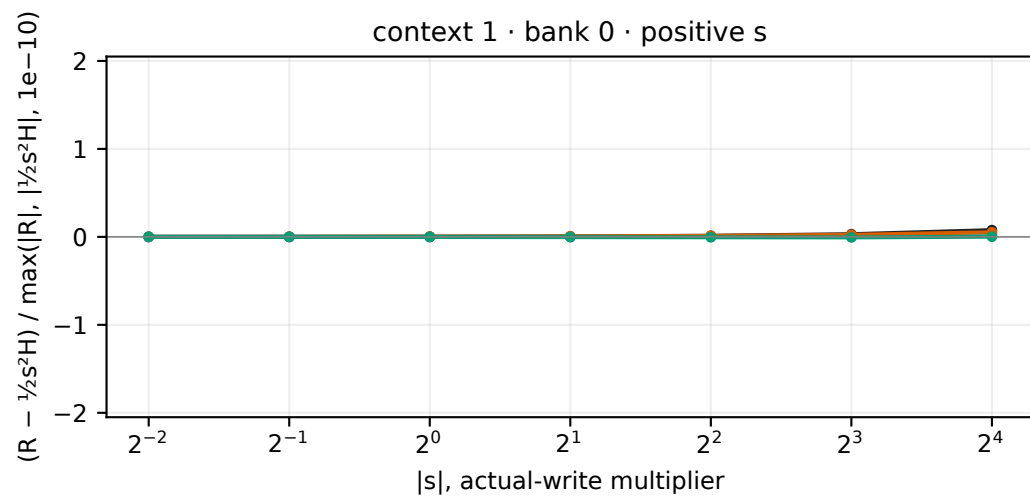

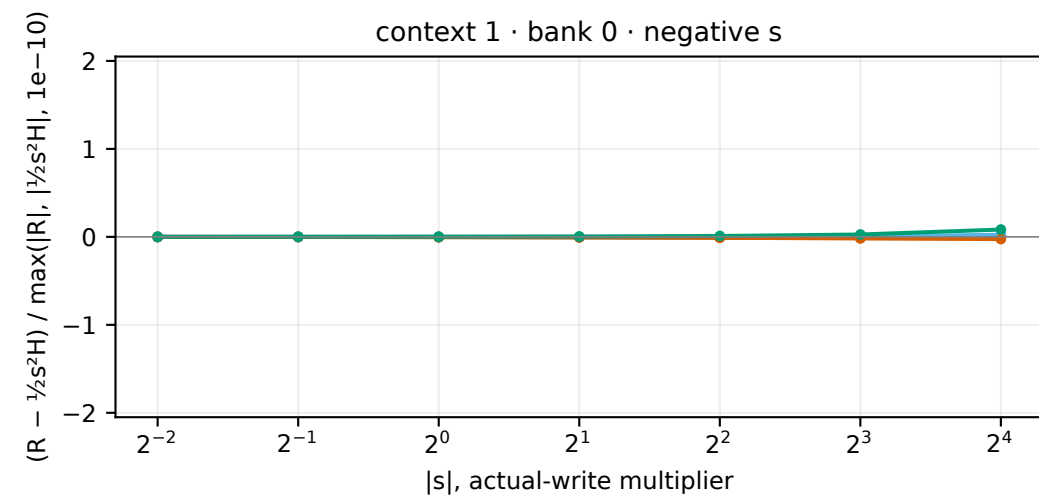

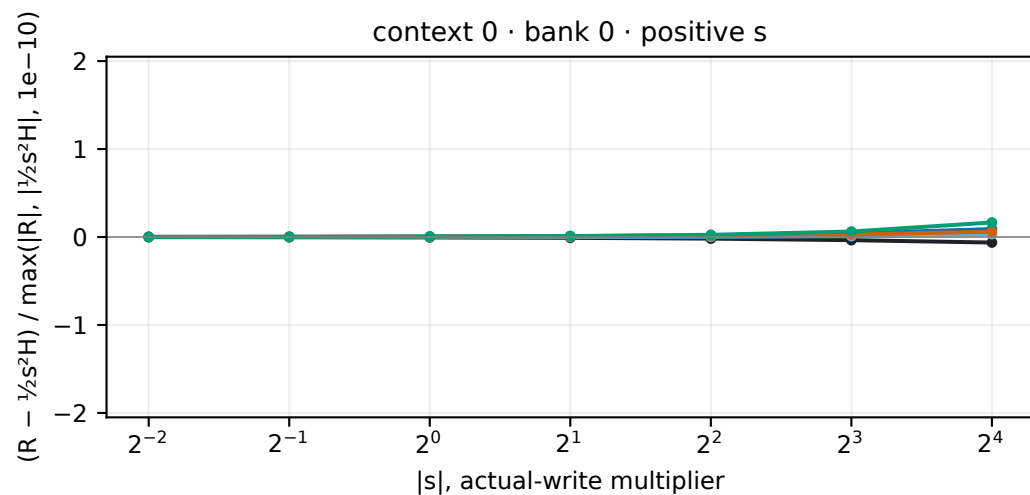

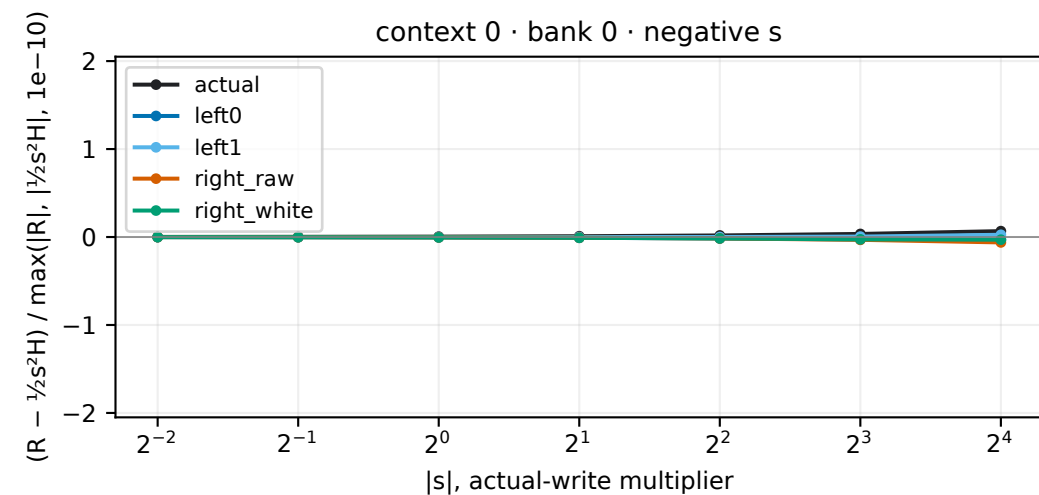

Muon · state 500 · block 4: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

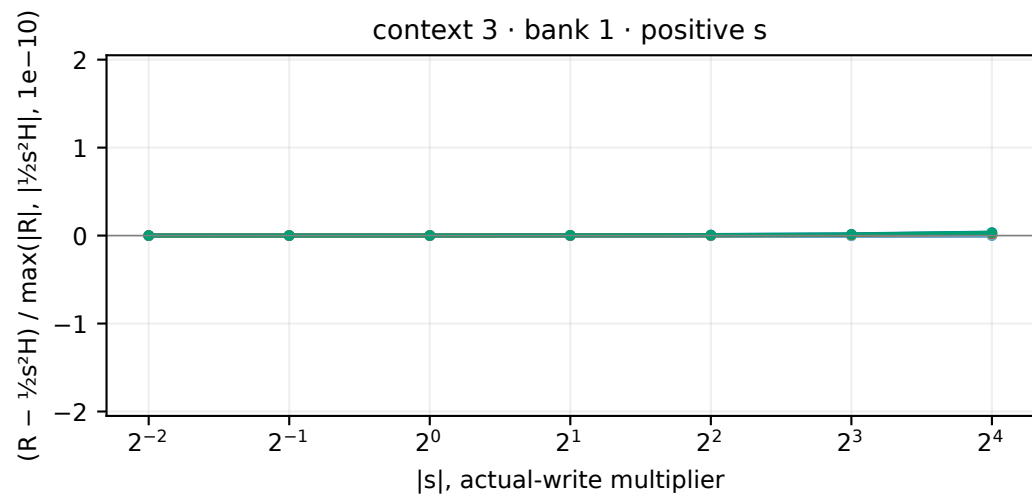

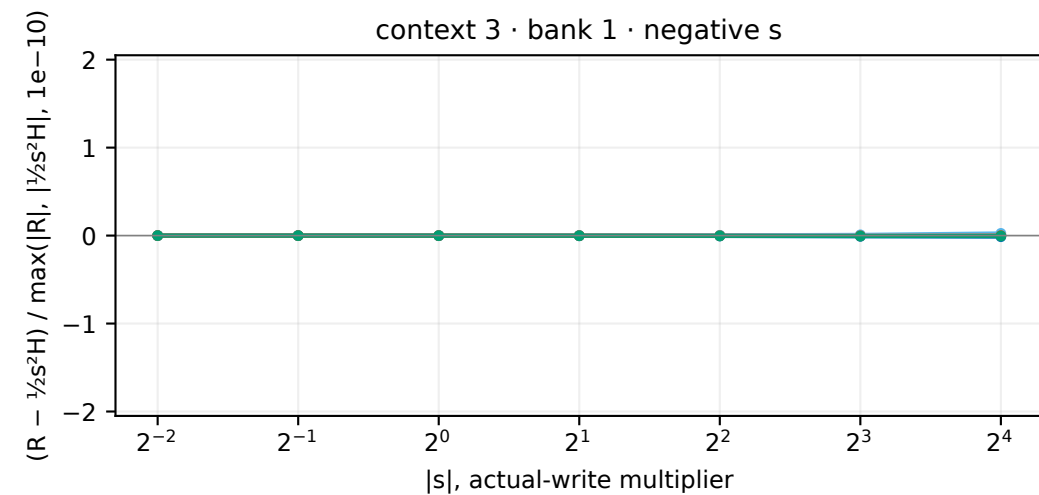

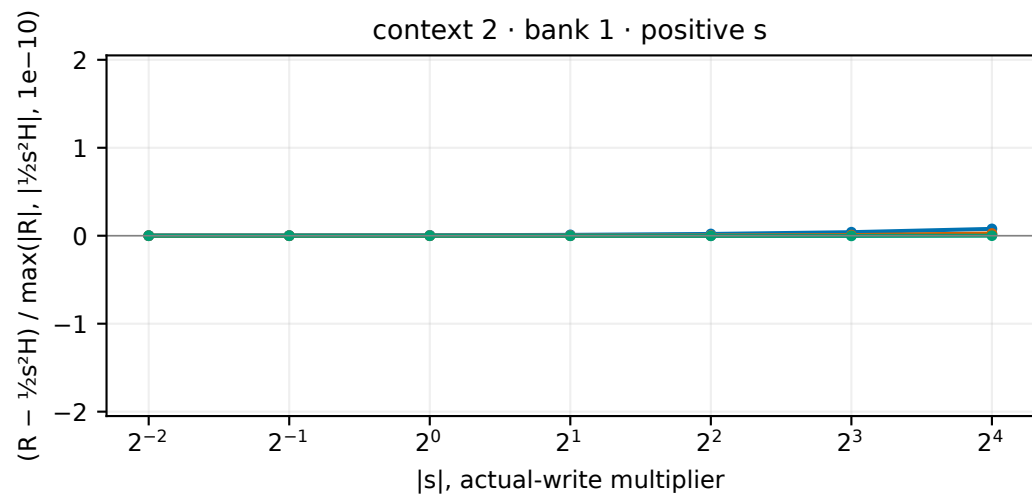

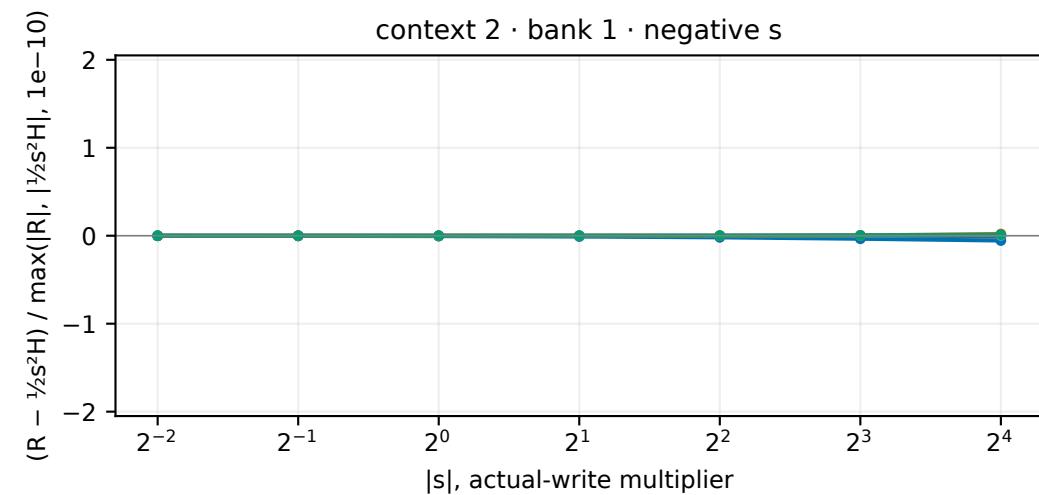

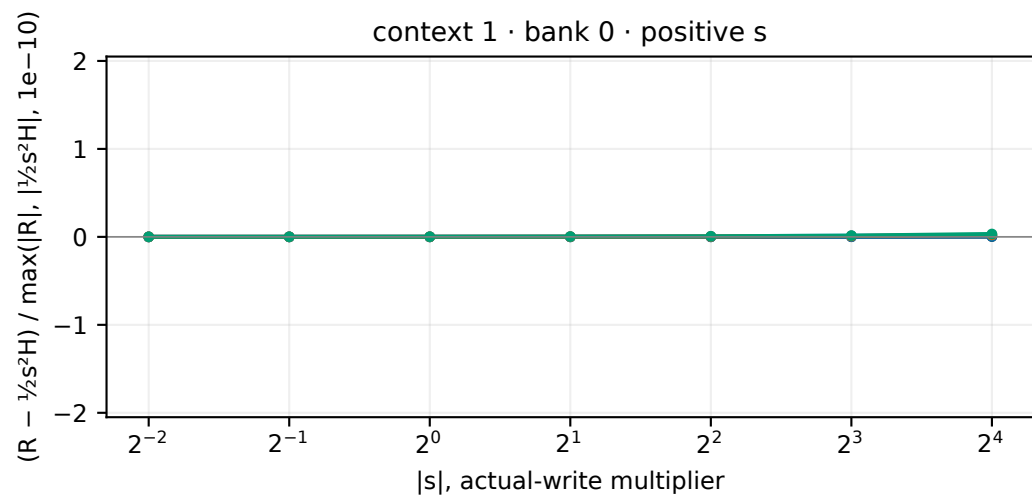

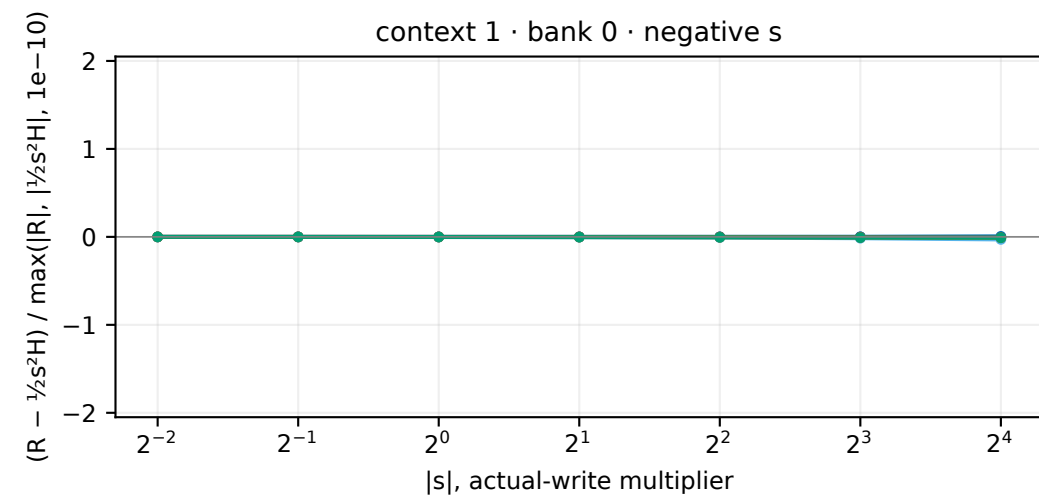

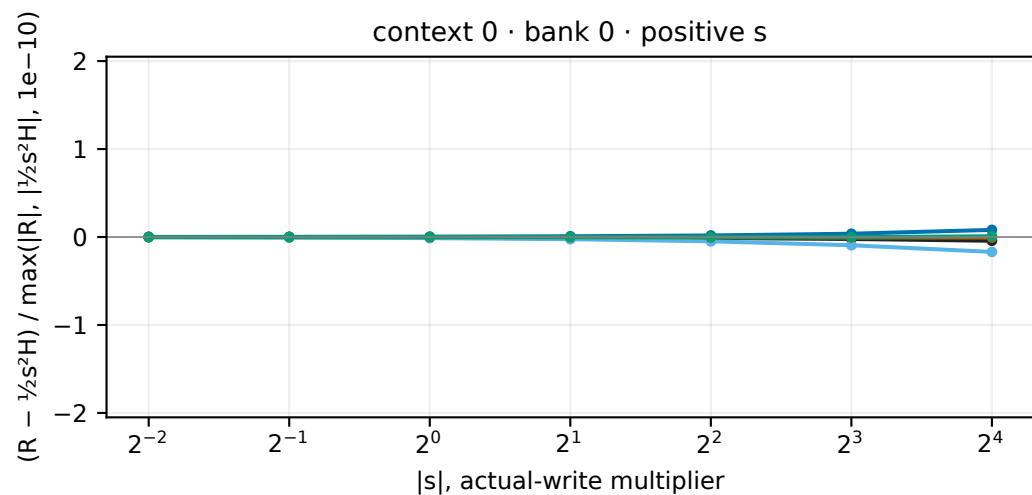

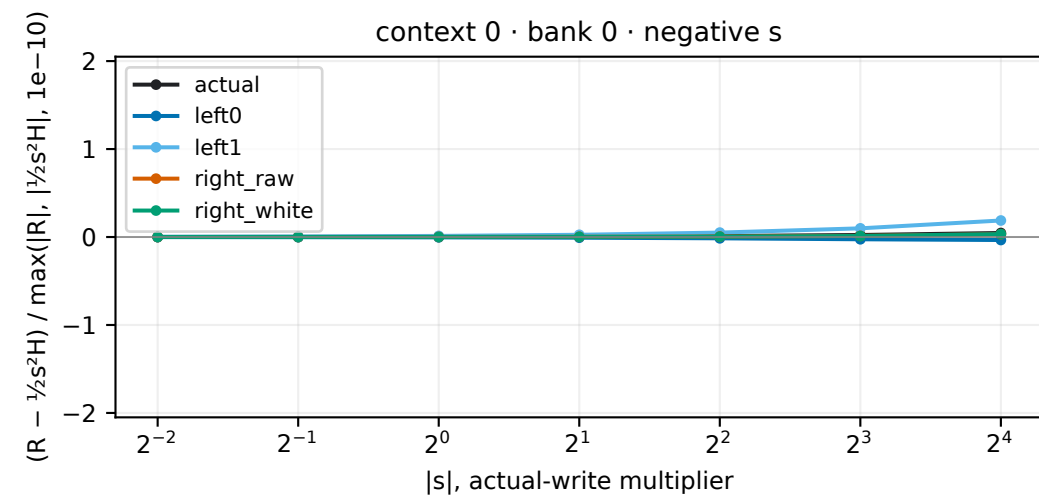

Muon · state 500 · block 8: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

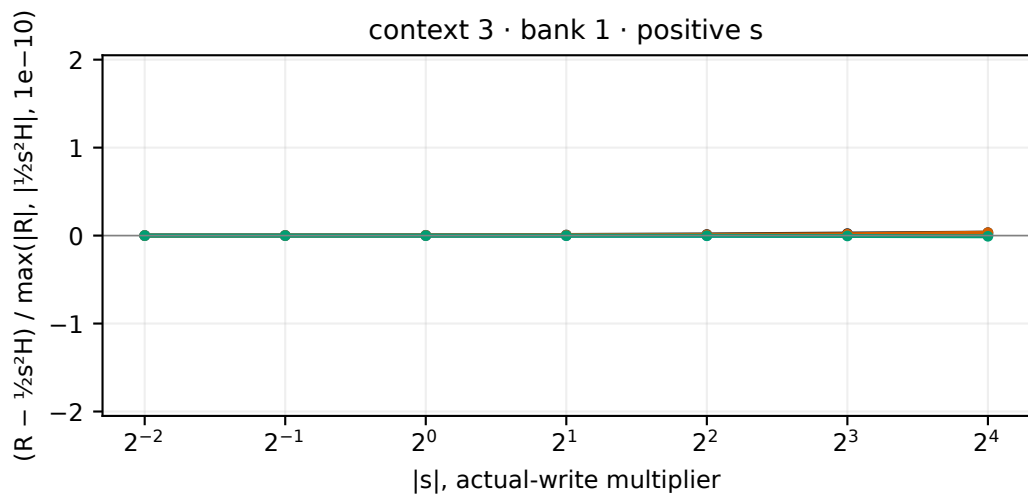

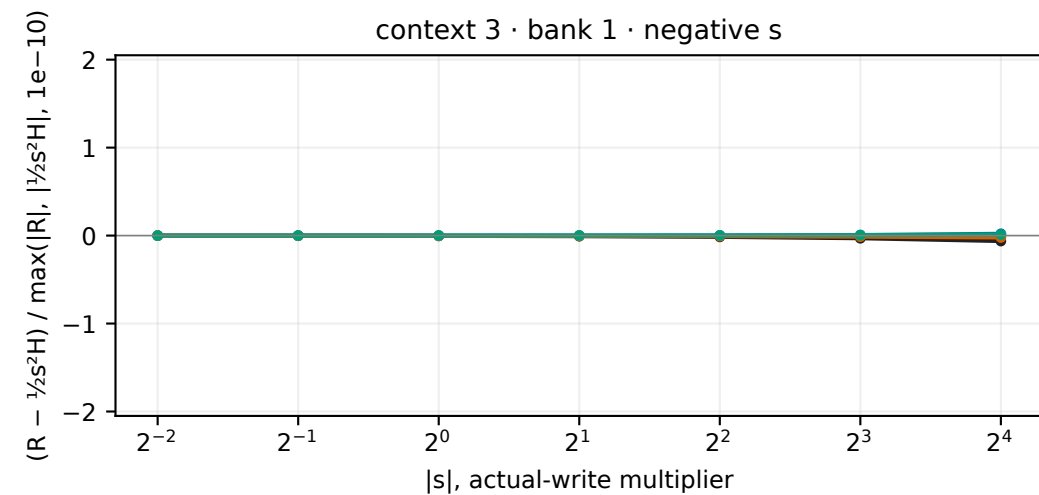

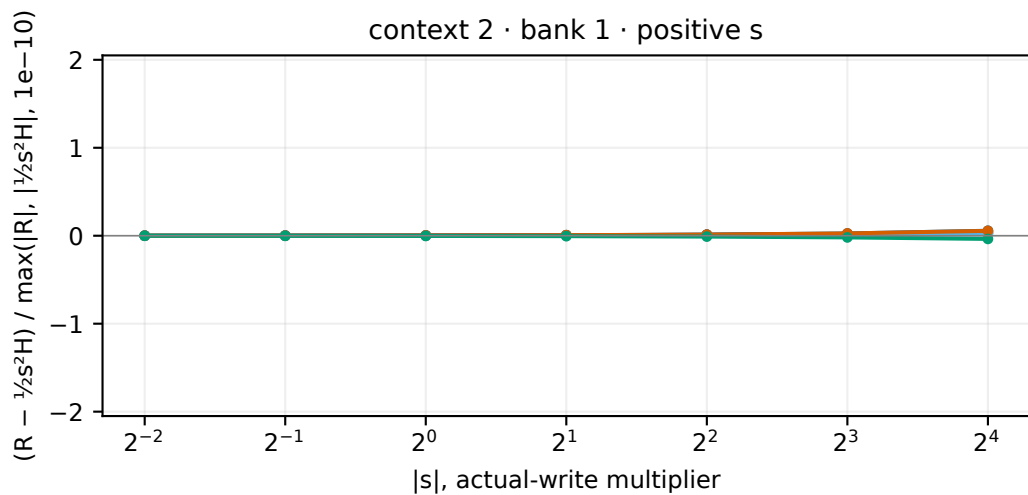

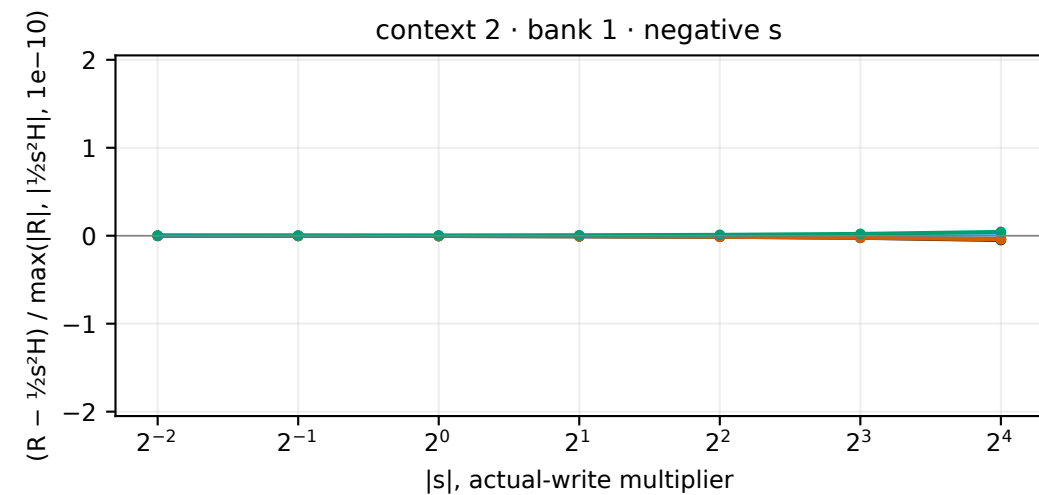

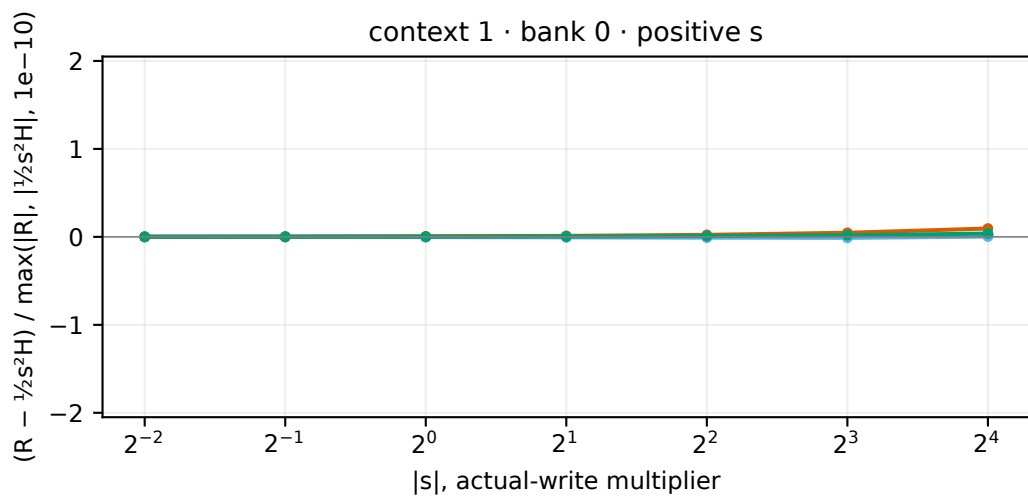

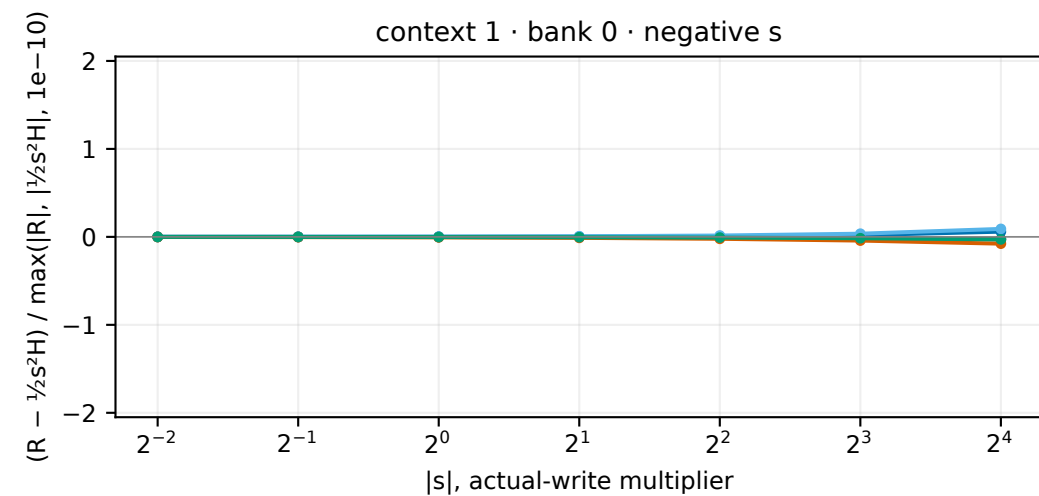

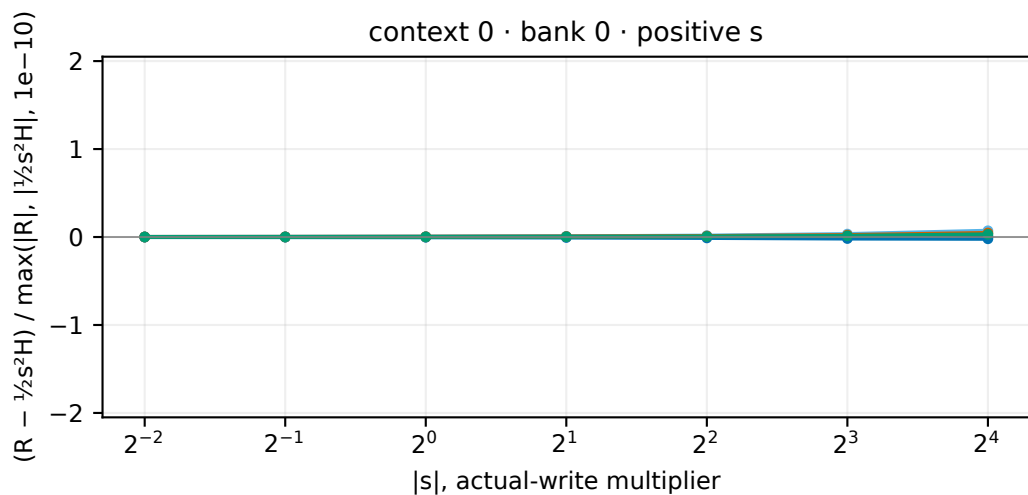

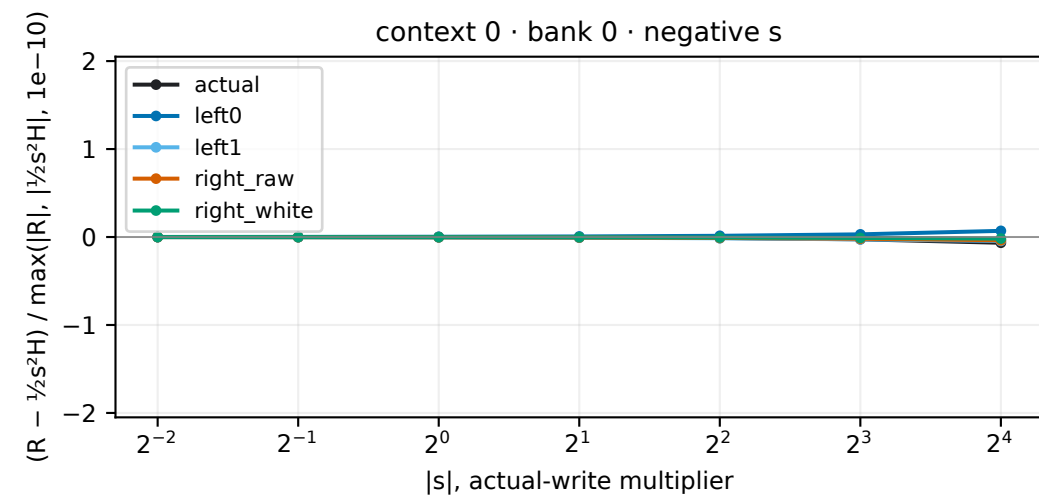

Muon · state 1300 · block 1: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

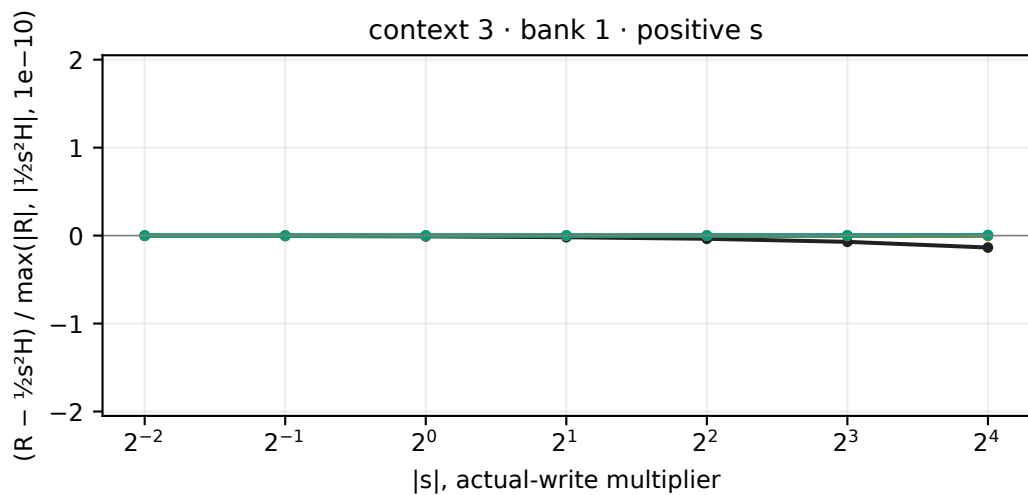

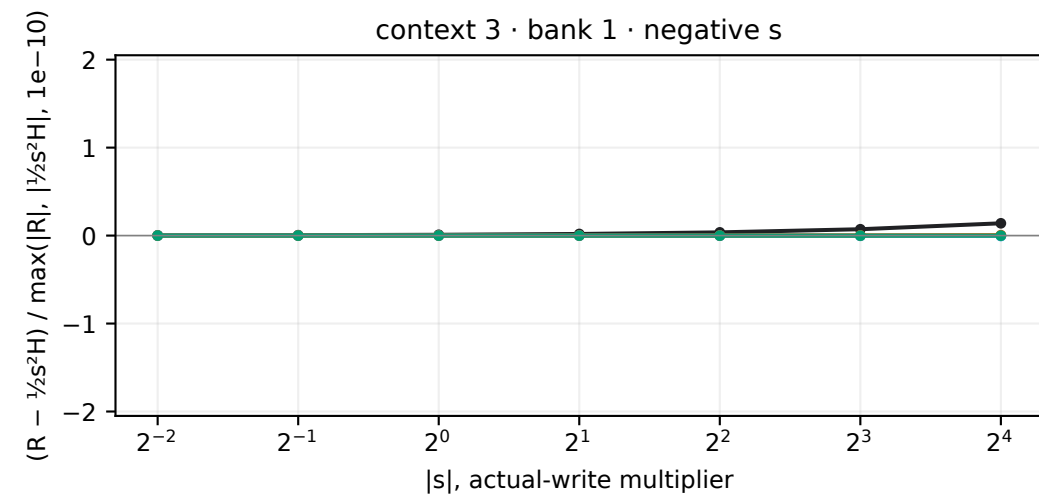

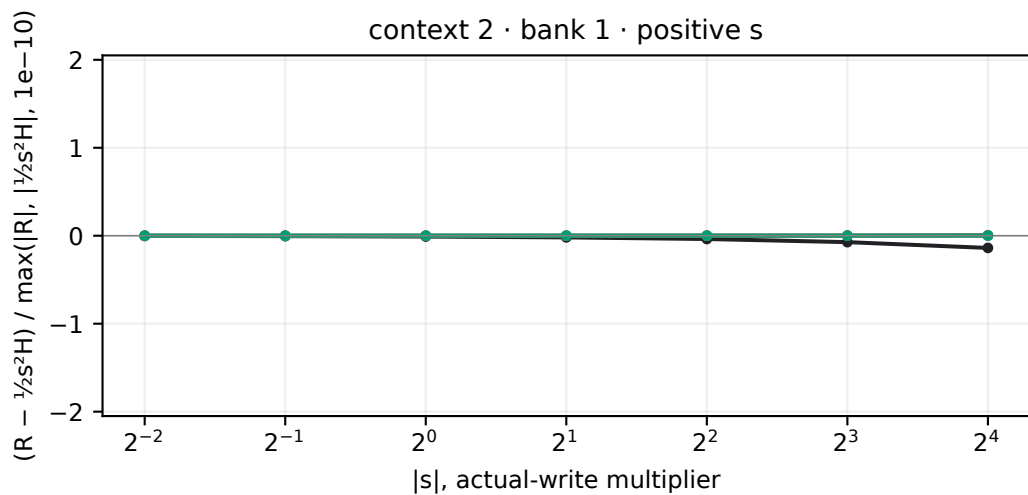

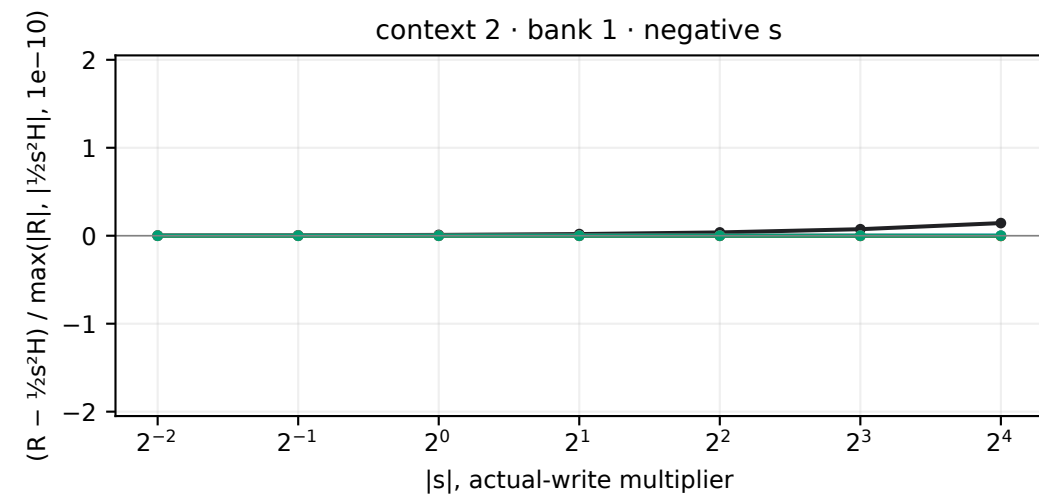

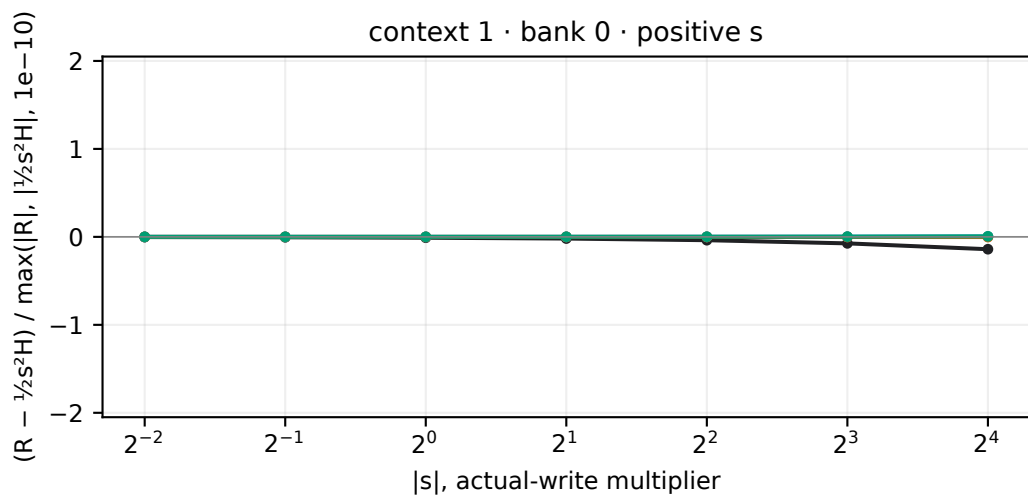

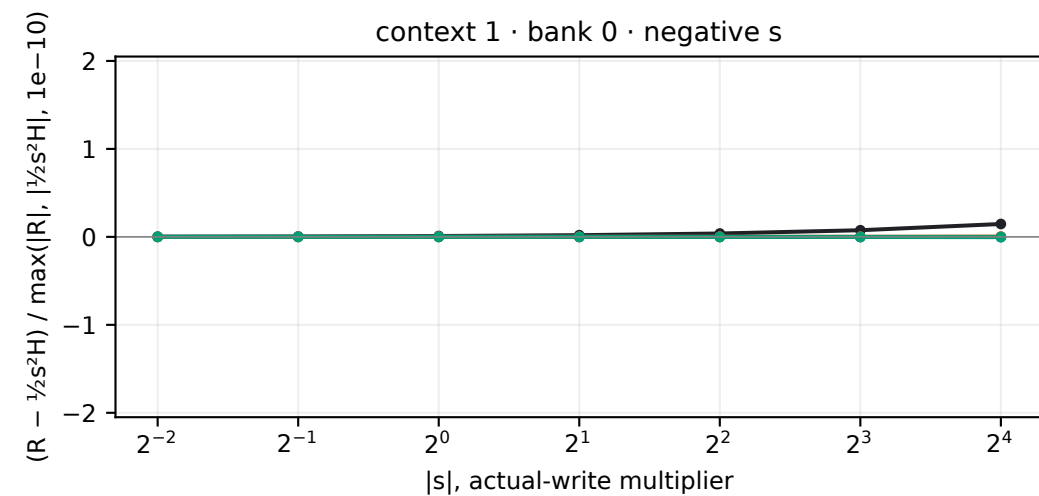

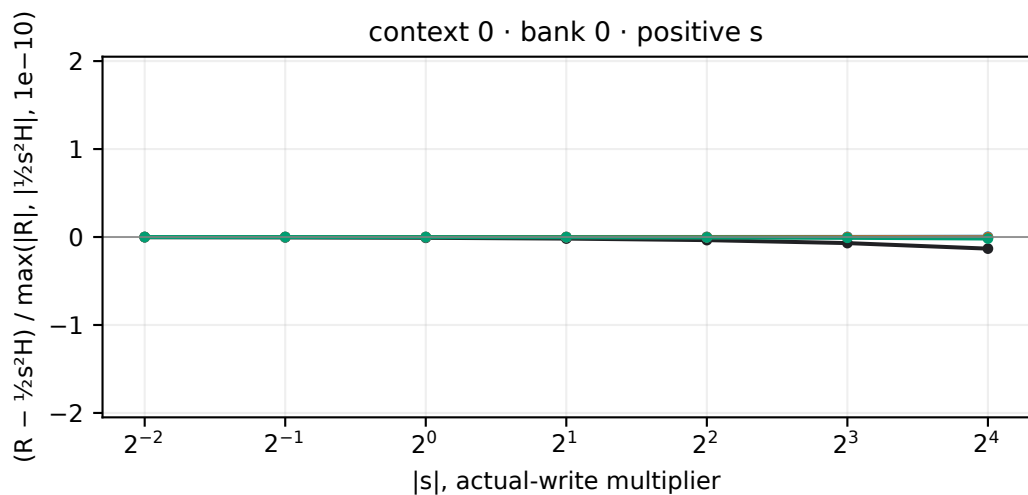

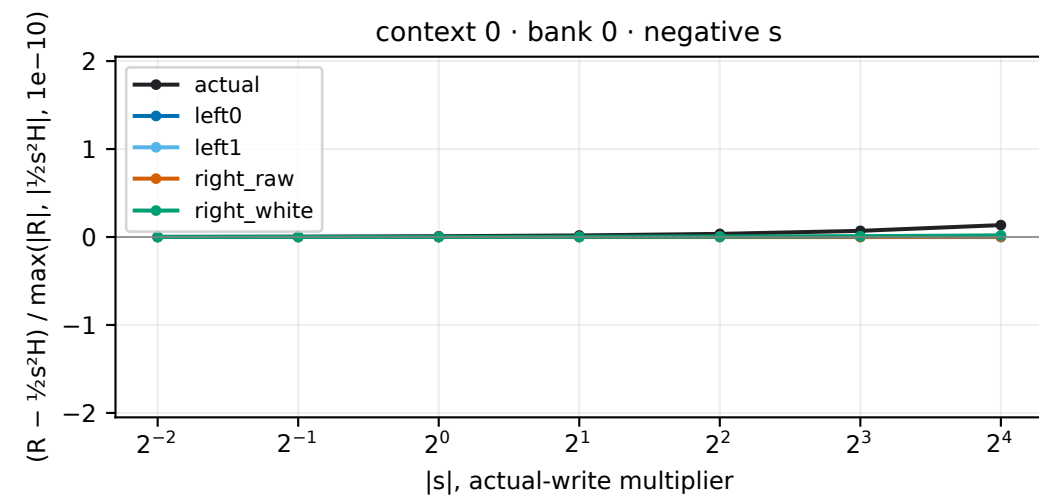

Muon · state 1300 · block 4: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

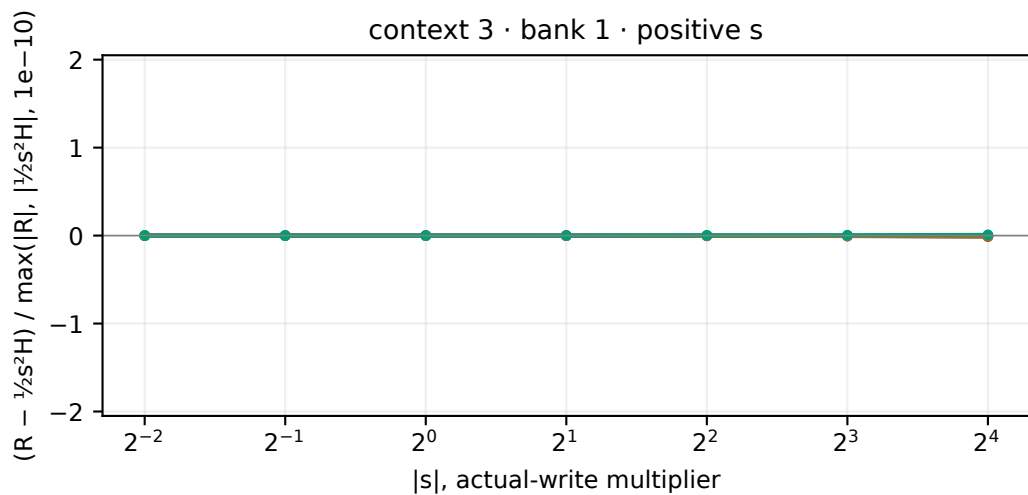

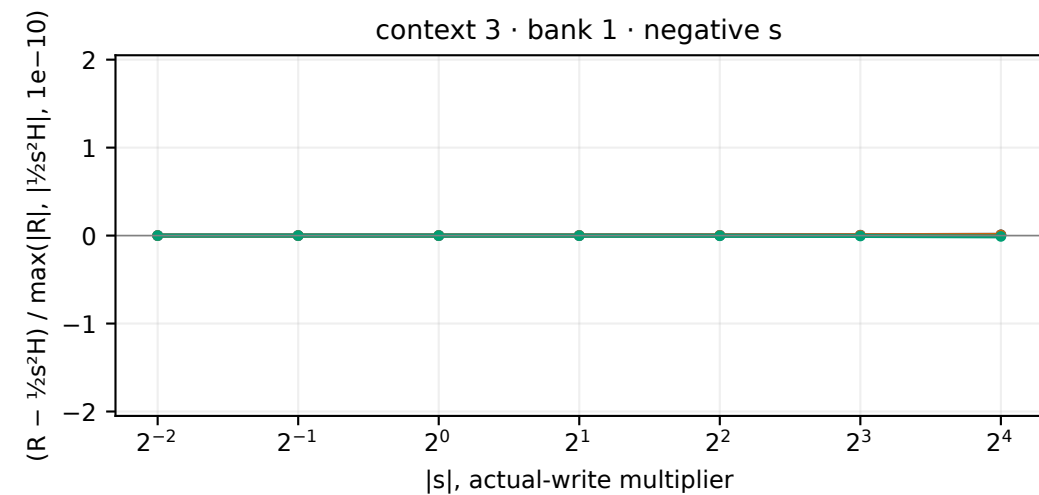

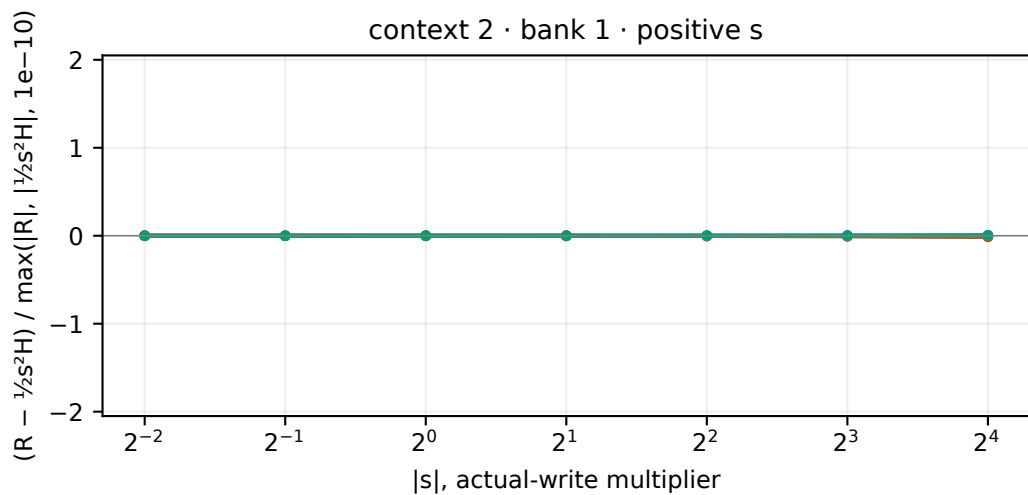

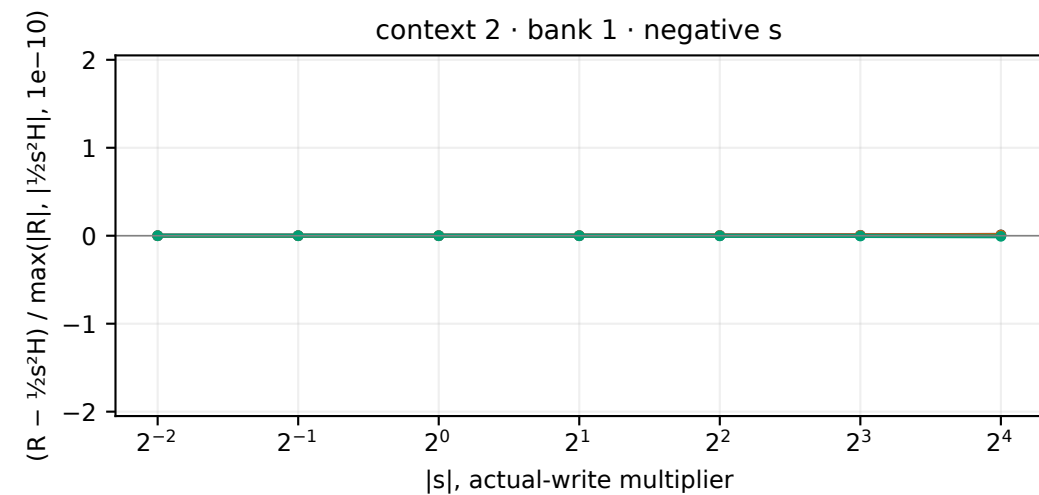

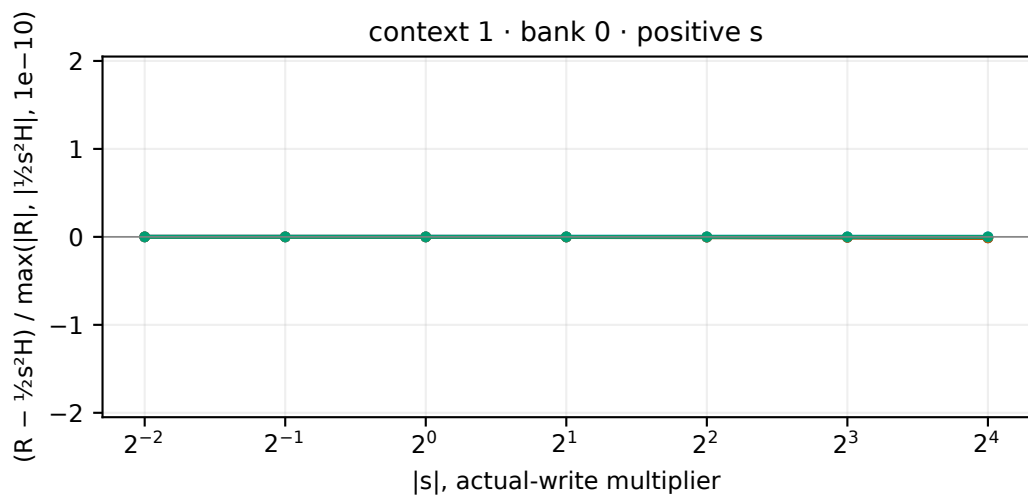

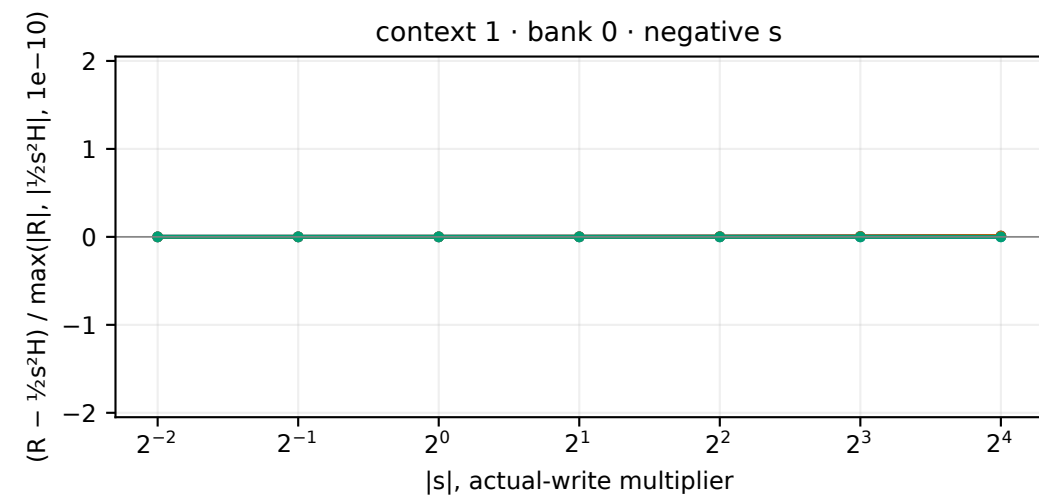

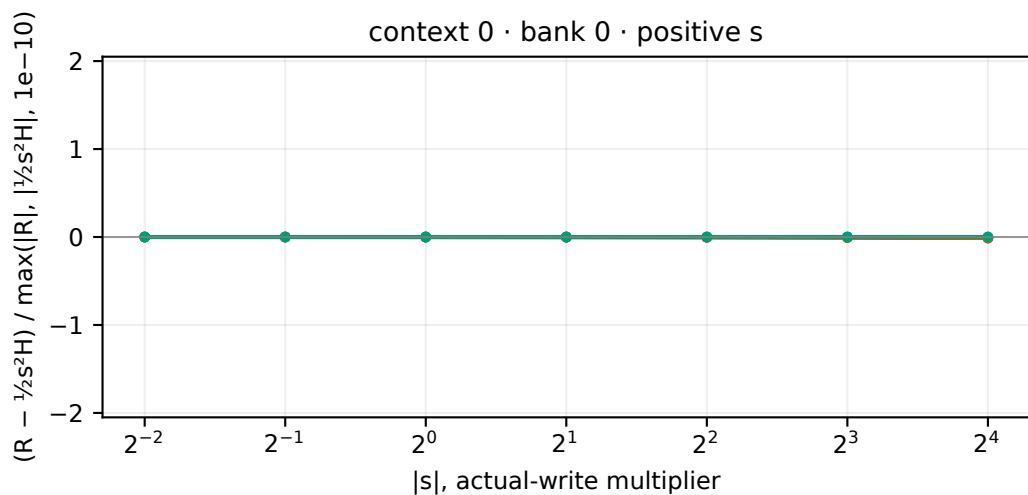

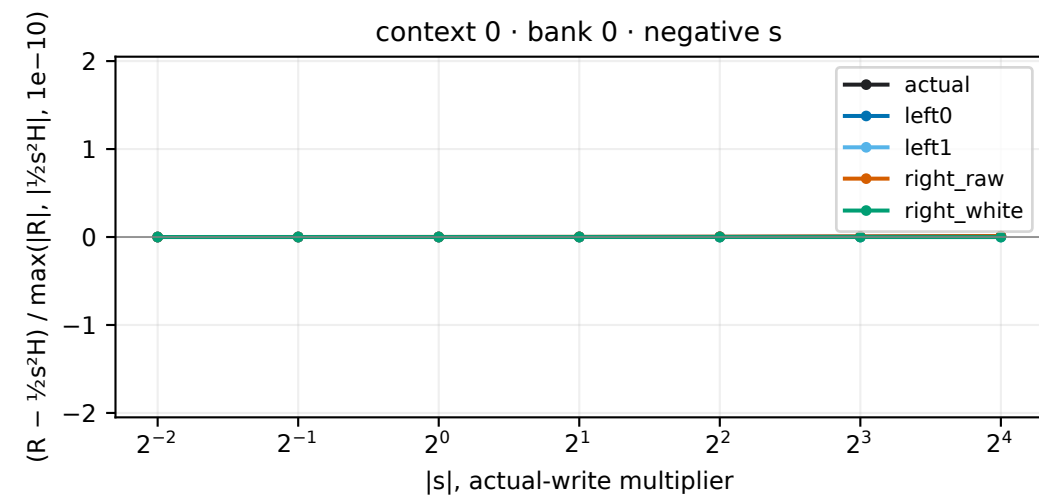

Muon · state 1300 · block 8: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

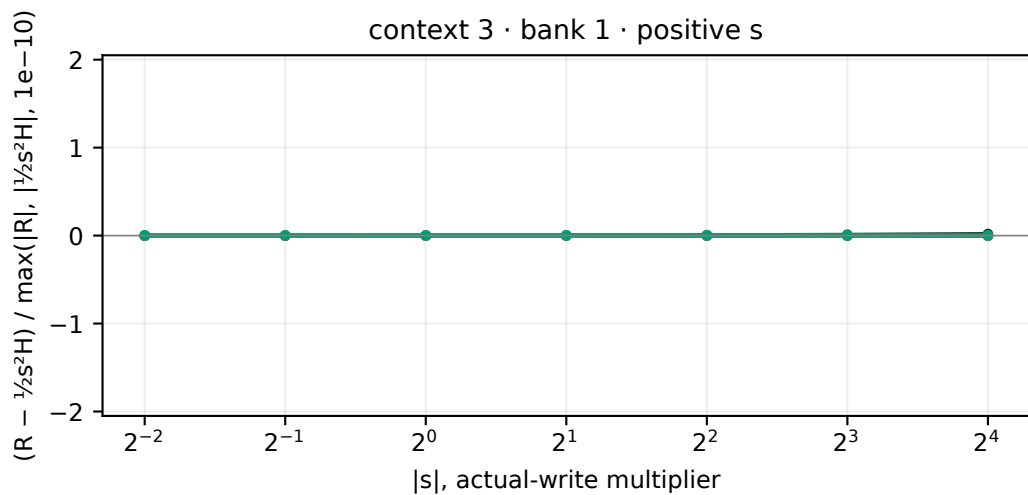

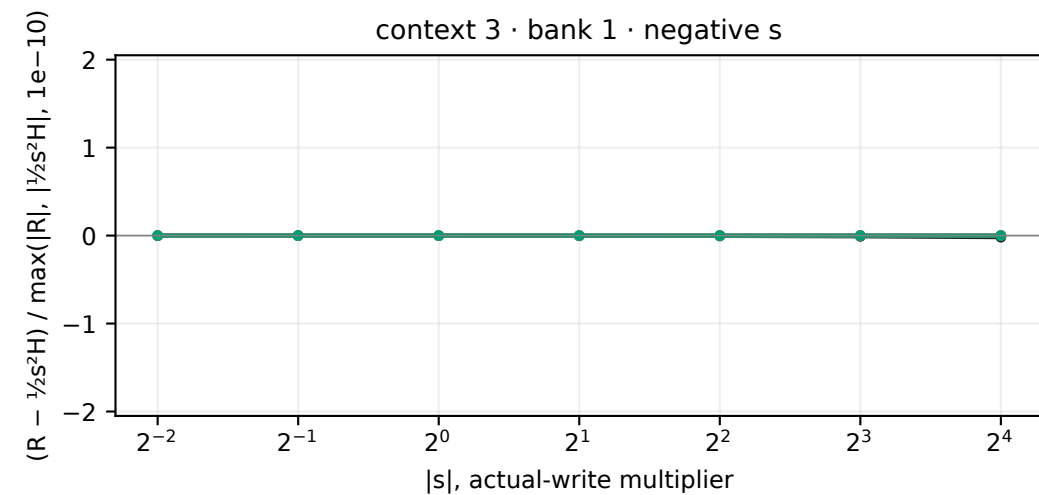

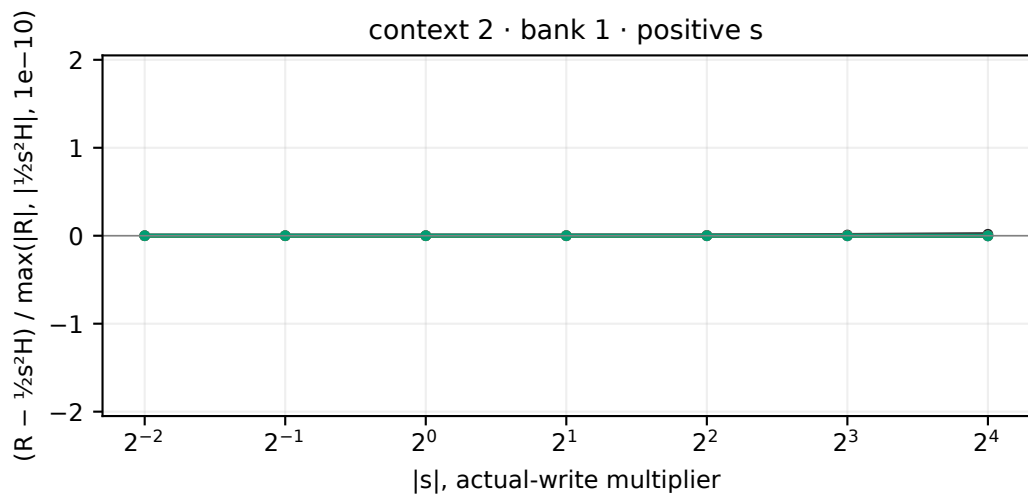

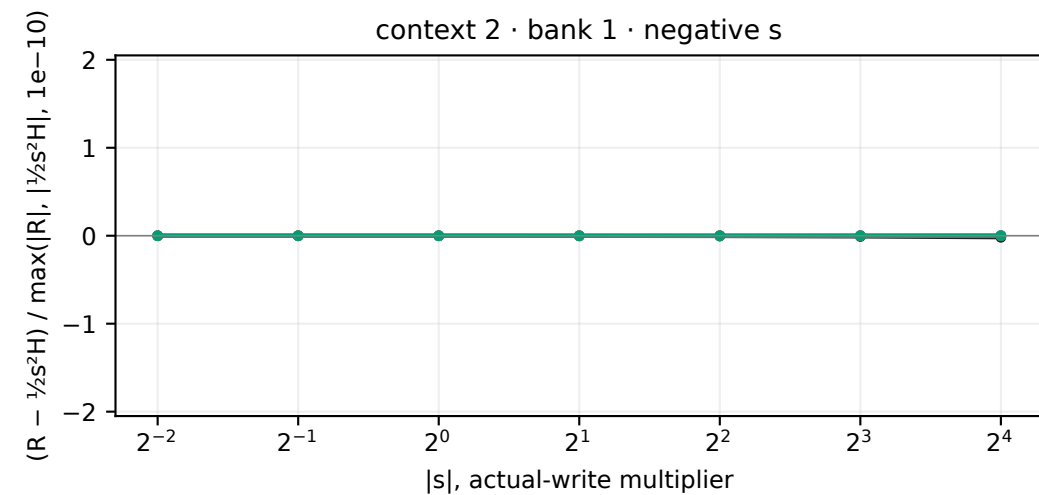

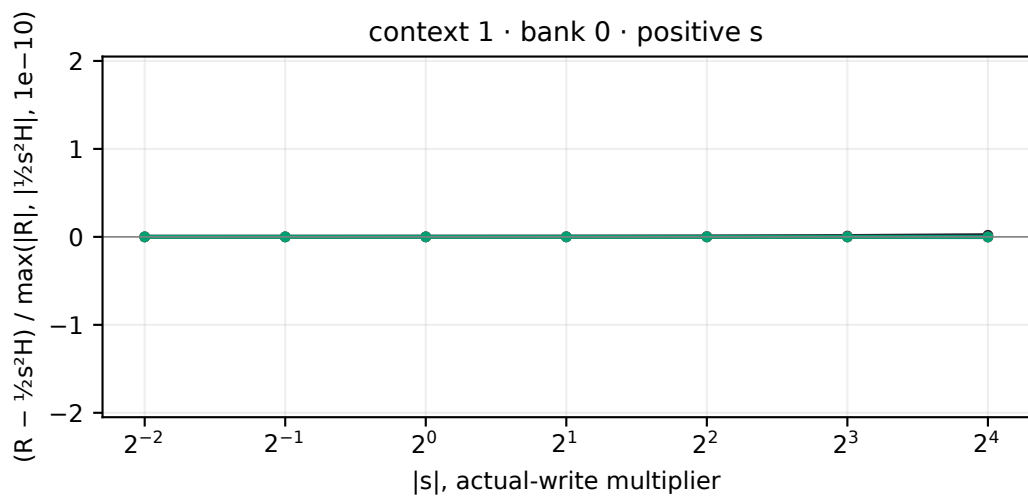

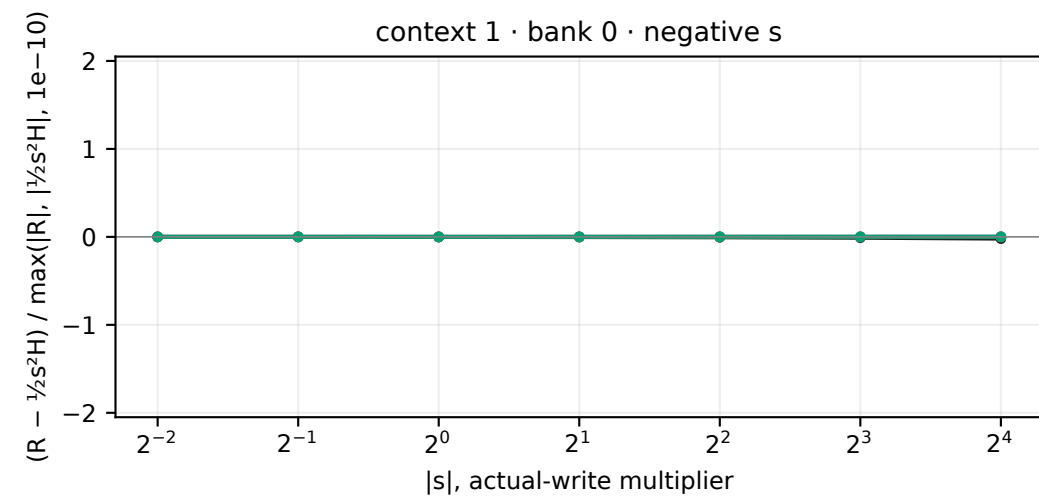

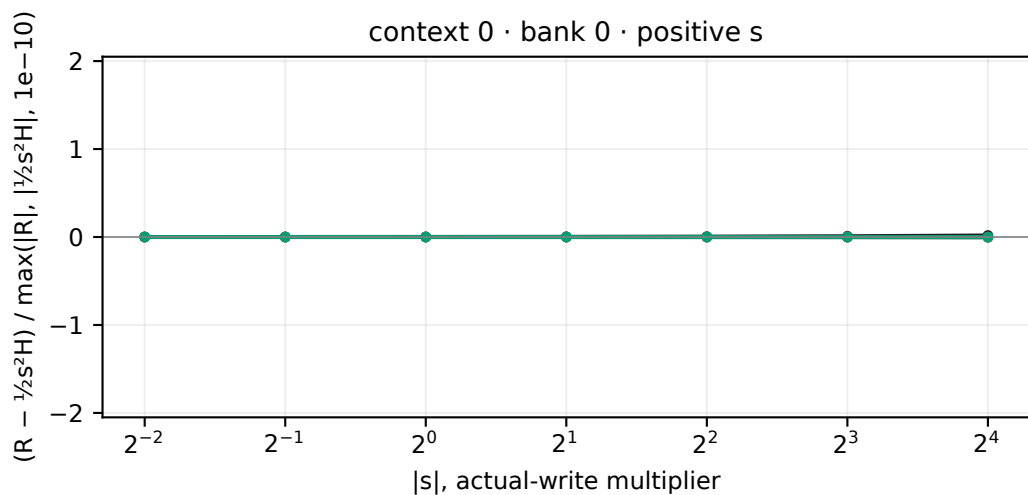

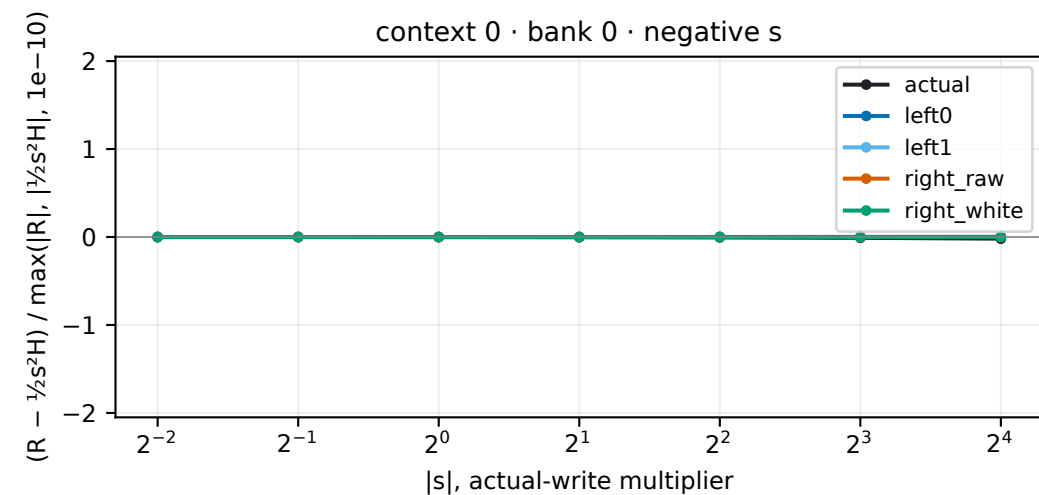

PD · state 10 · block 1: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

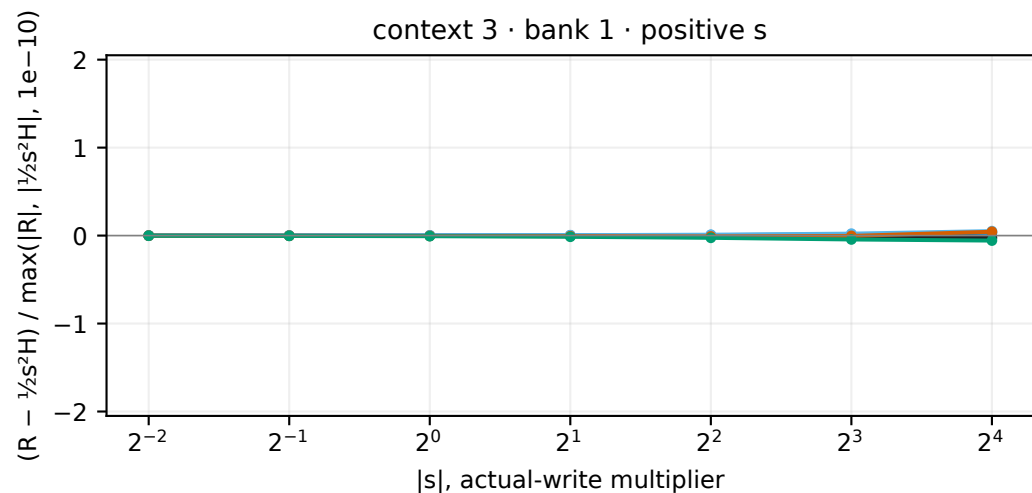

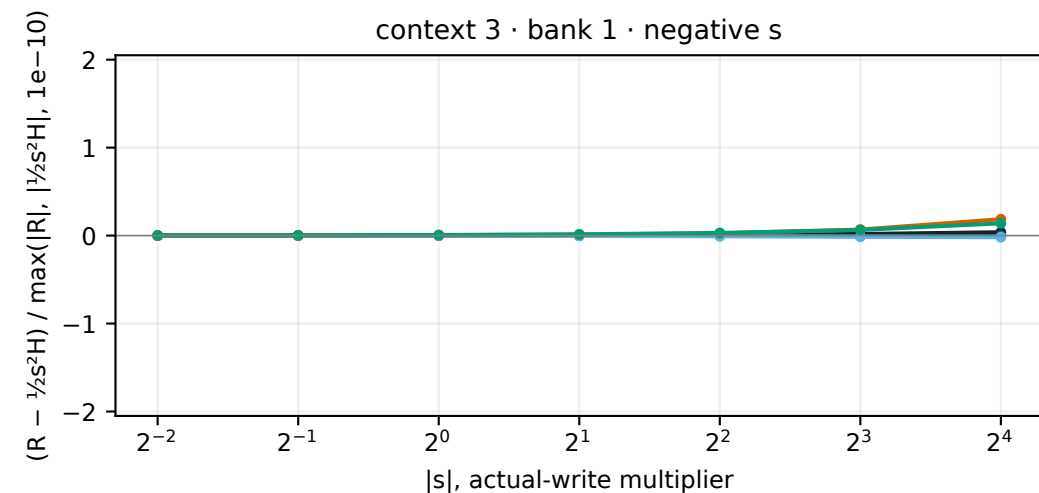

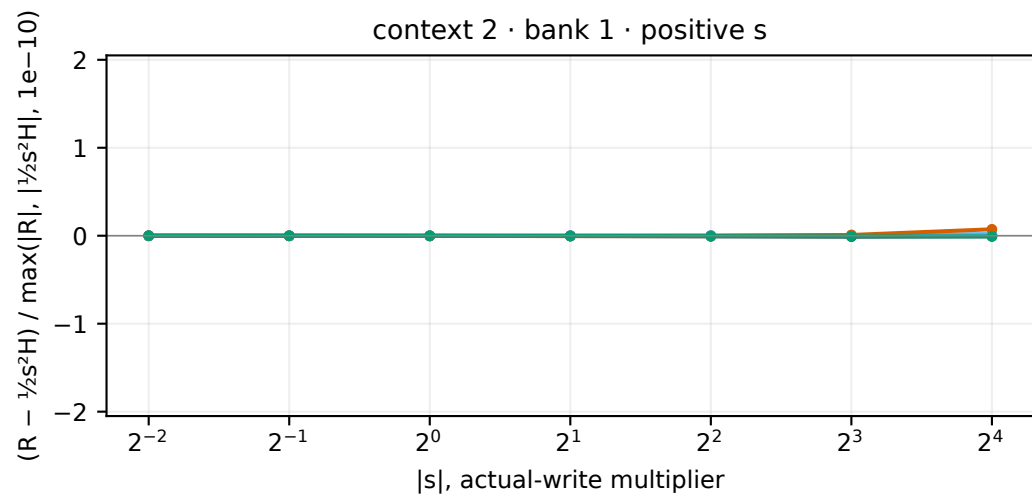

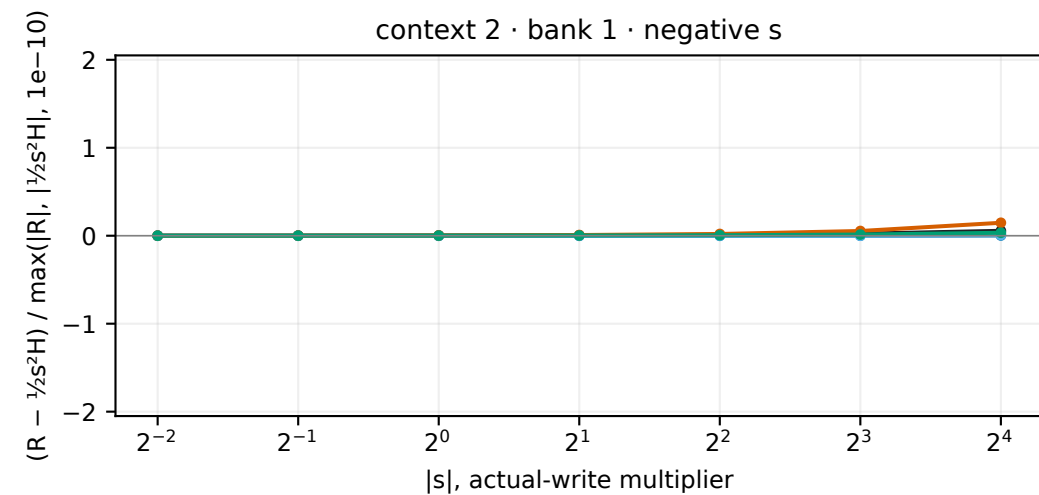

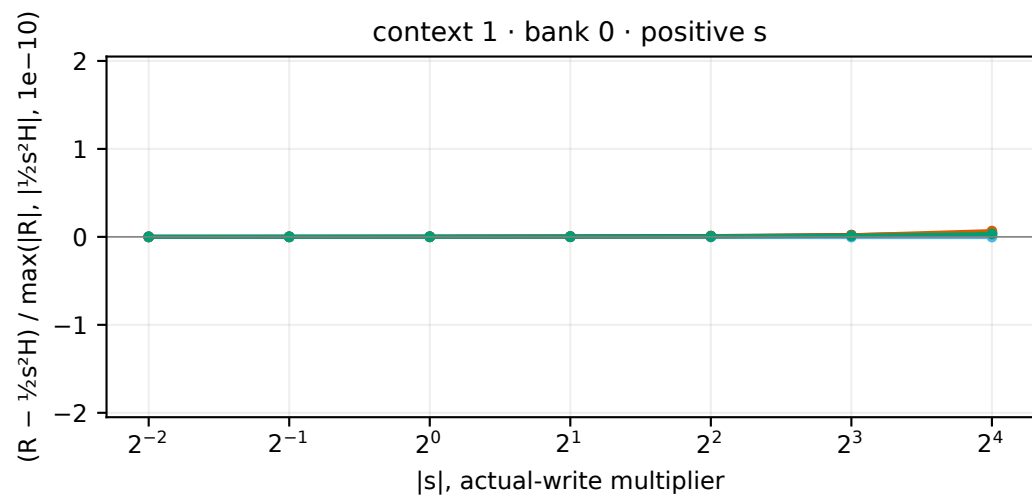

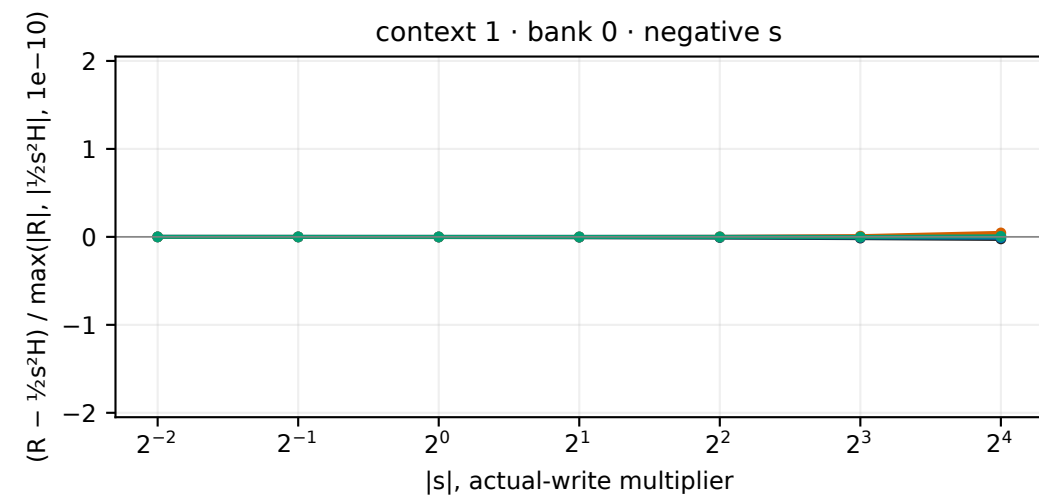

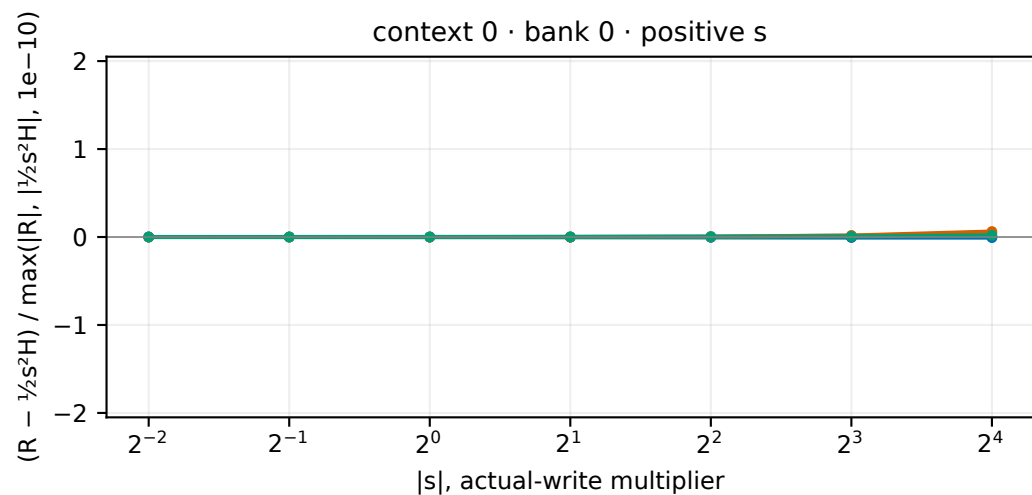

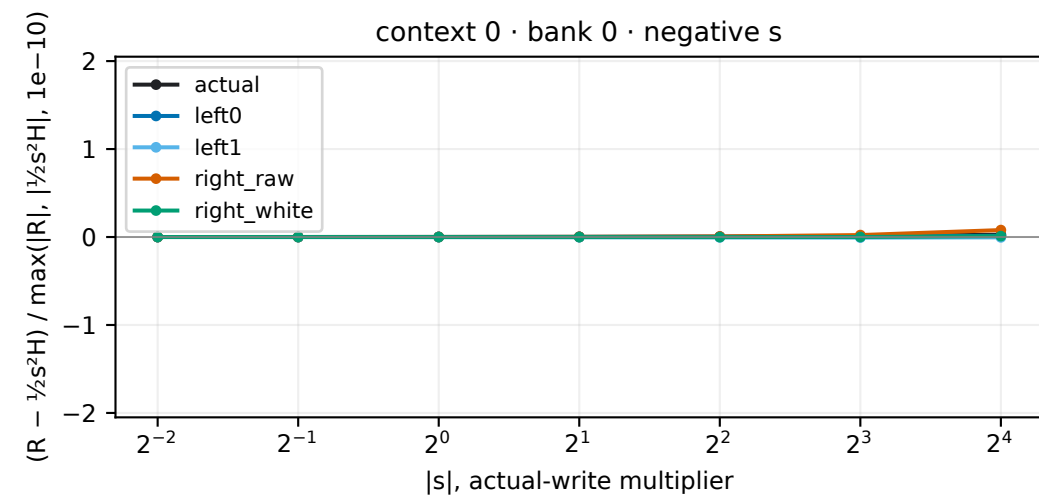

PD · state 10 · block 4: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

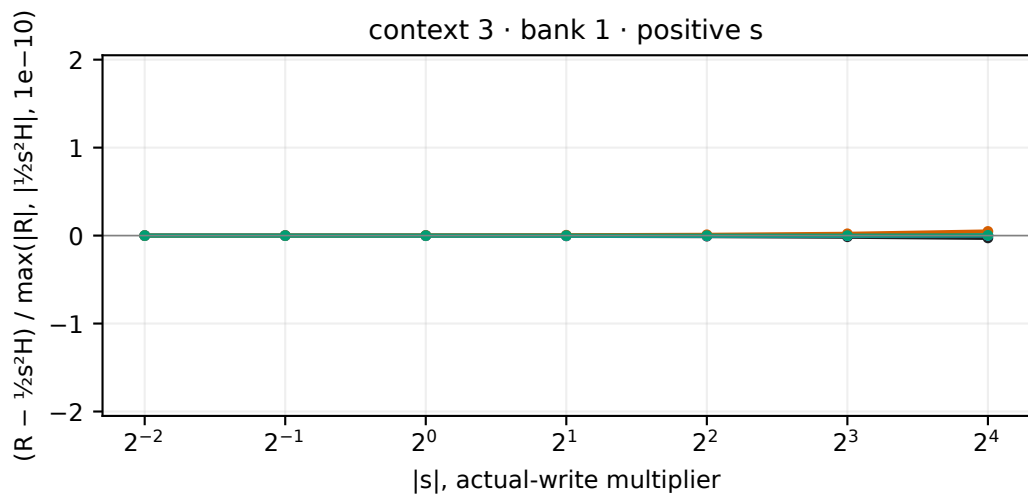

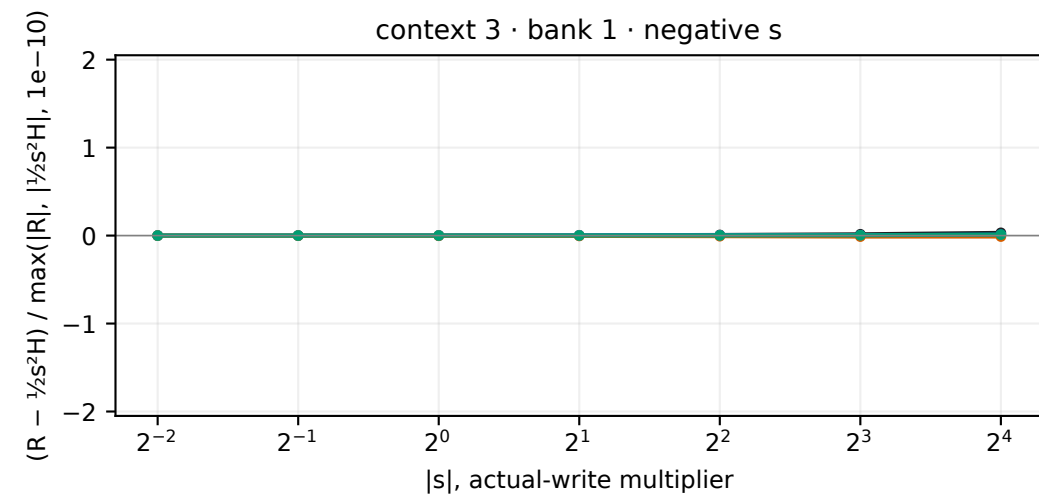

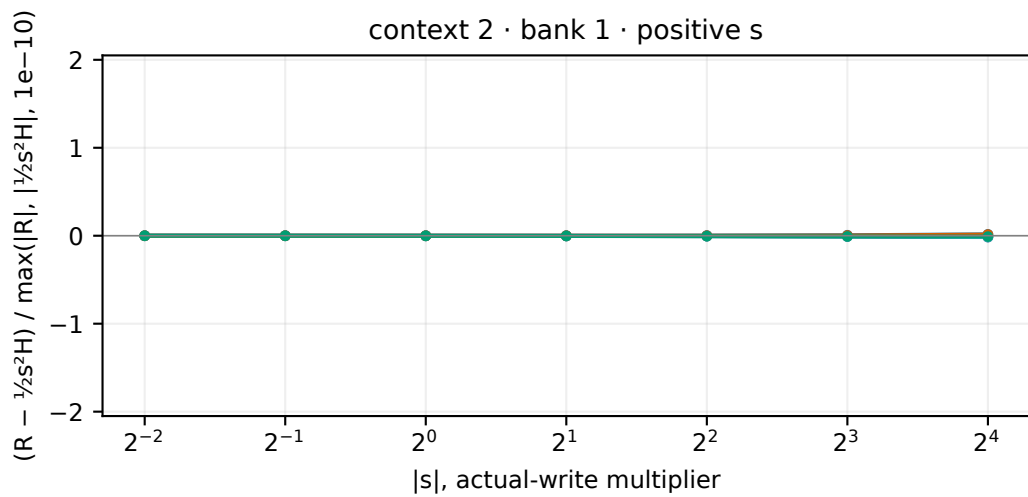

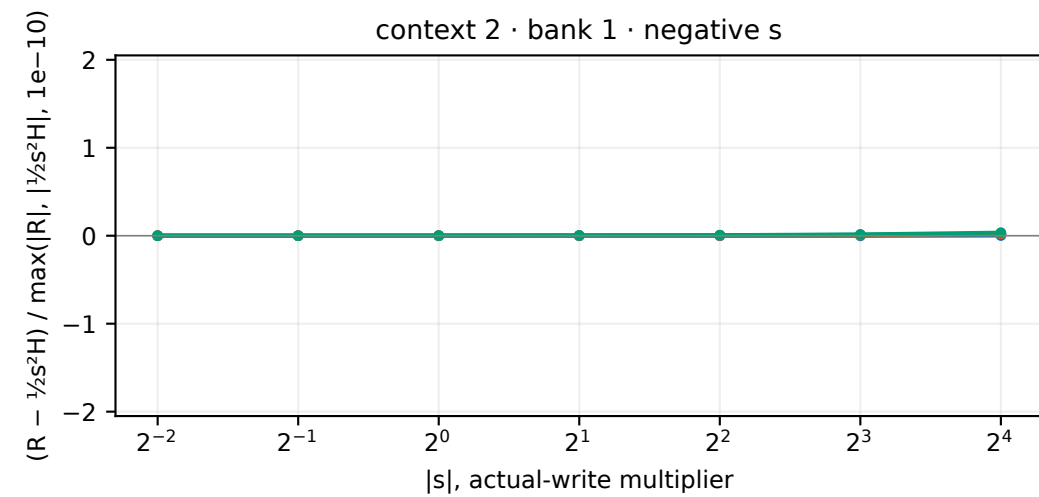

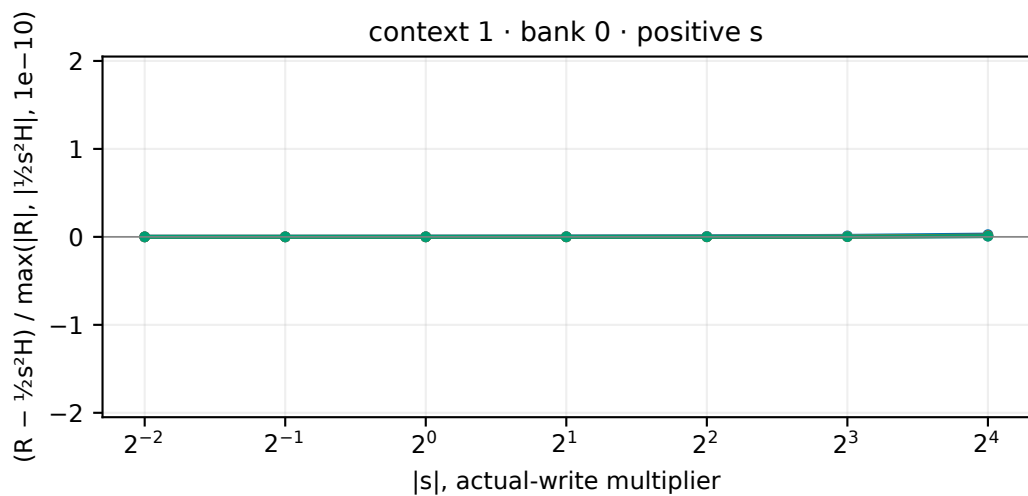

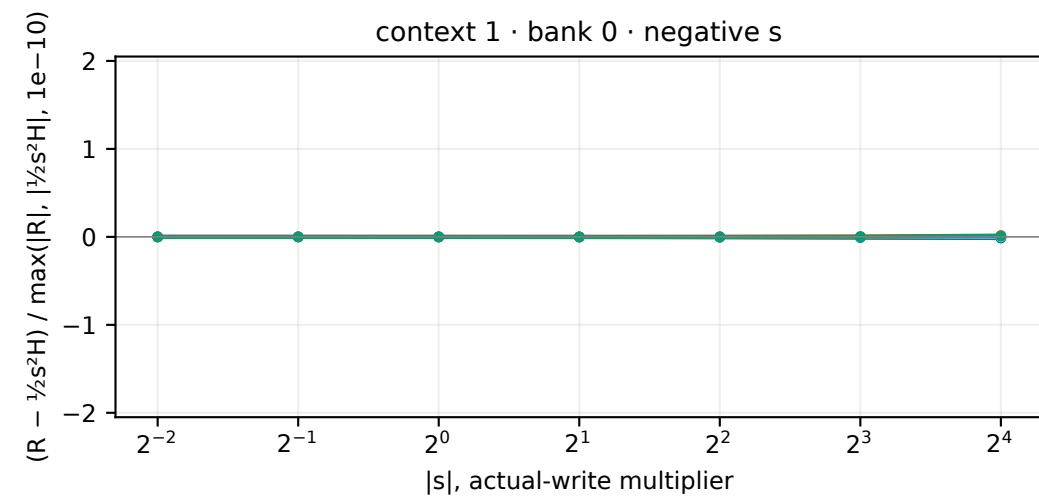

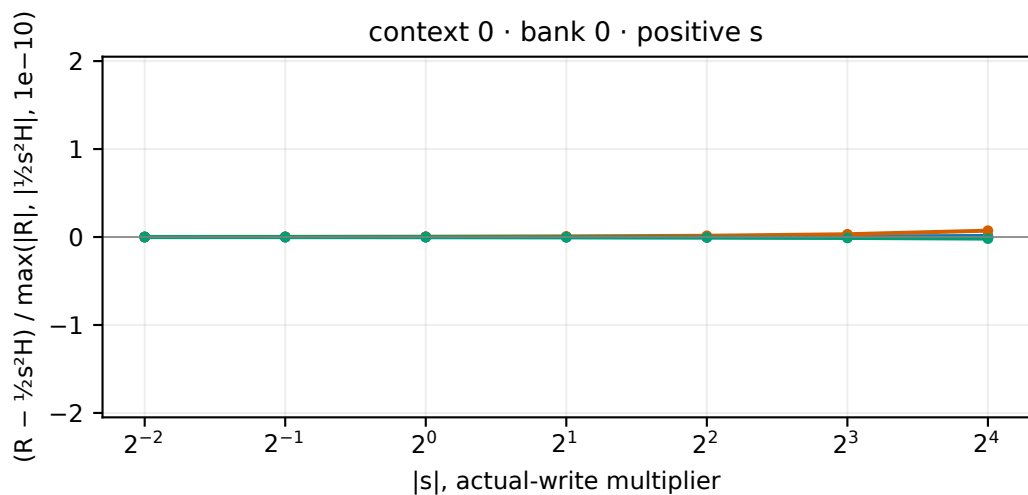

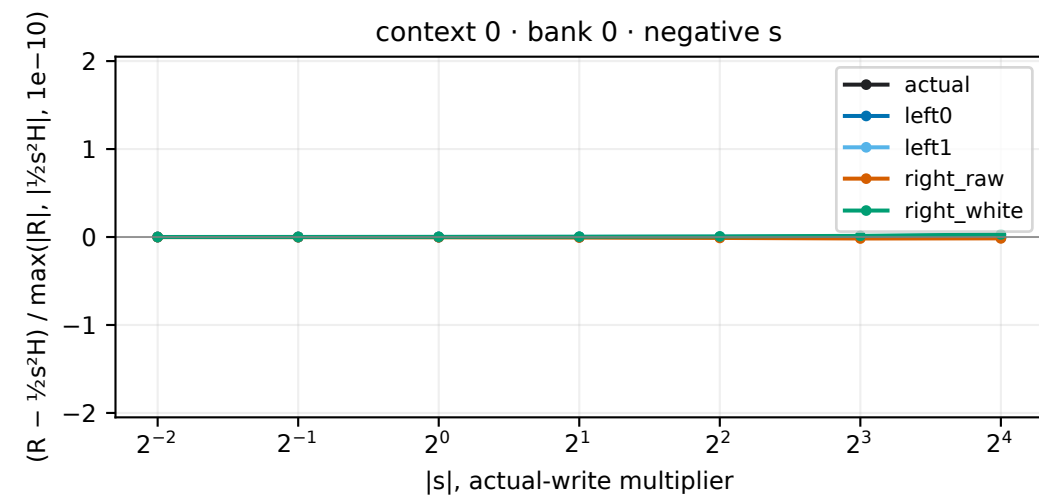

PD · state 10 · block 8: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

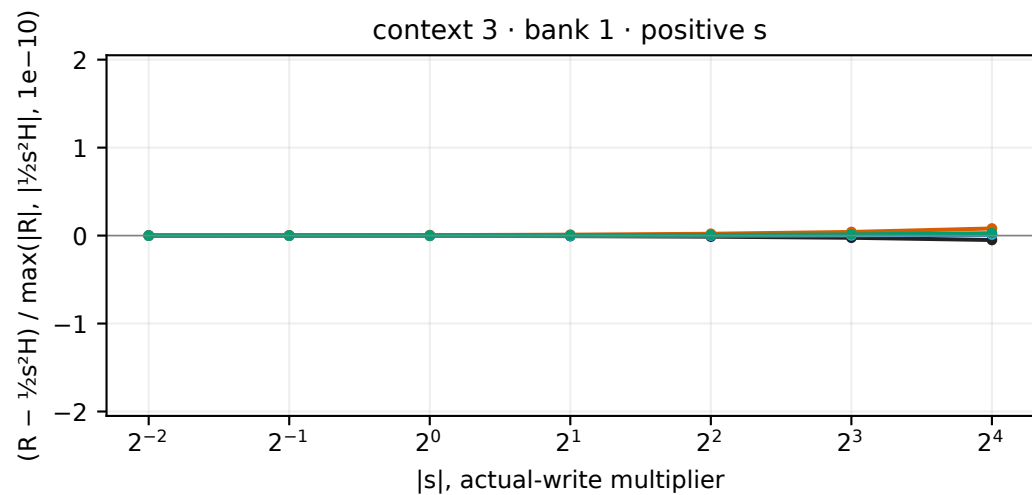

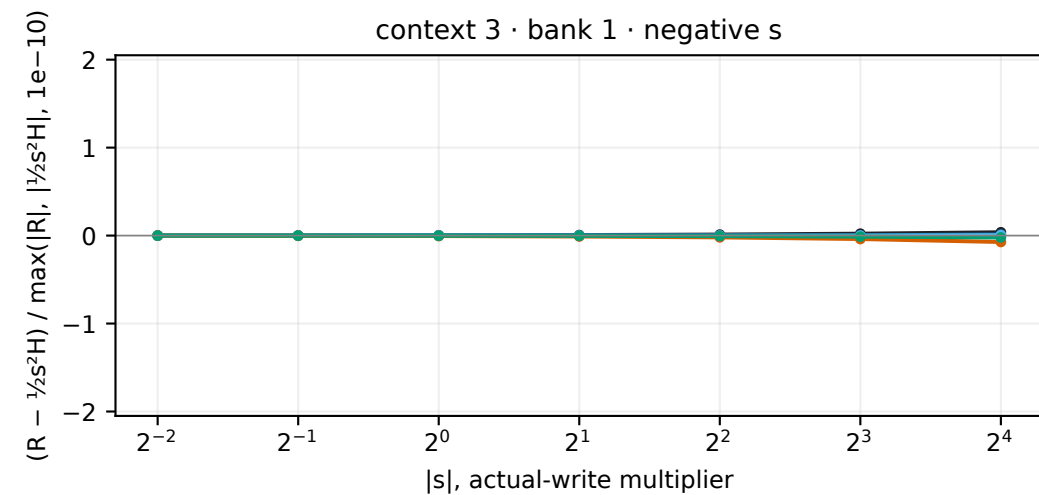

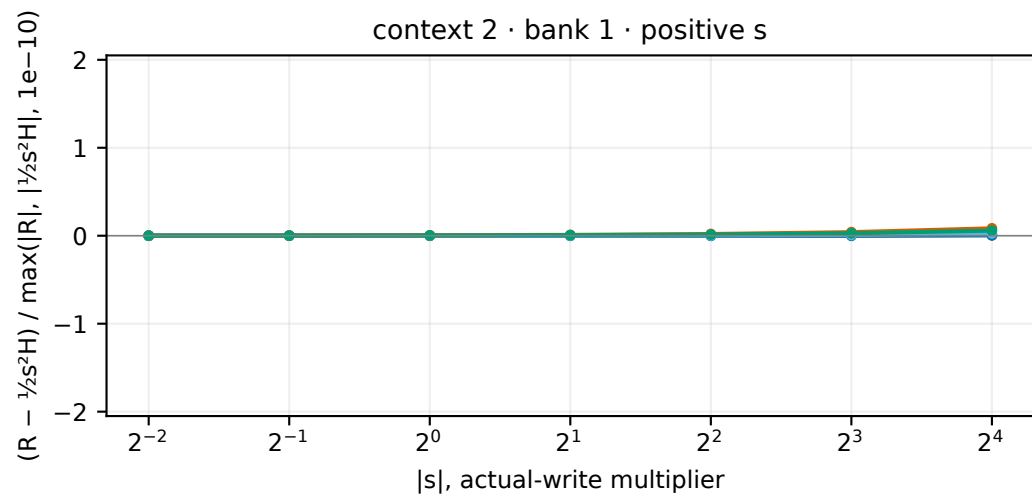

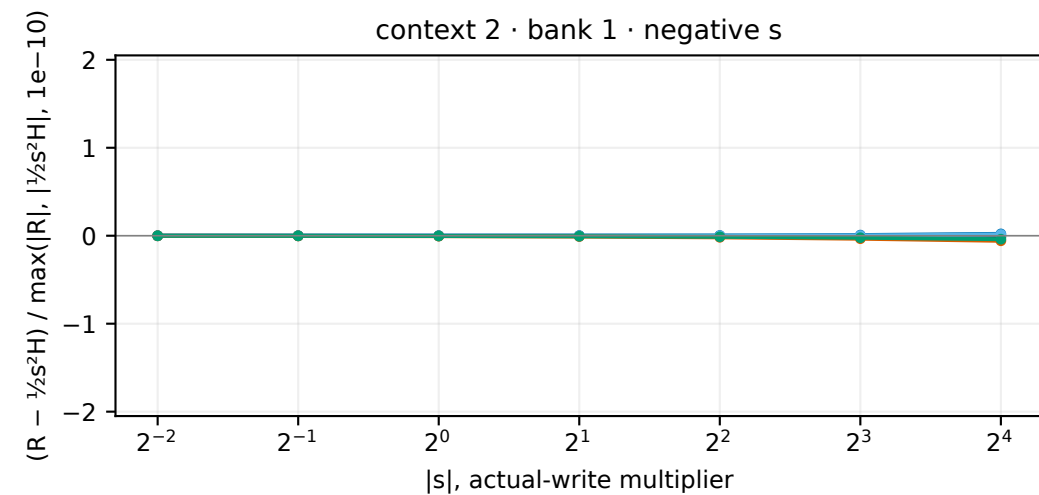

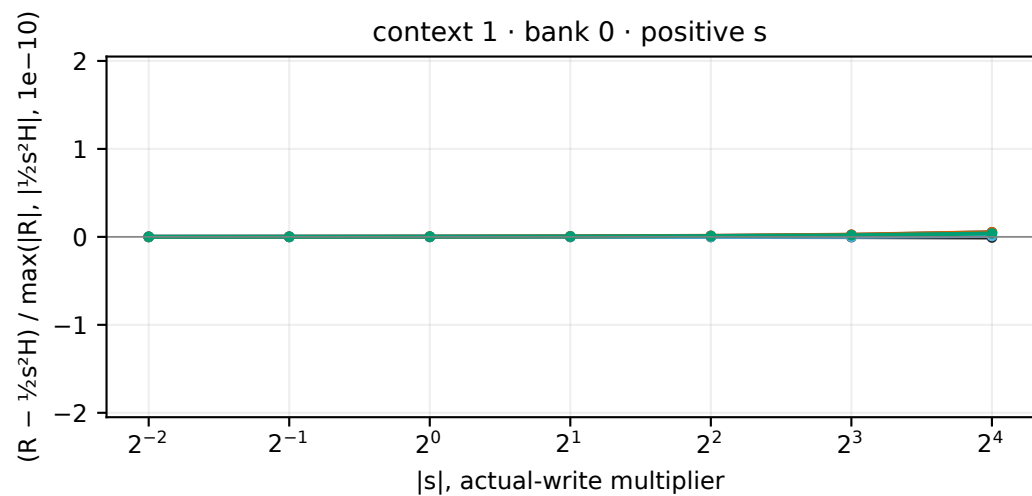

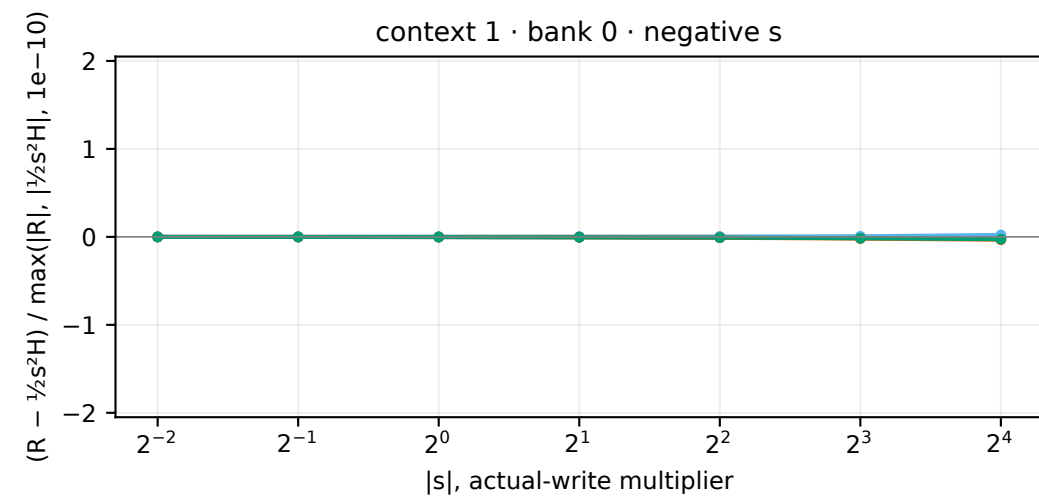

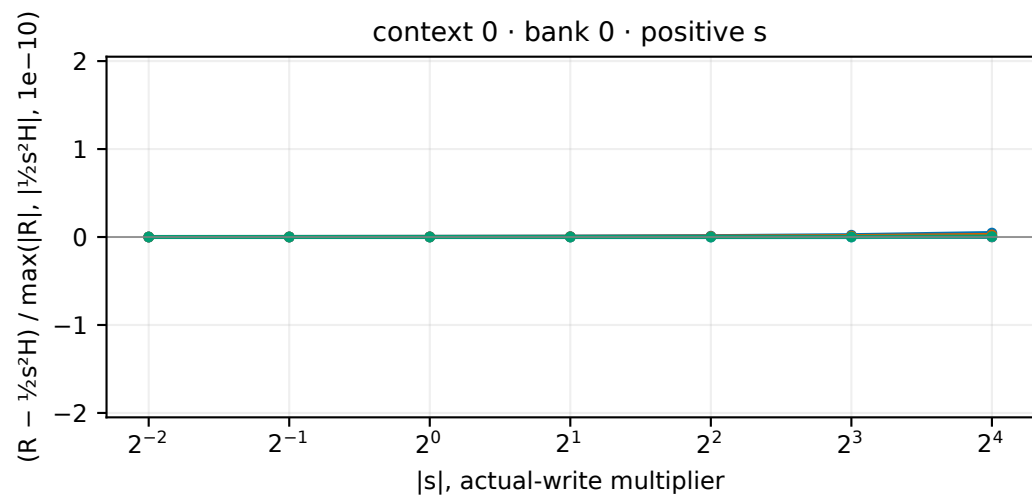

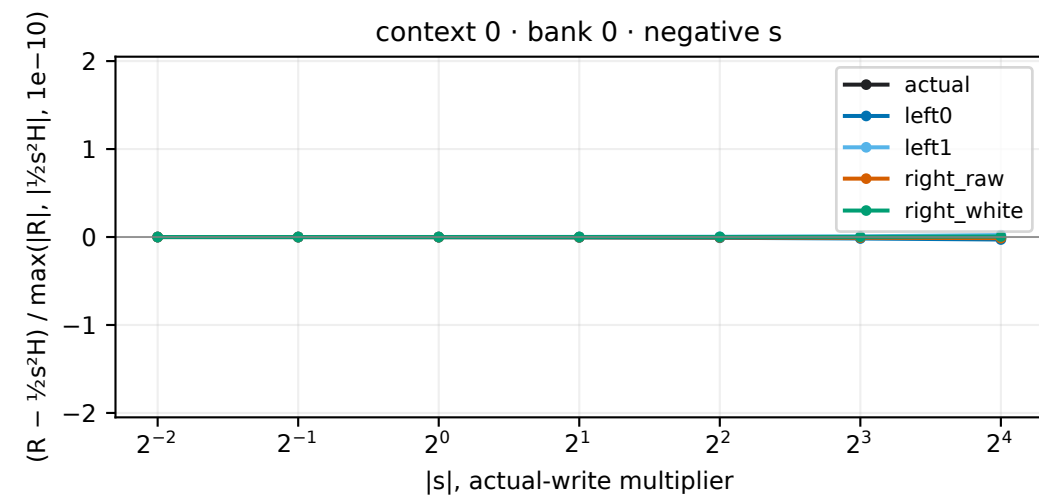

PD · state 500 · block 1: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

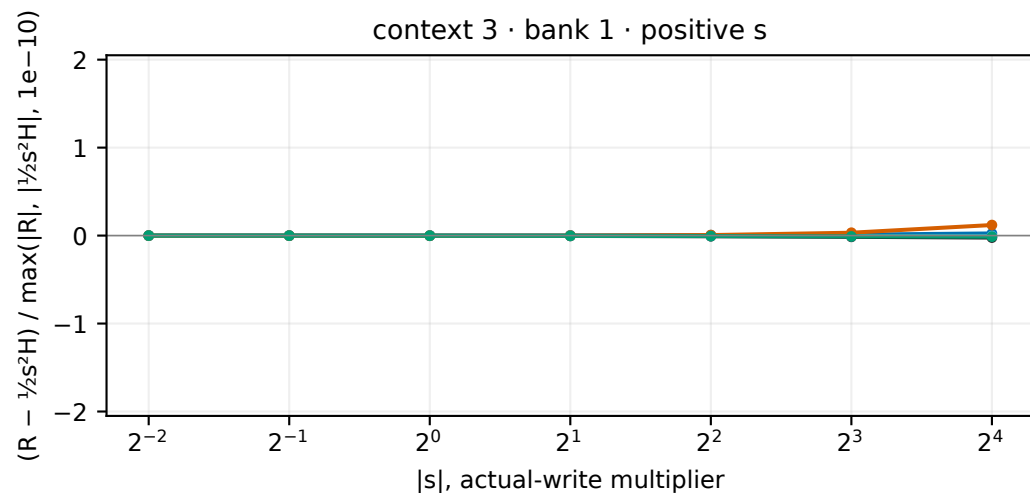

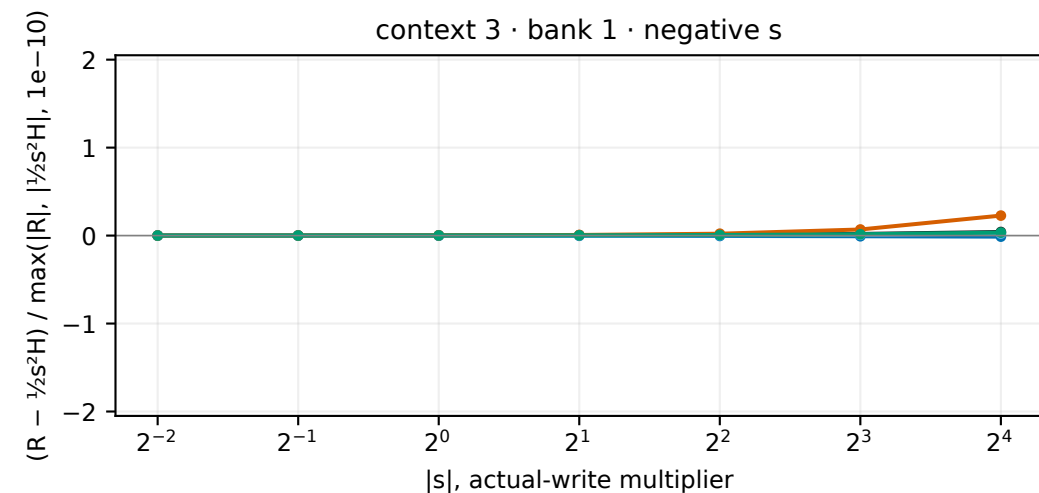

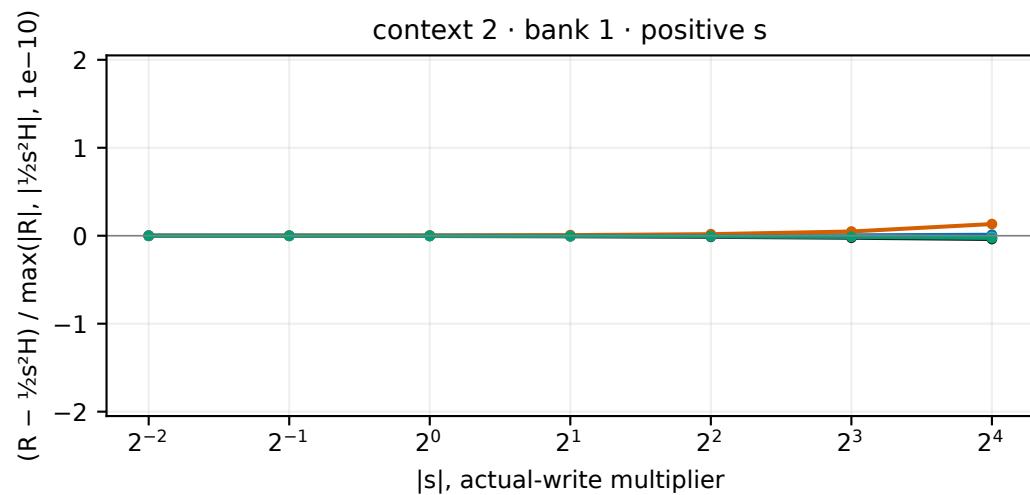

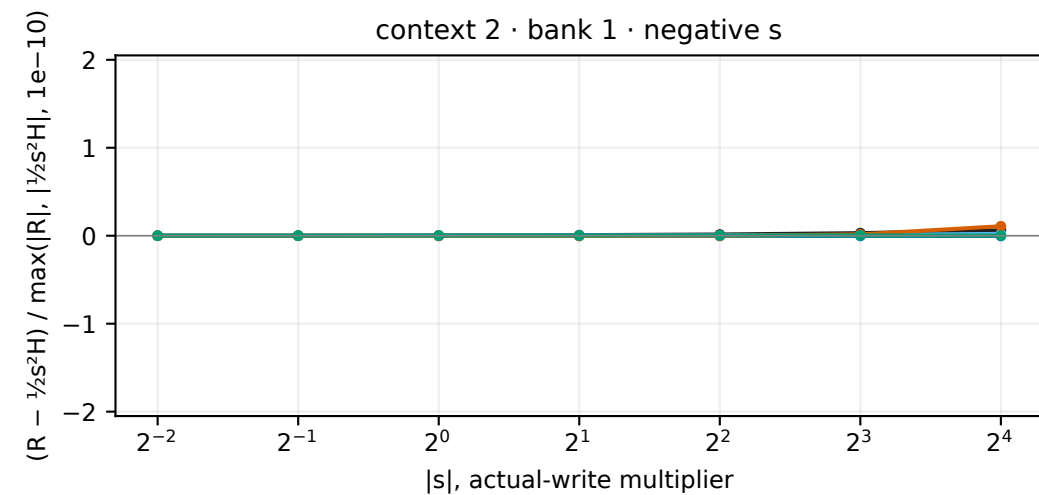

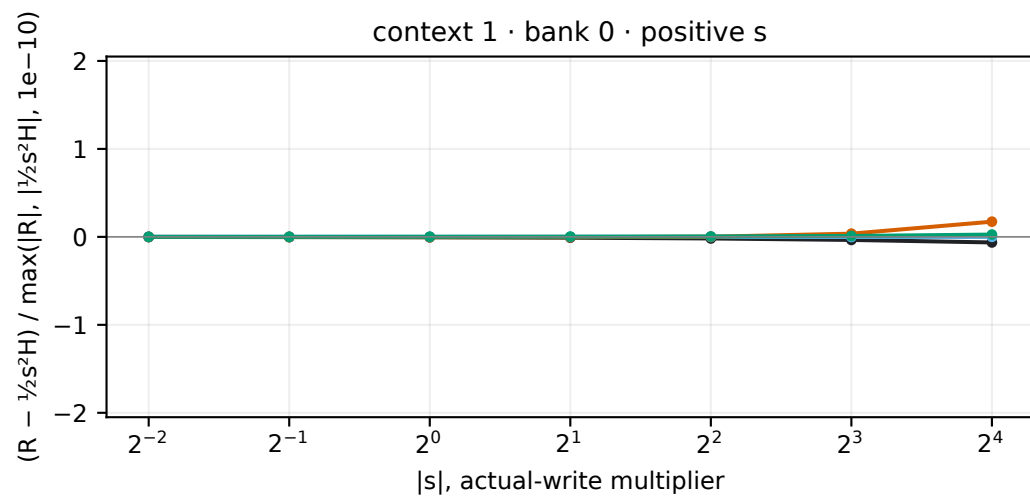

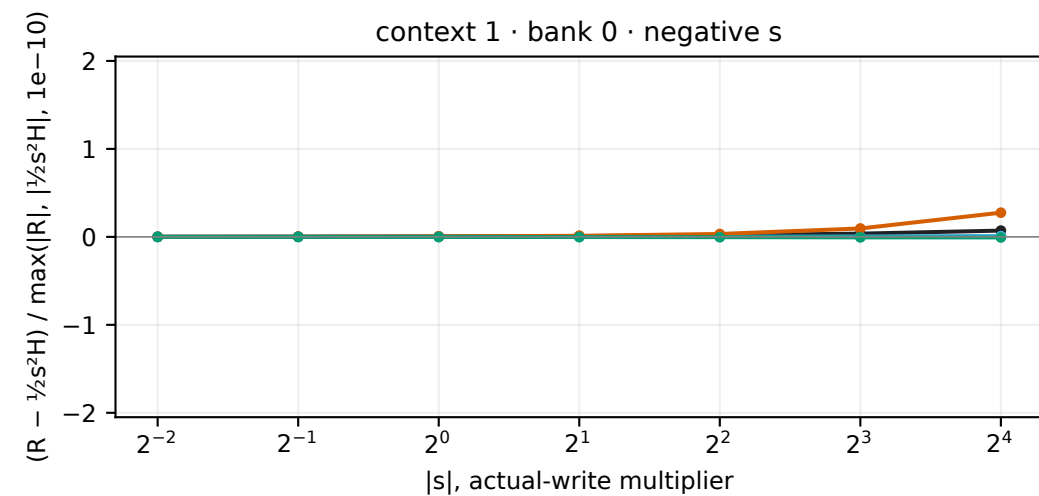

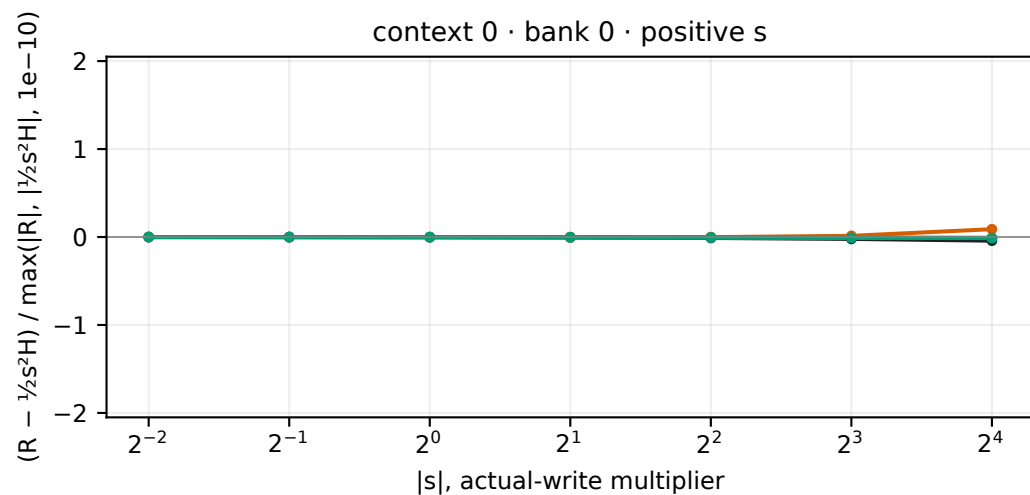

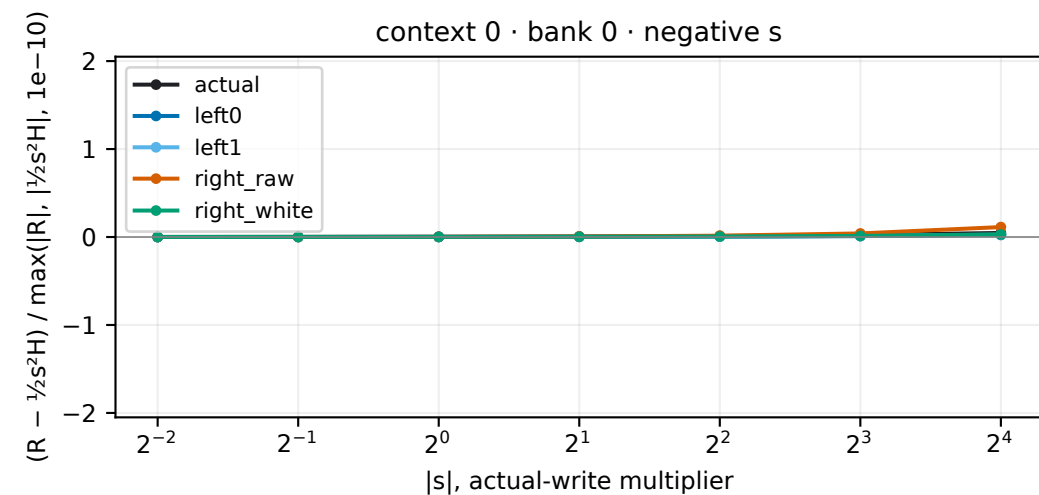

PD · state 500 · block 4: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

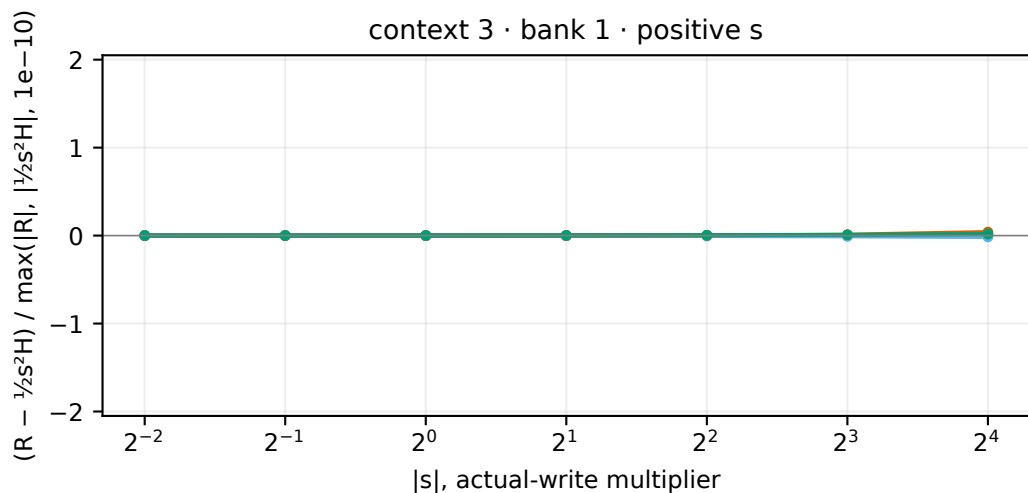

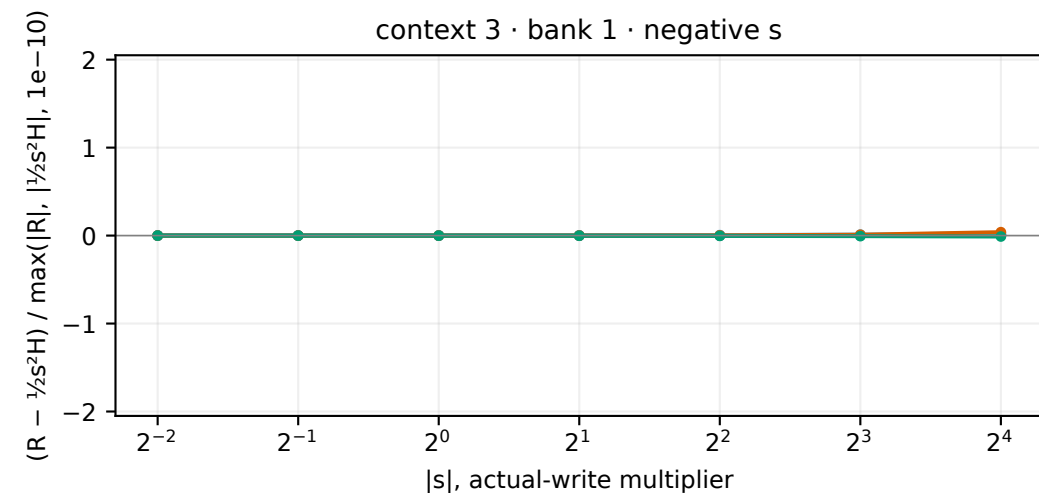

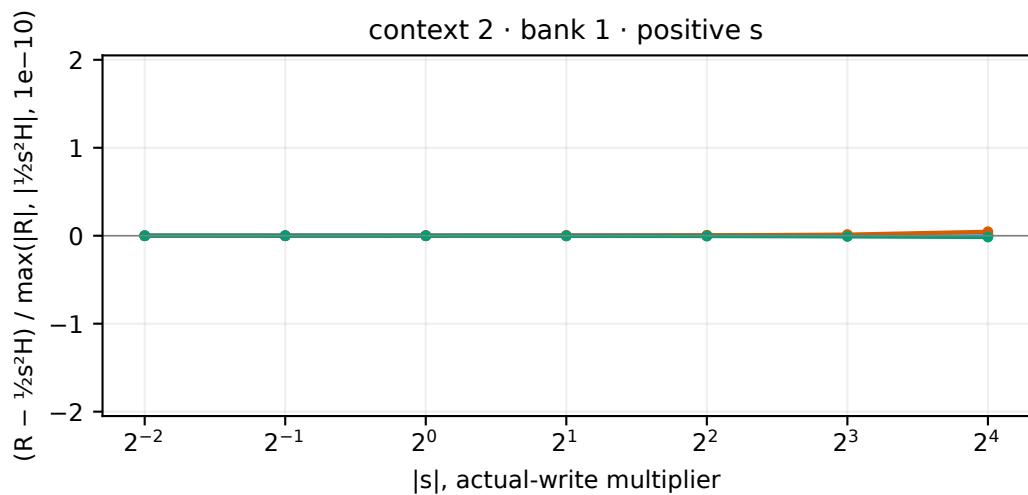

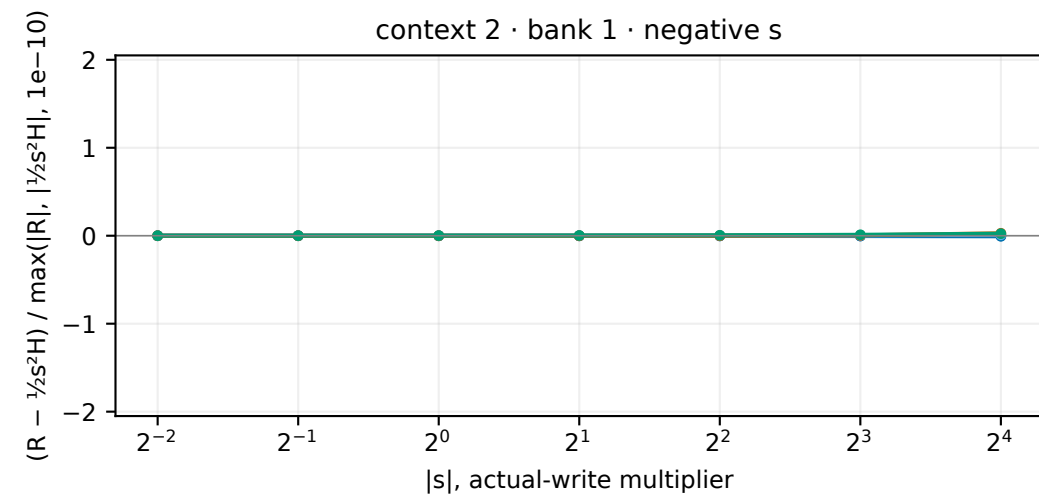

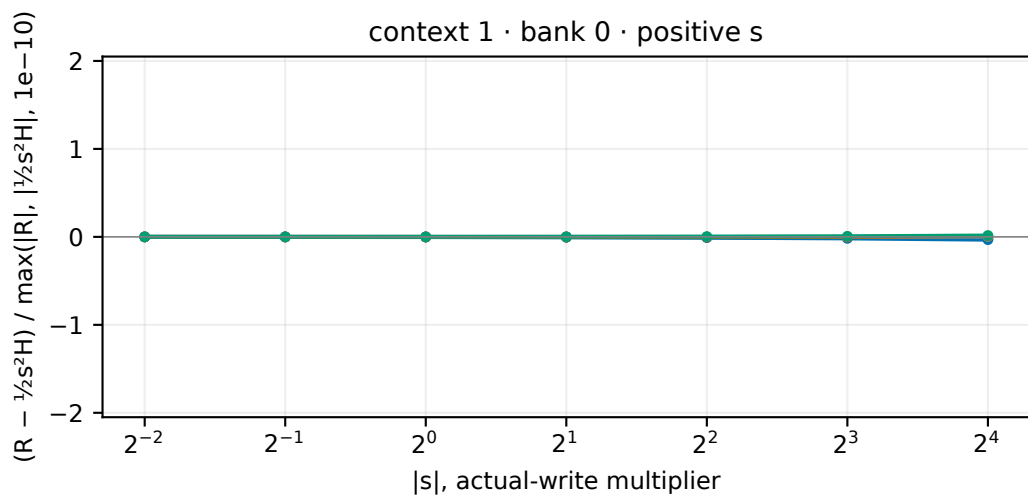

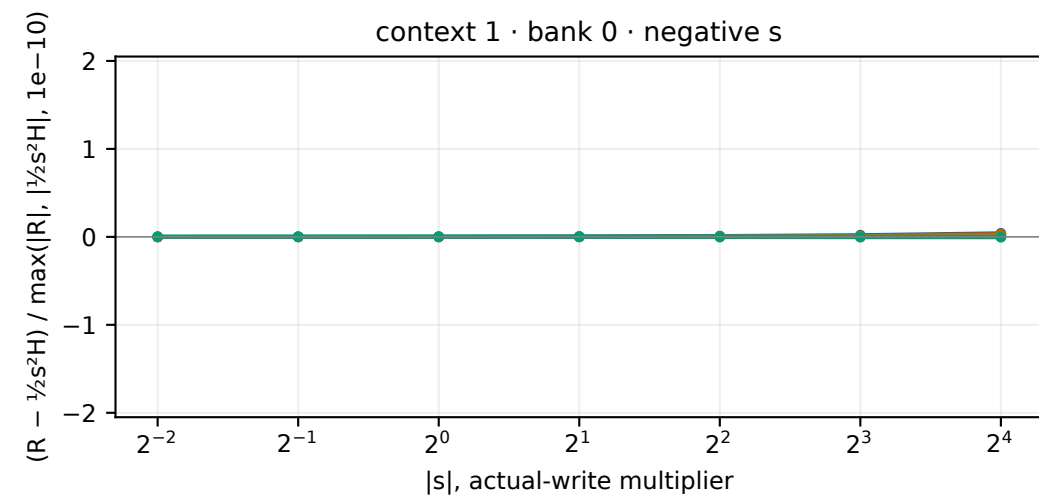

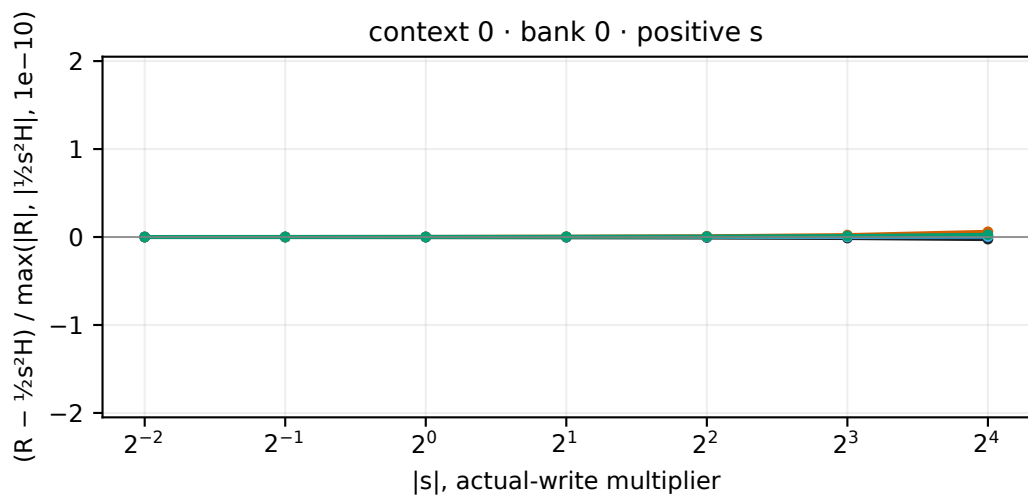

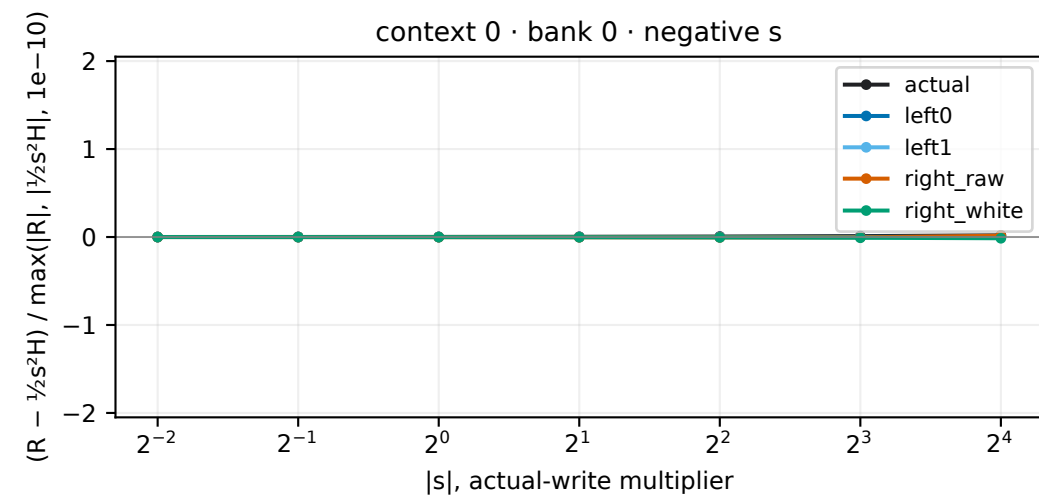

PD · state 500 · block 8: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

PD · state 1300 · block 1: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

PD · state 1300 · block 4: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained

PD · state 1300 · block 8: signed quadratic departure
Ratios computed after whole-context aggregation; negative H and R retained
