

Muon · state 10 · block 1 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

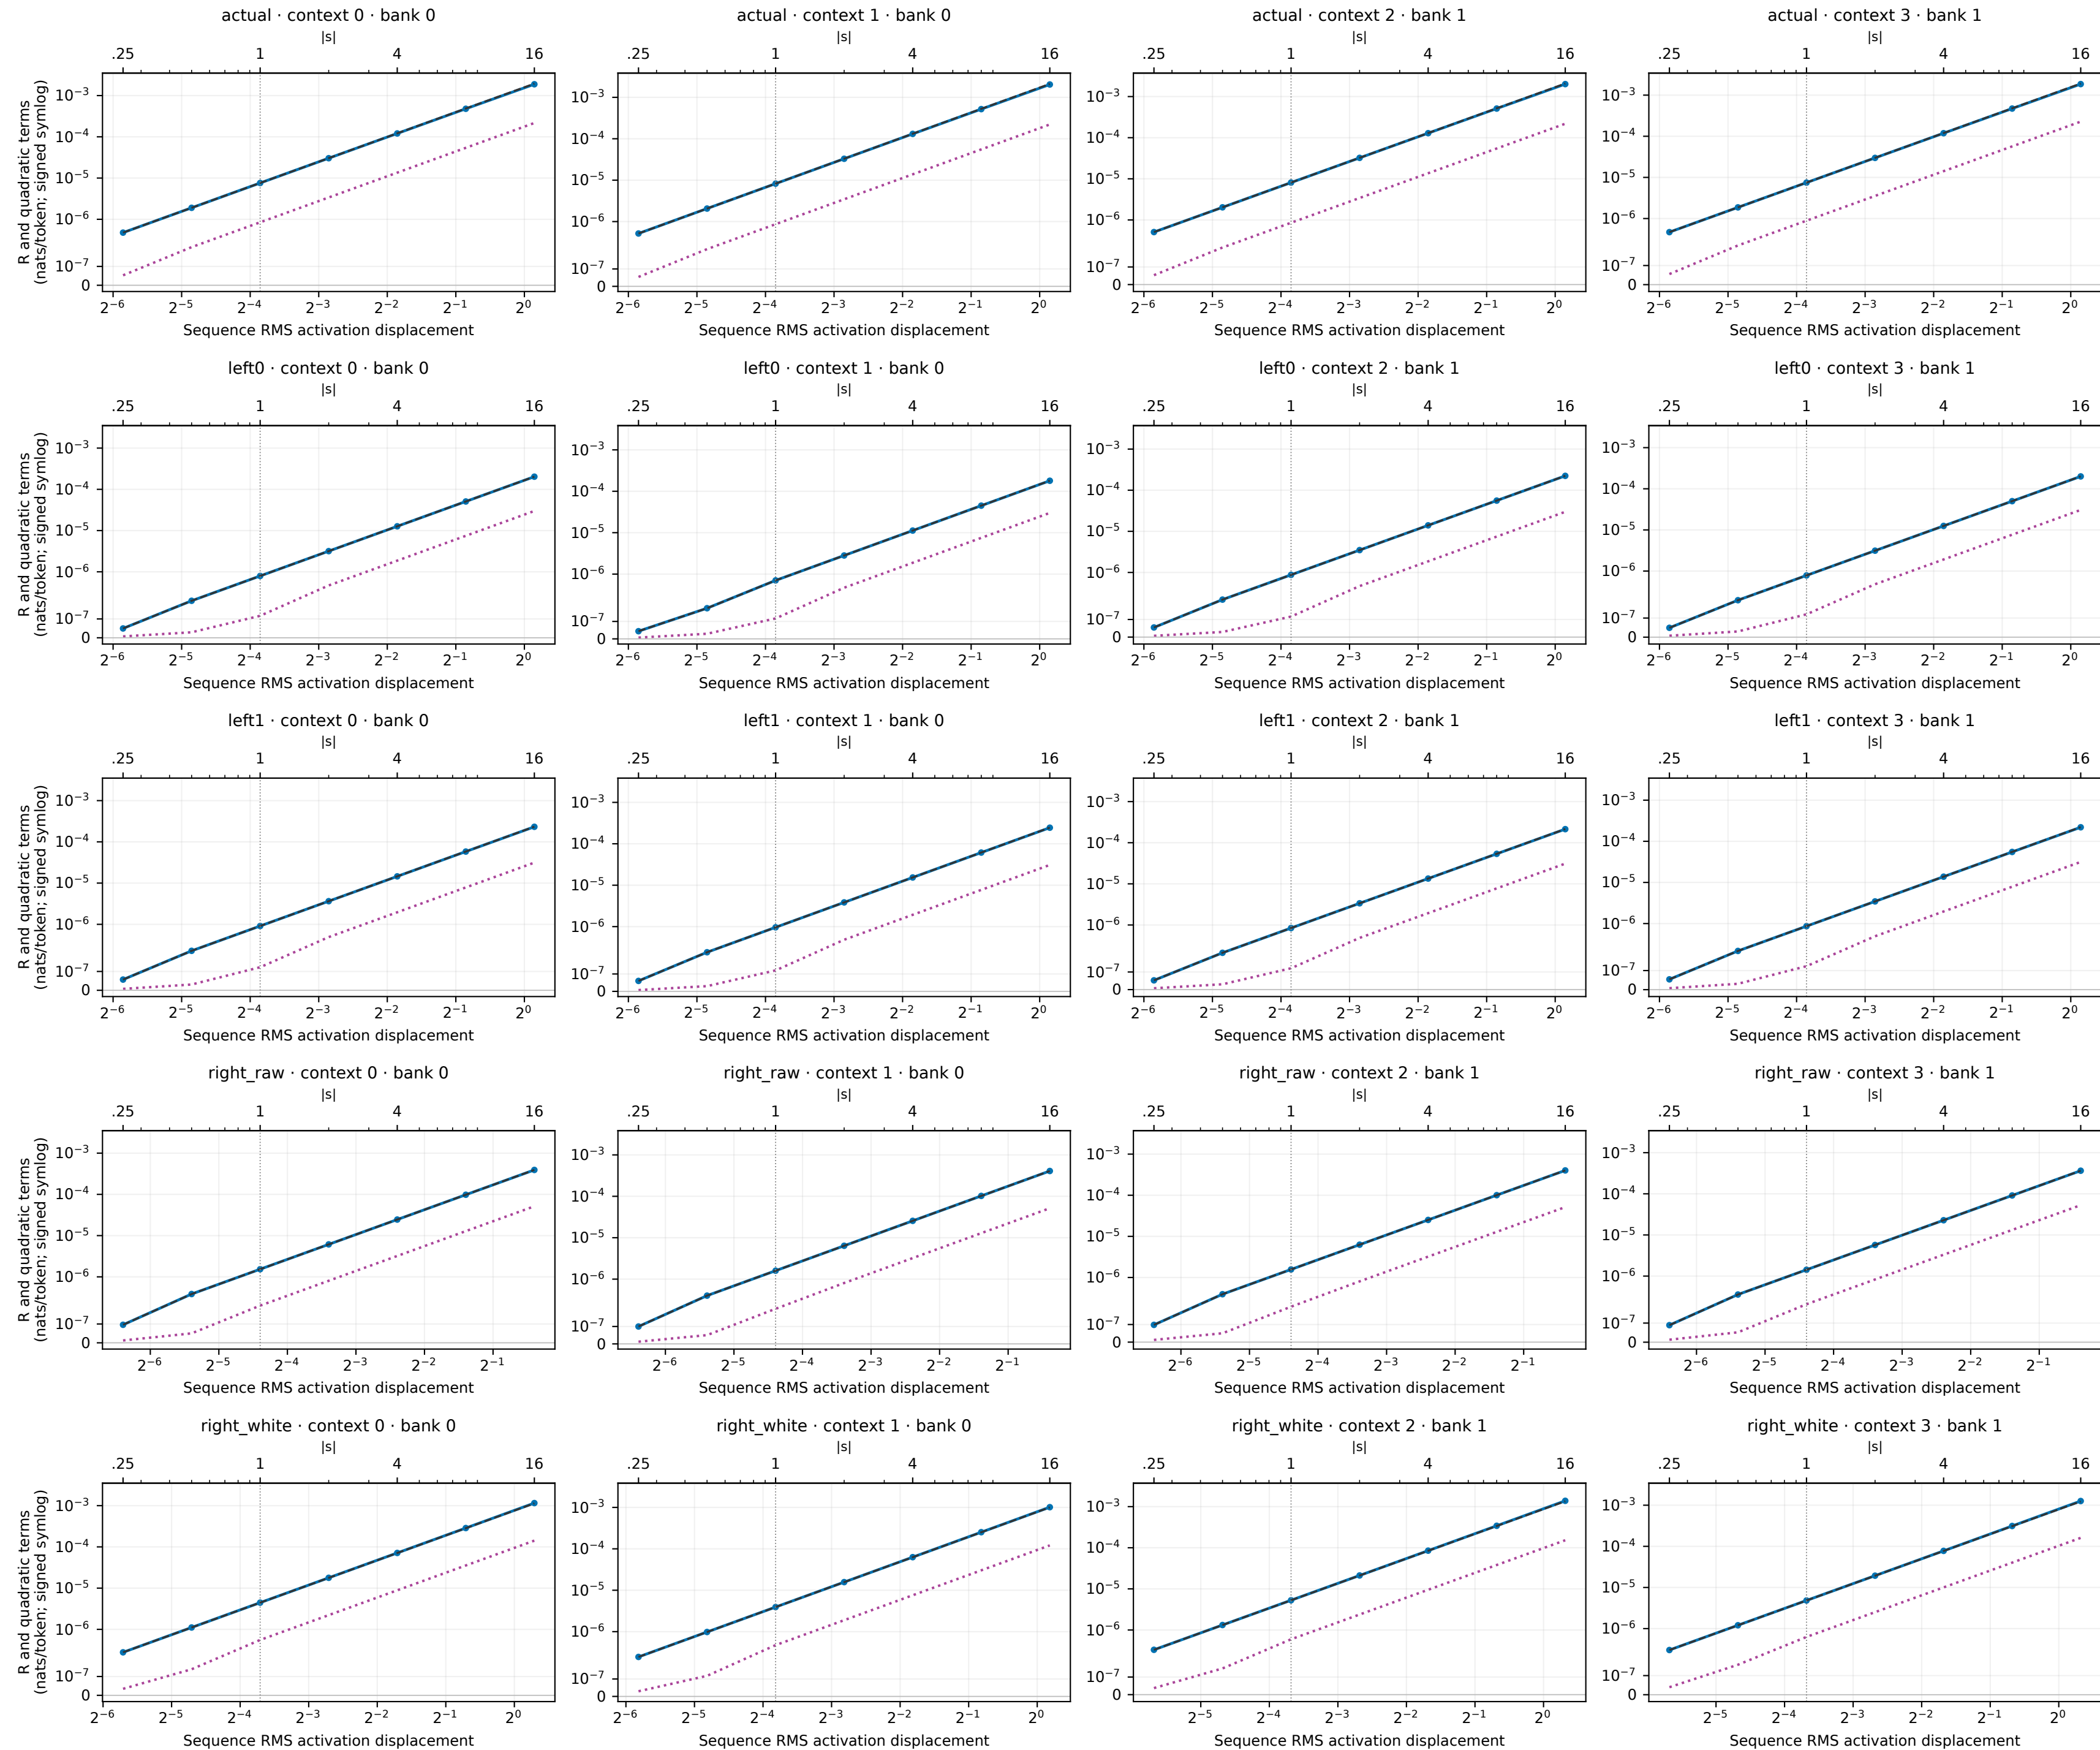

Muon · state 10 · block 1 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

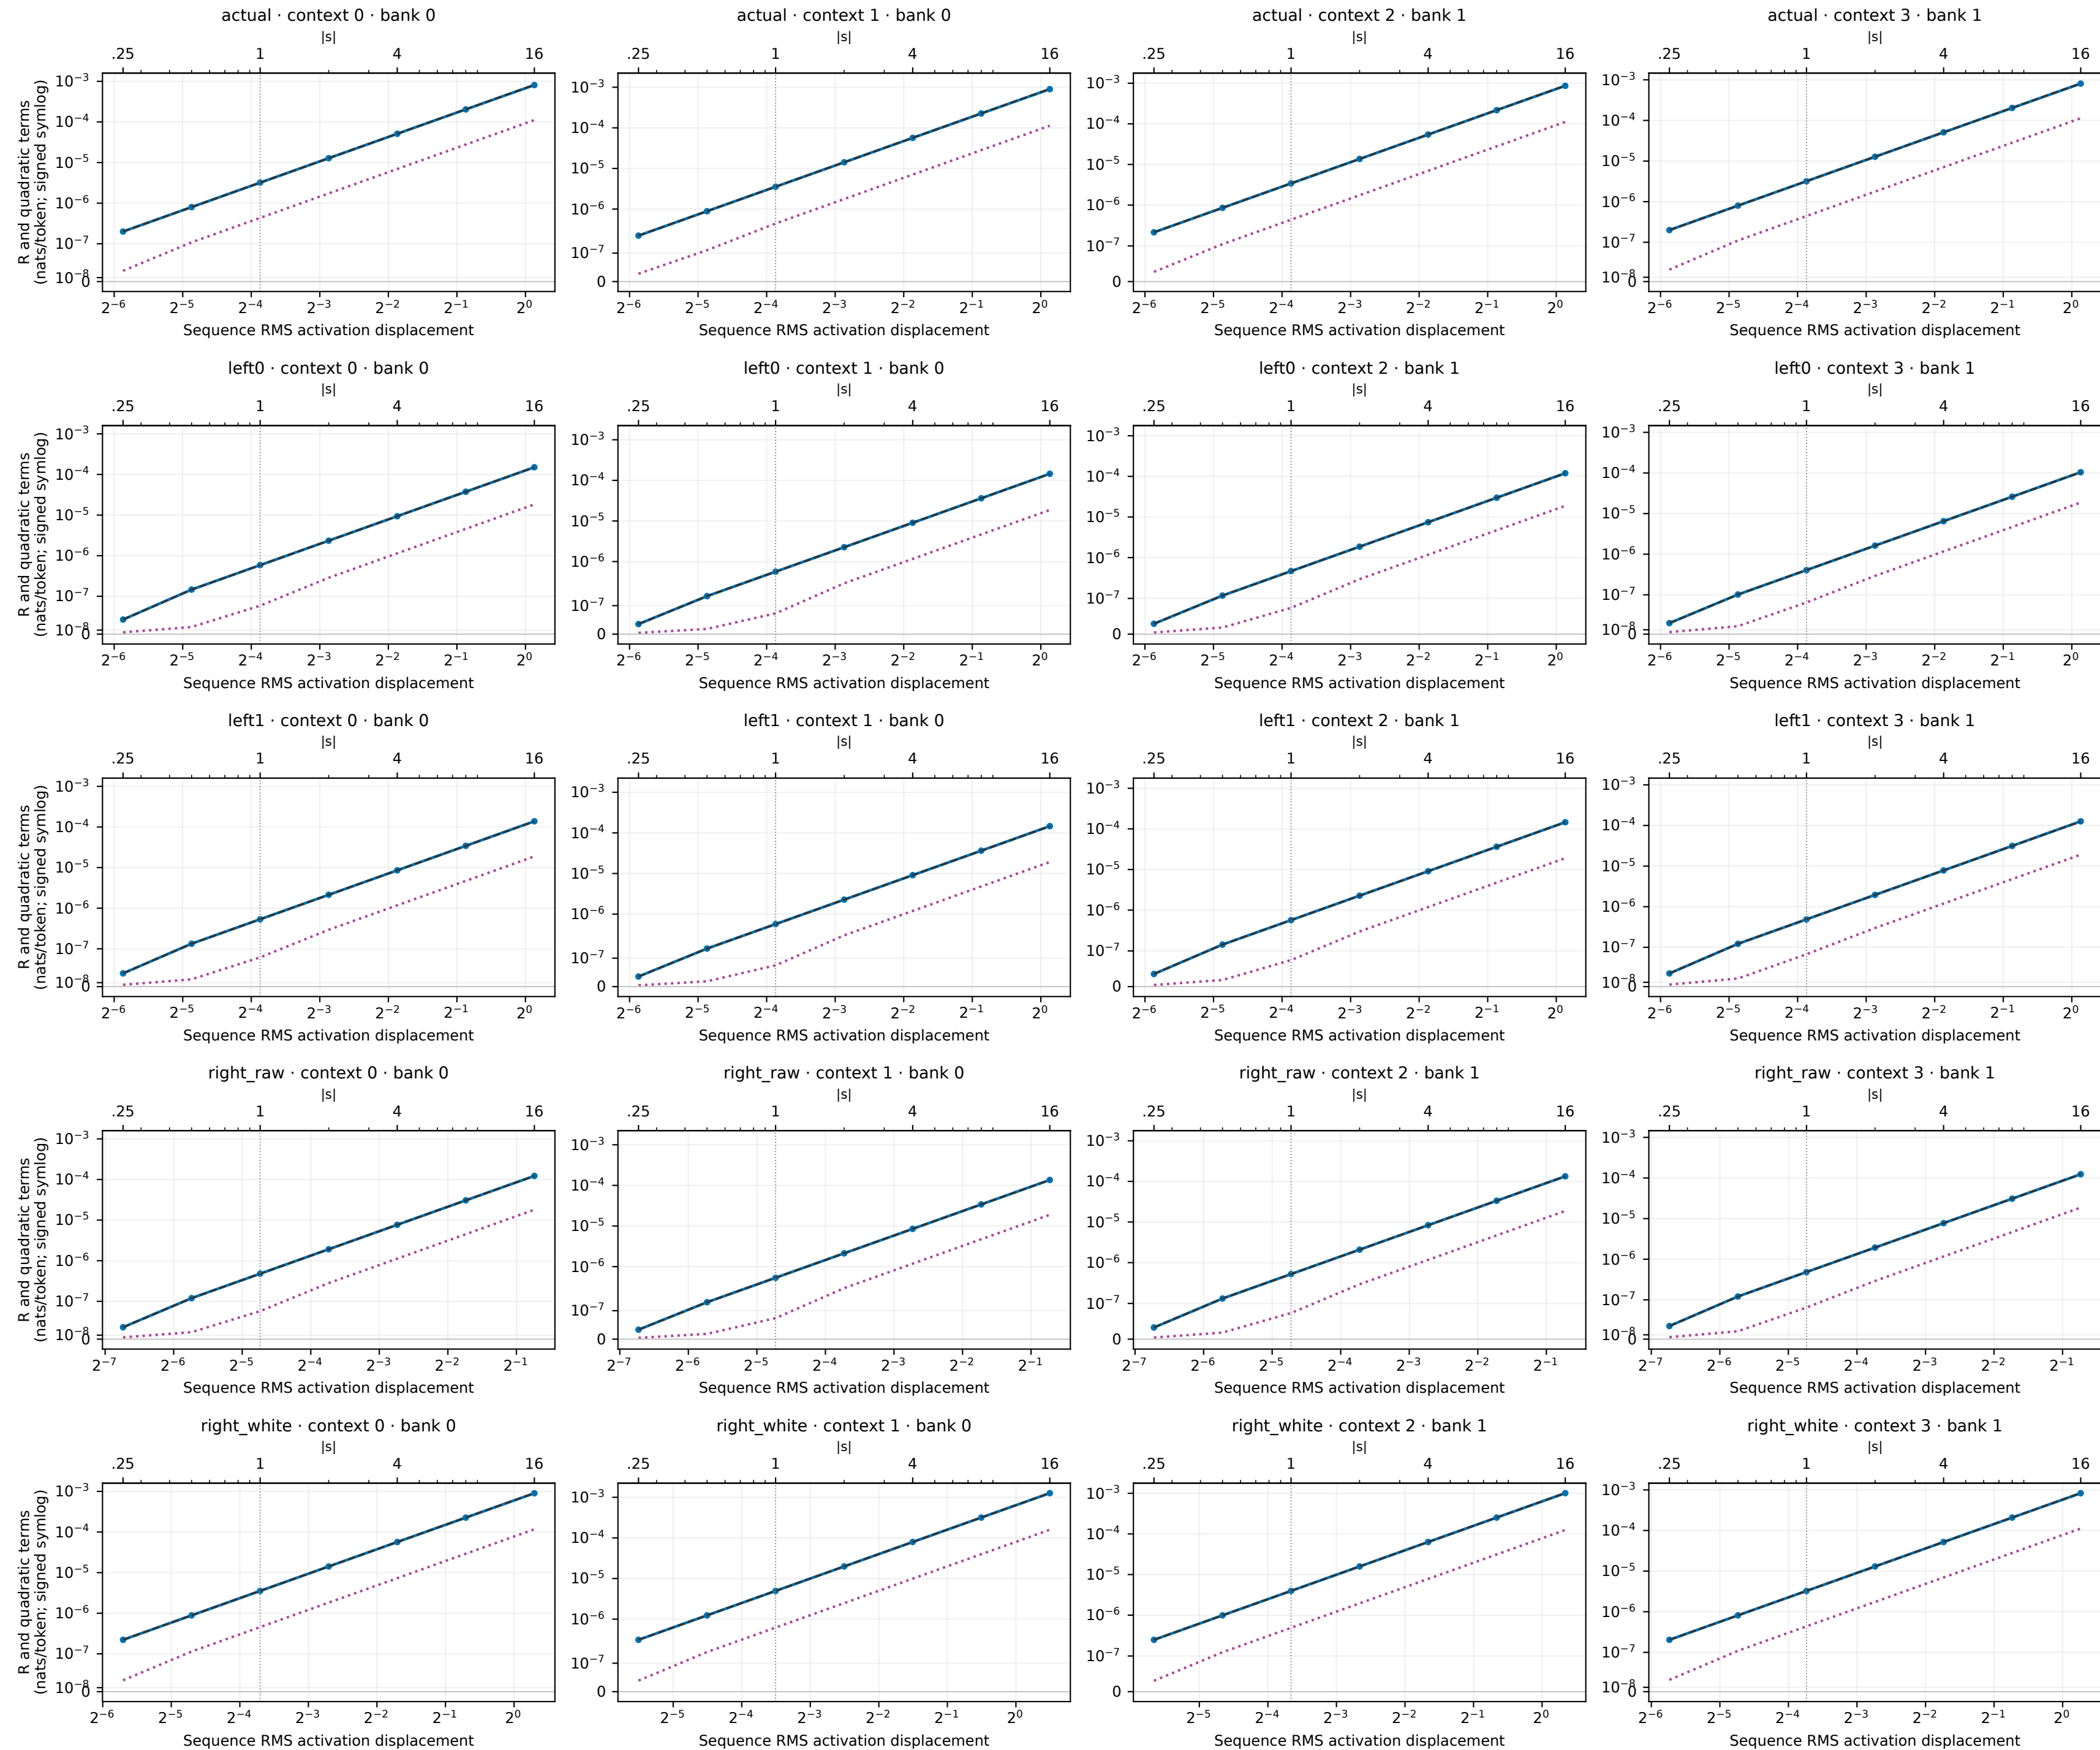

Muon · state 10 · block 4 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

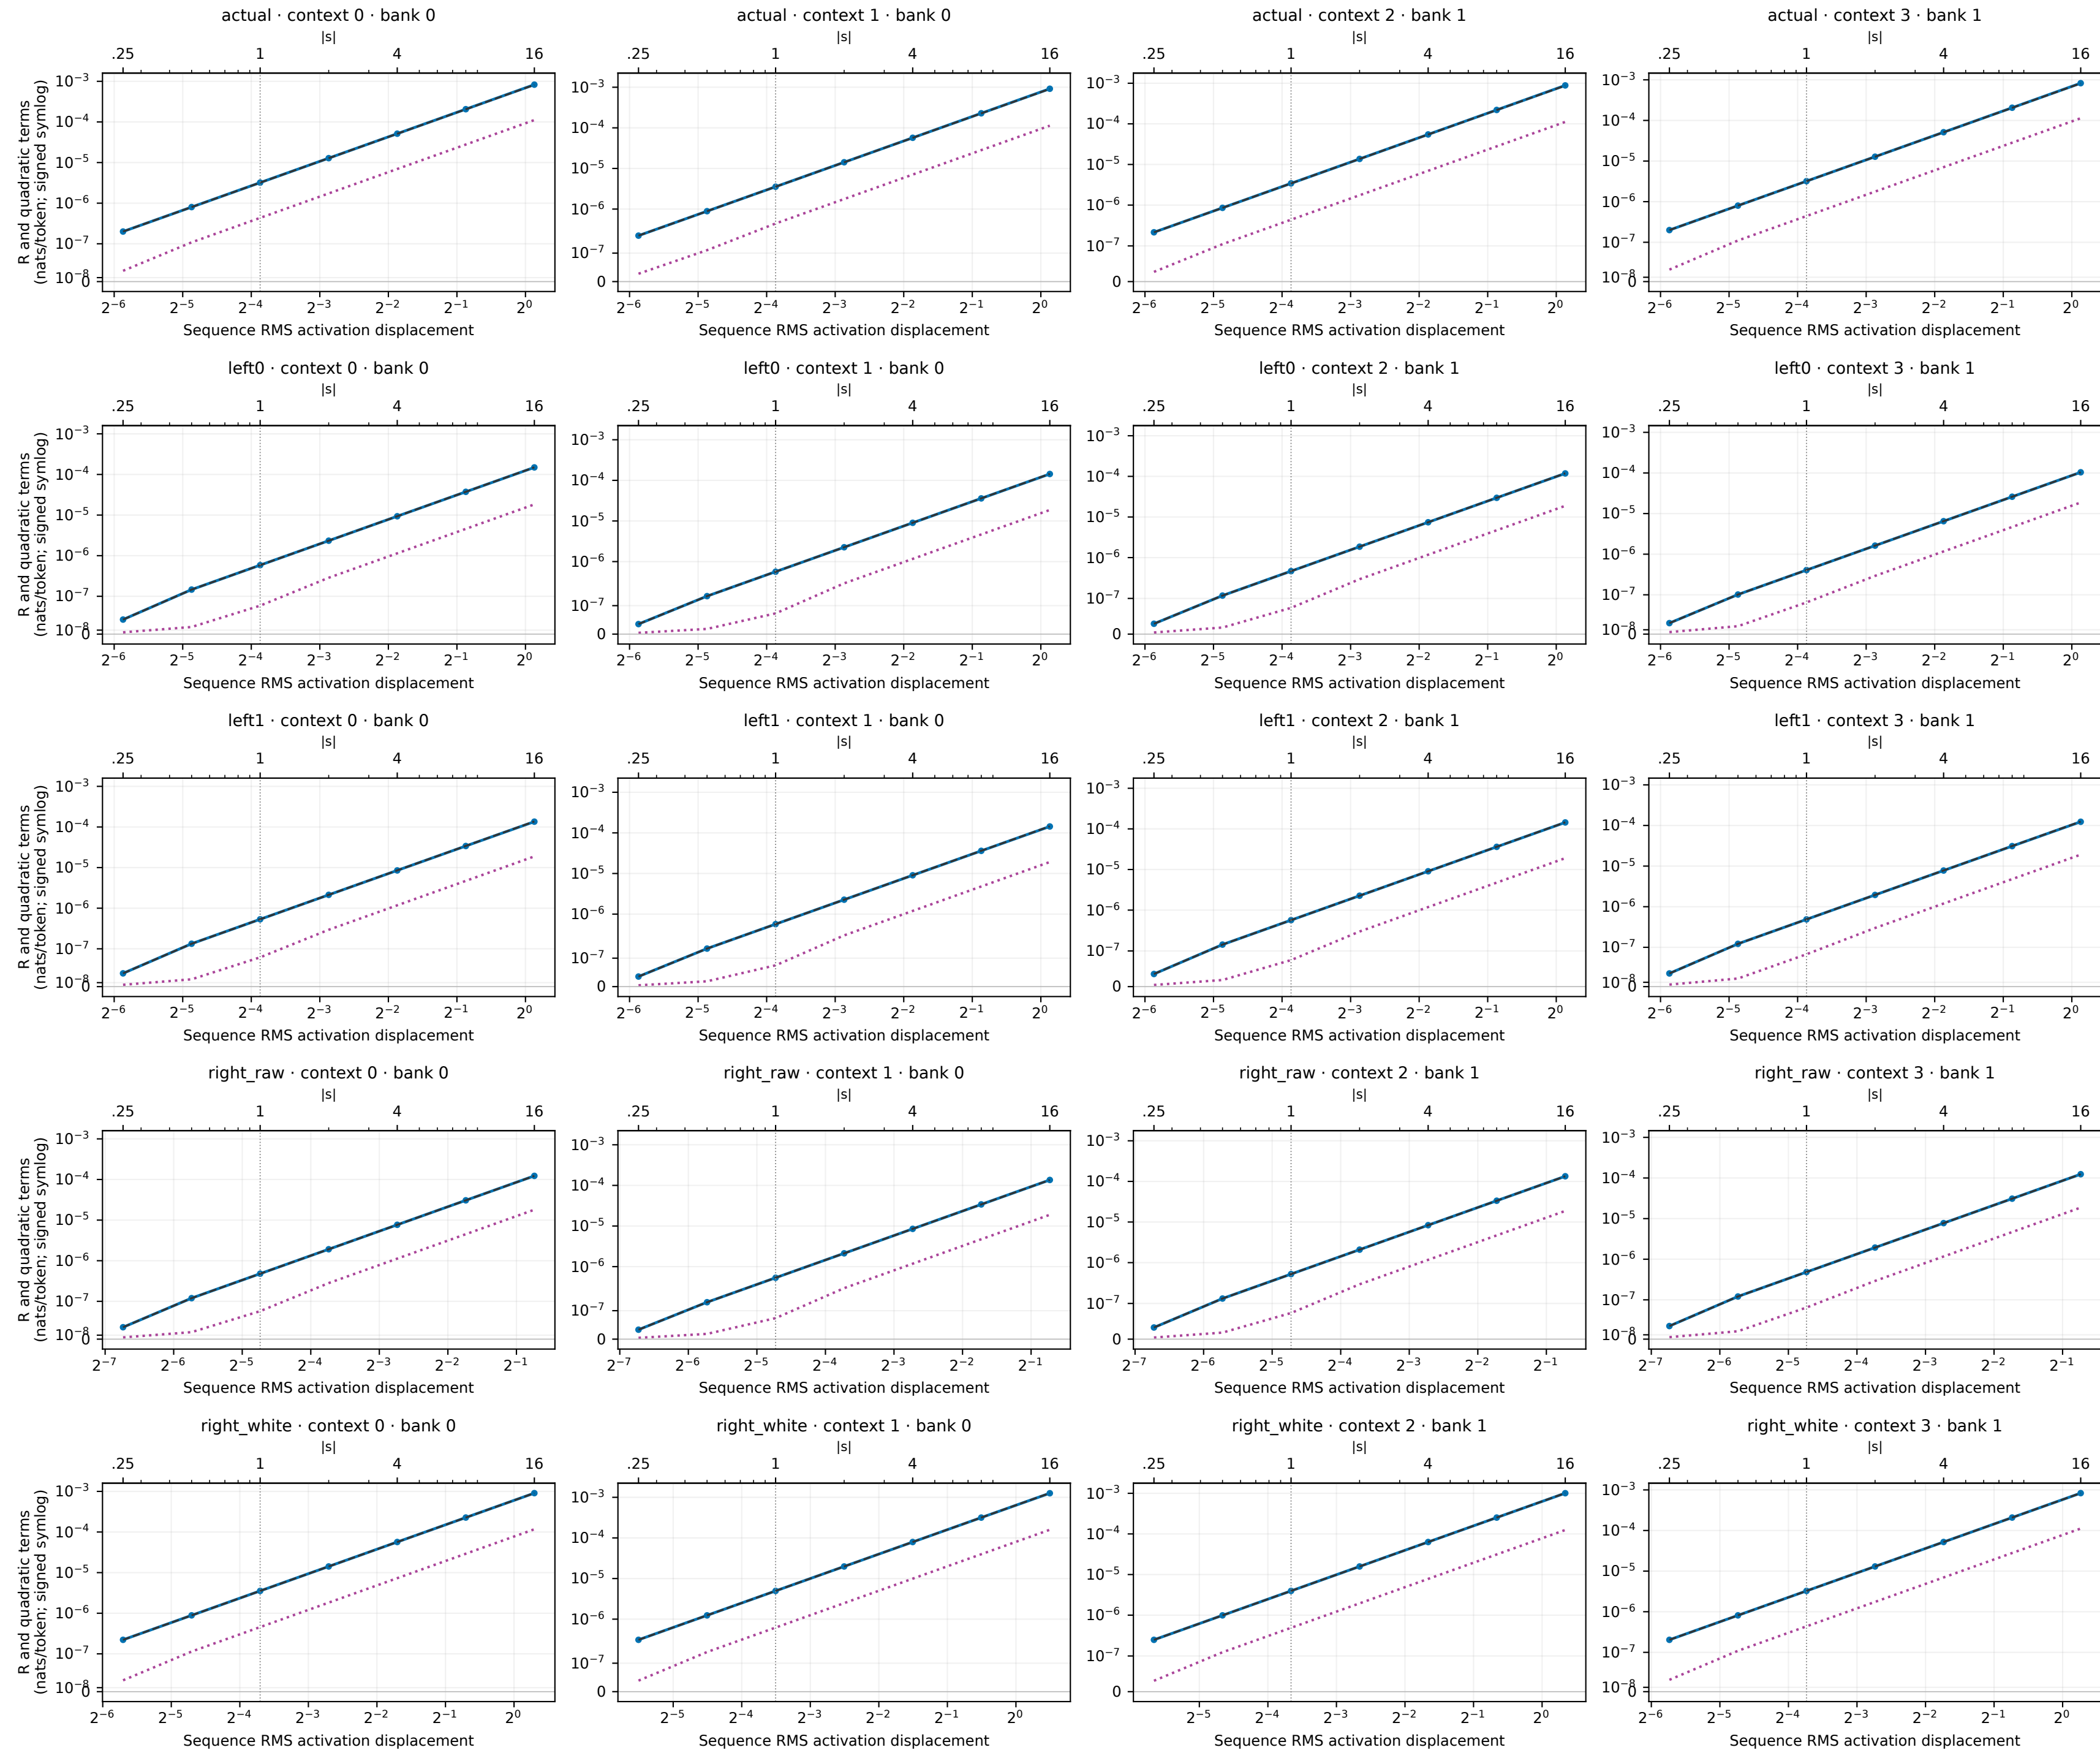

Muon · state 10 · block 4 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

Muon · state 10 · block 8 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

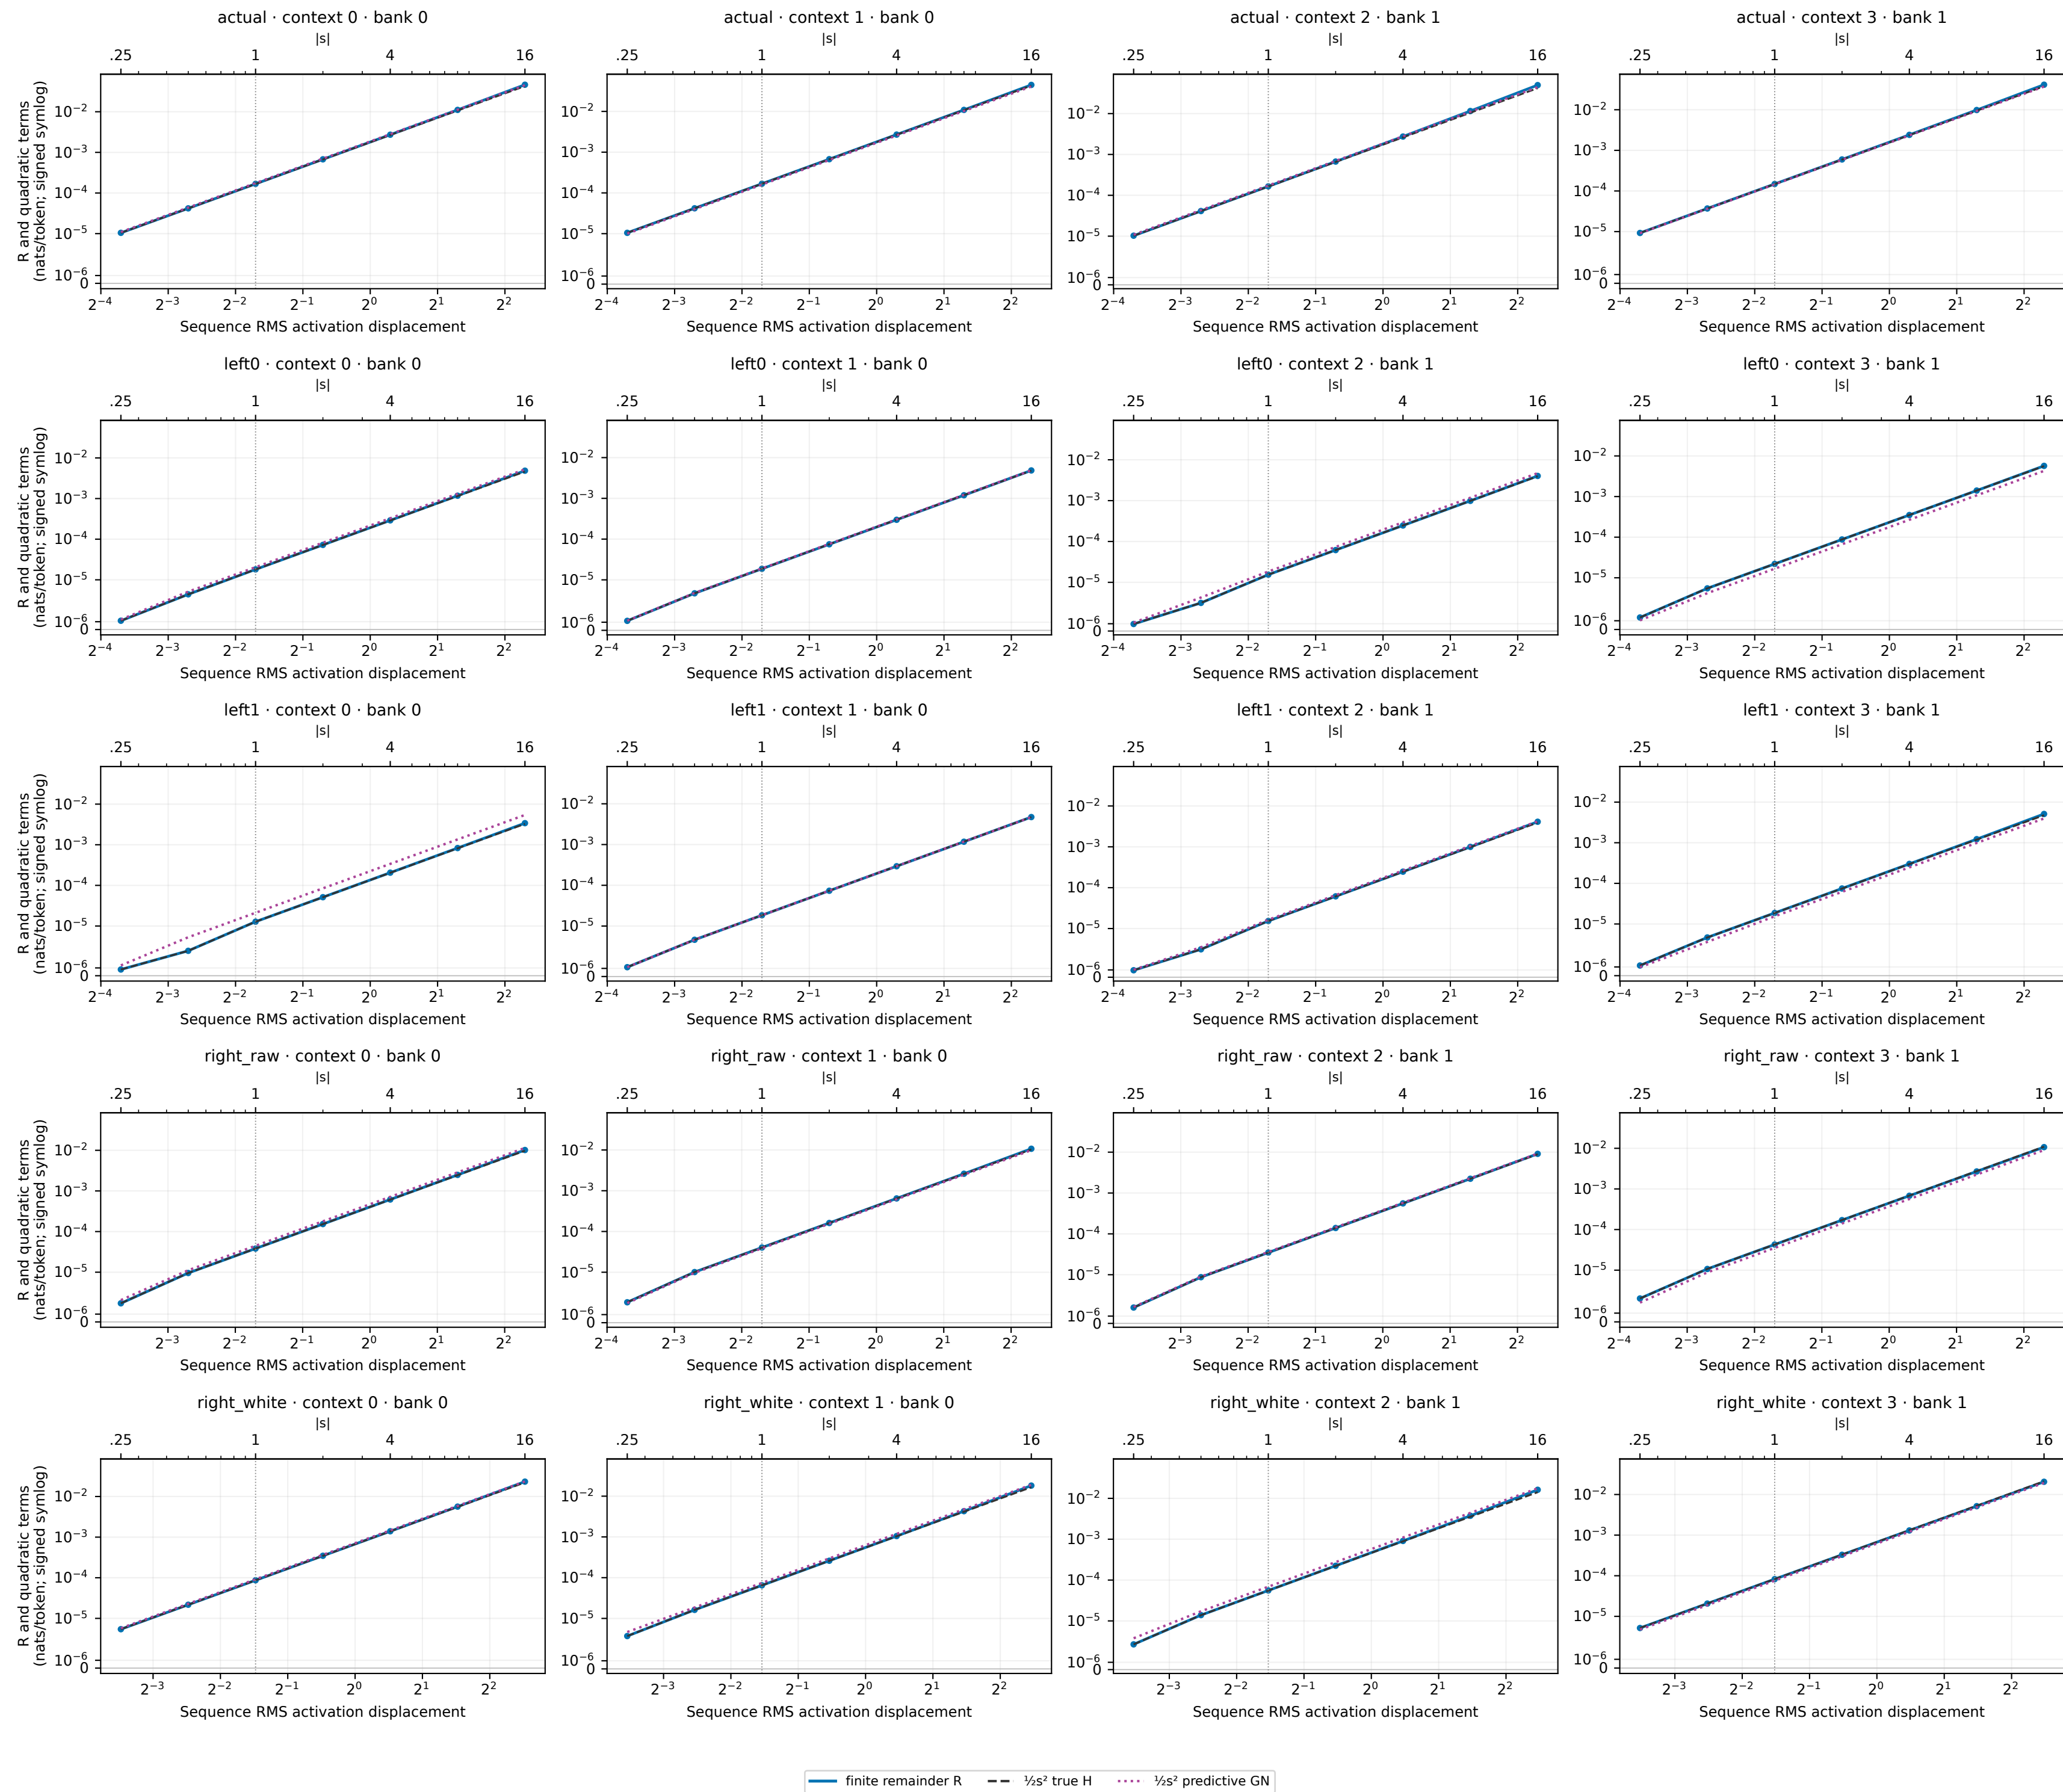

Muon · state 10 · block 8 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

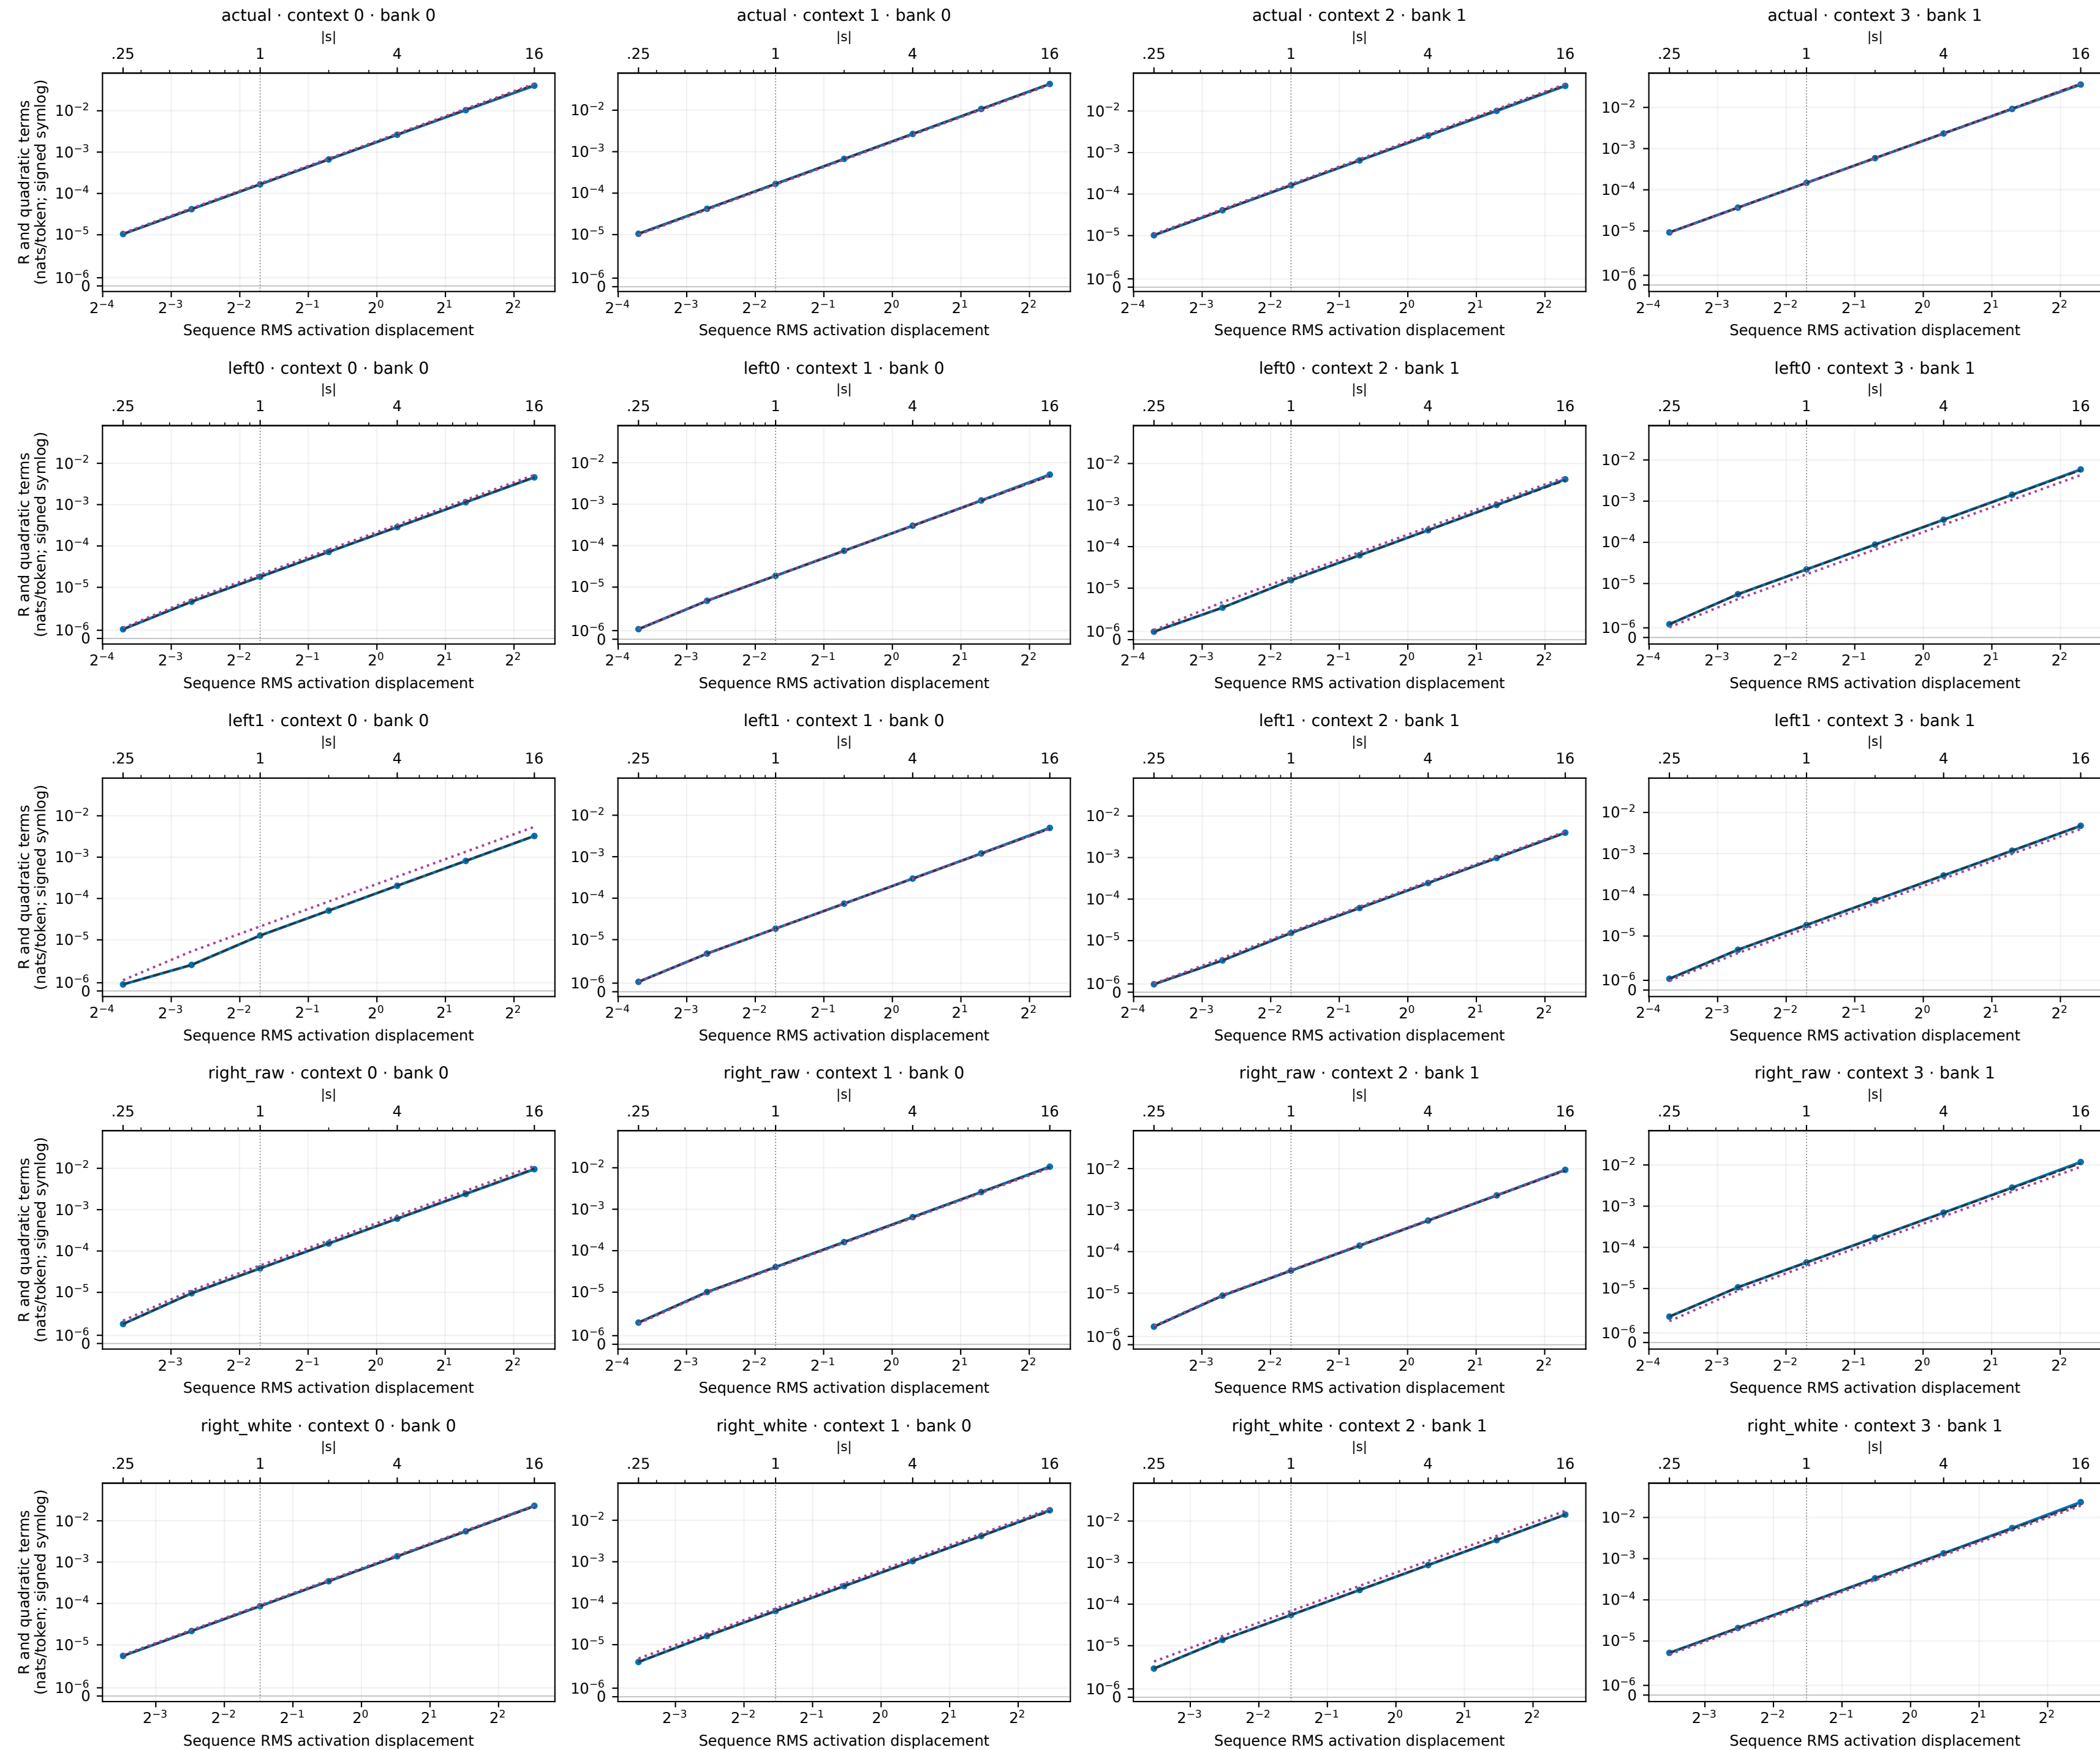

— finite remainder R - - $\frac{1}{2}s^2$ true H ··· $\frac{1}{2}s^2$ predictive GN

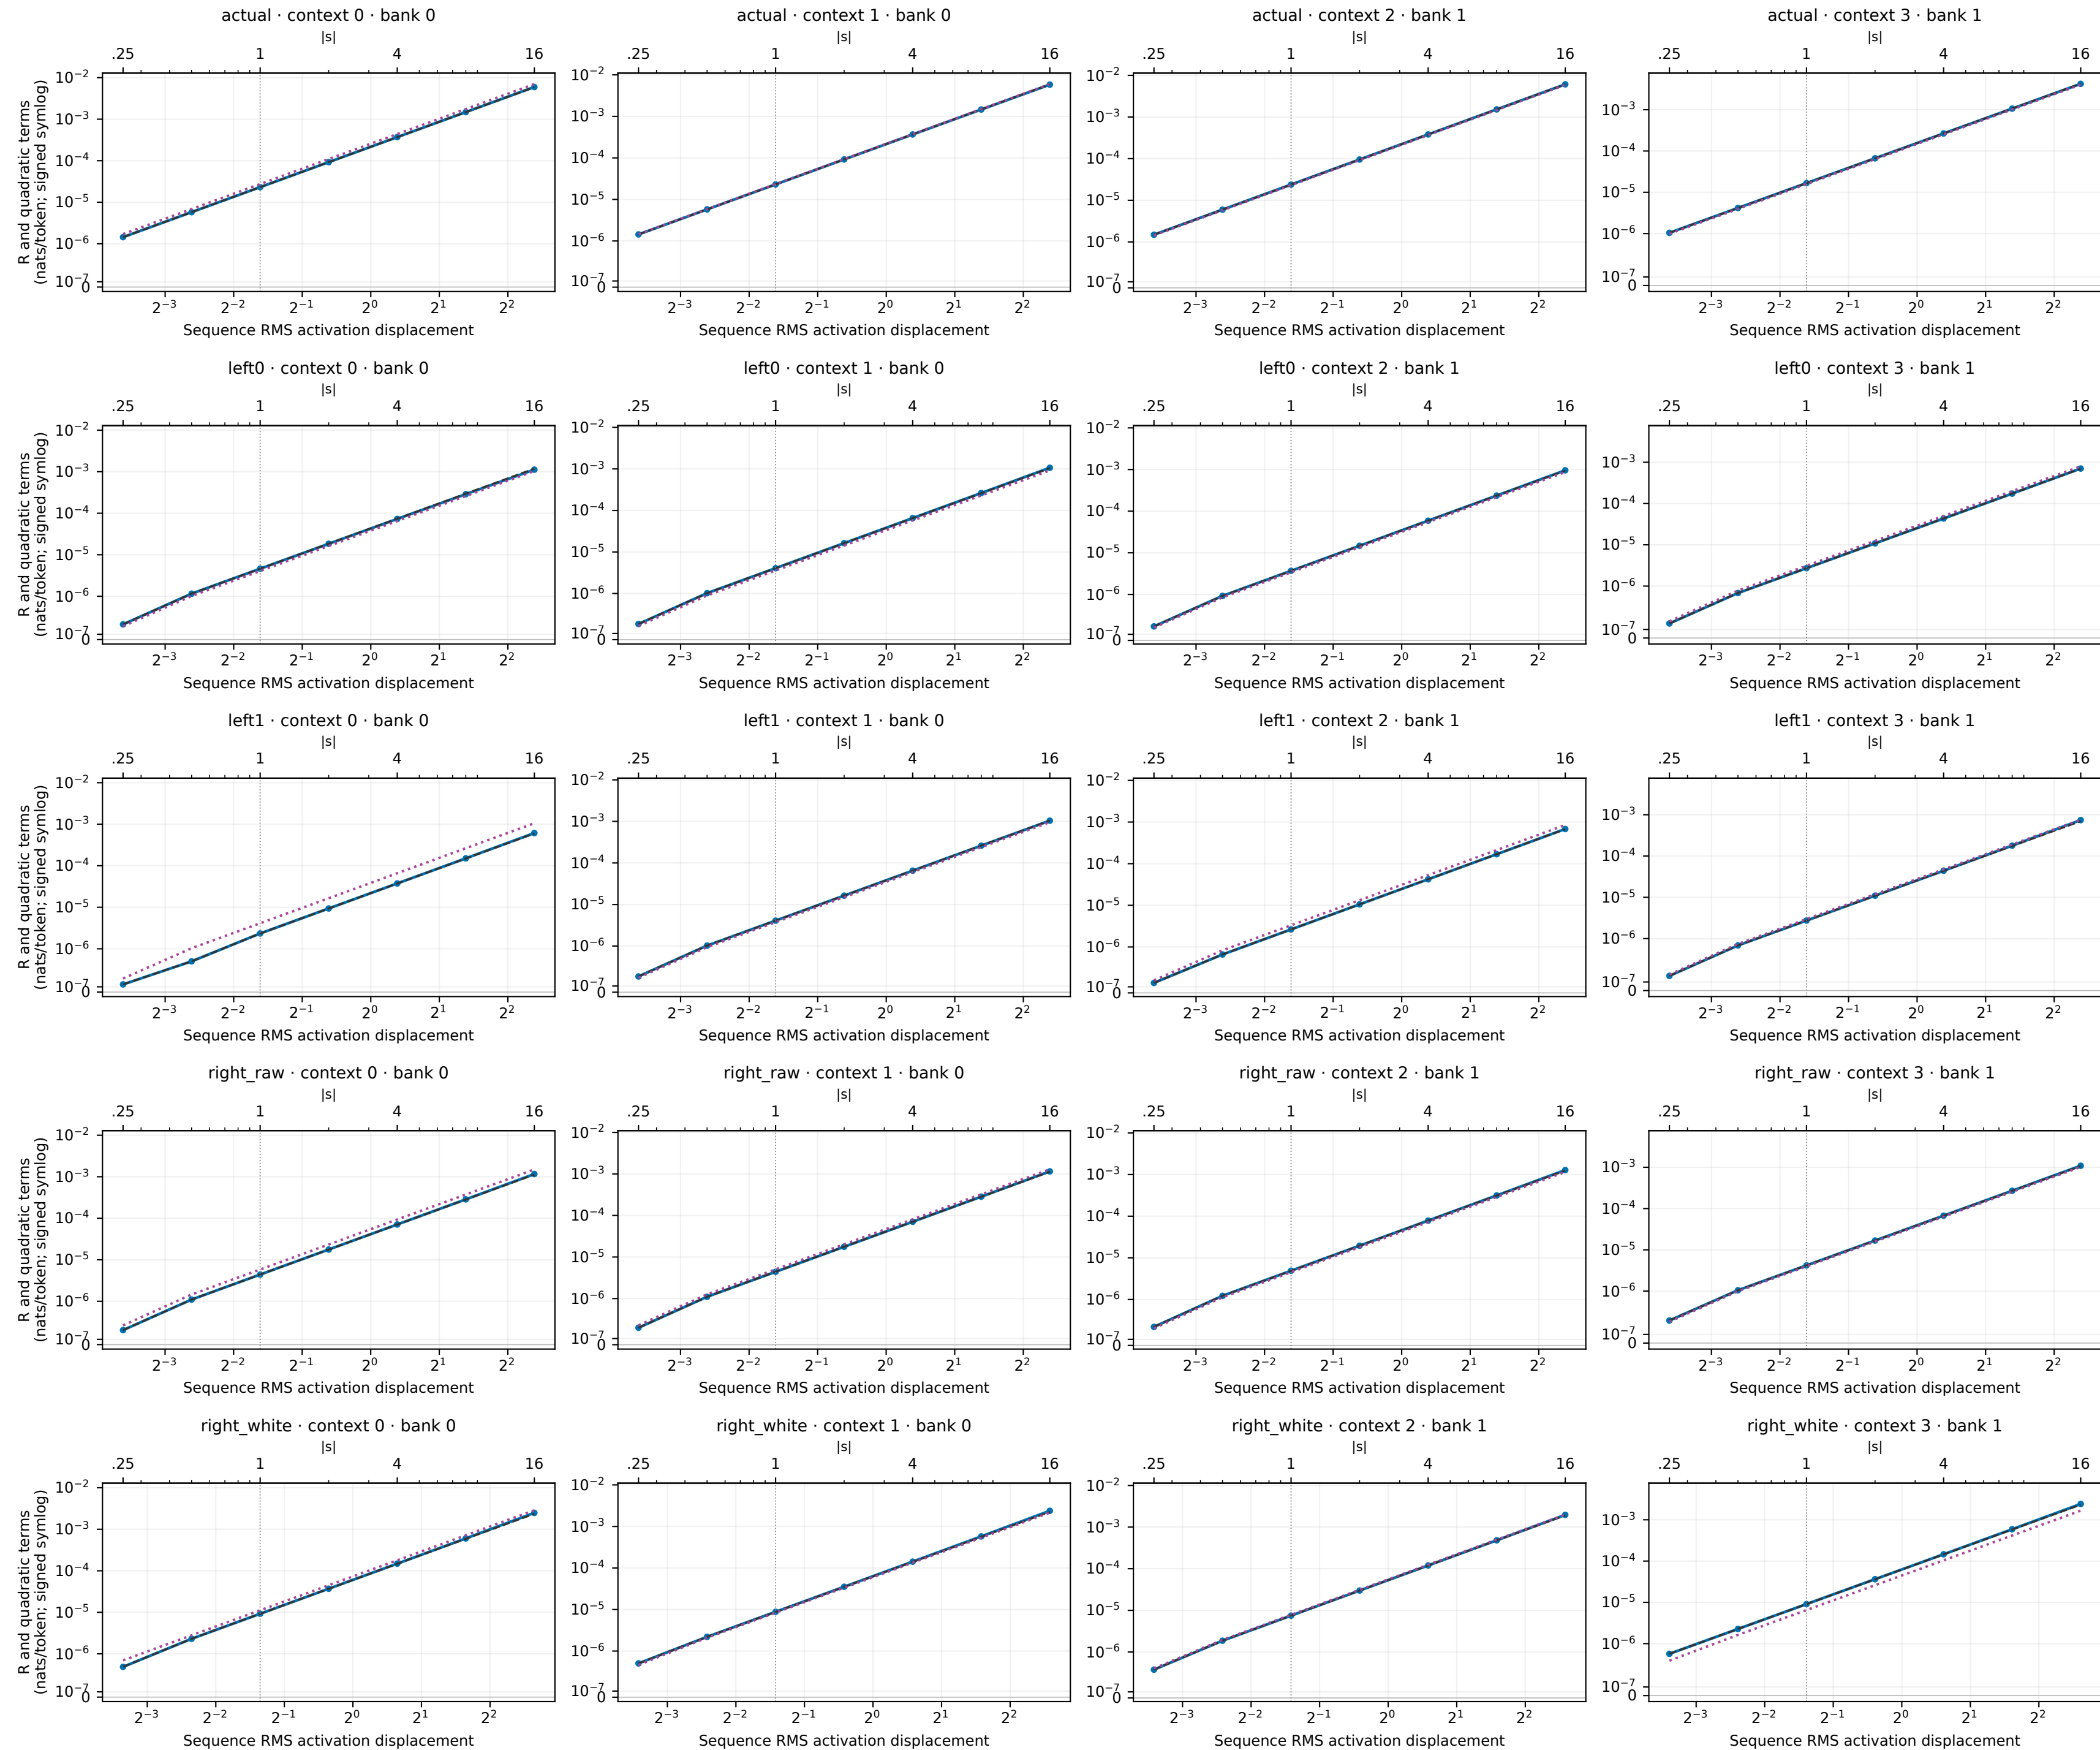

Muon · state 500 · block 1 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

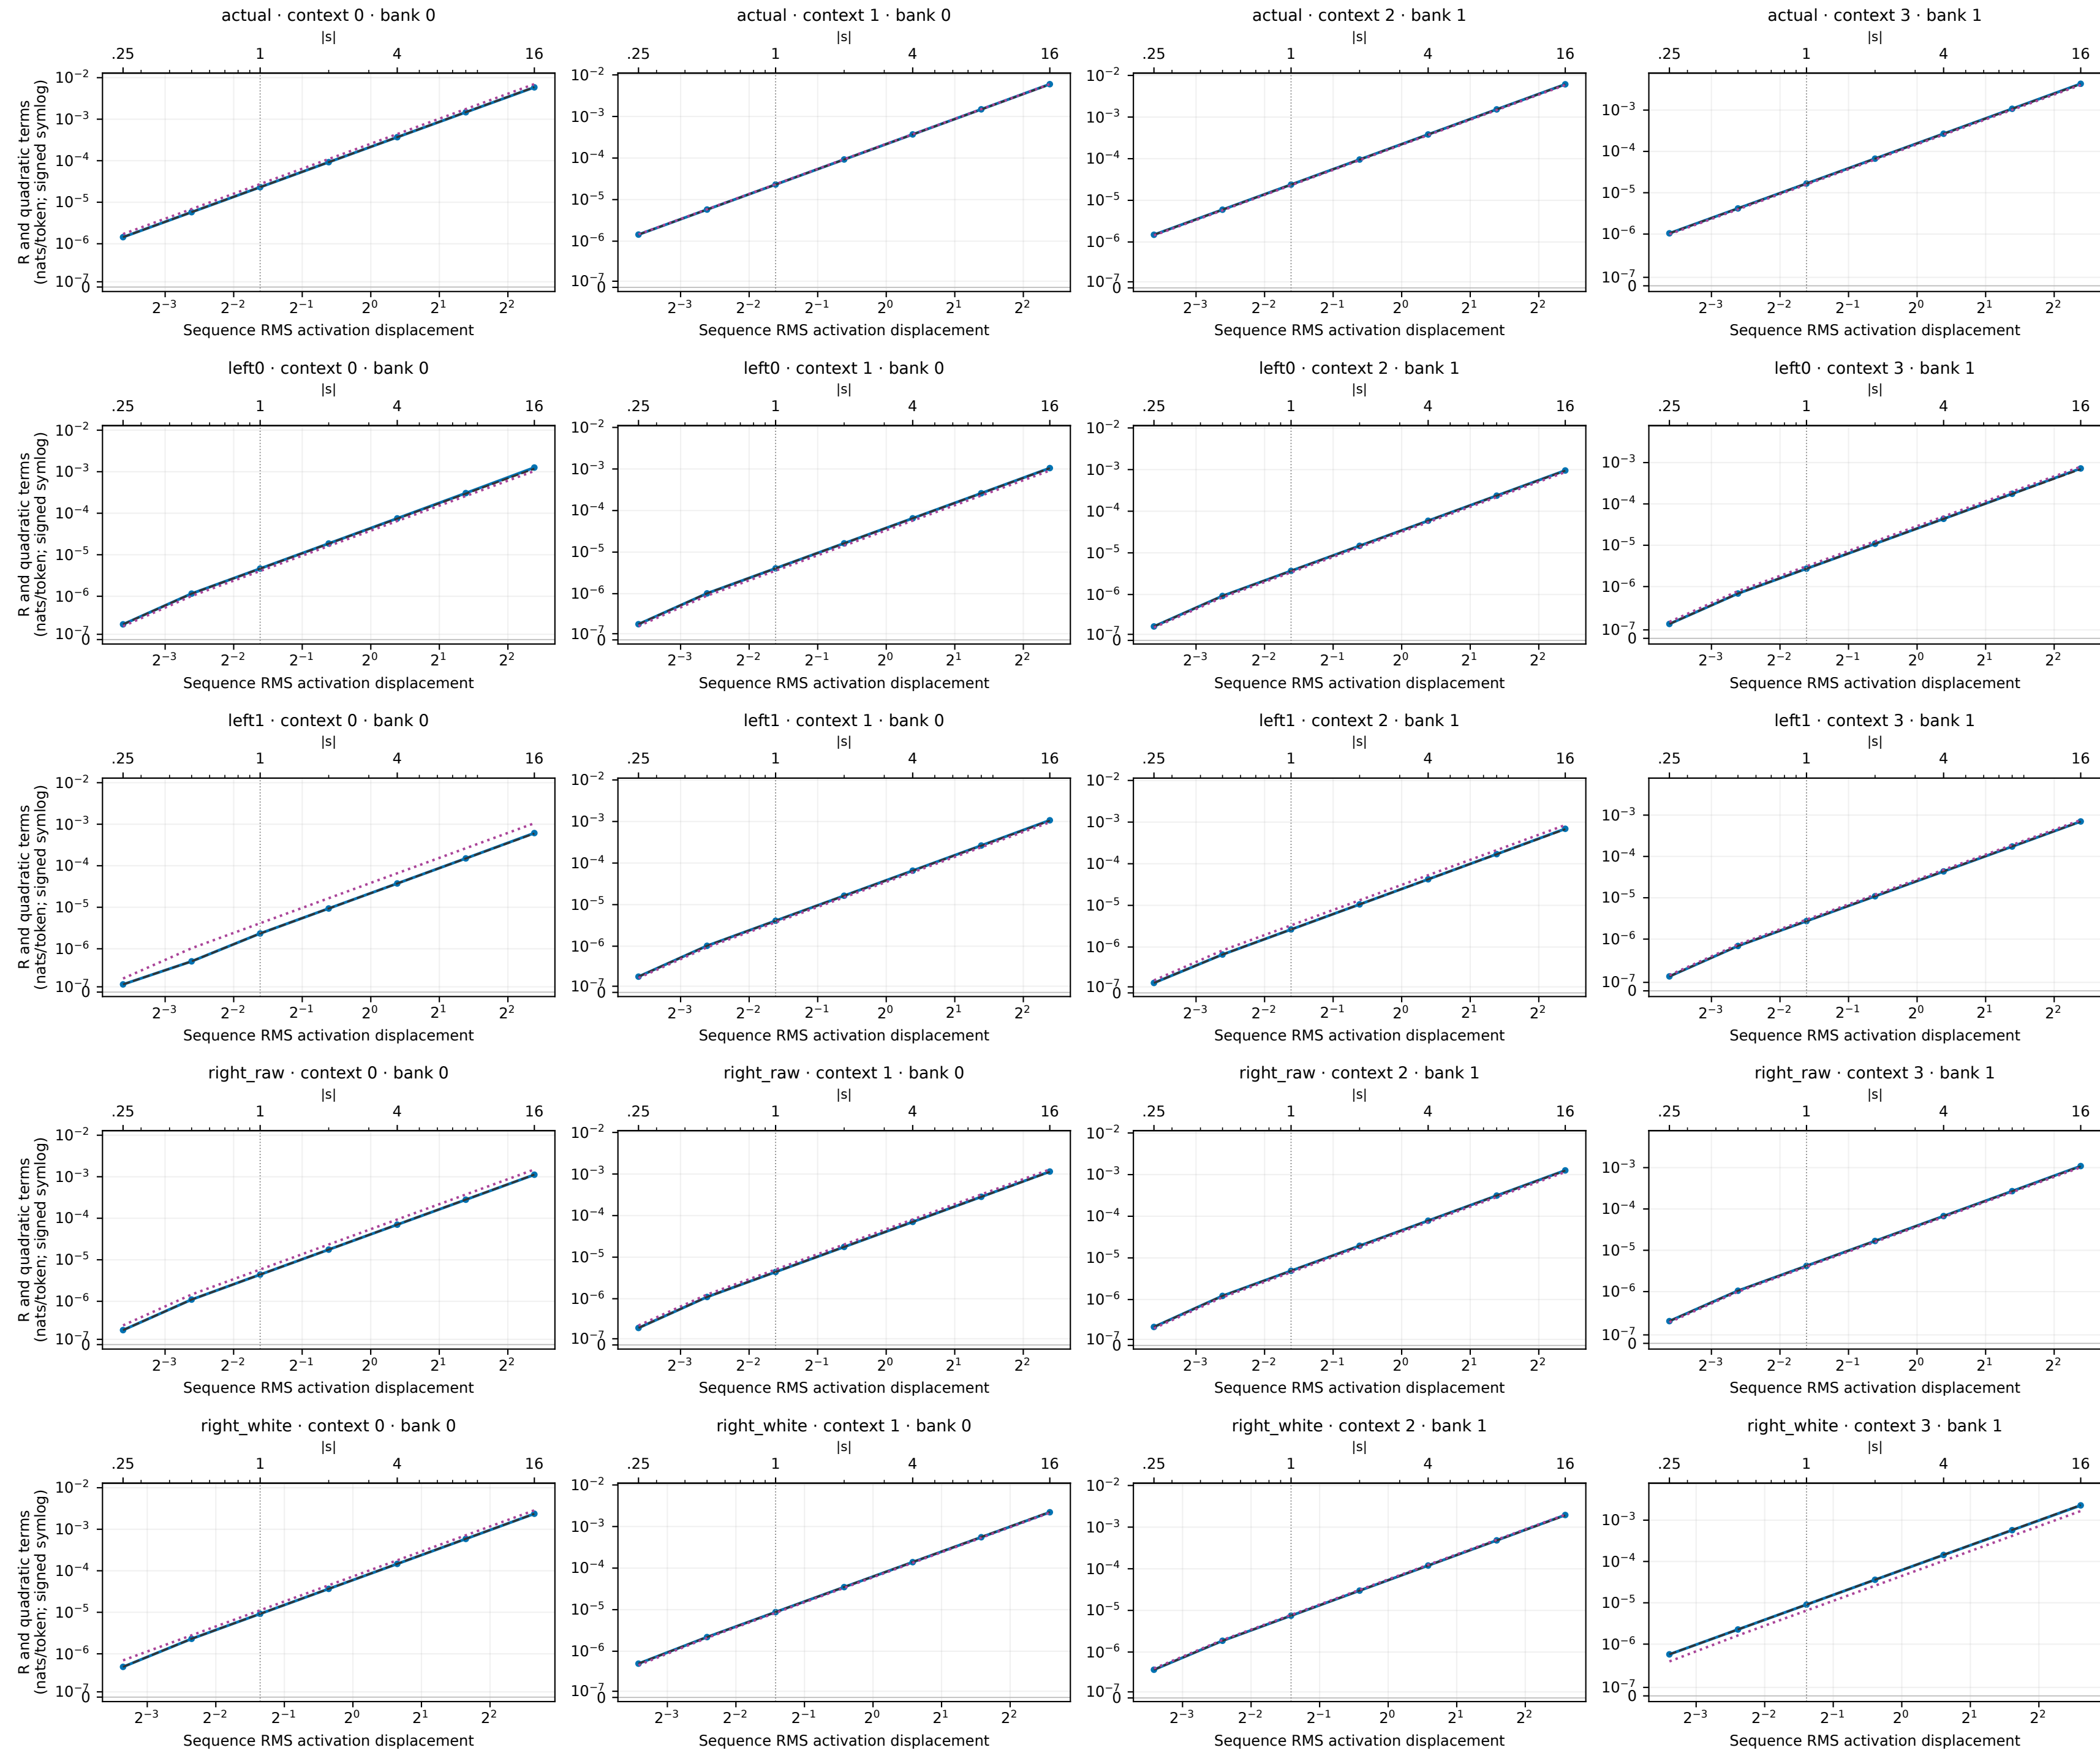

Muon · state 500 · block 1 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

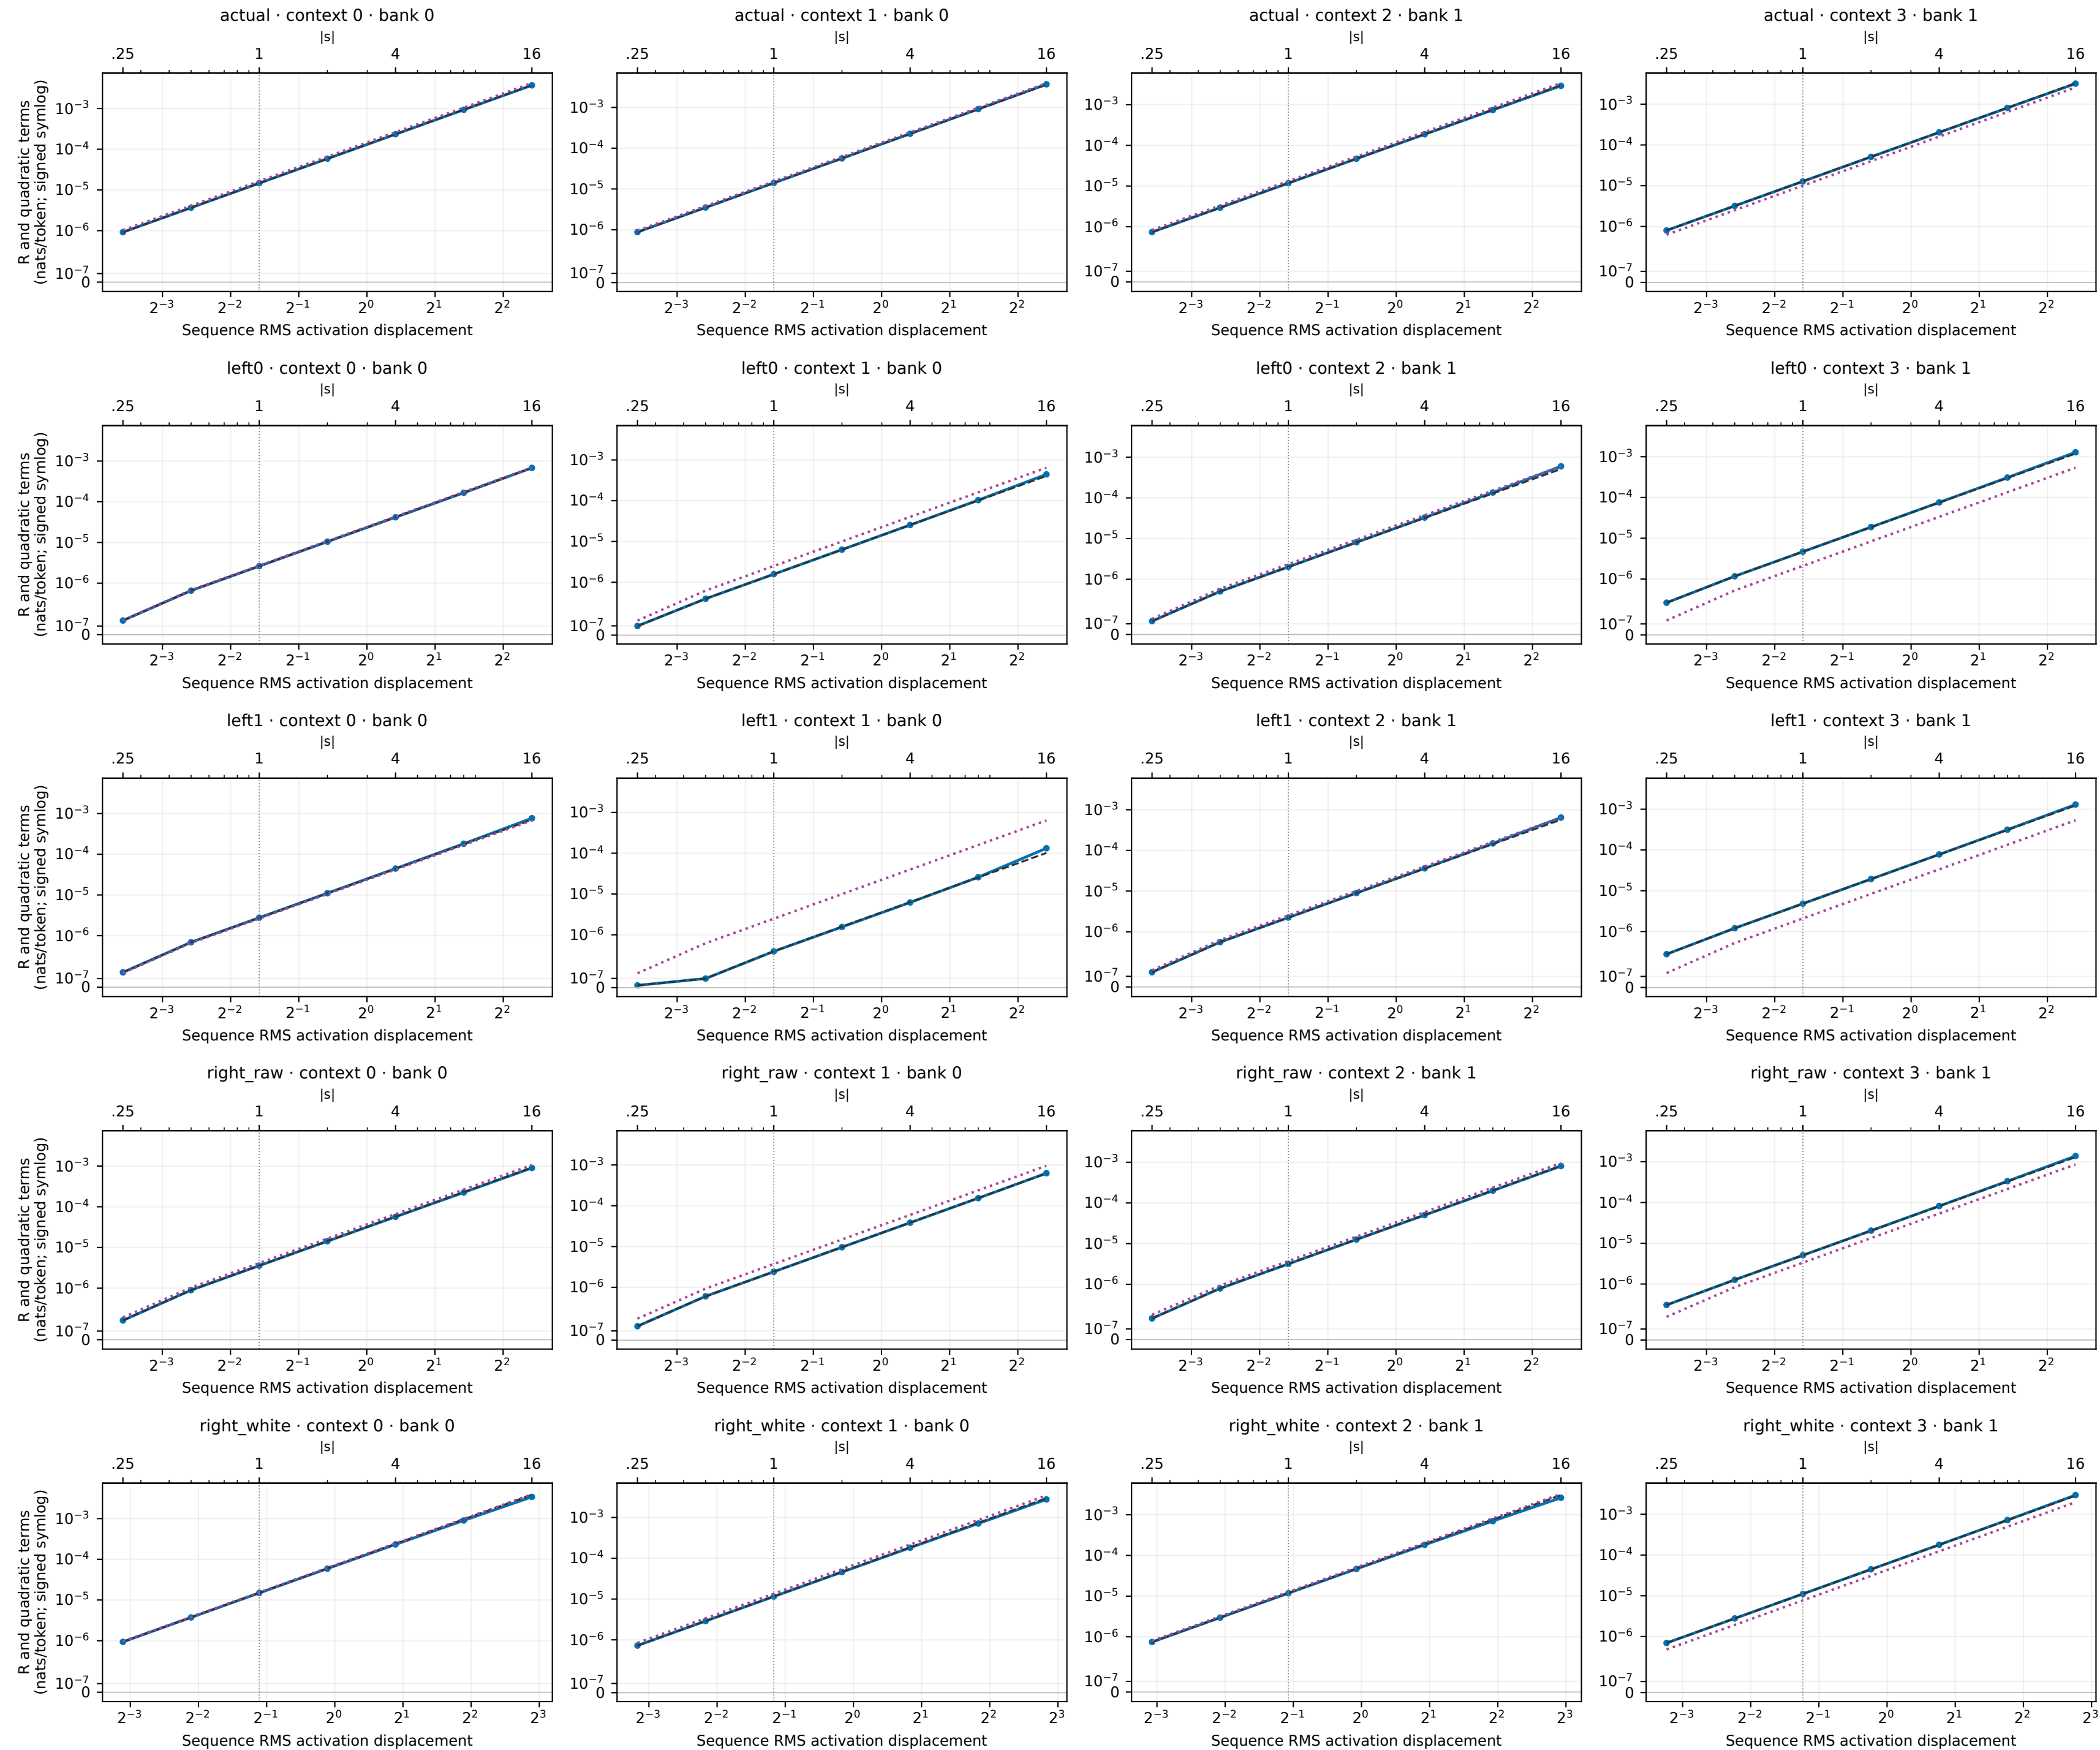

Muon · state 500 · block 4 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

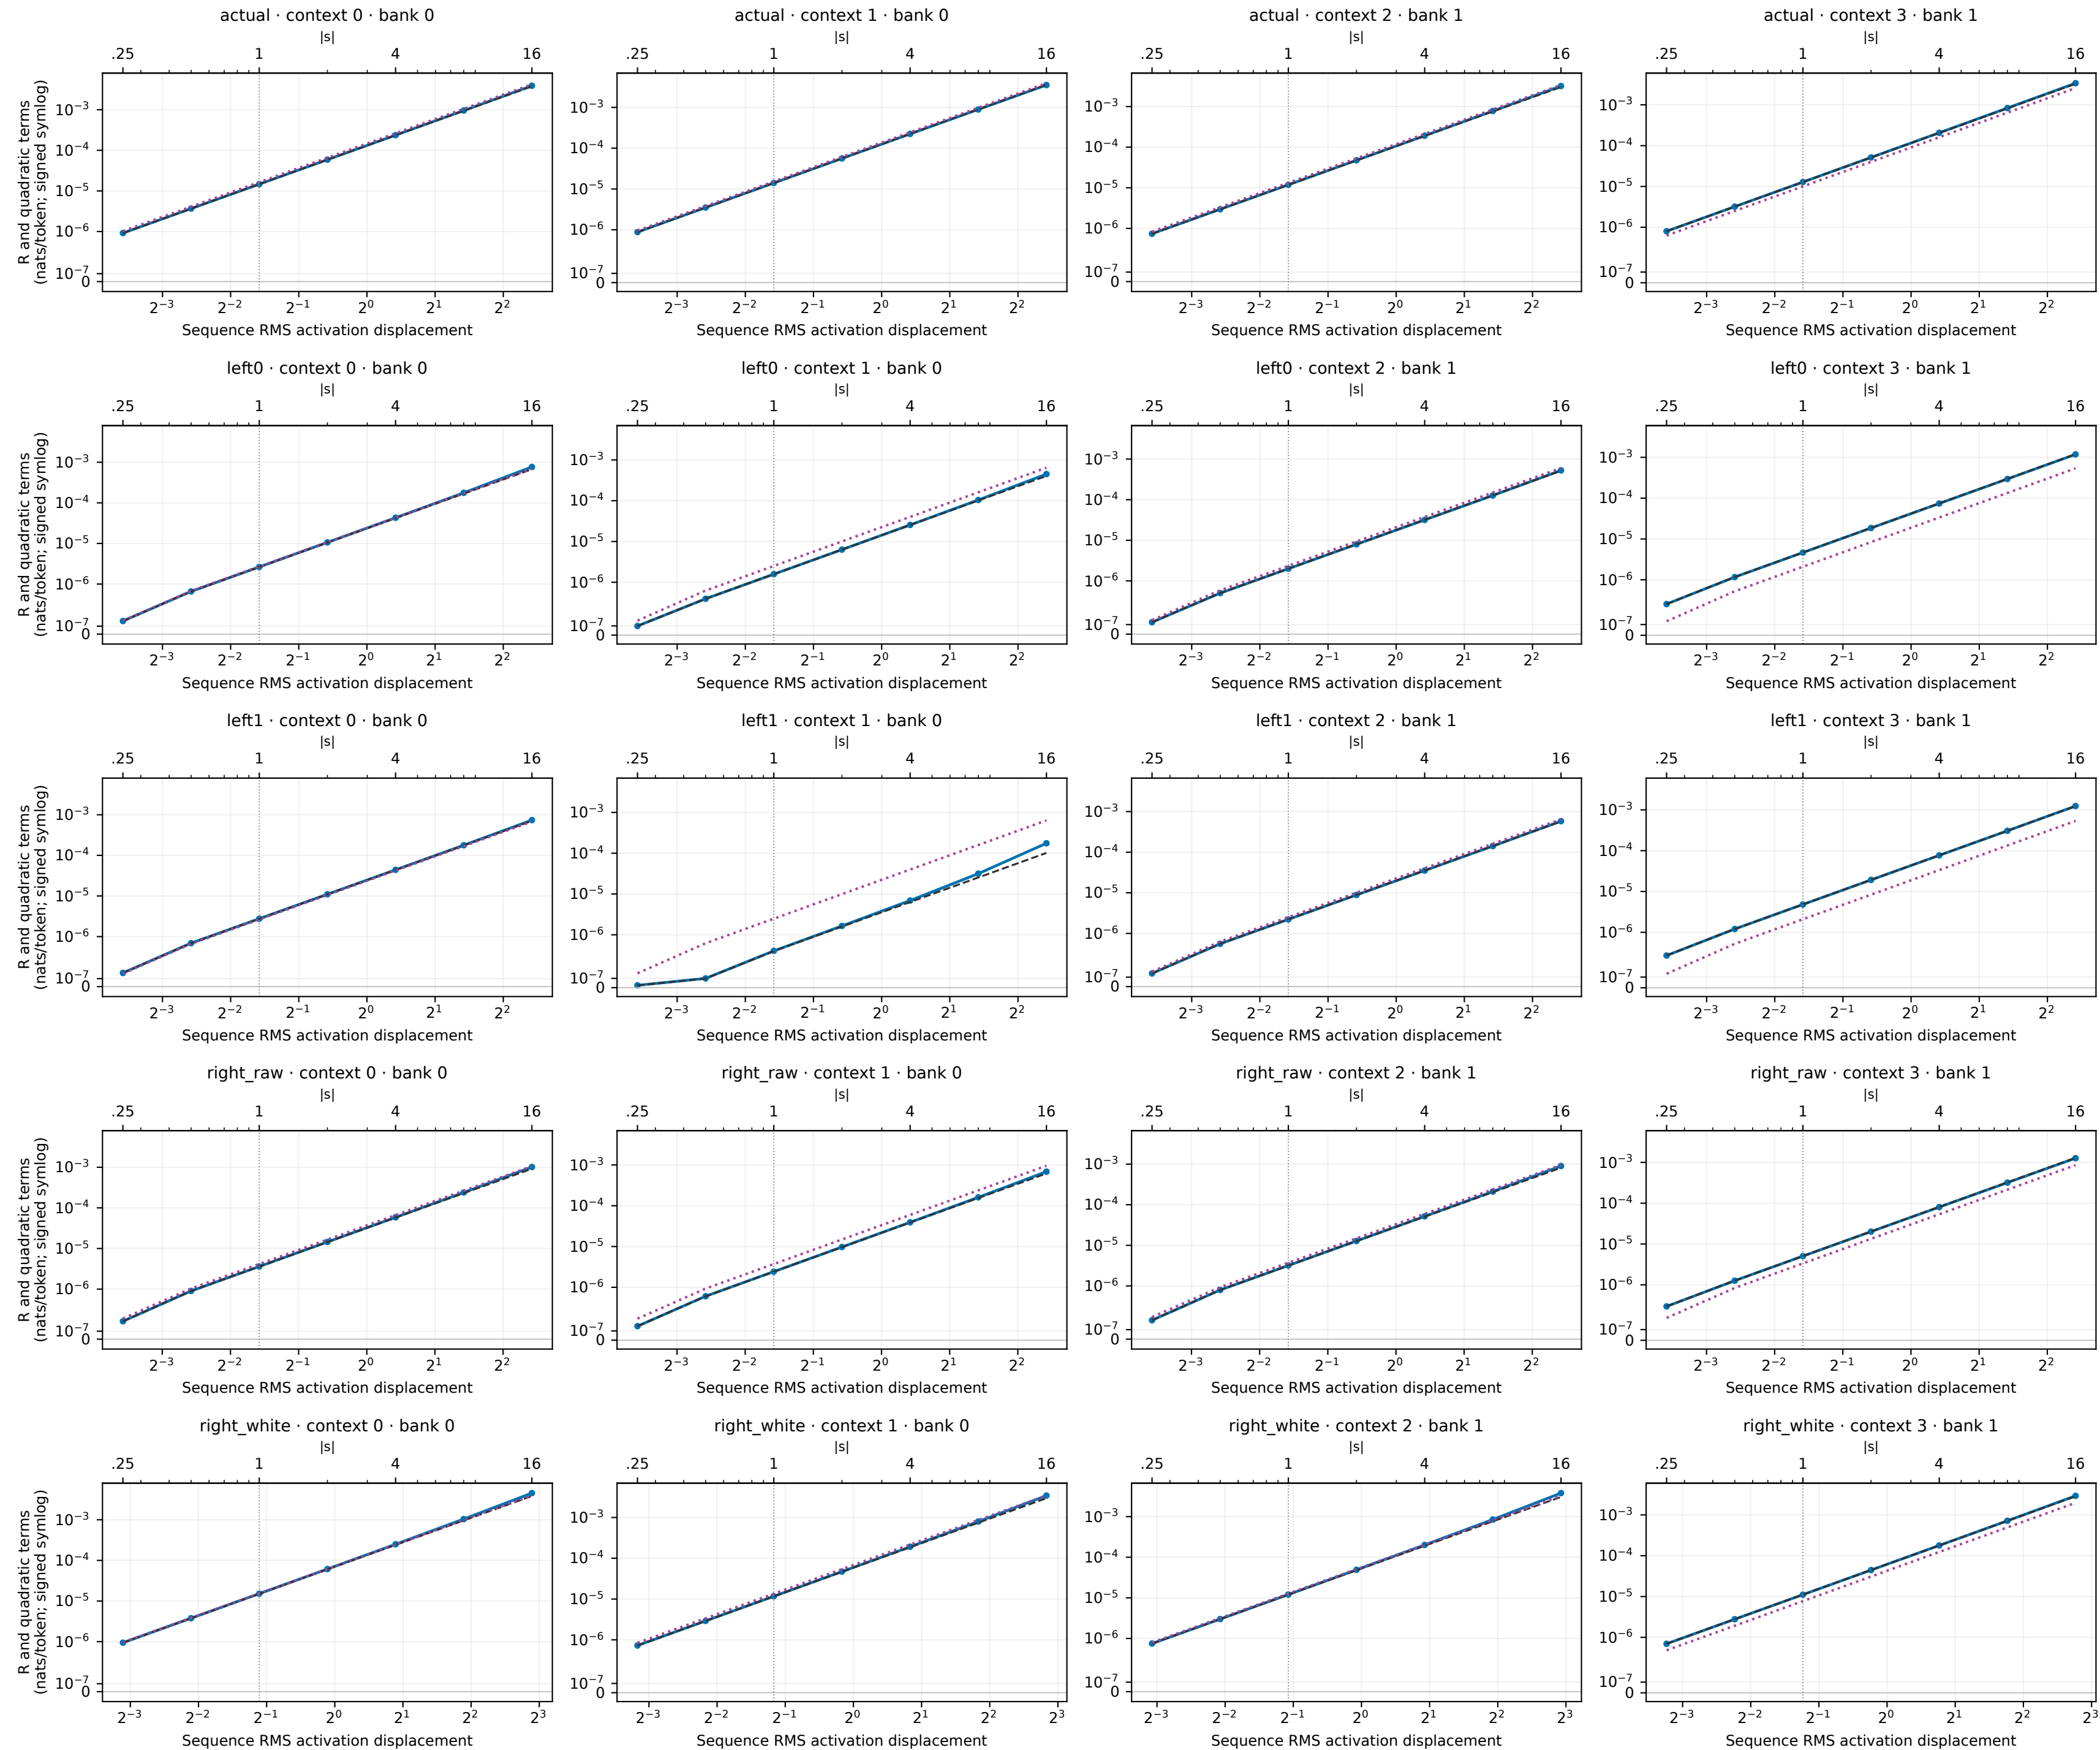

Muon · state 500 · block 4 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

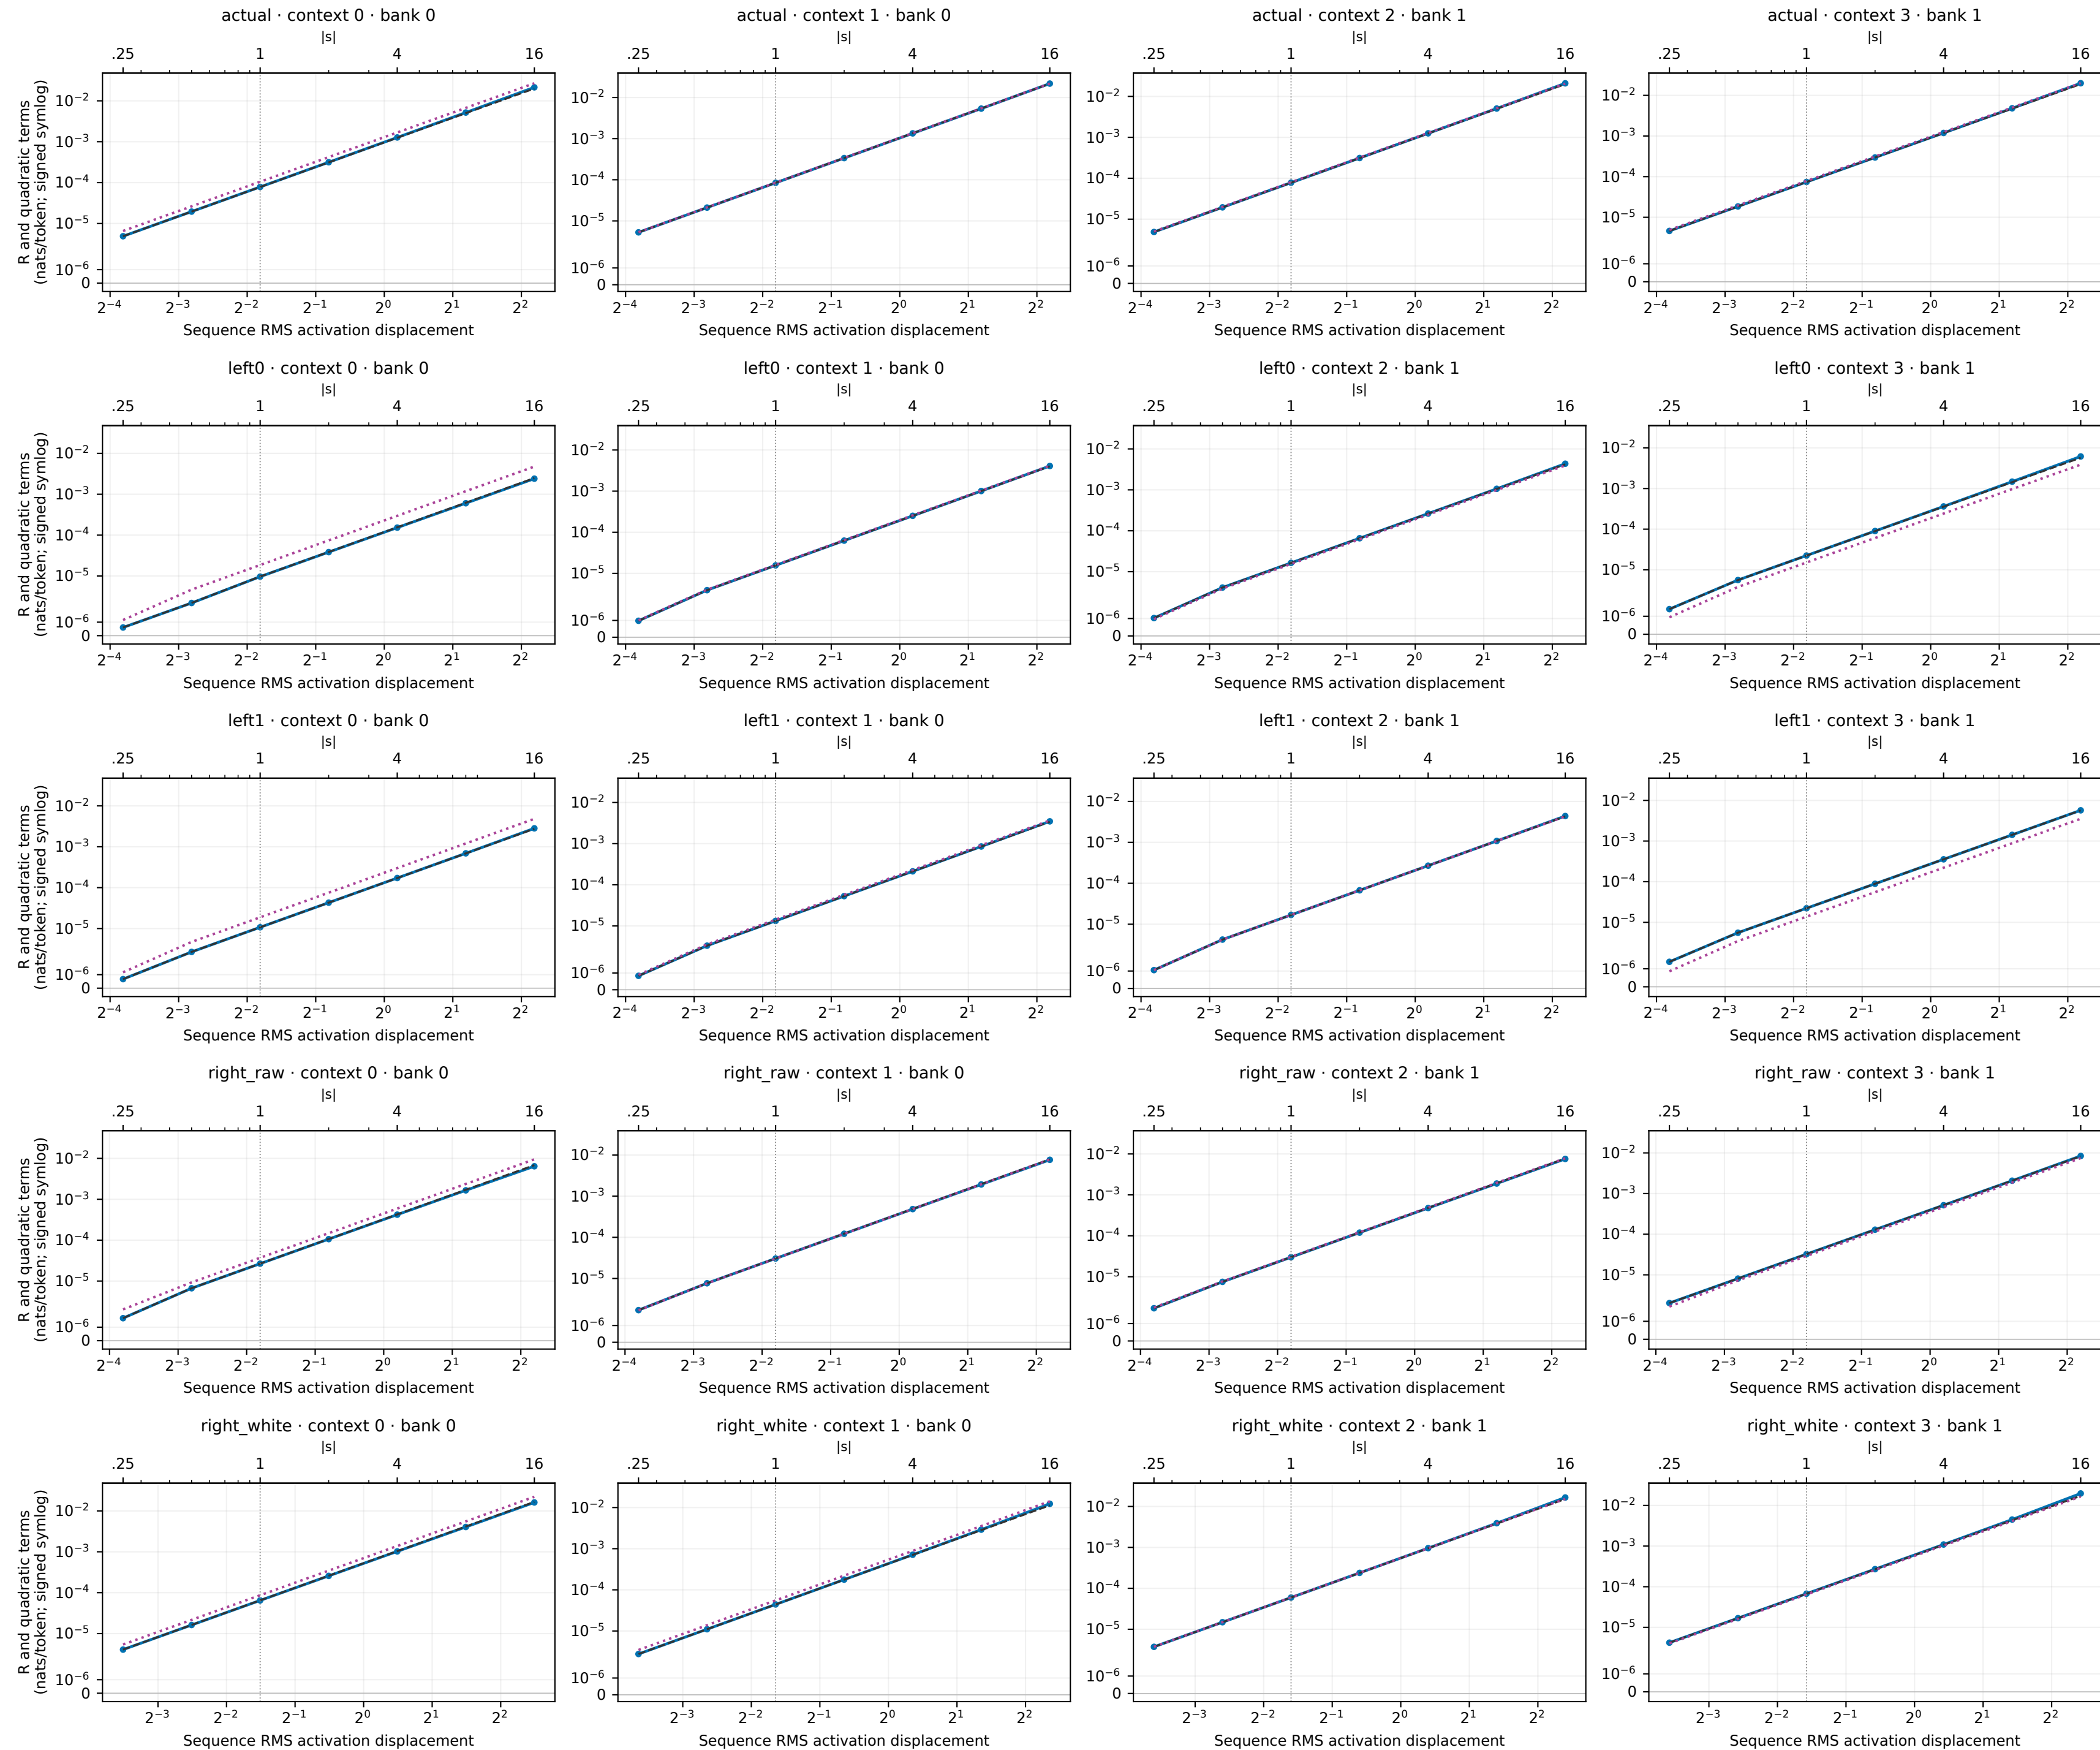

Muon · state 500 · block 8 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

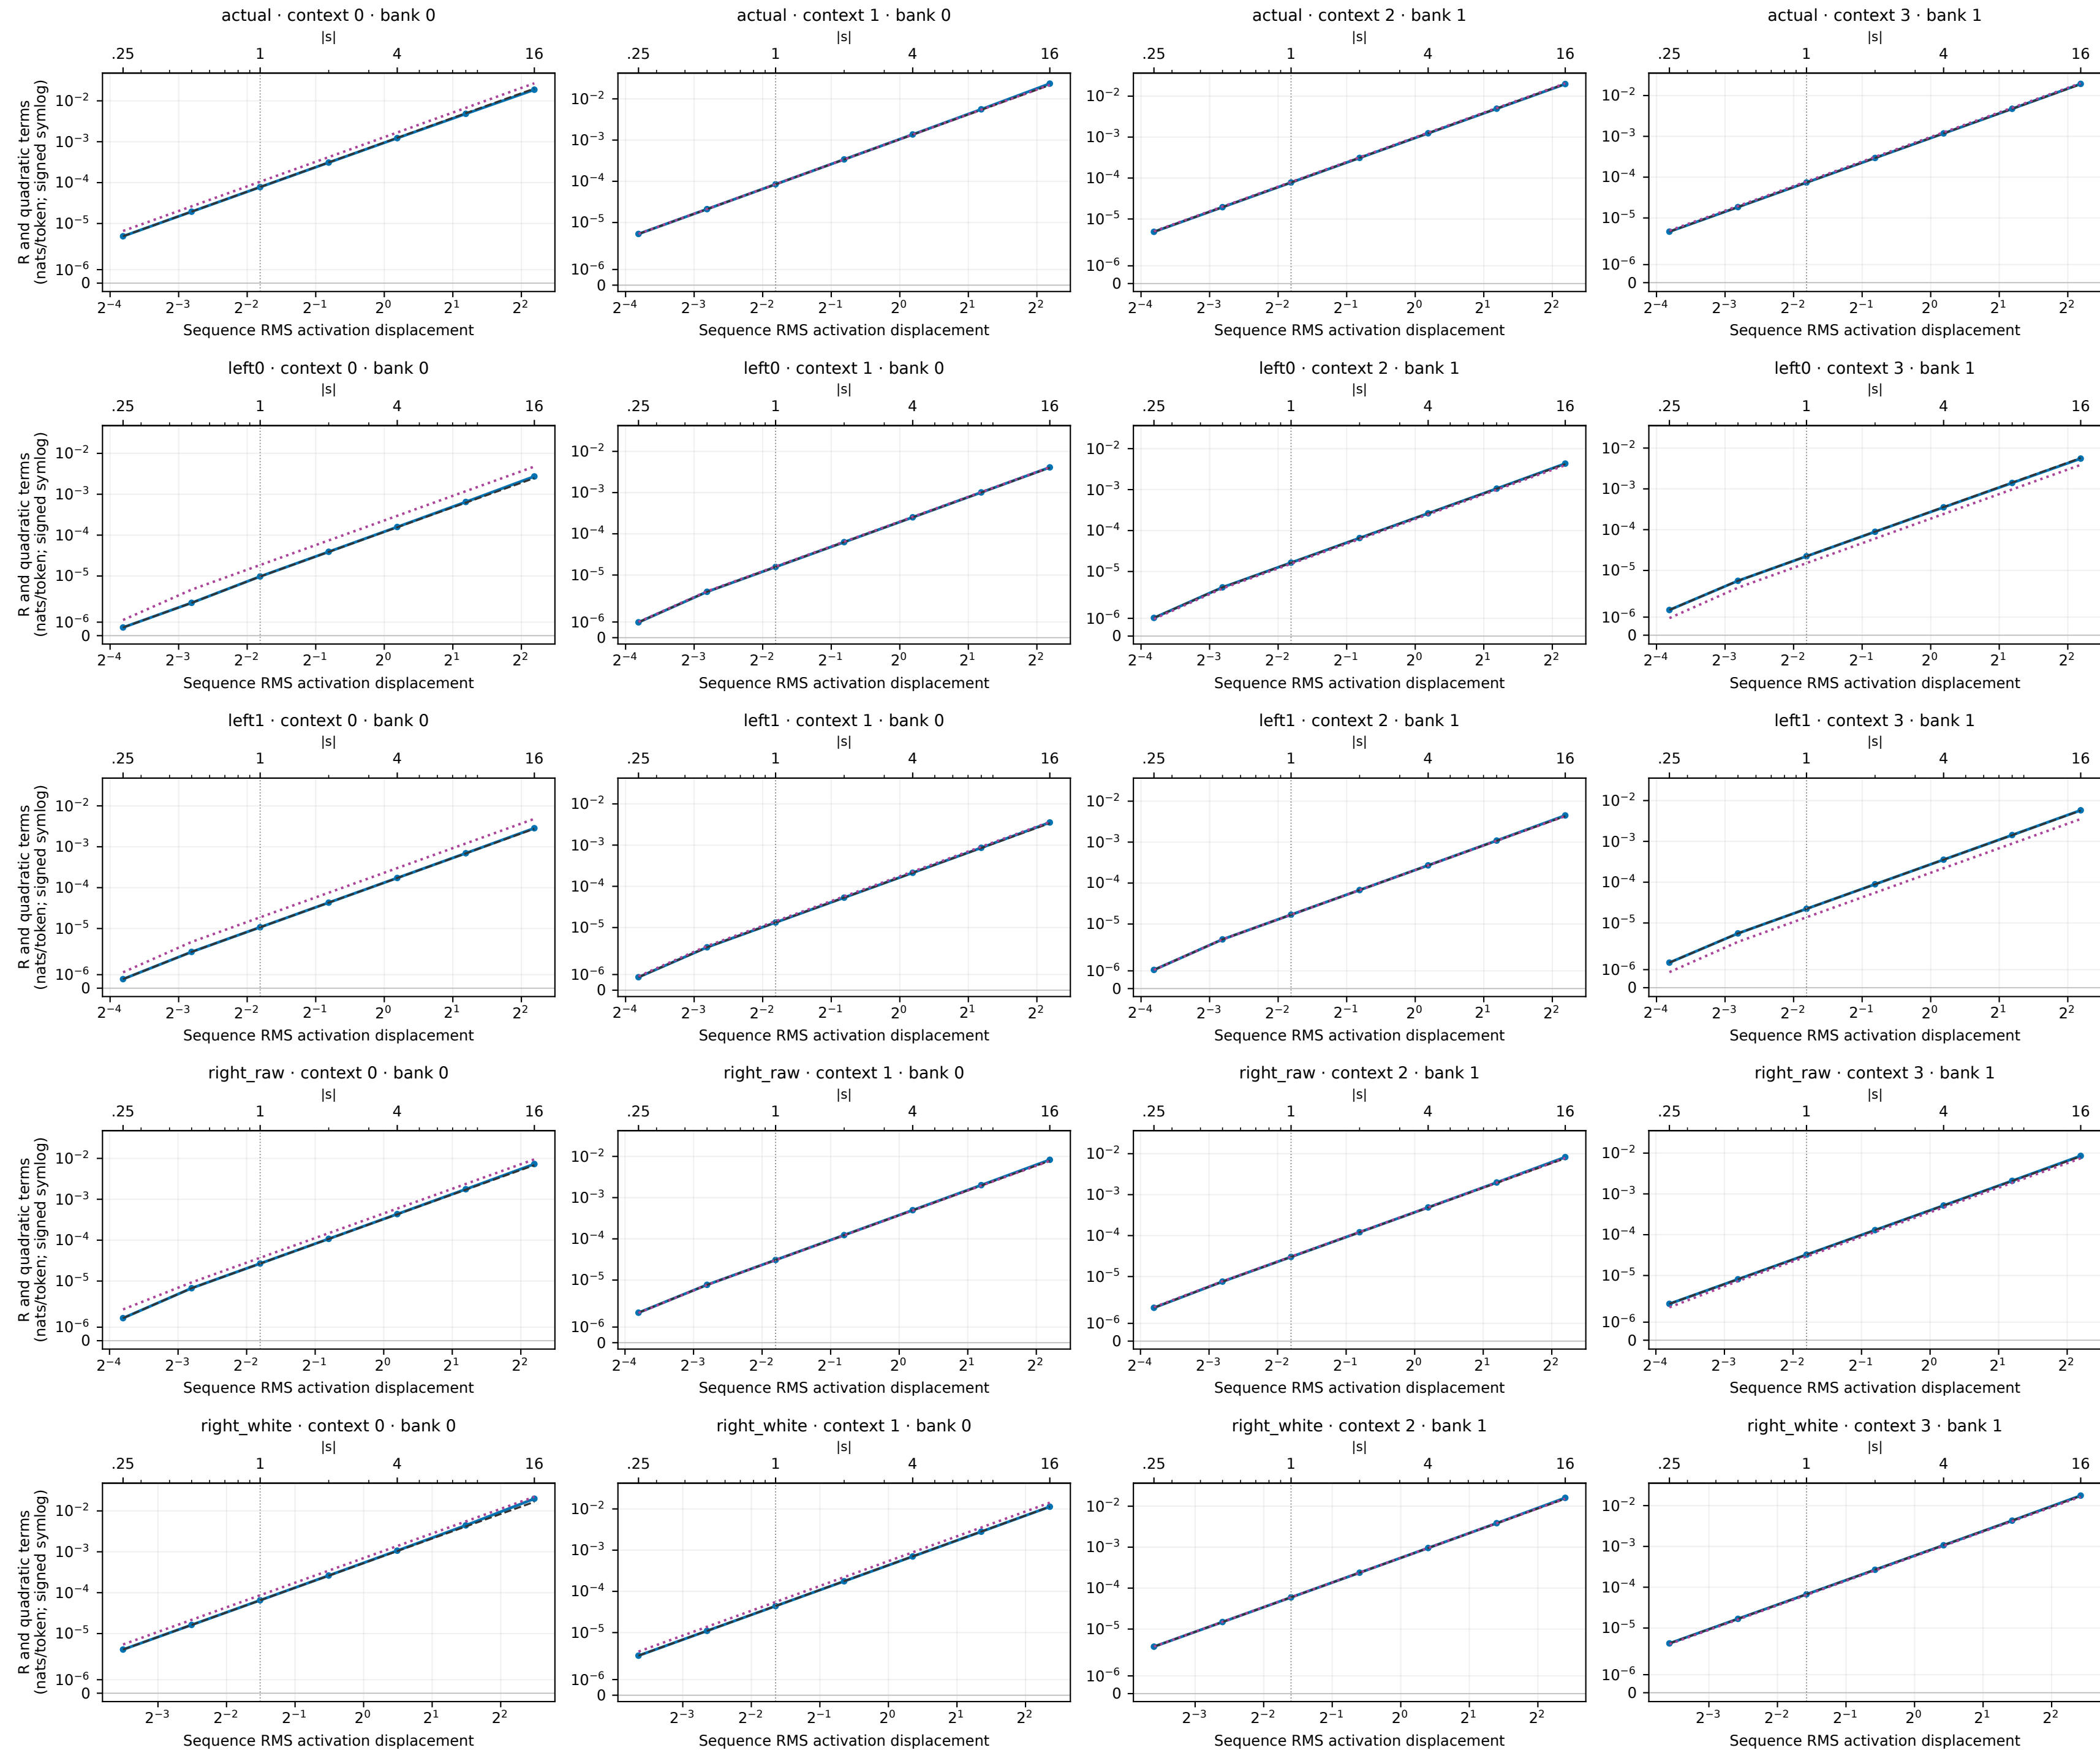

Muon · state 500 · block 8 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

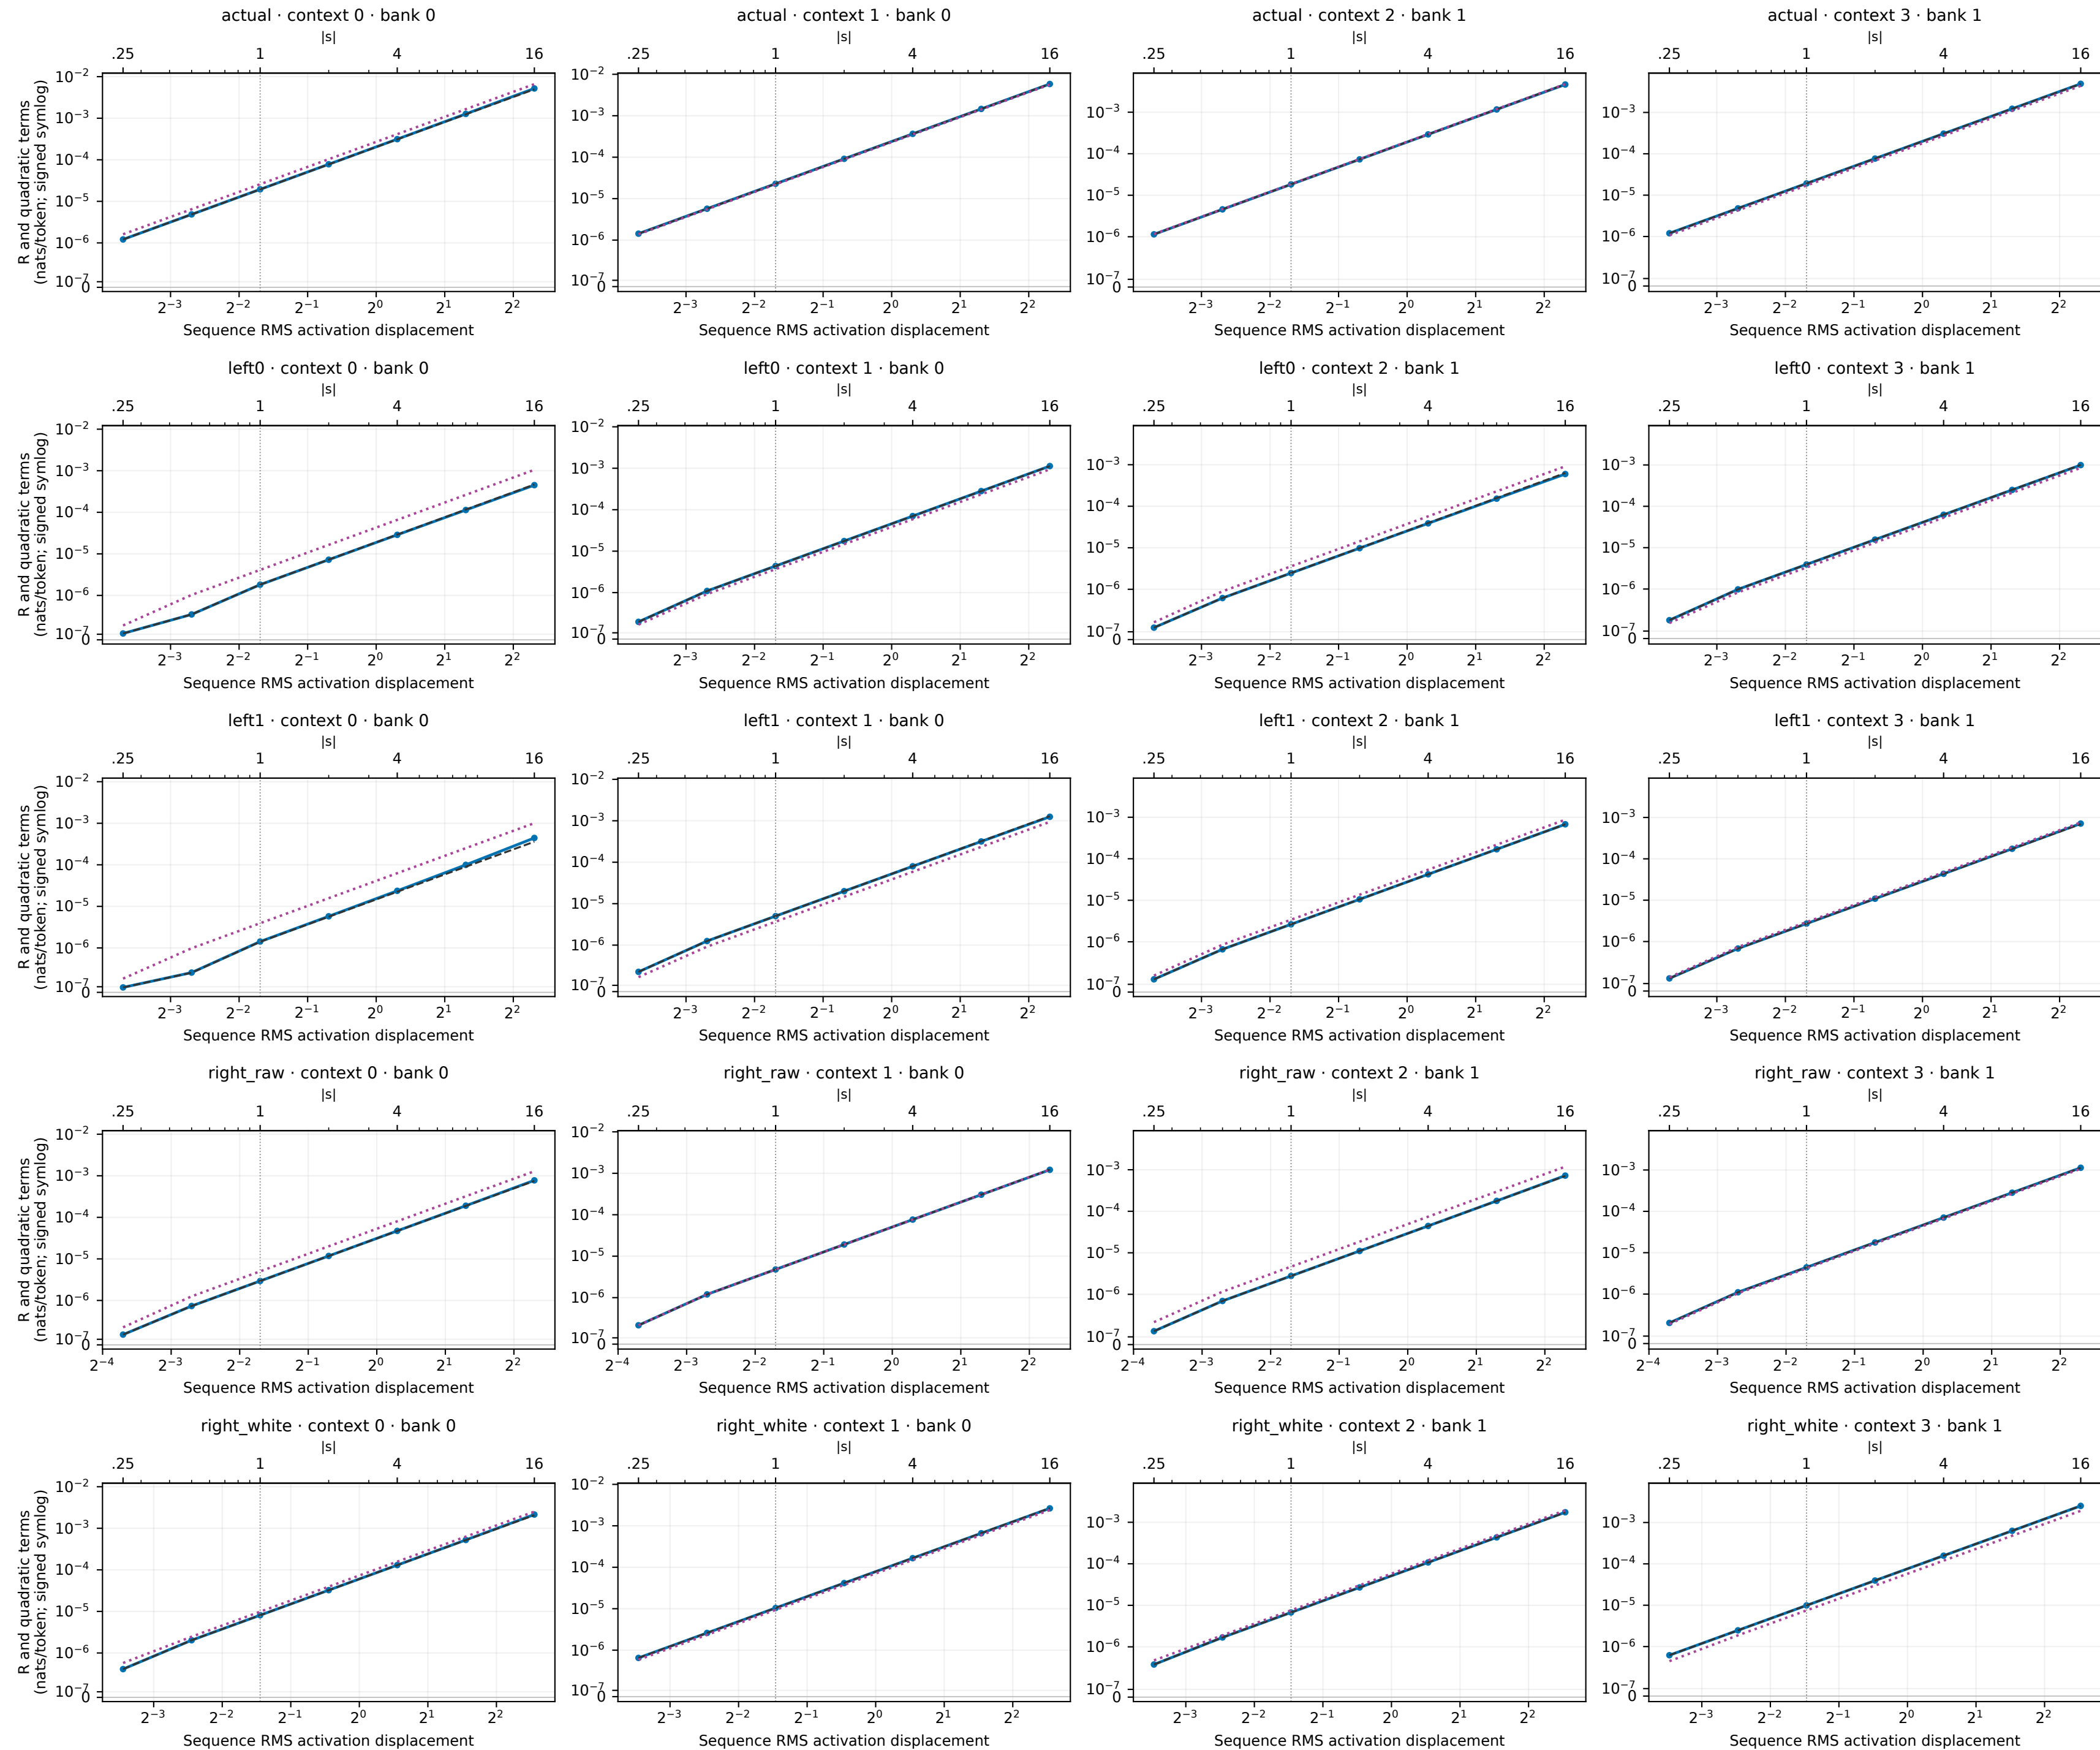

Muon · state 1300 · block 1 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

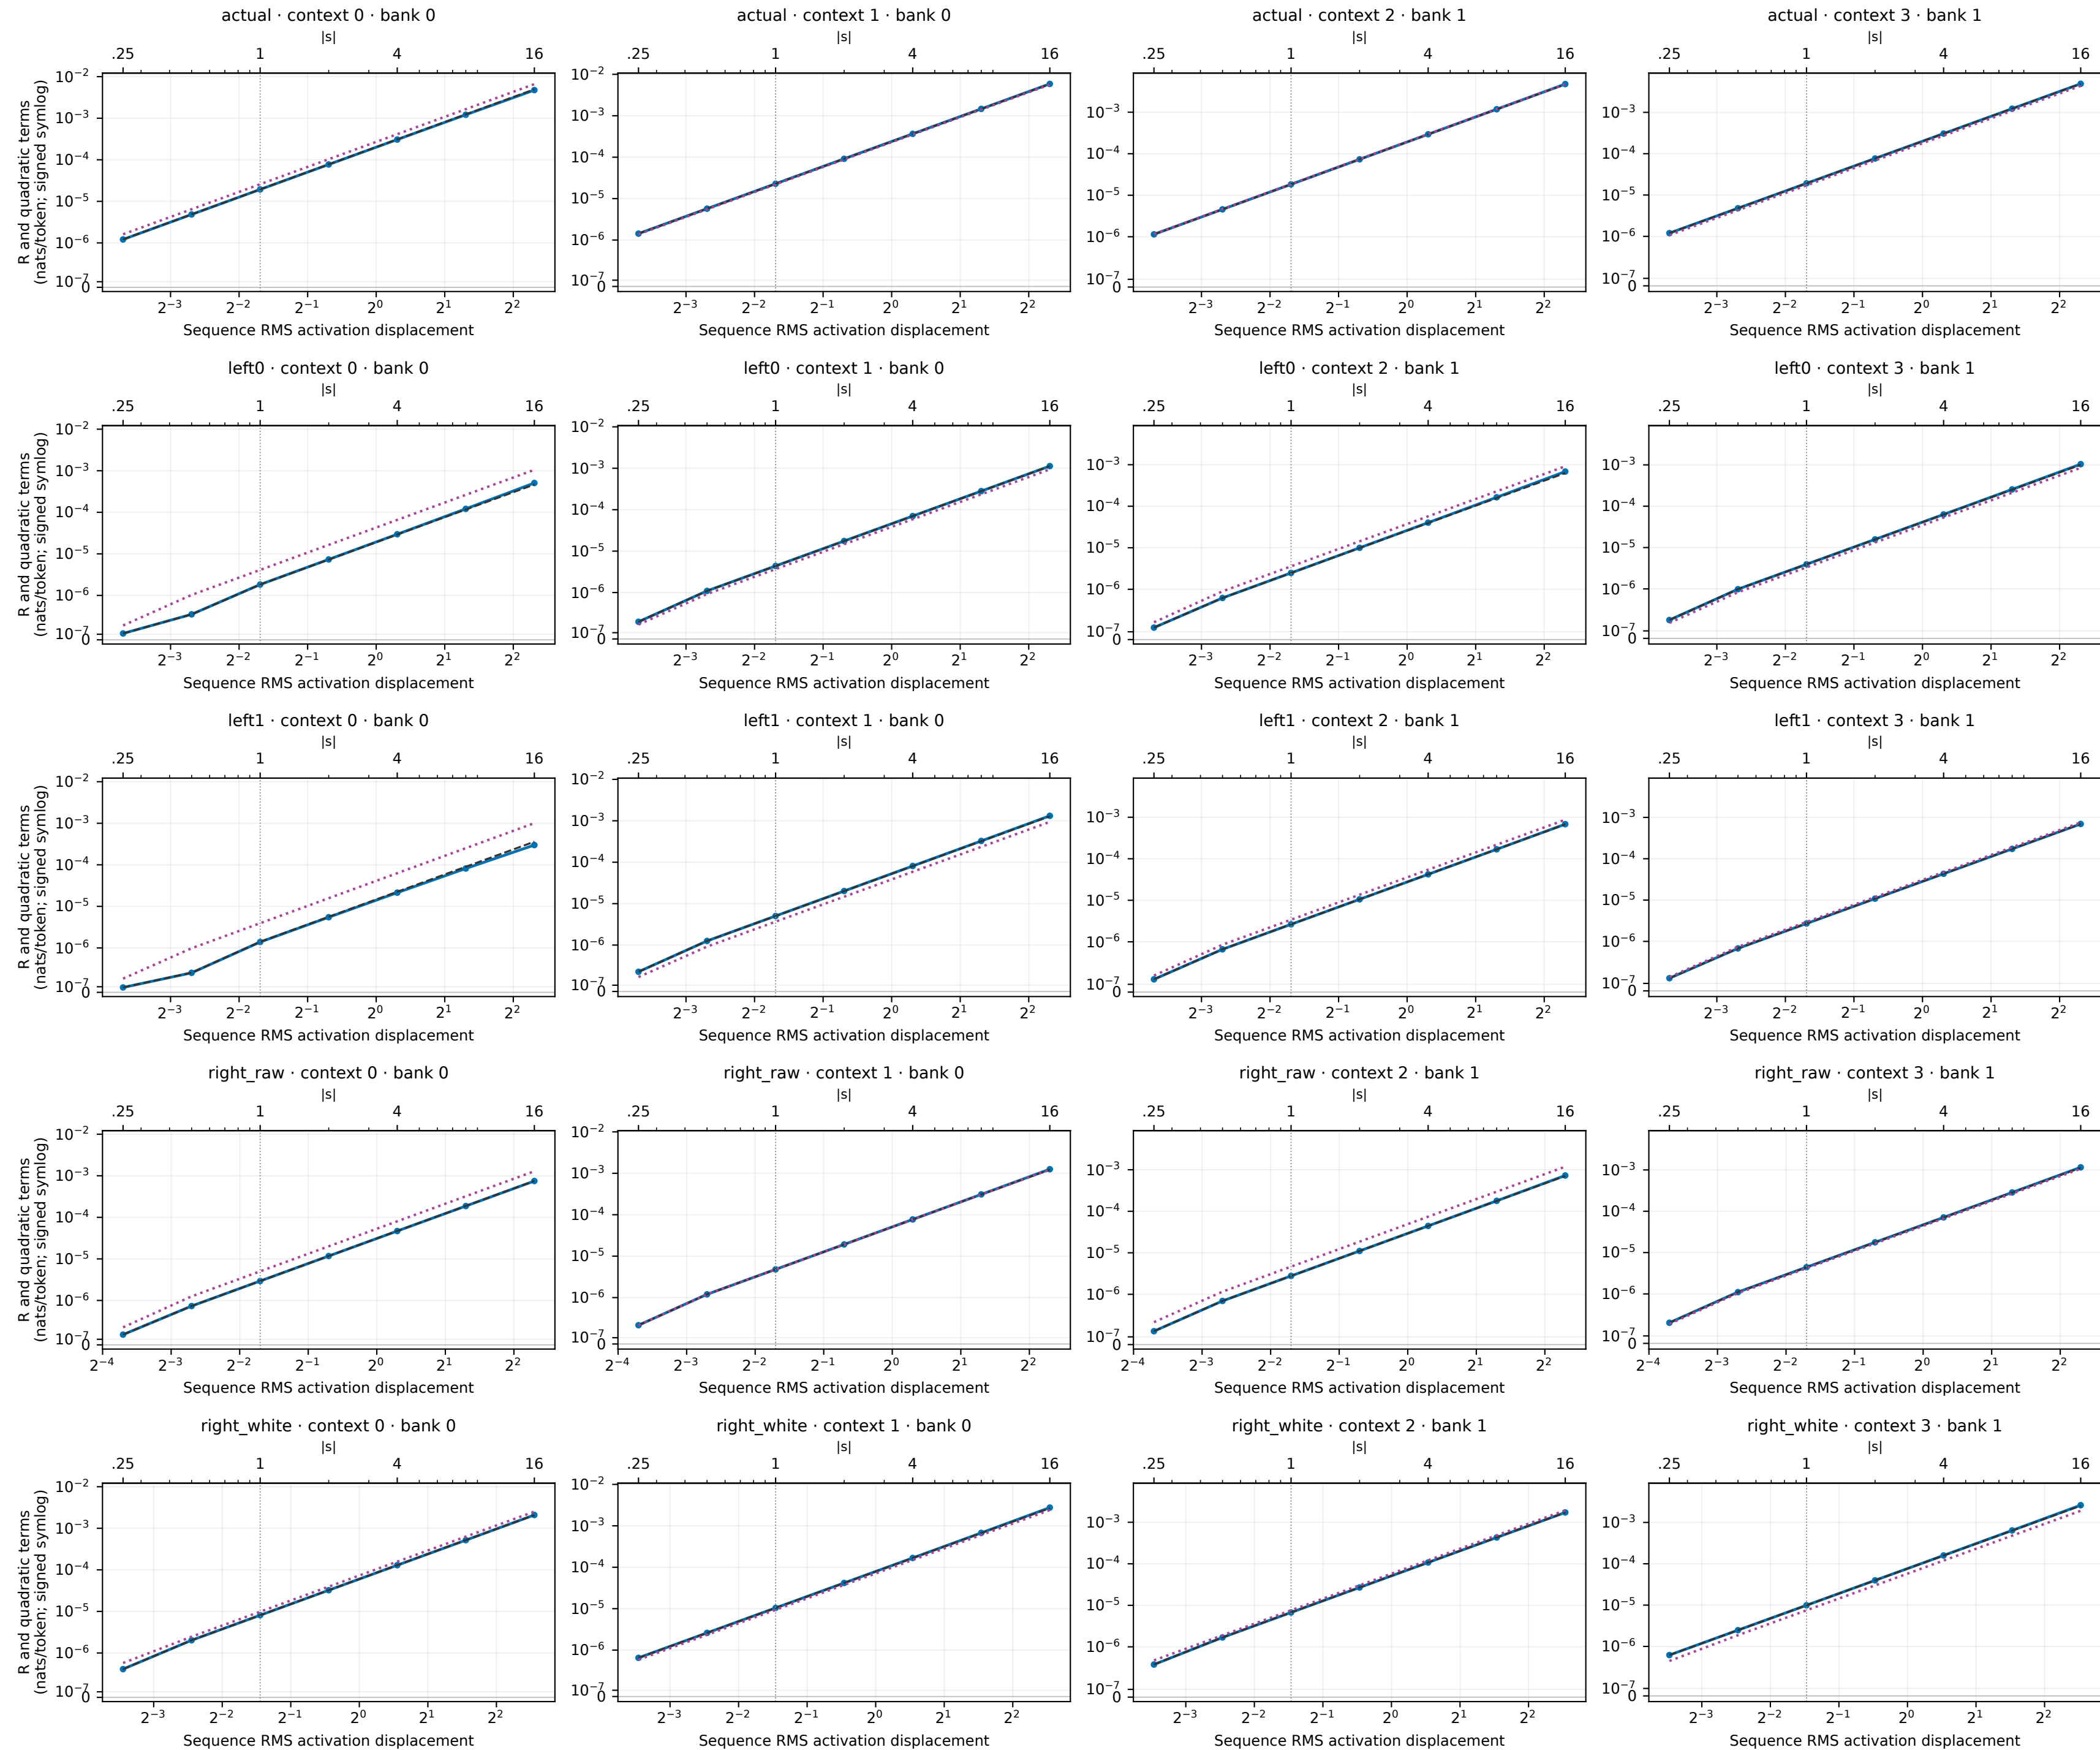

Muon · state 1300 · block 1 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

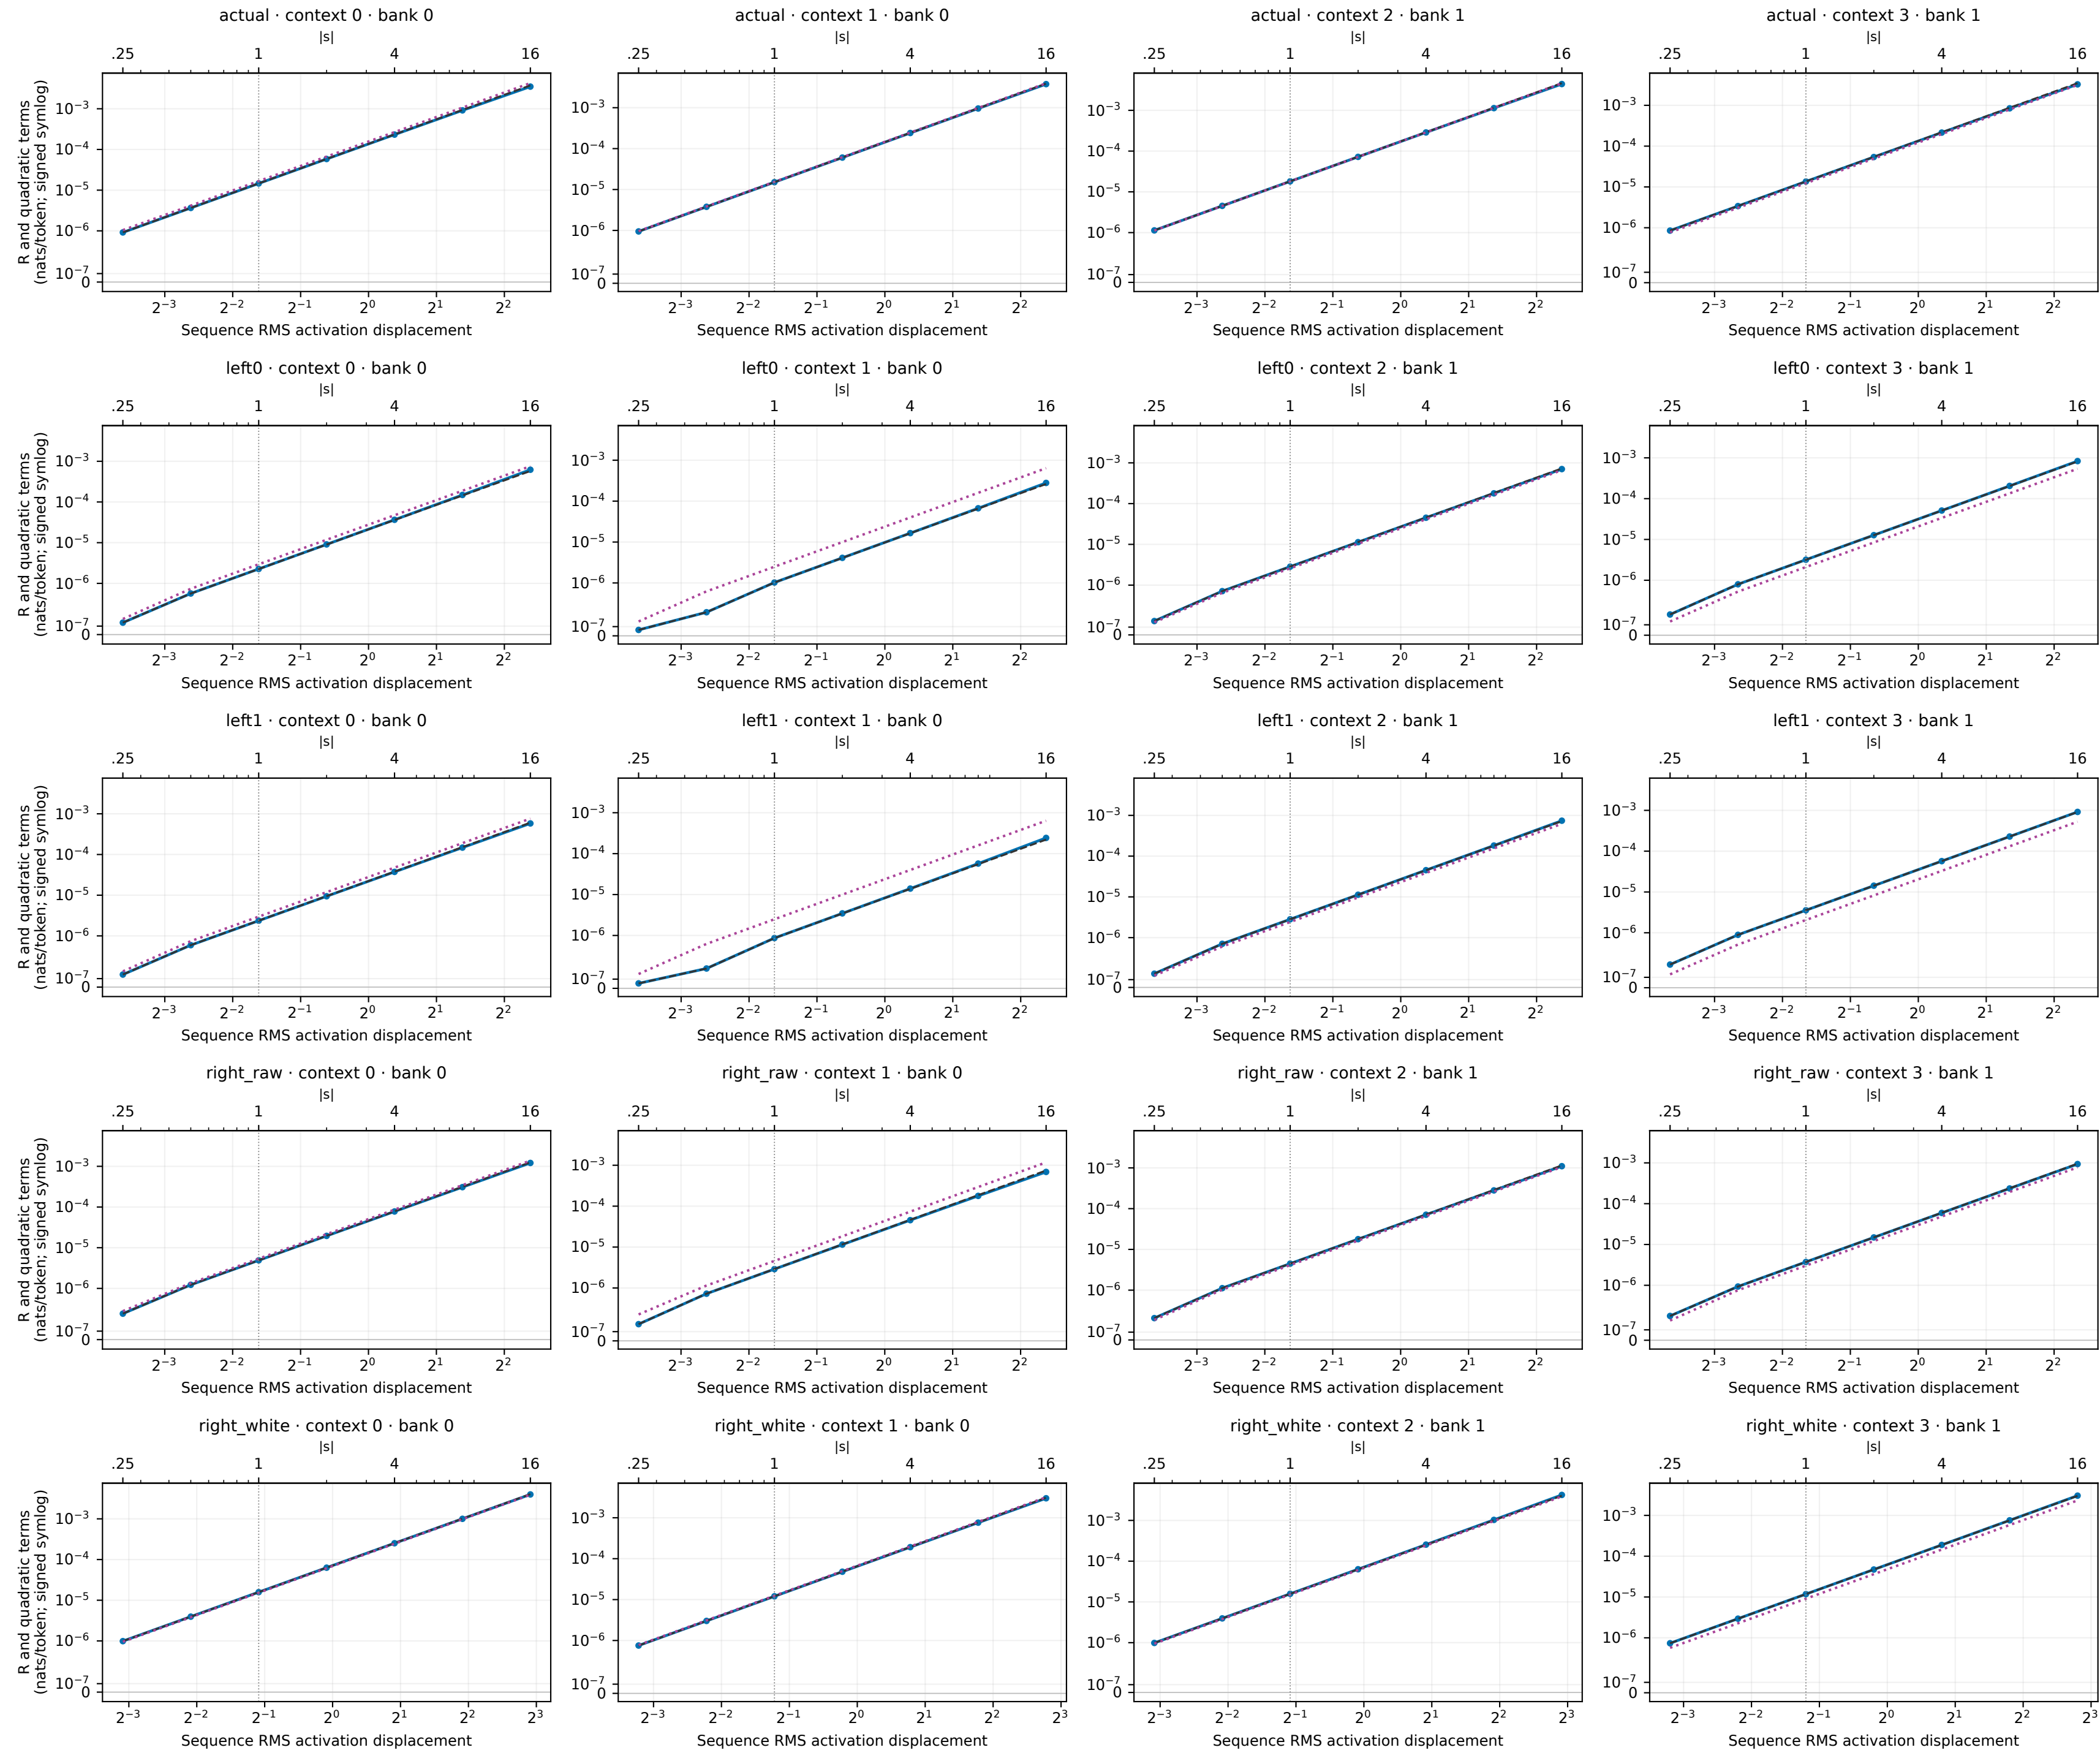

Muon · state 1300 · block 4 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

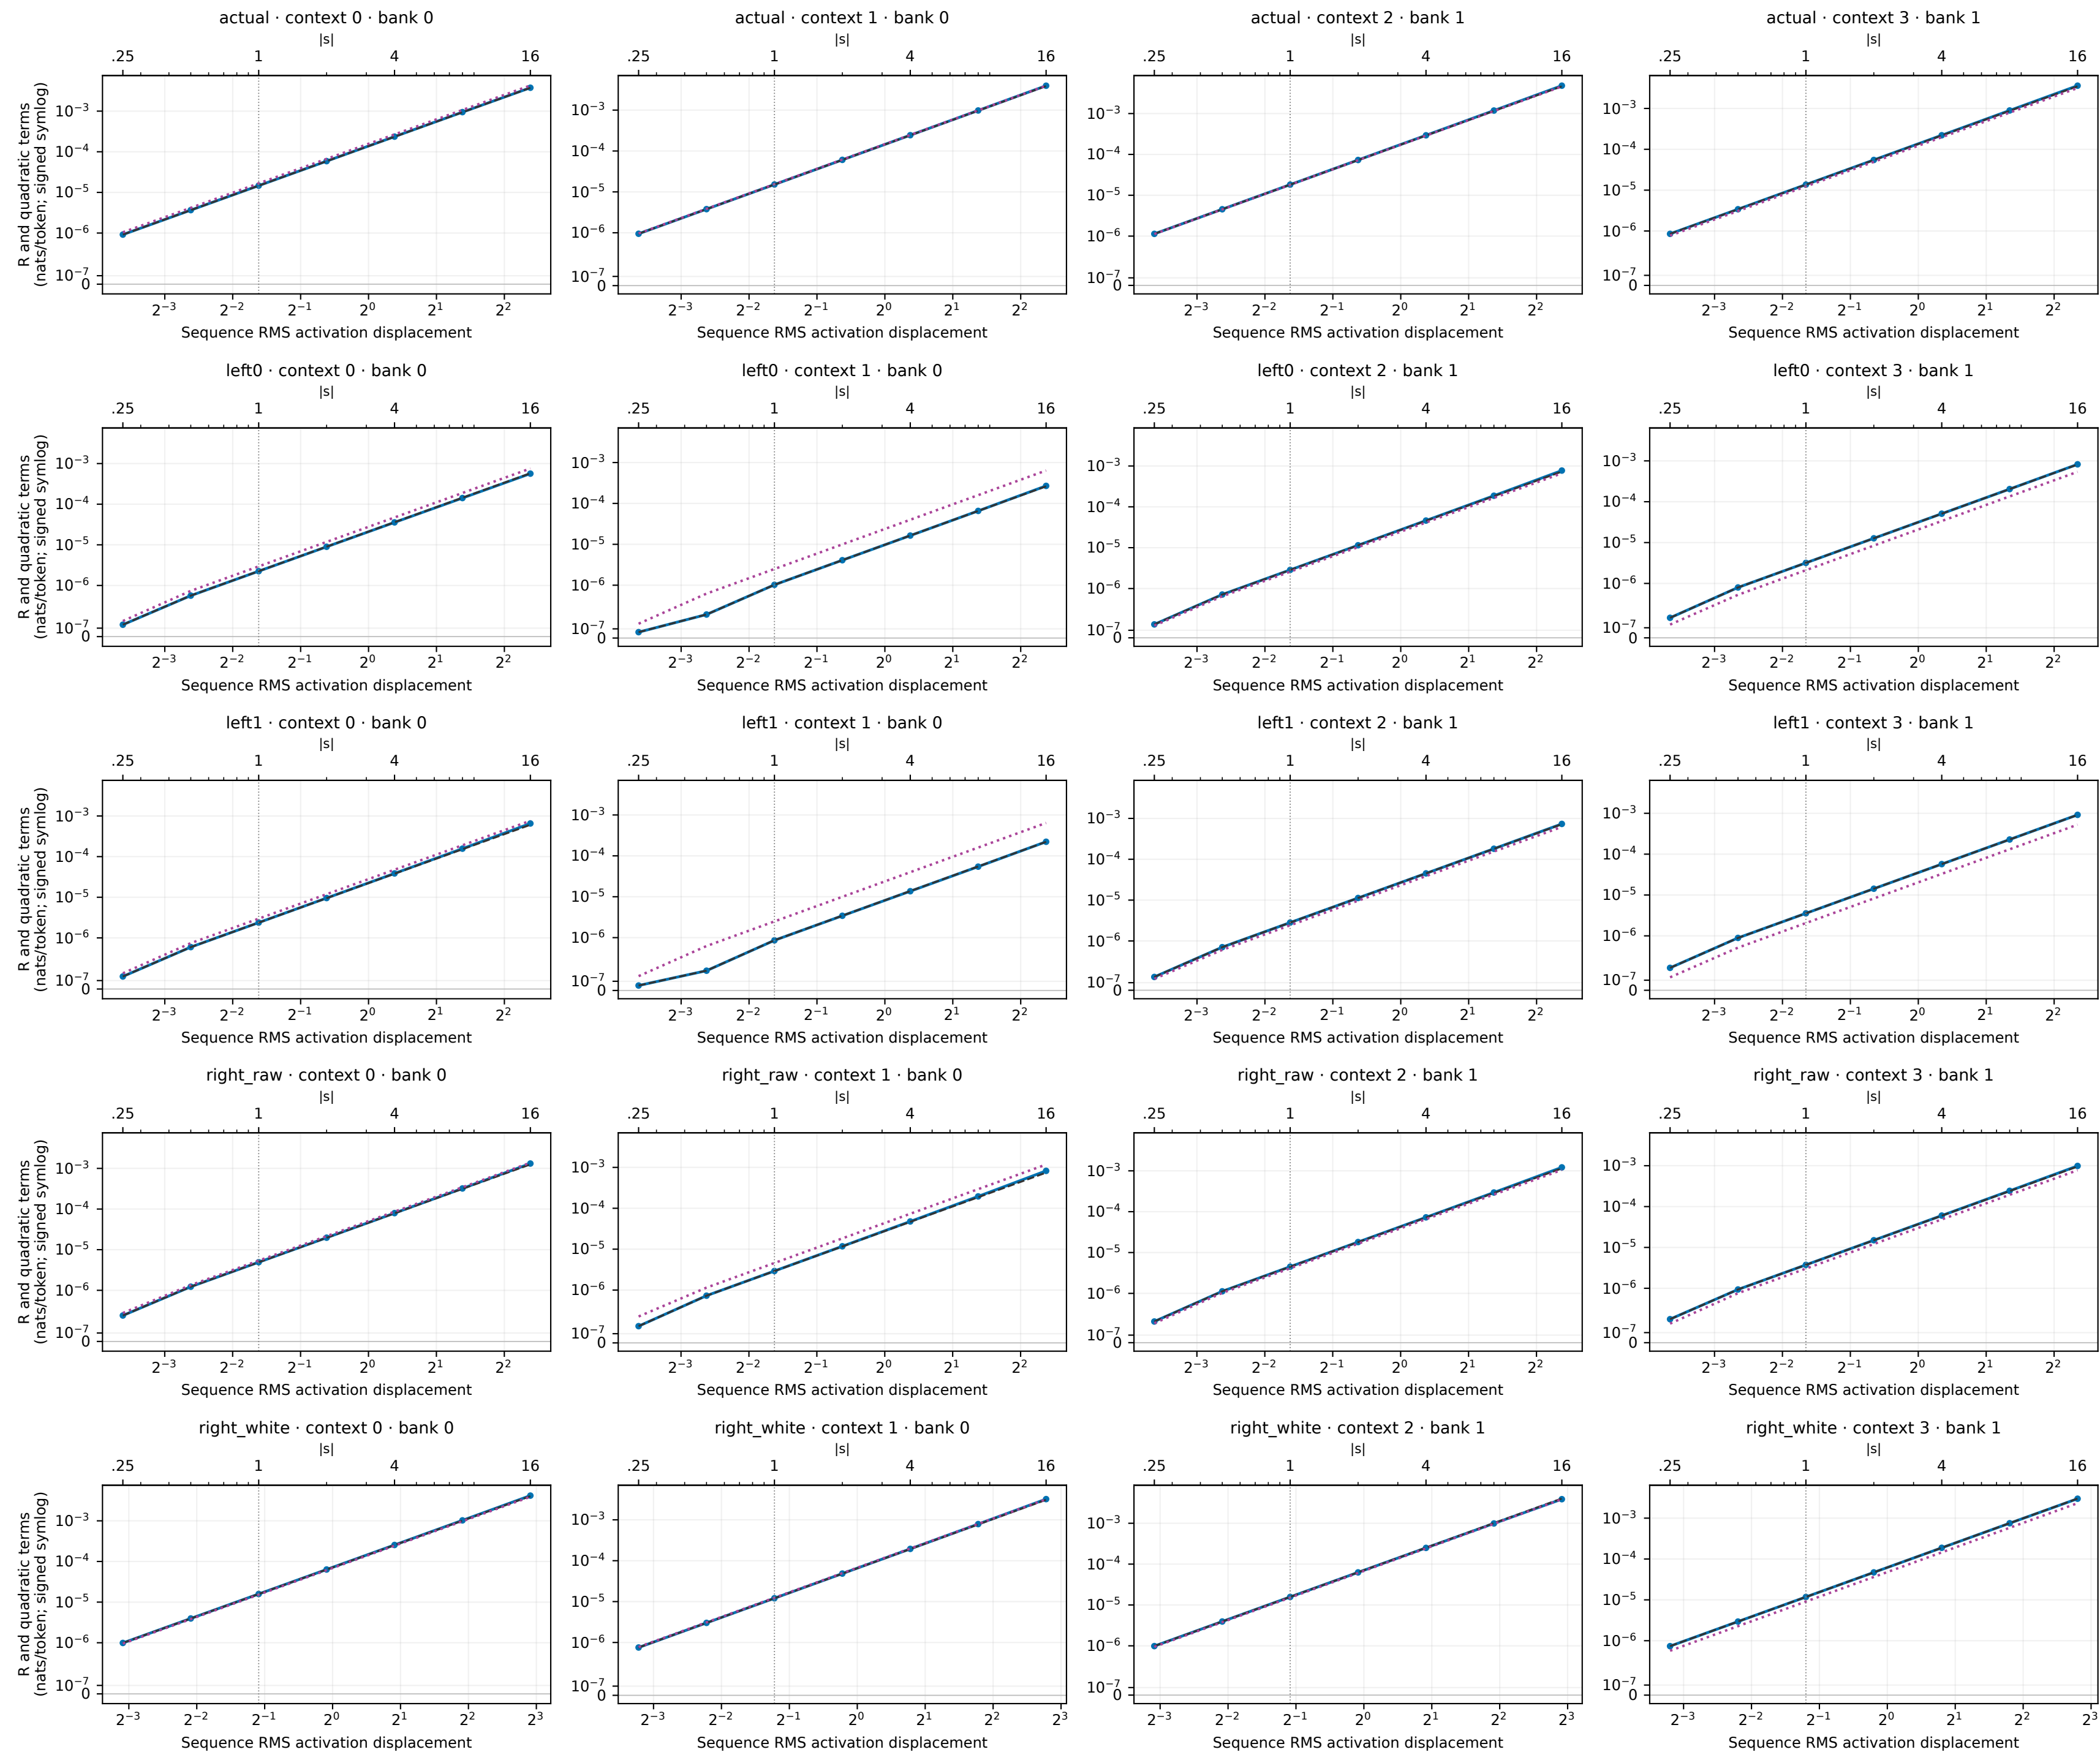

Muon · state 1300 · block 4 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

Muon · state 1300 · block 8 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

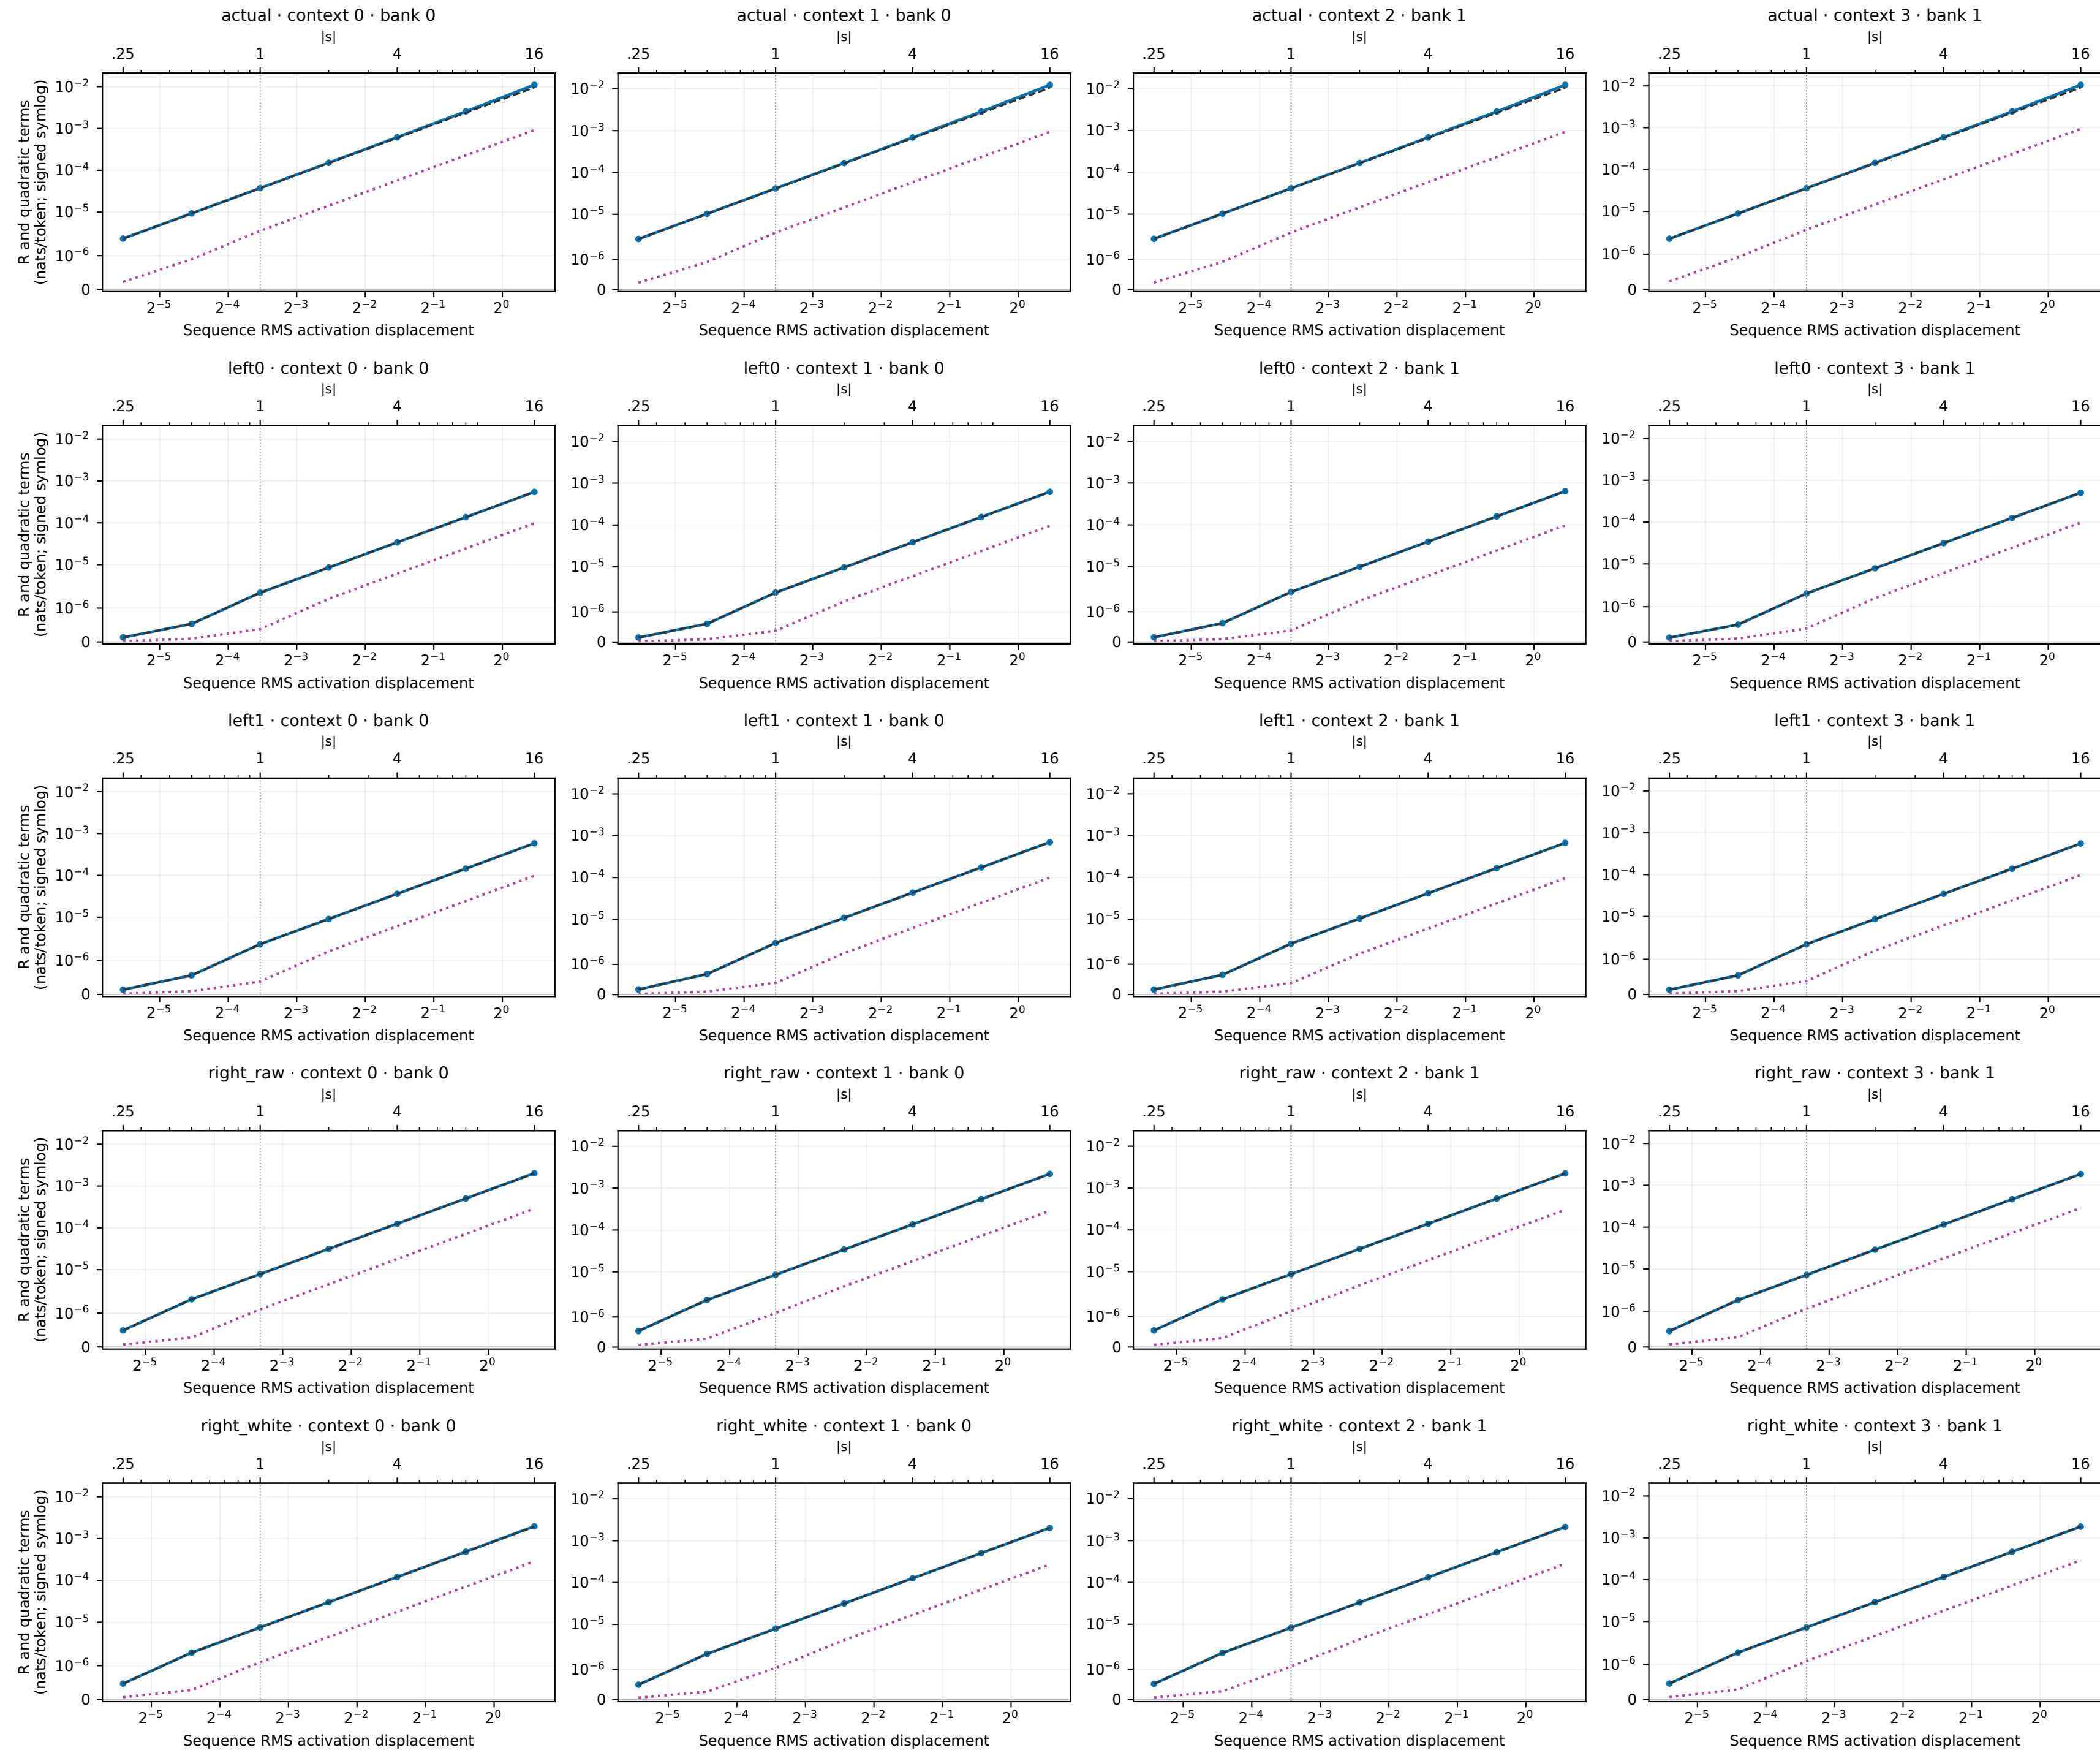

Muon · state 1300 · block 8 up · positive multipliers
 Full-context loss; shared y scale within each context; radius summarizes all injected positions

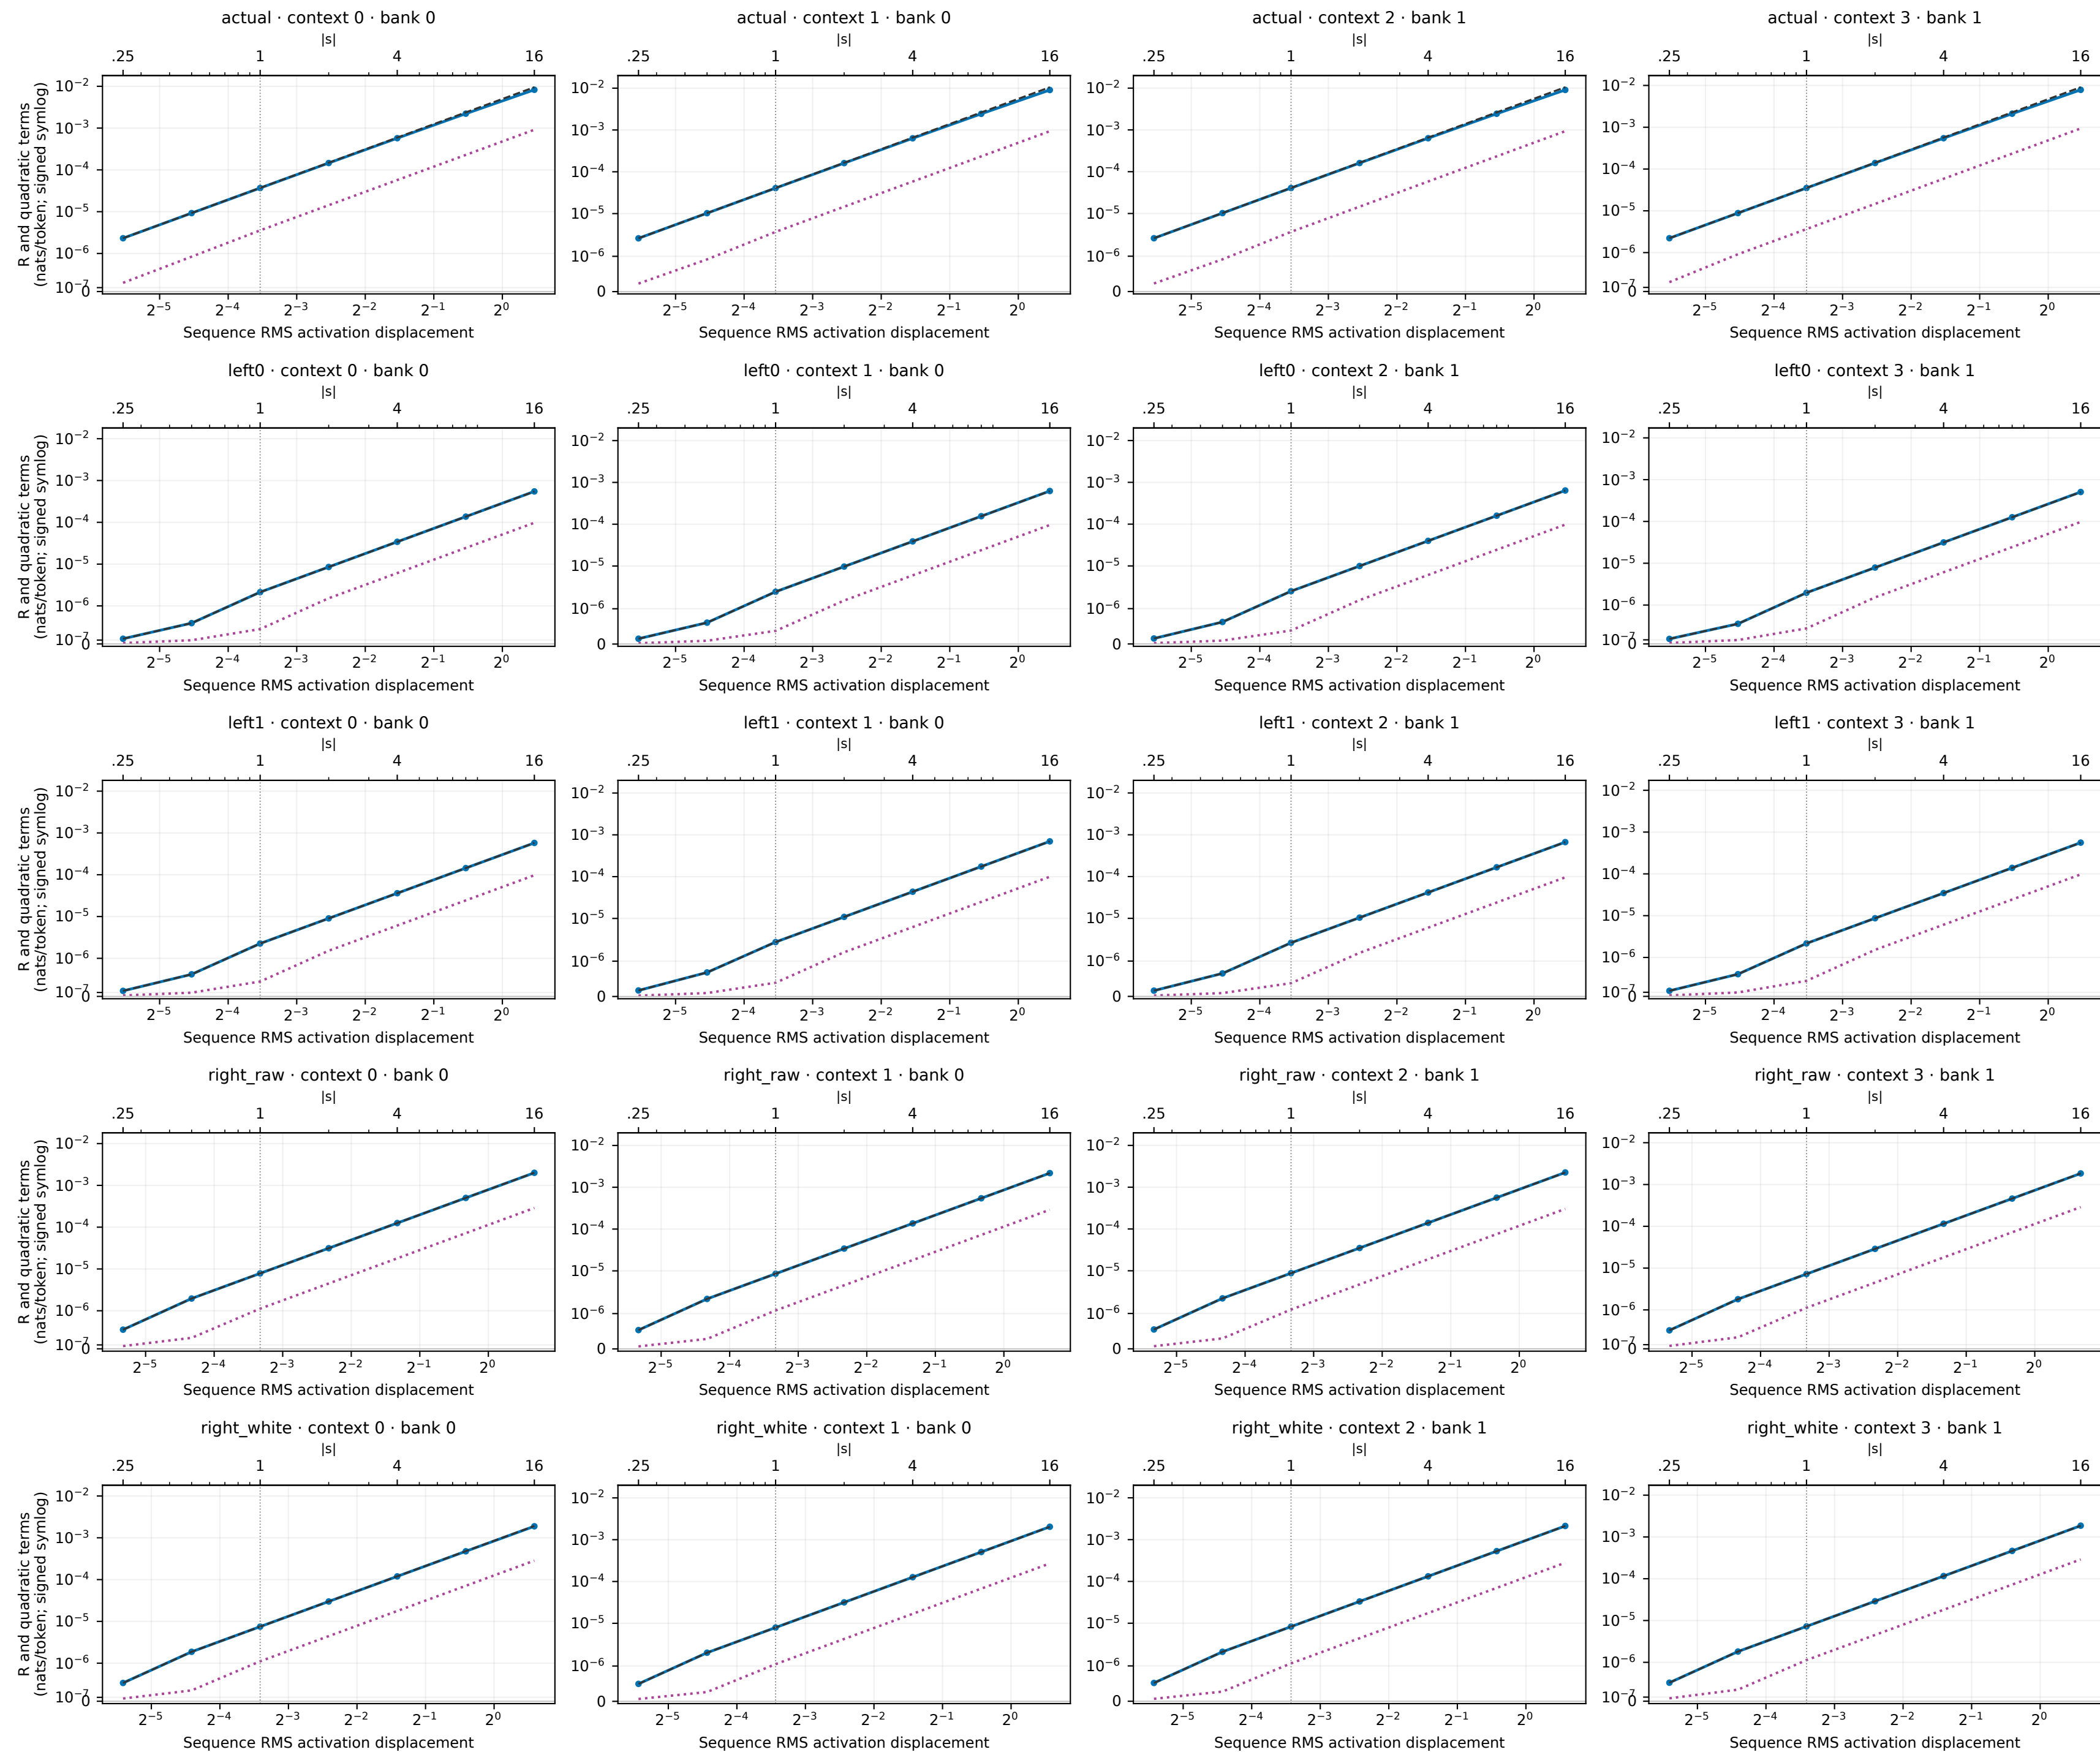

— finite remainder R - - $\frac{1}{2}s^2$ true H ··· $\frac{1}{2}s^2$ predictive GN

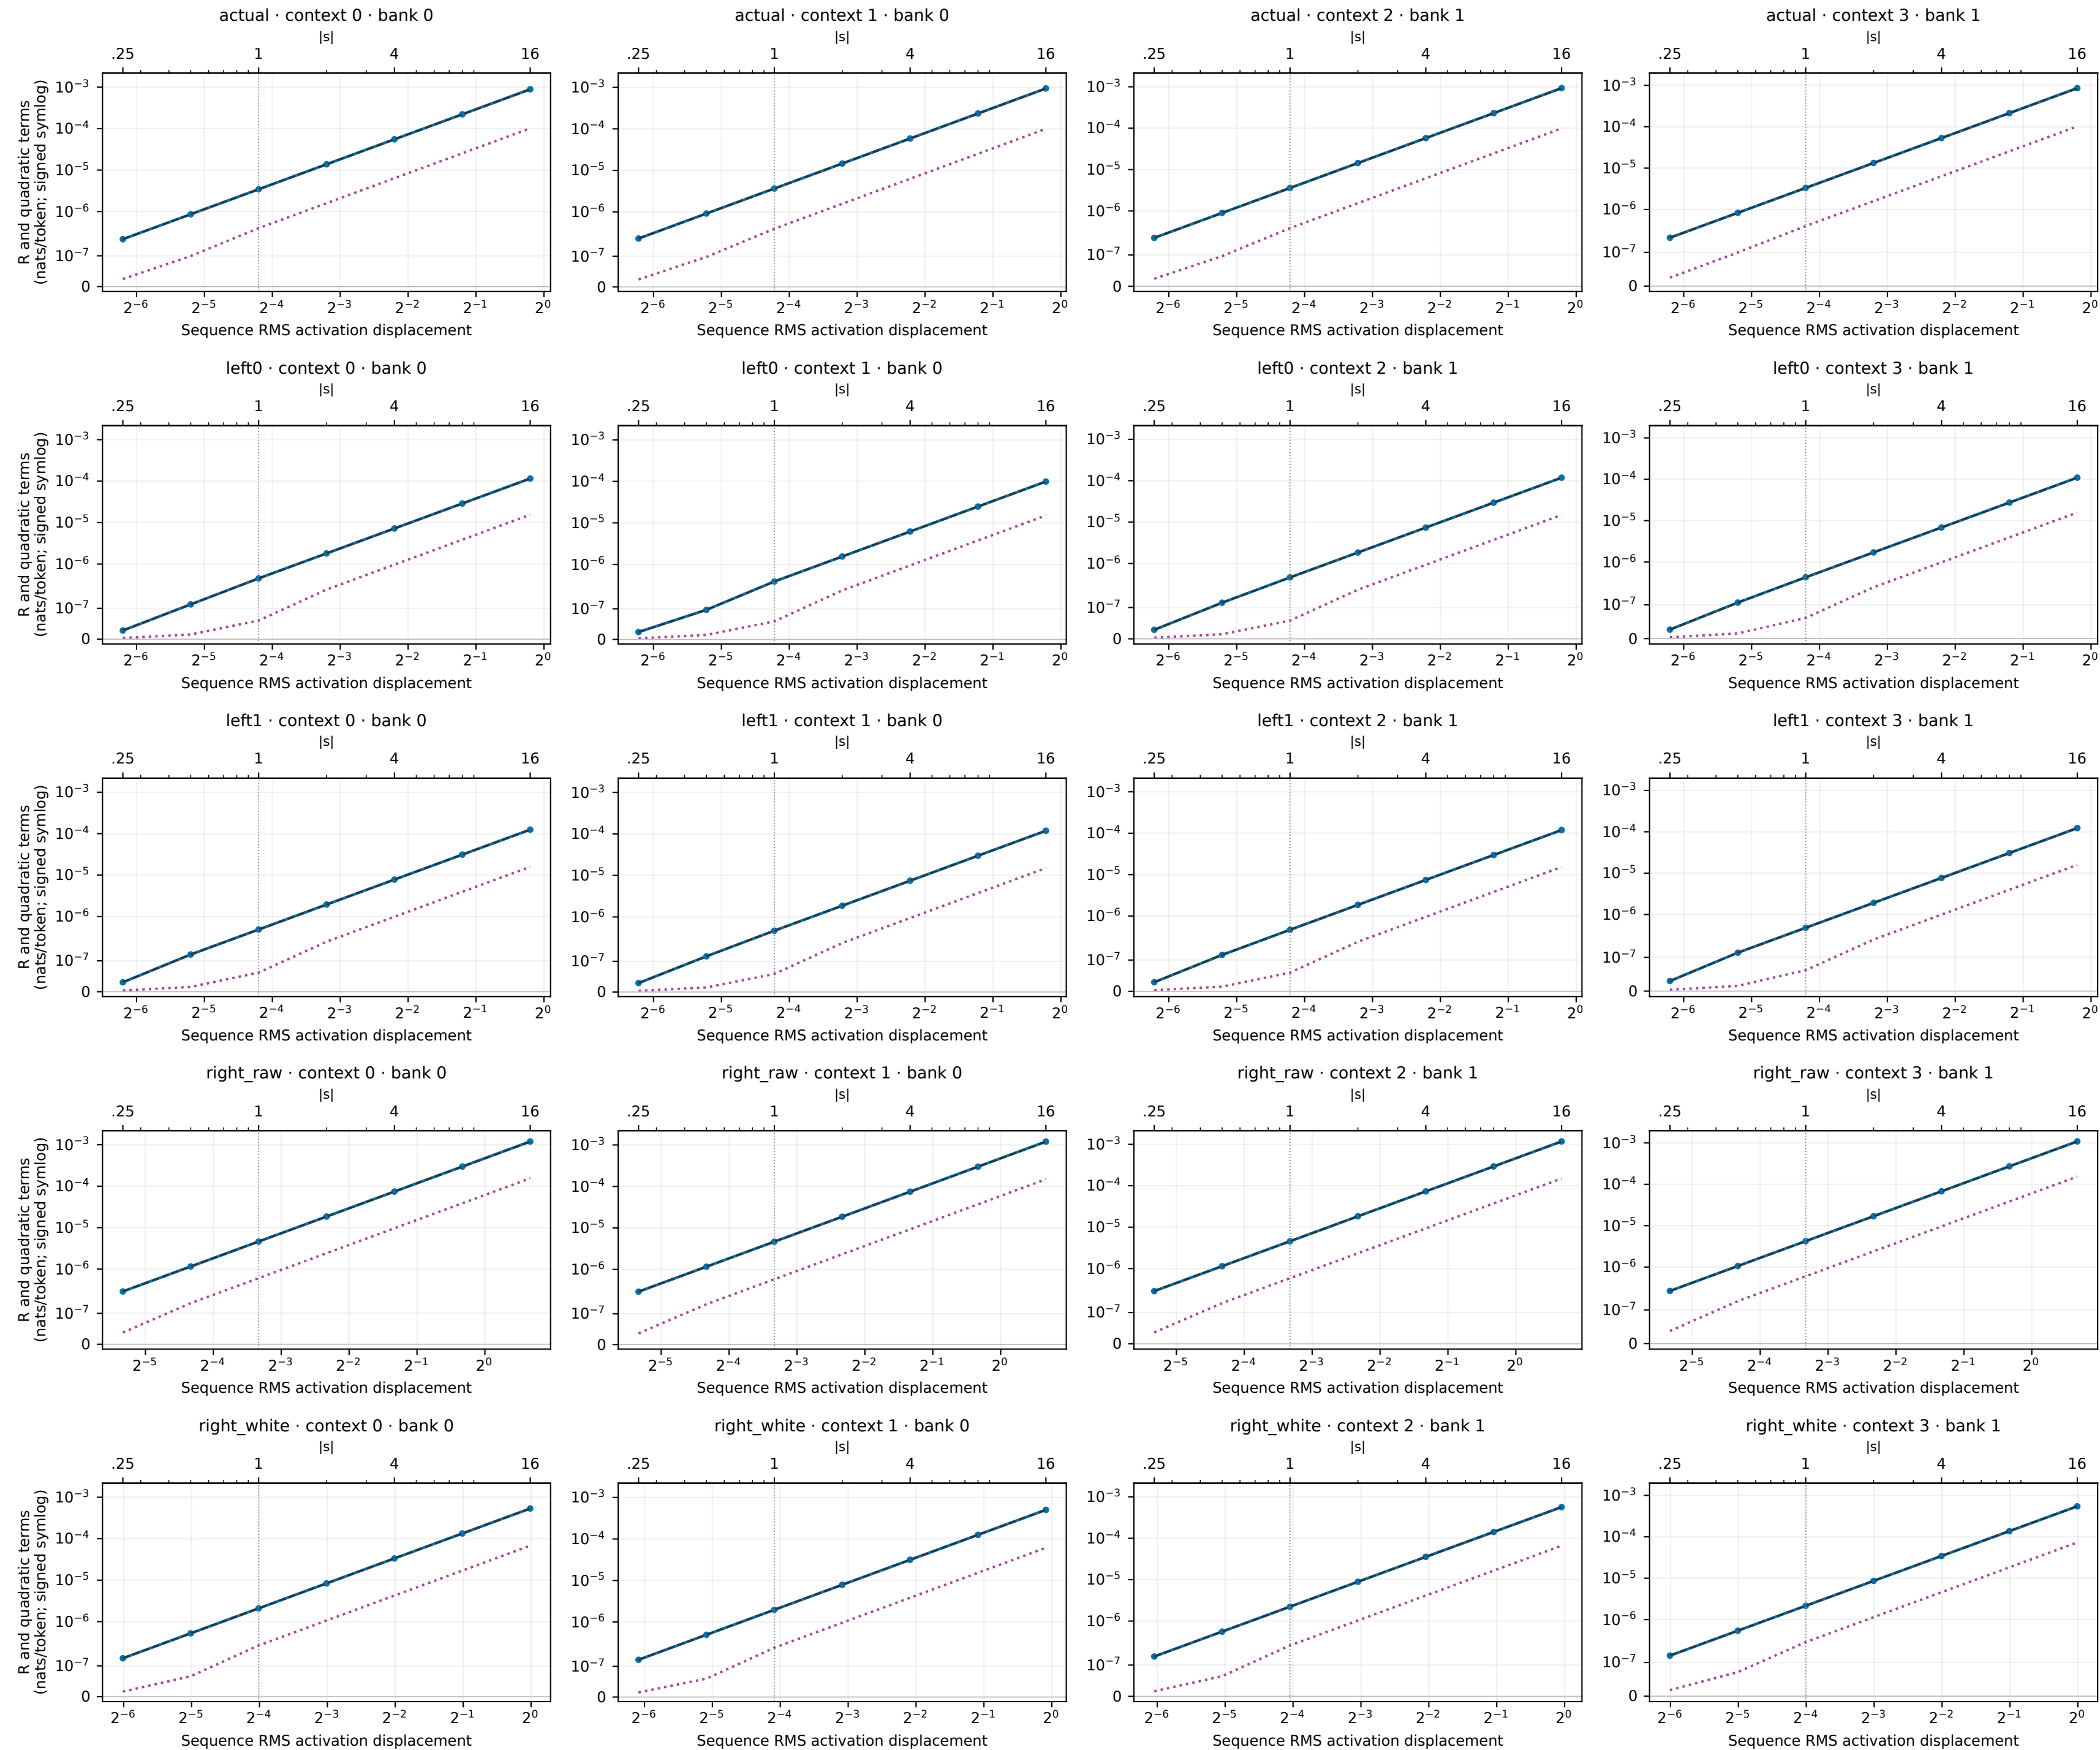

PD · state 10 · block 1 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

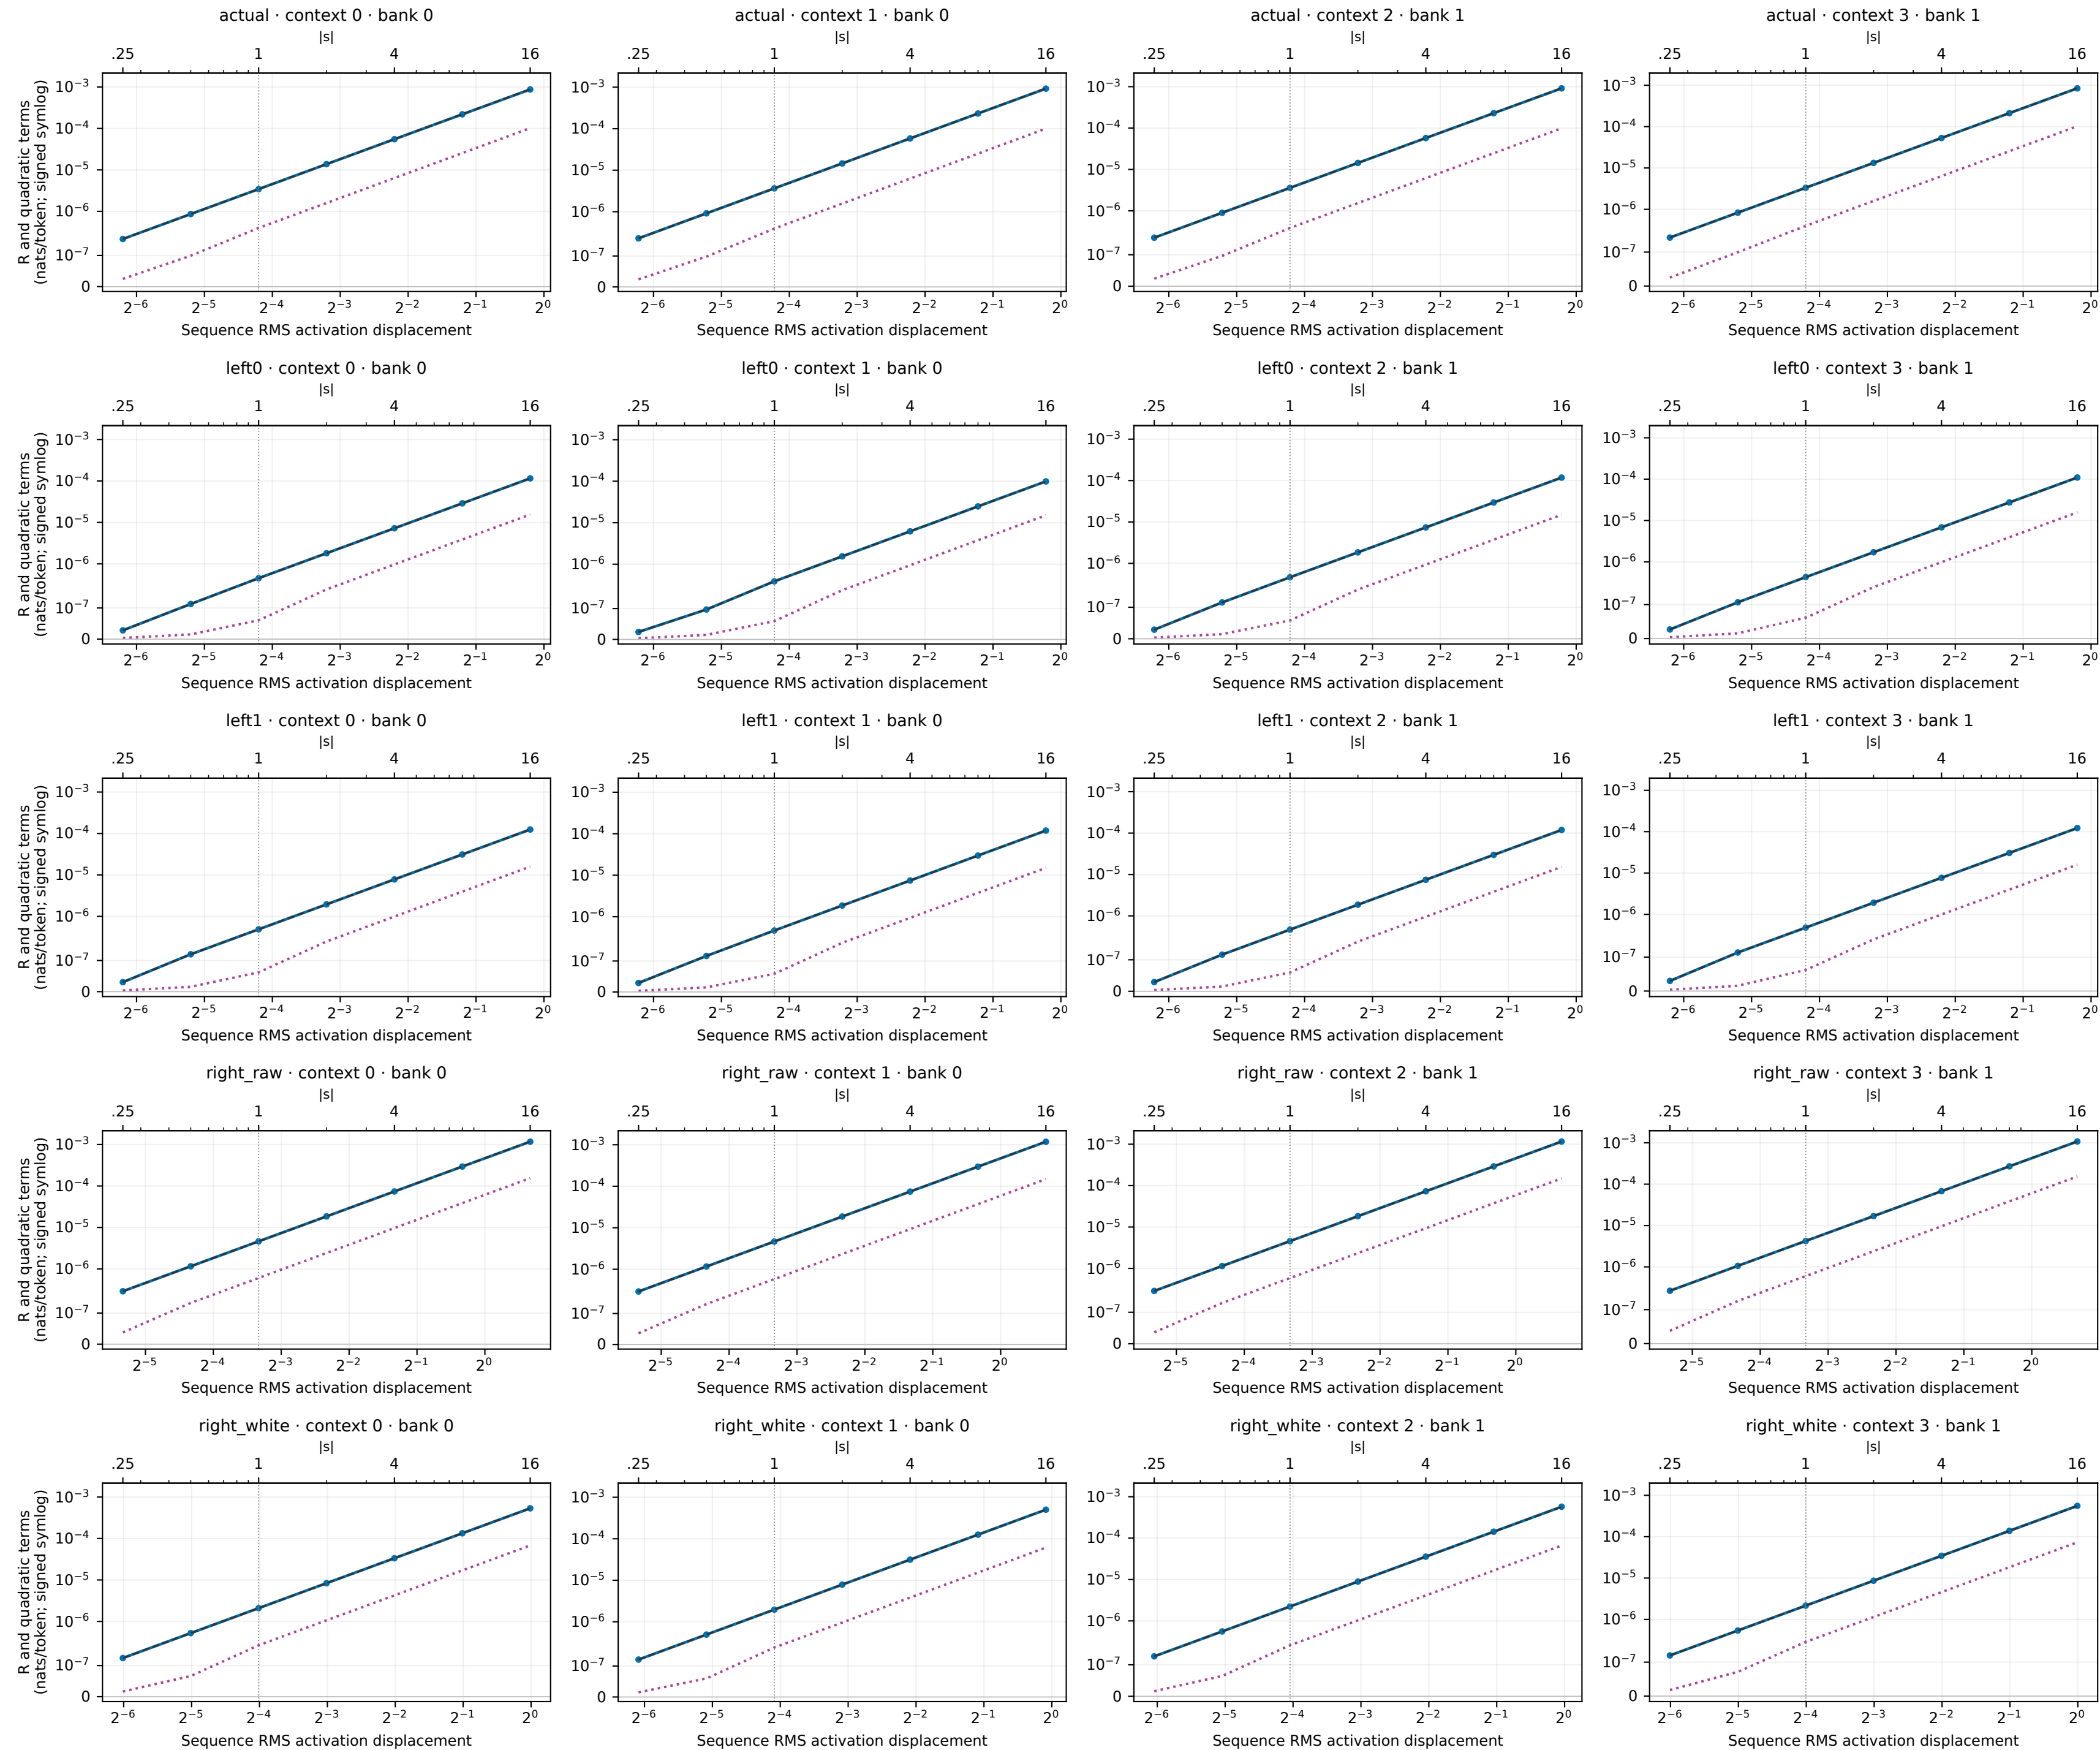

PD · state 10 · block 1 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

PD · state 10 · block 4 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

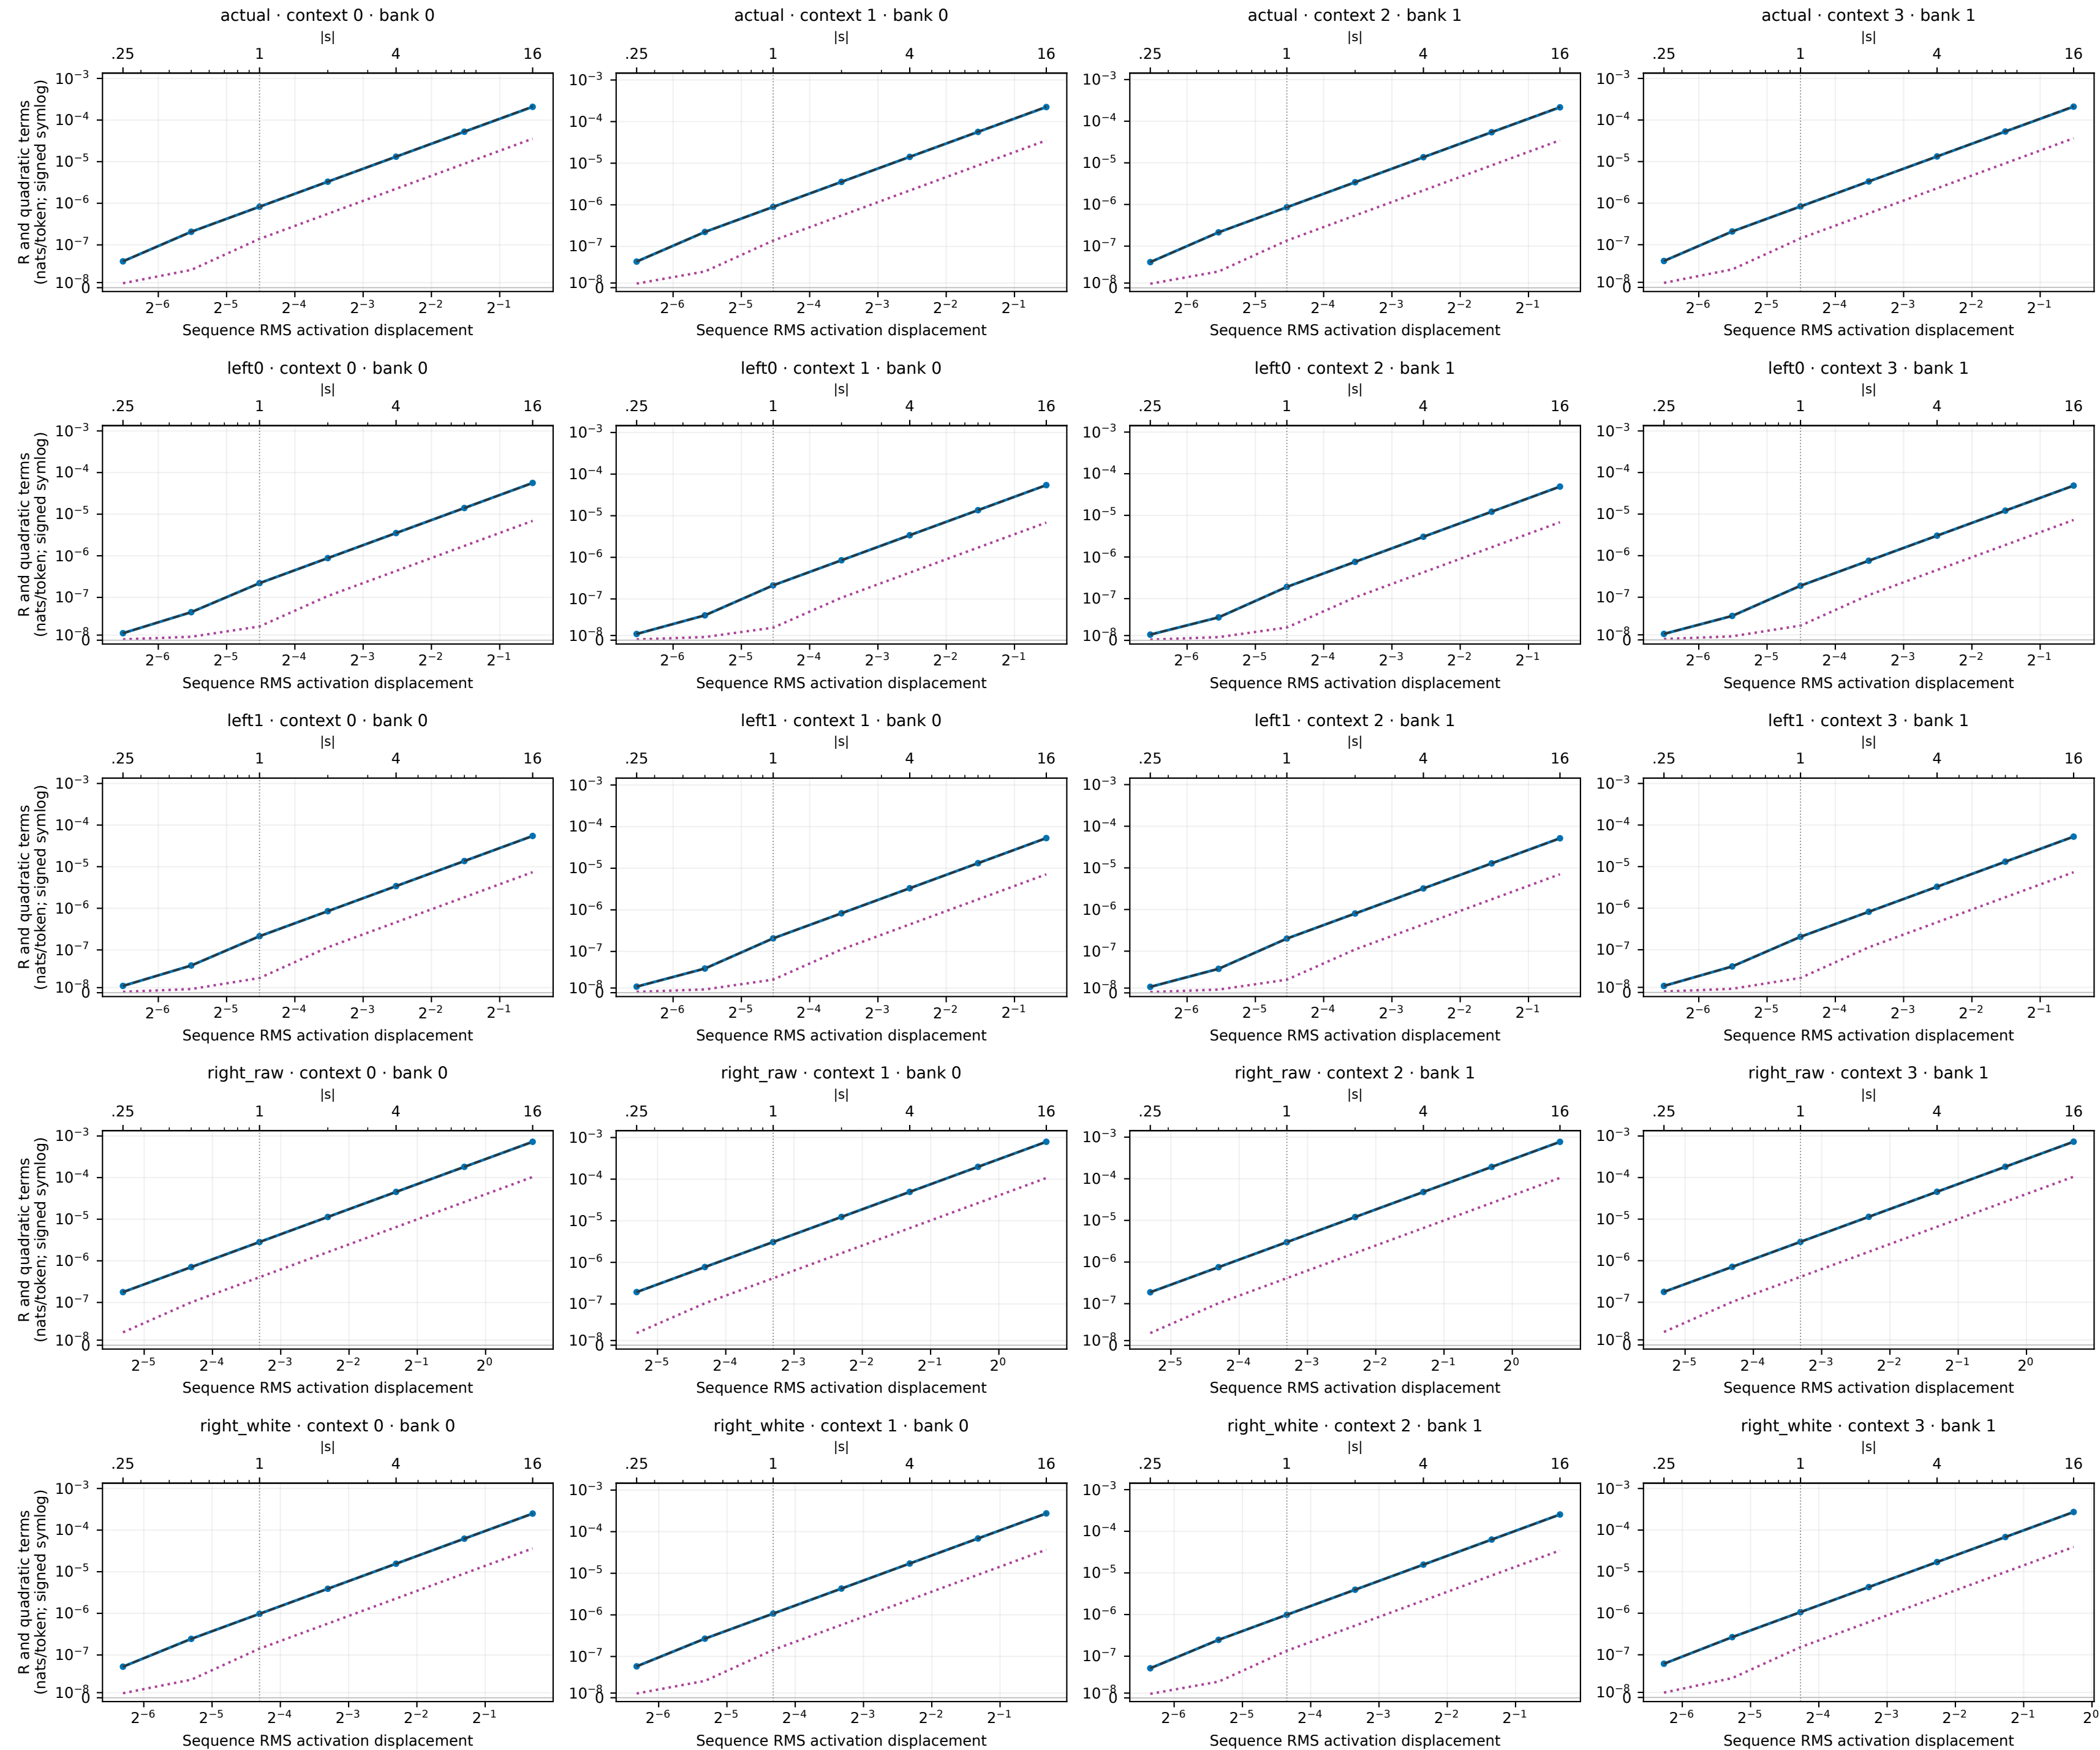

PD · state 10 · block 4 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

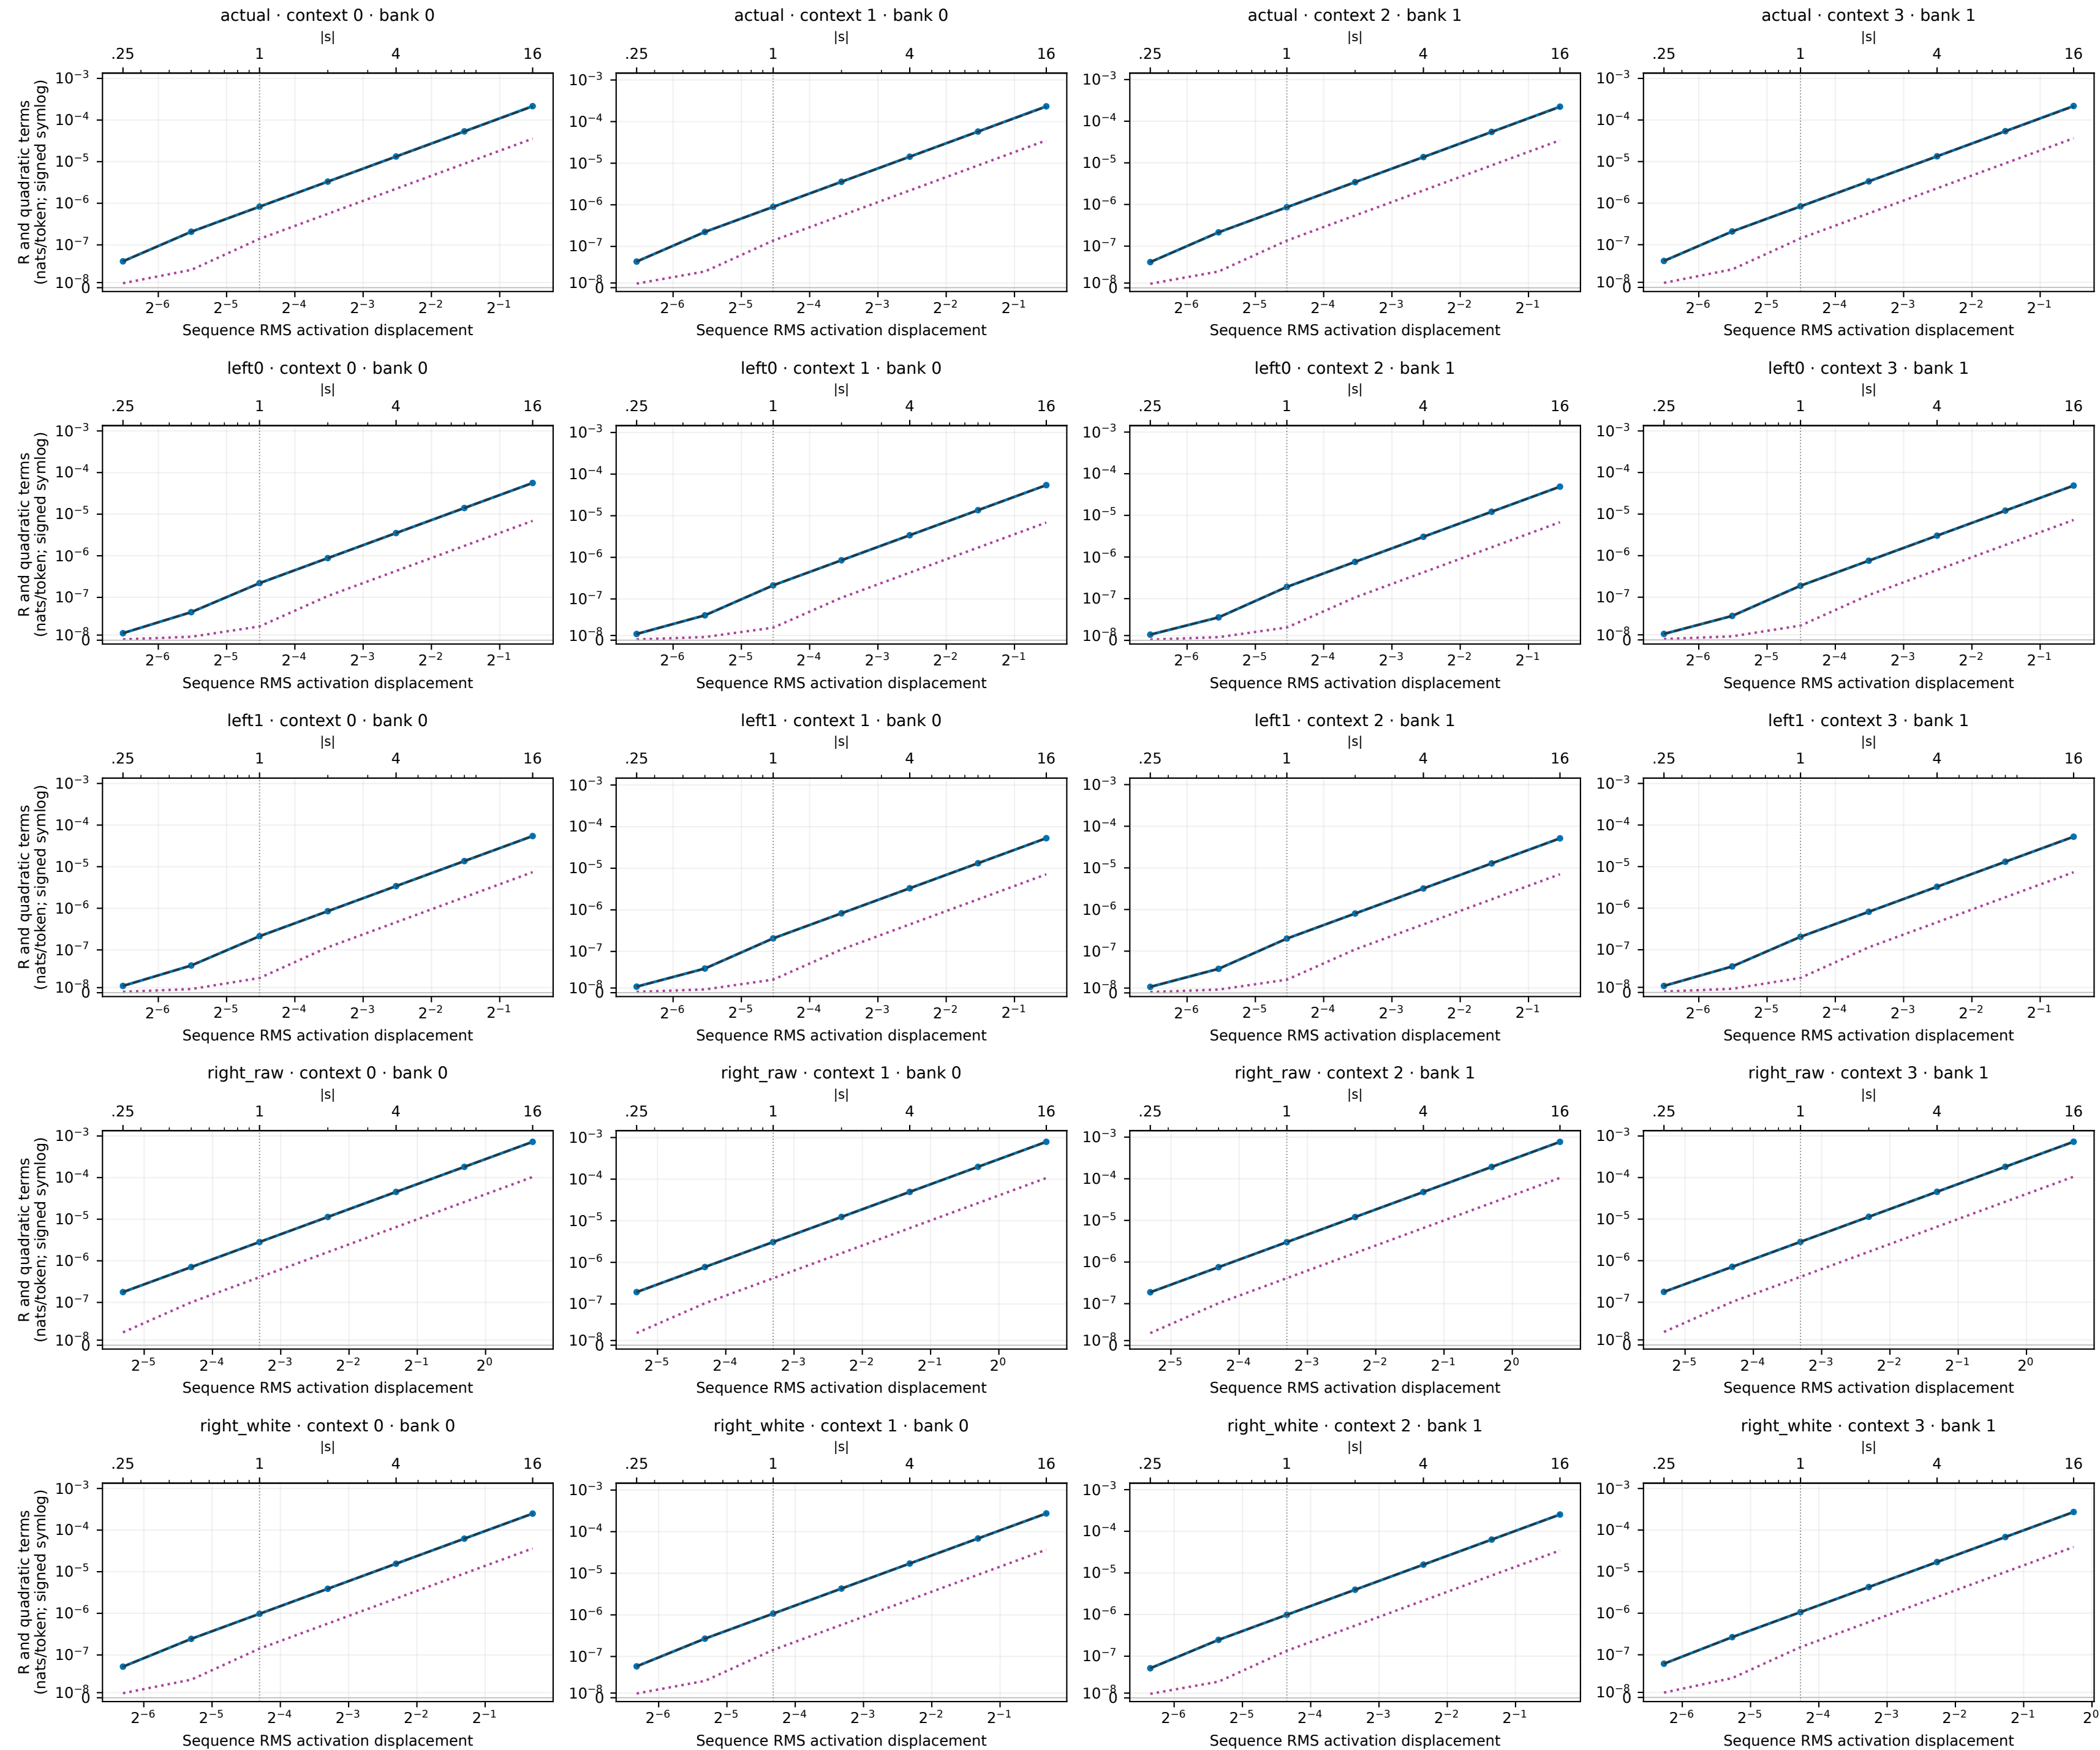

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

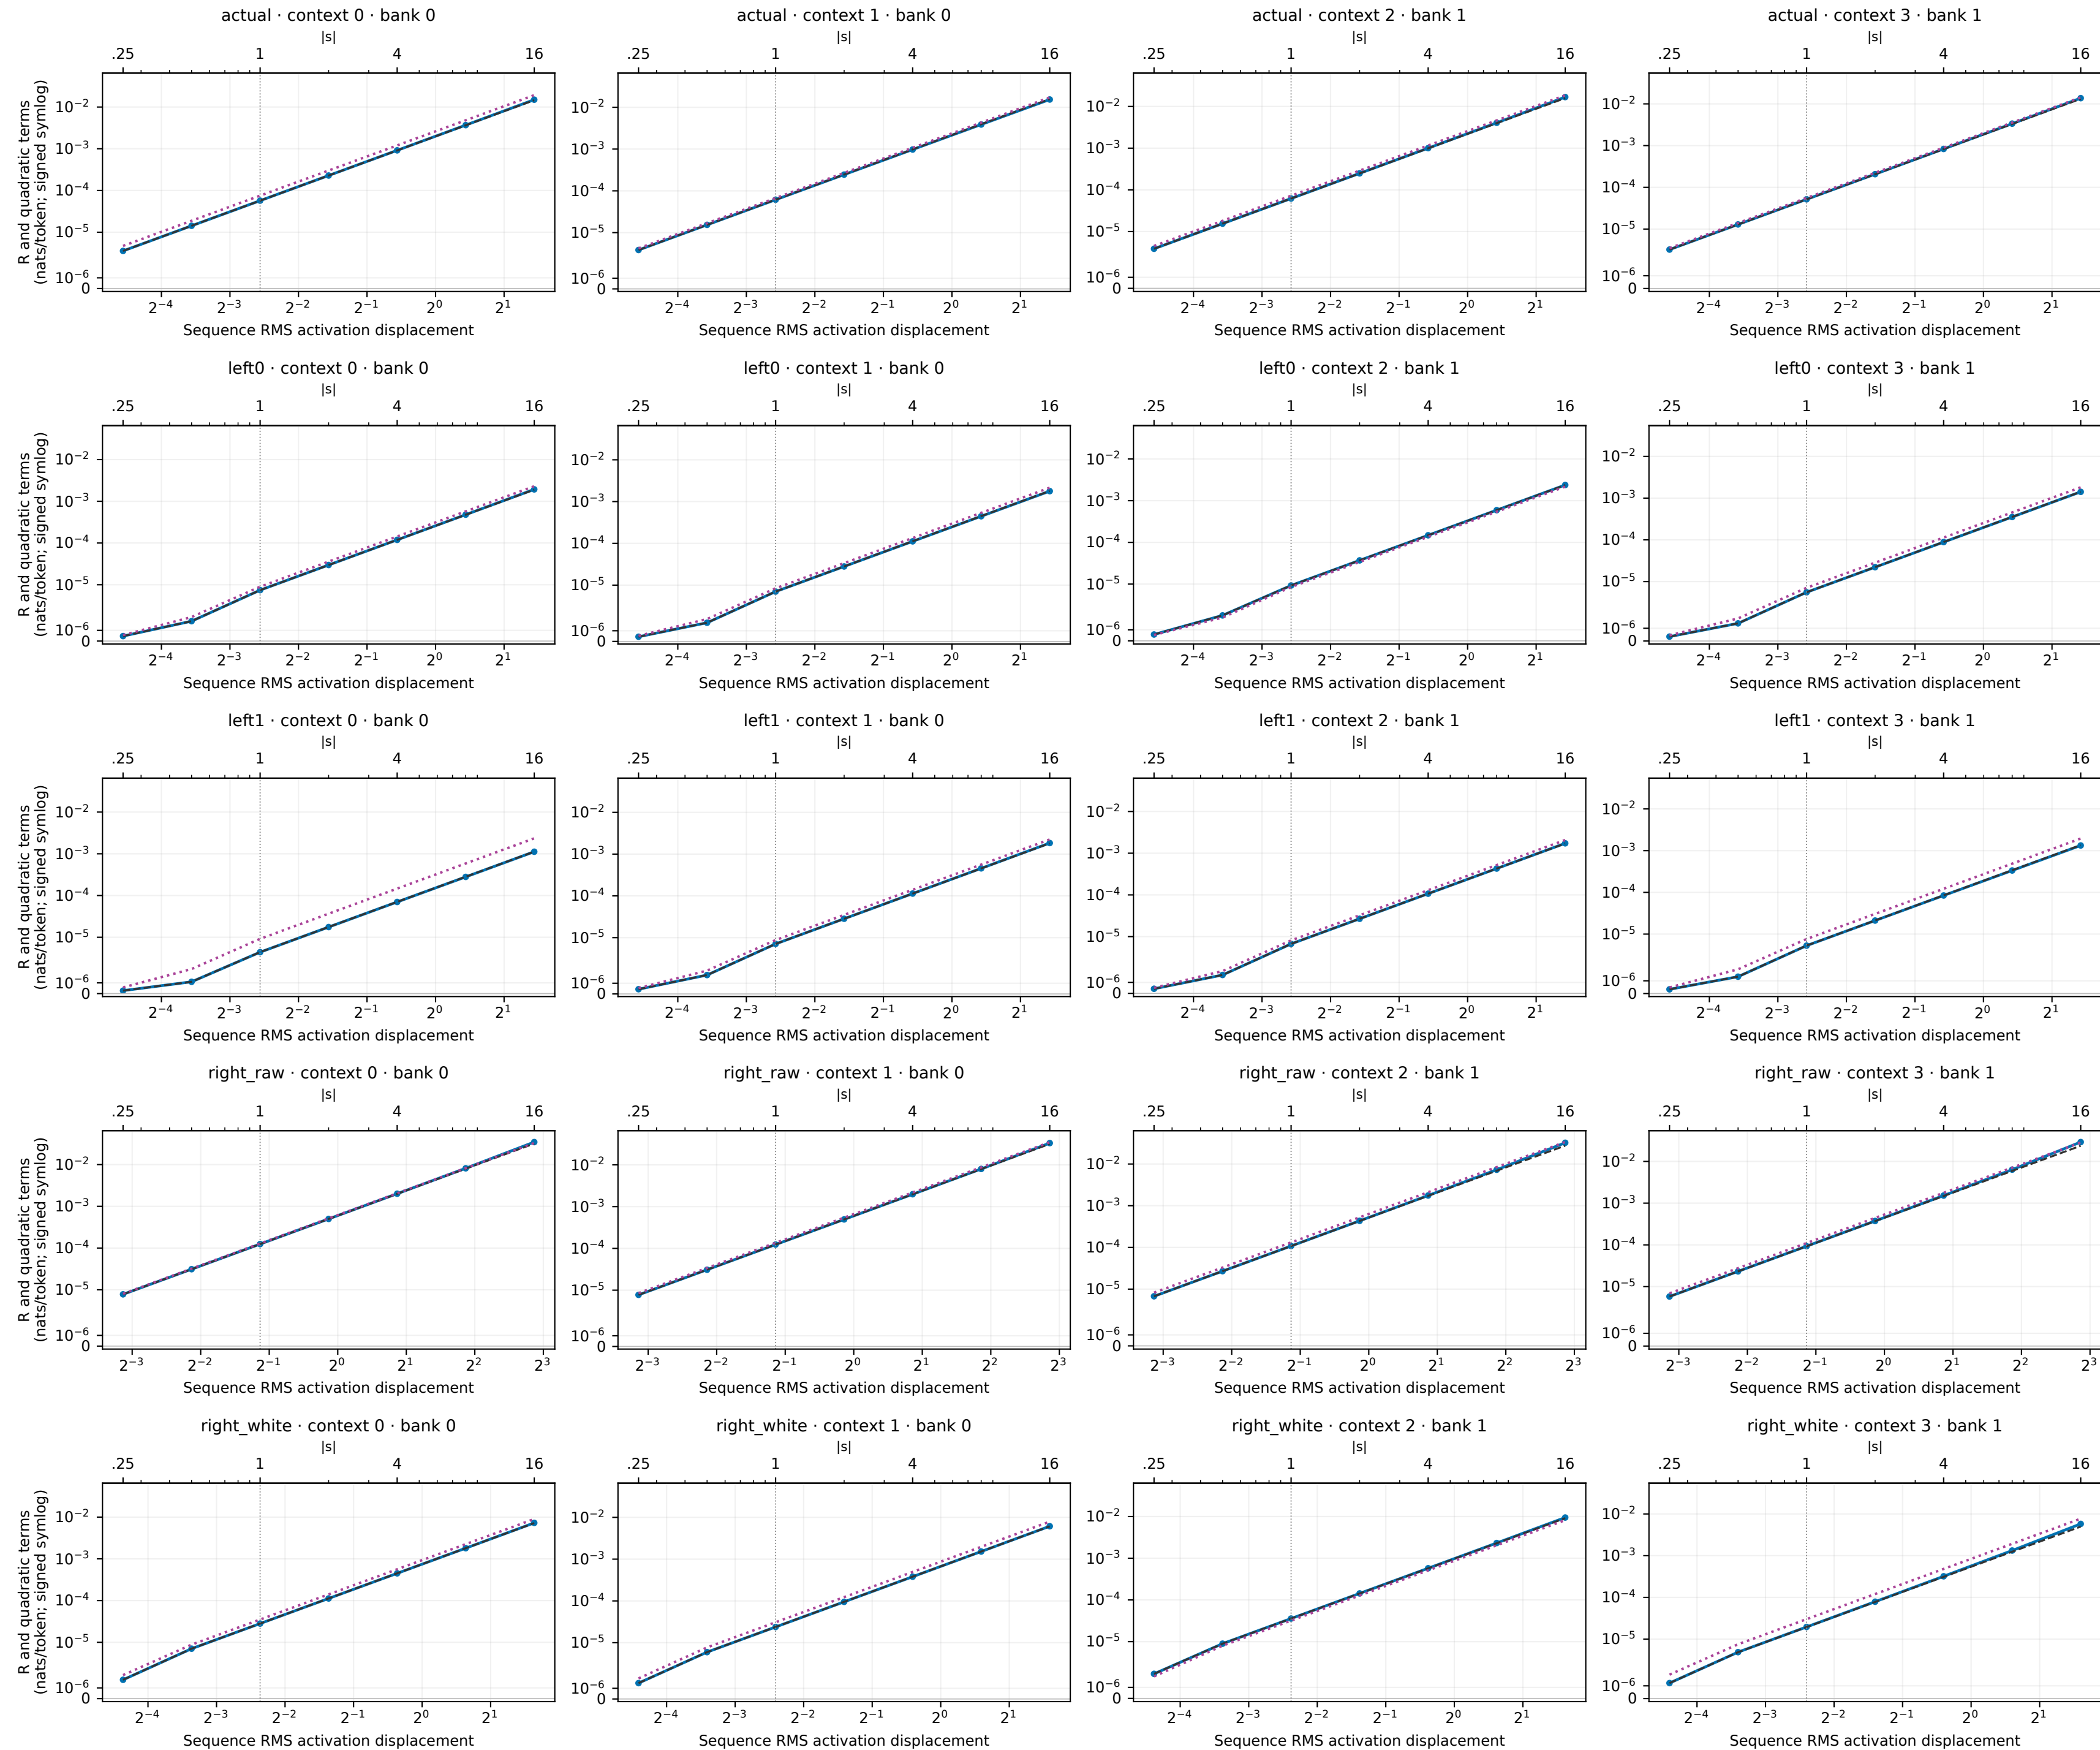

PD · state 10 · block 8 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

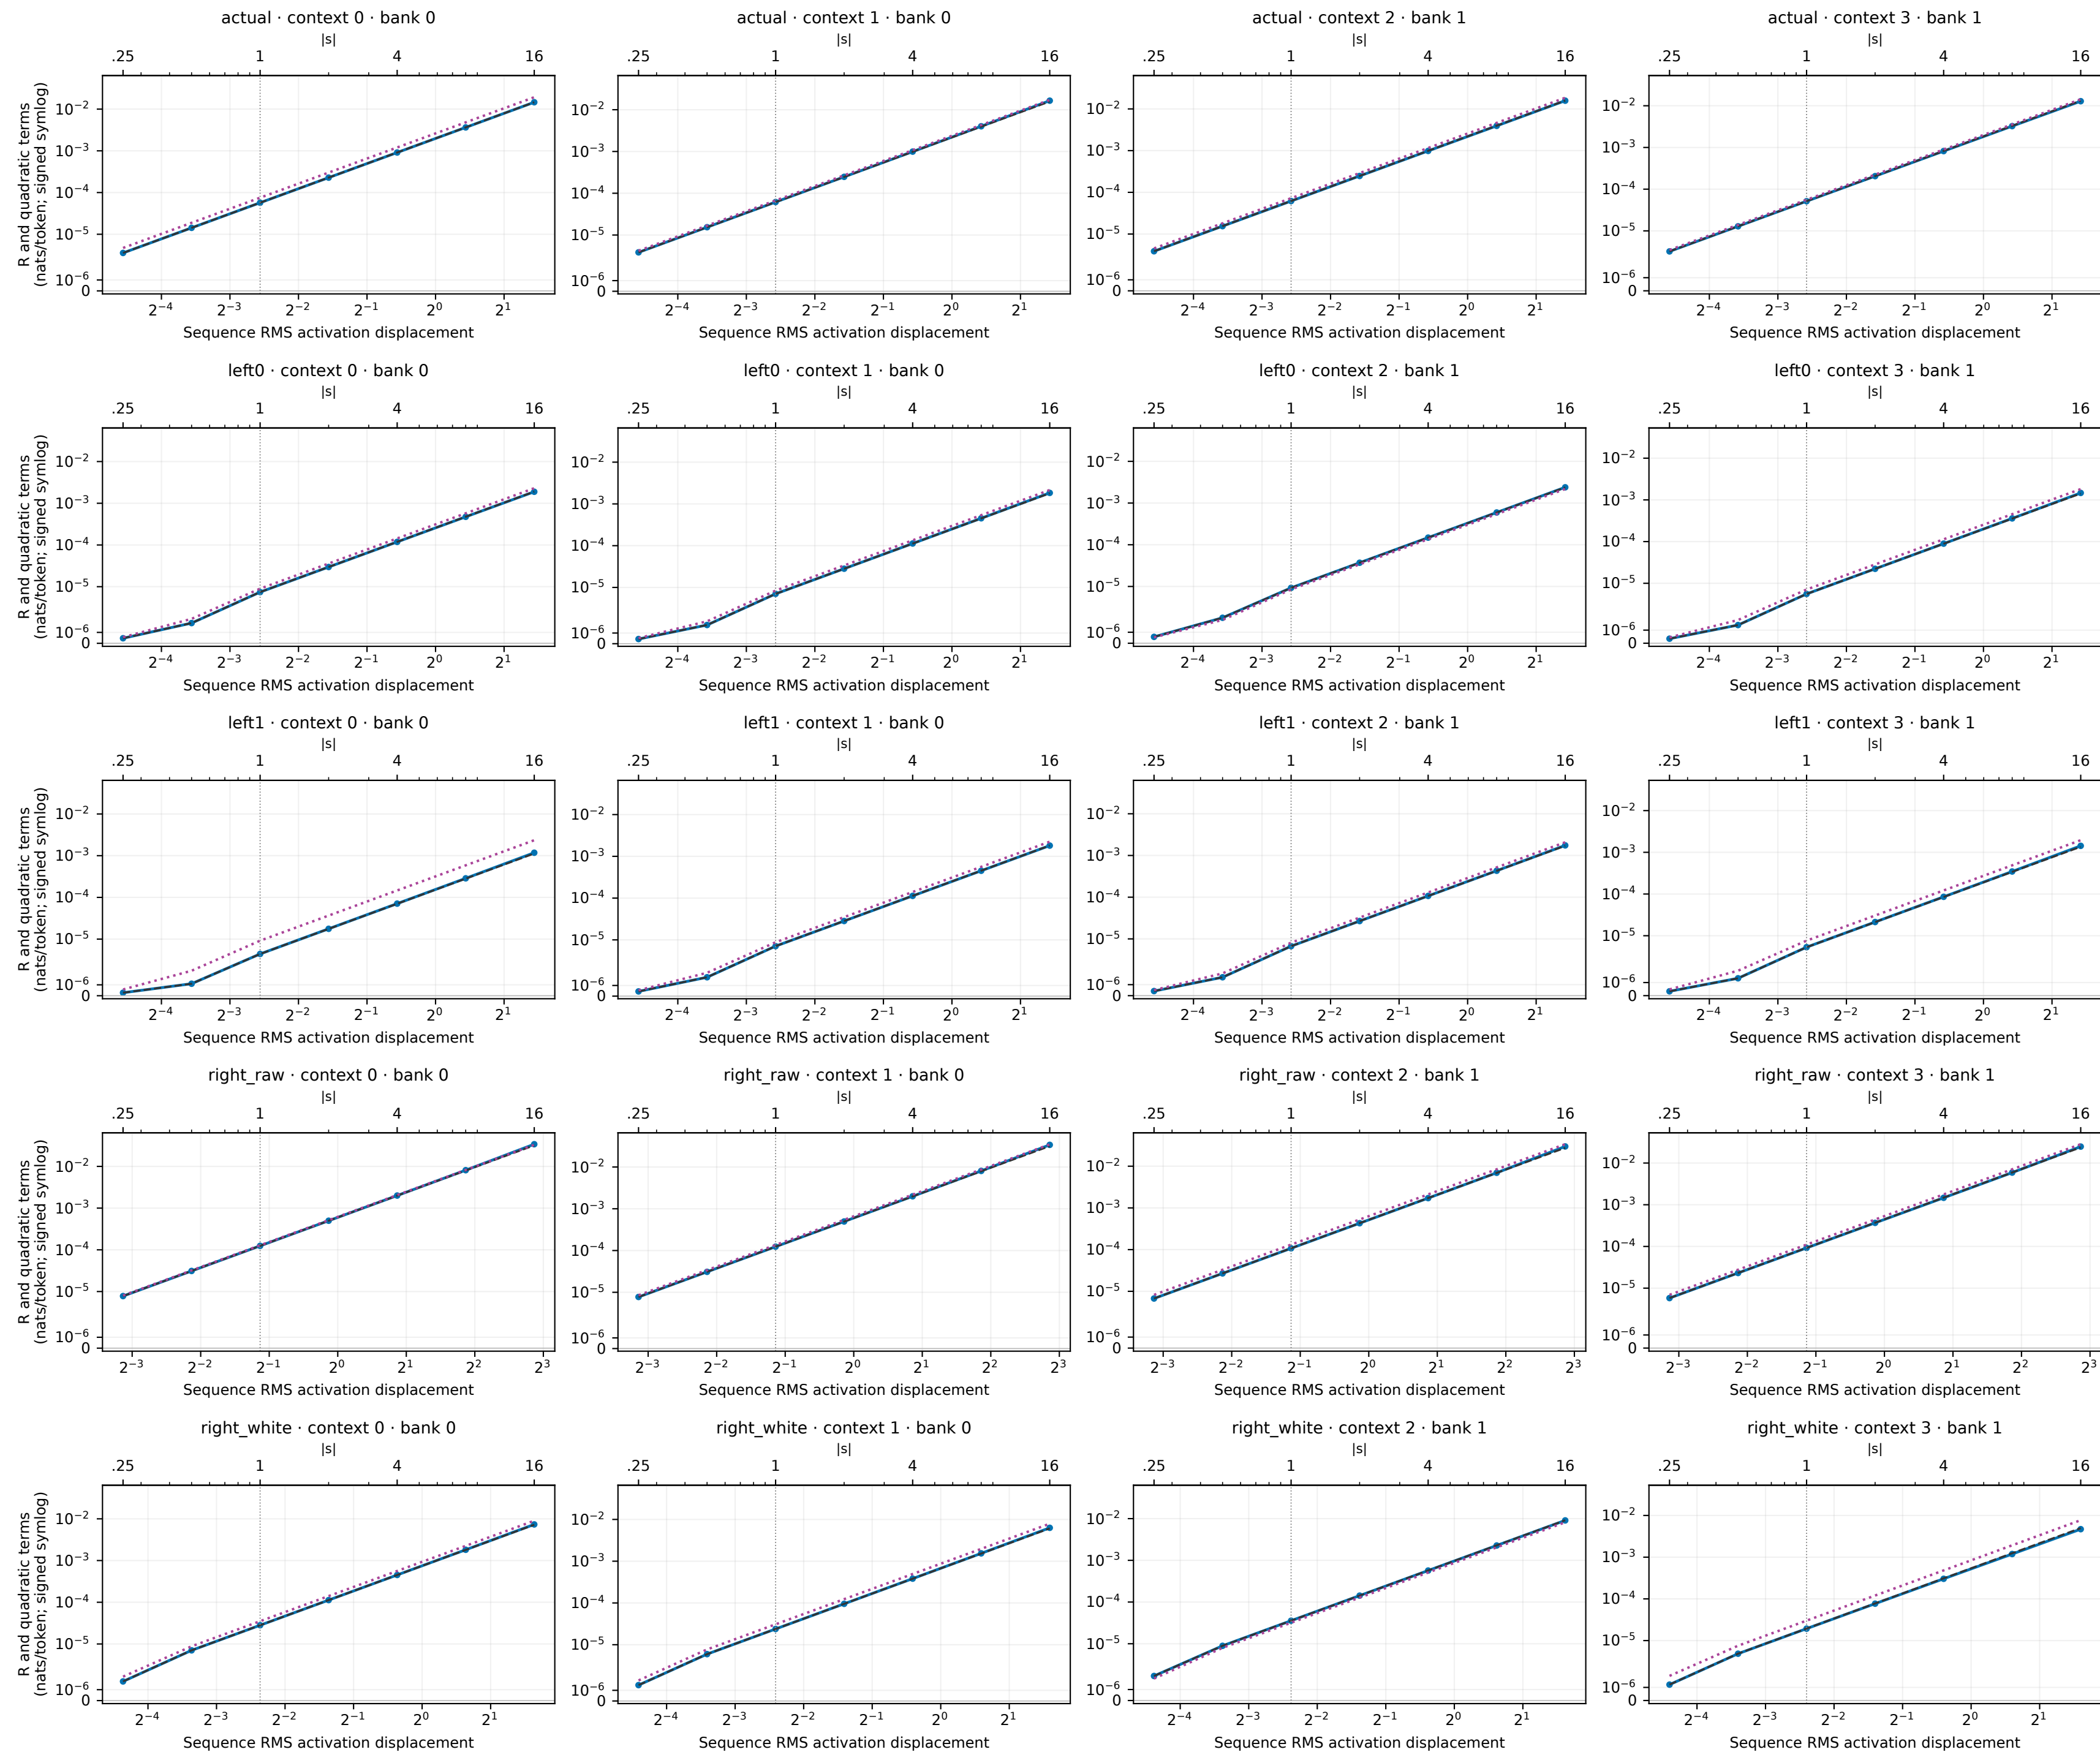

PD · state 10 · block 8 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

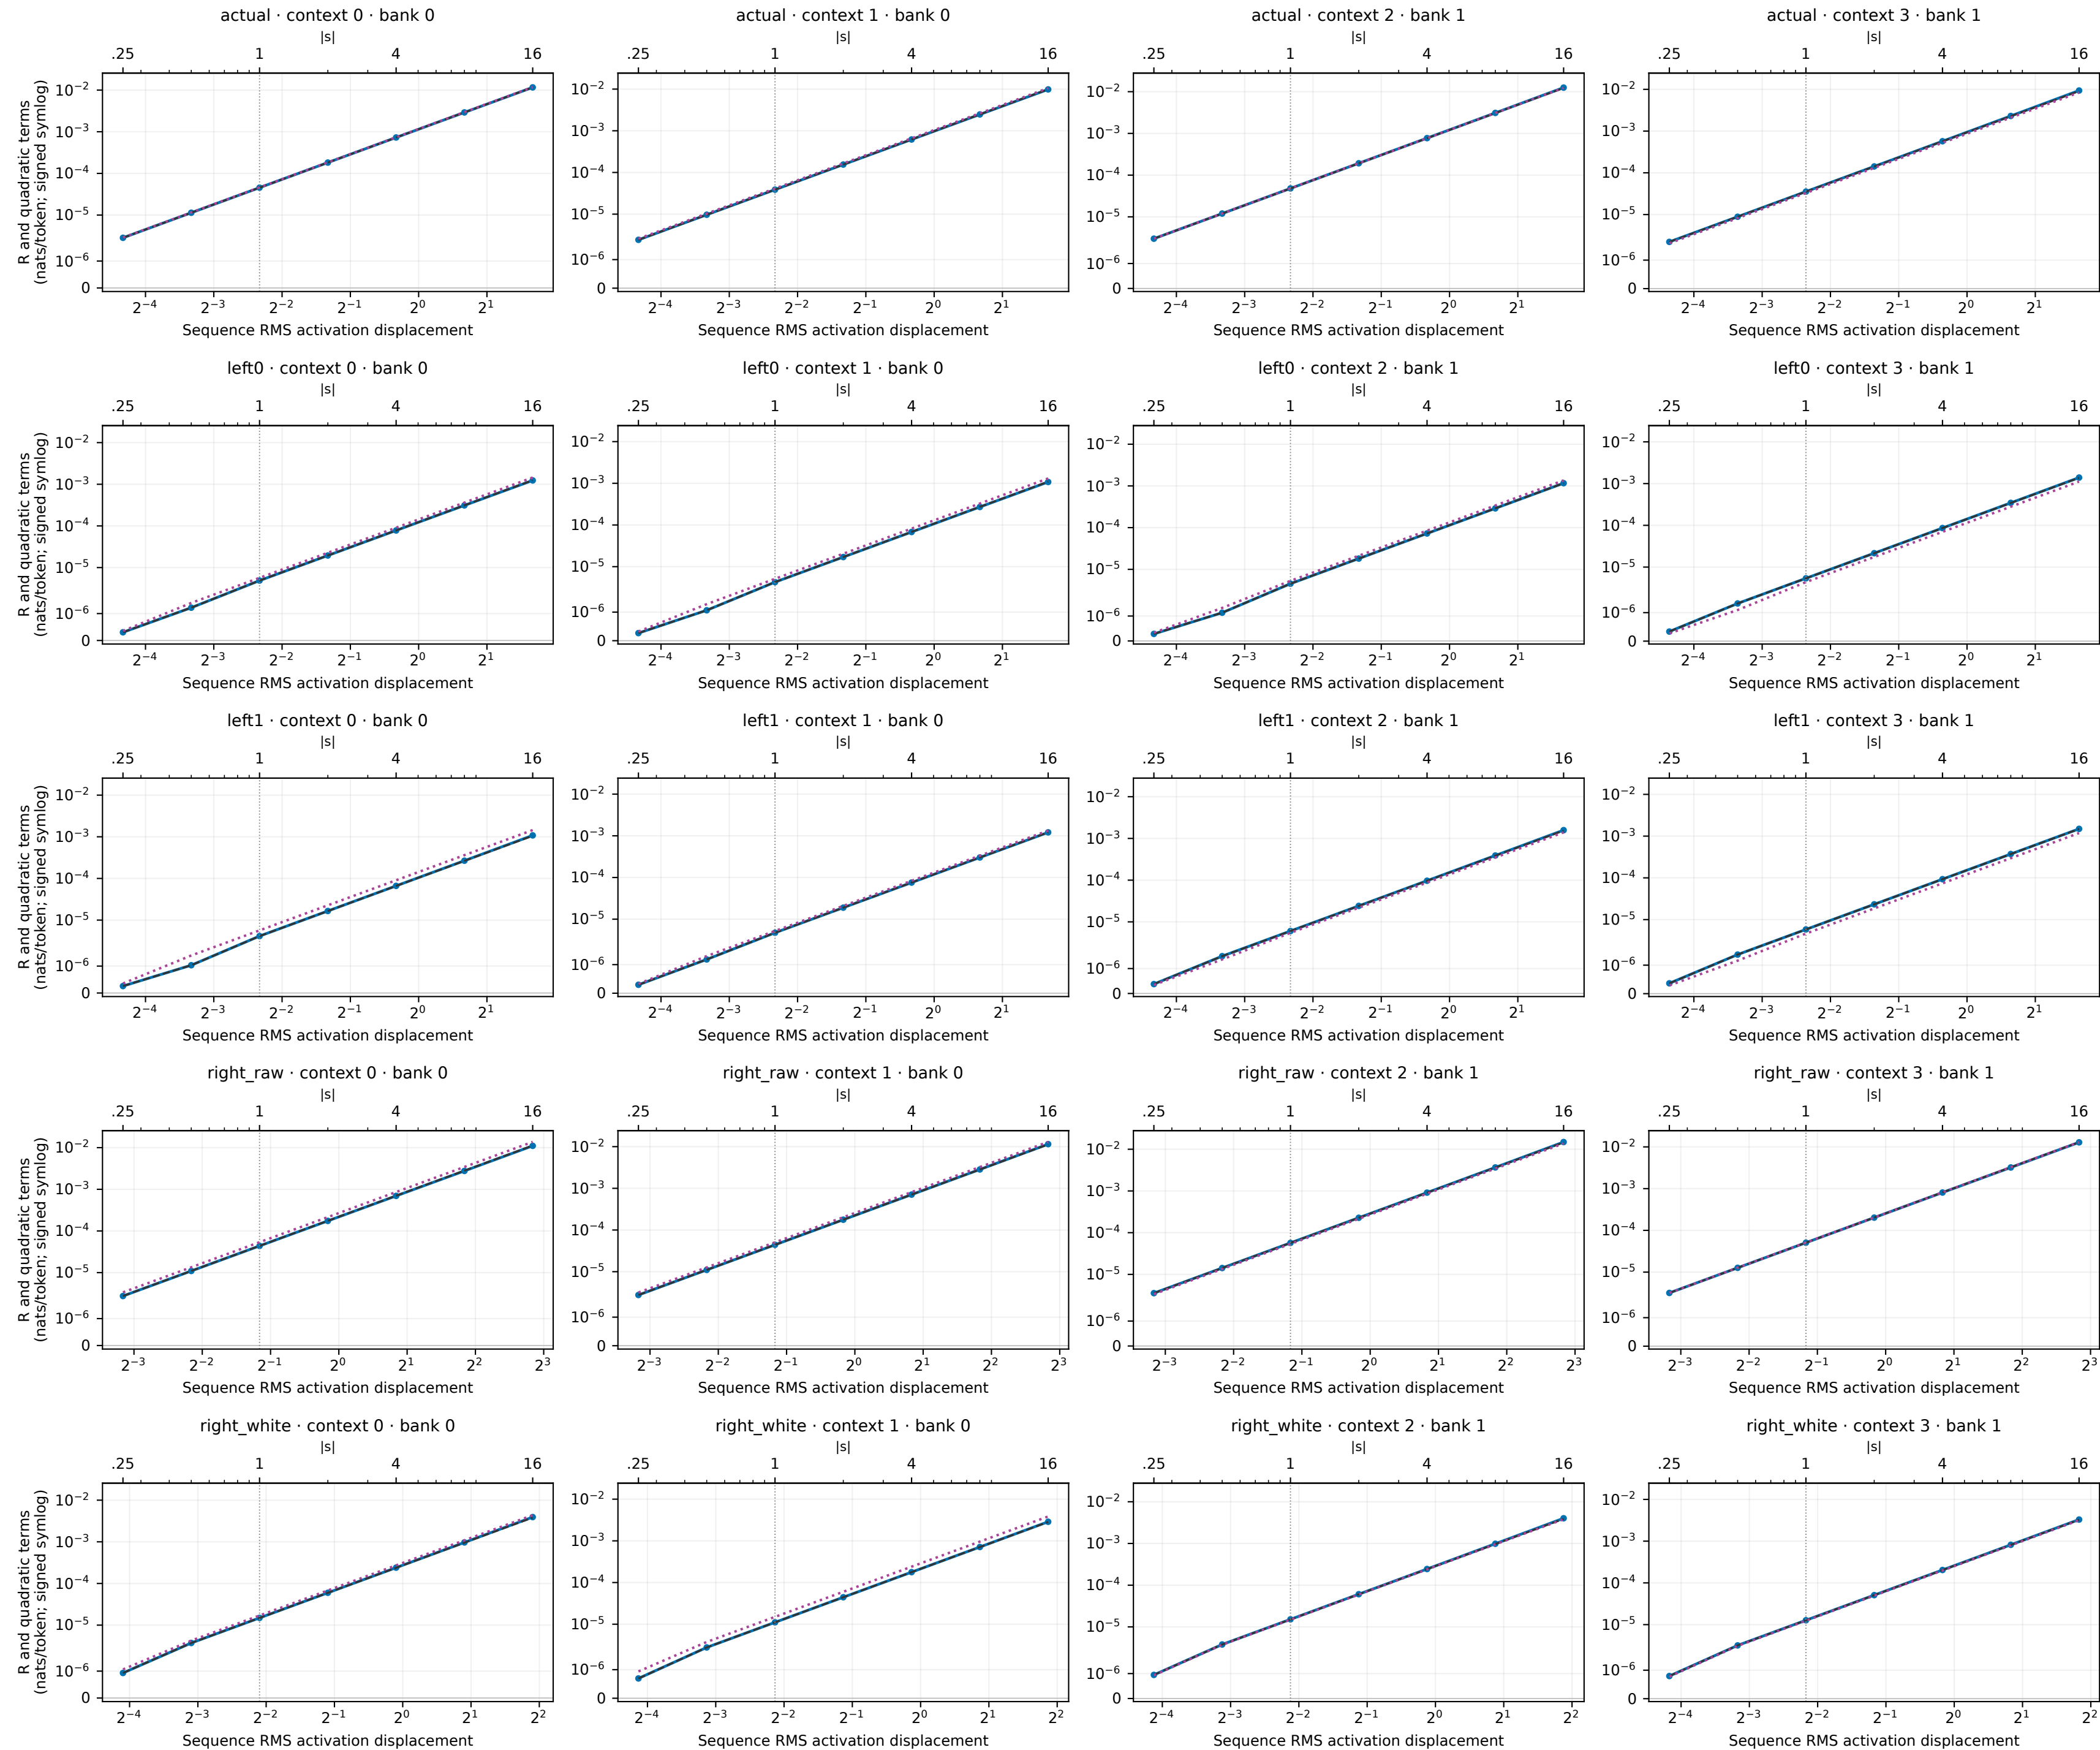

PD · state 500 · block 1 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

PD · state 500 · block 1 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

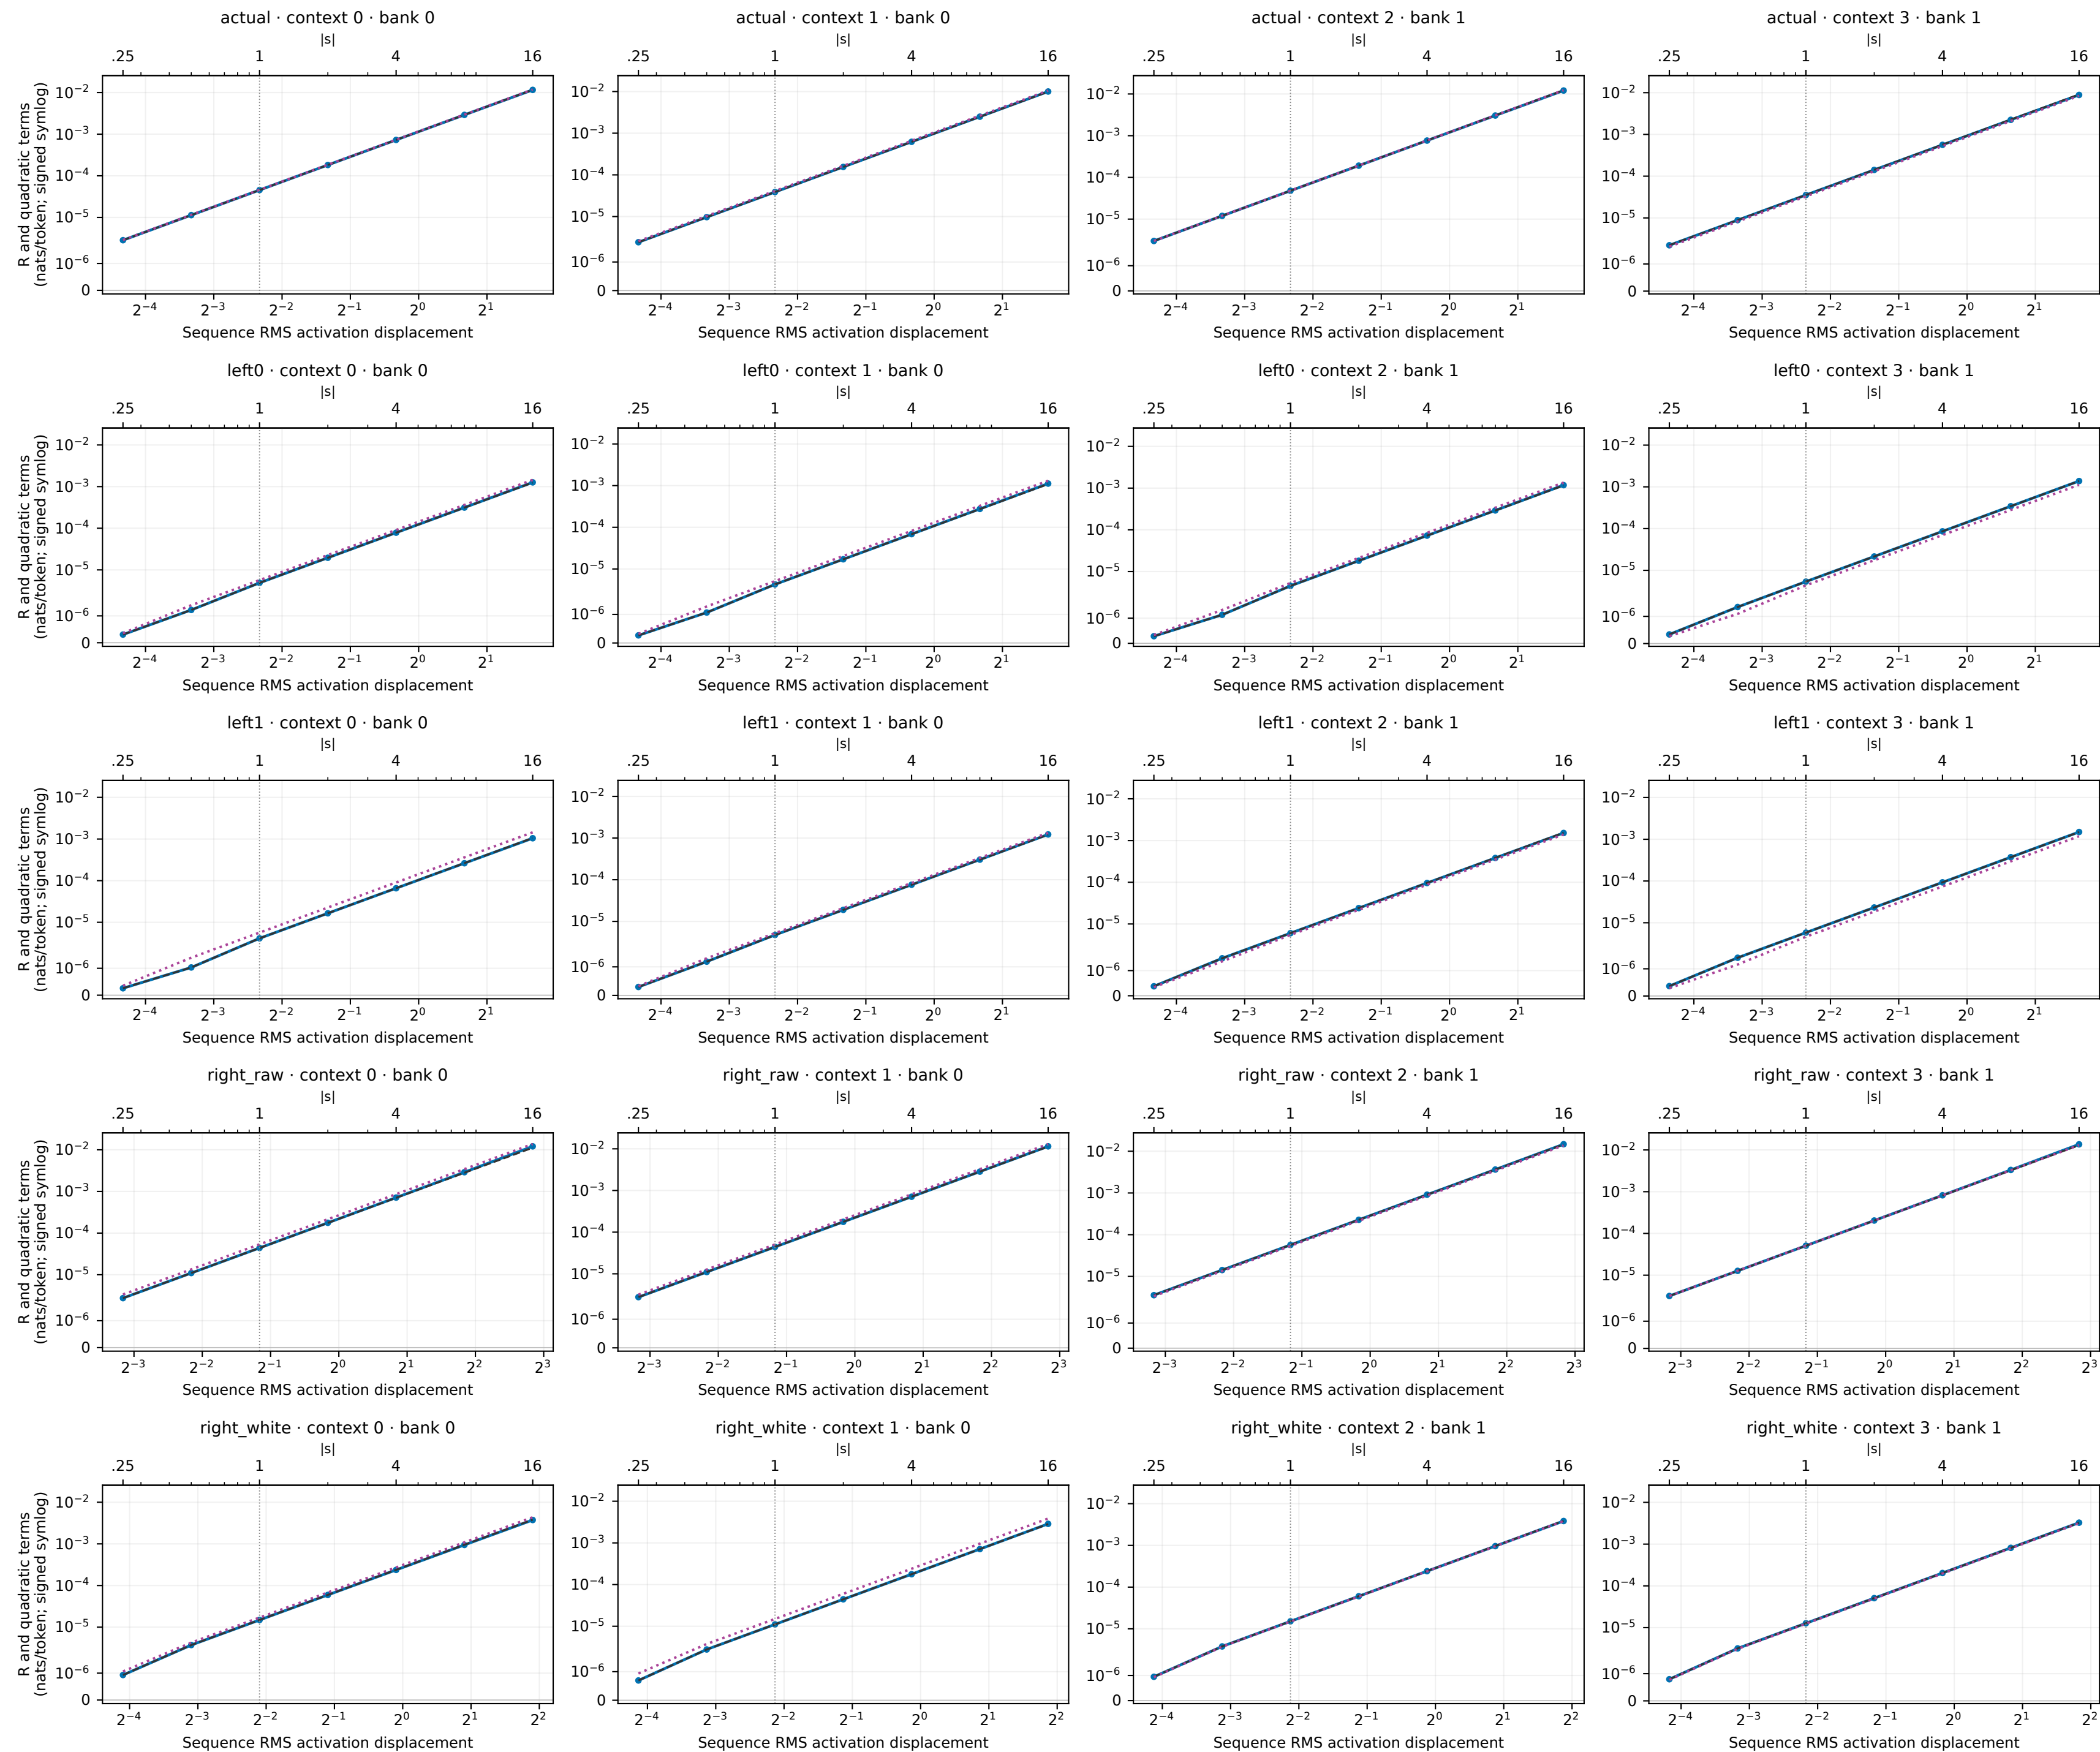

PD · state 500 · block 4 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

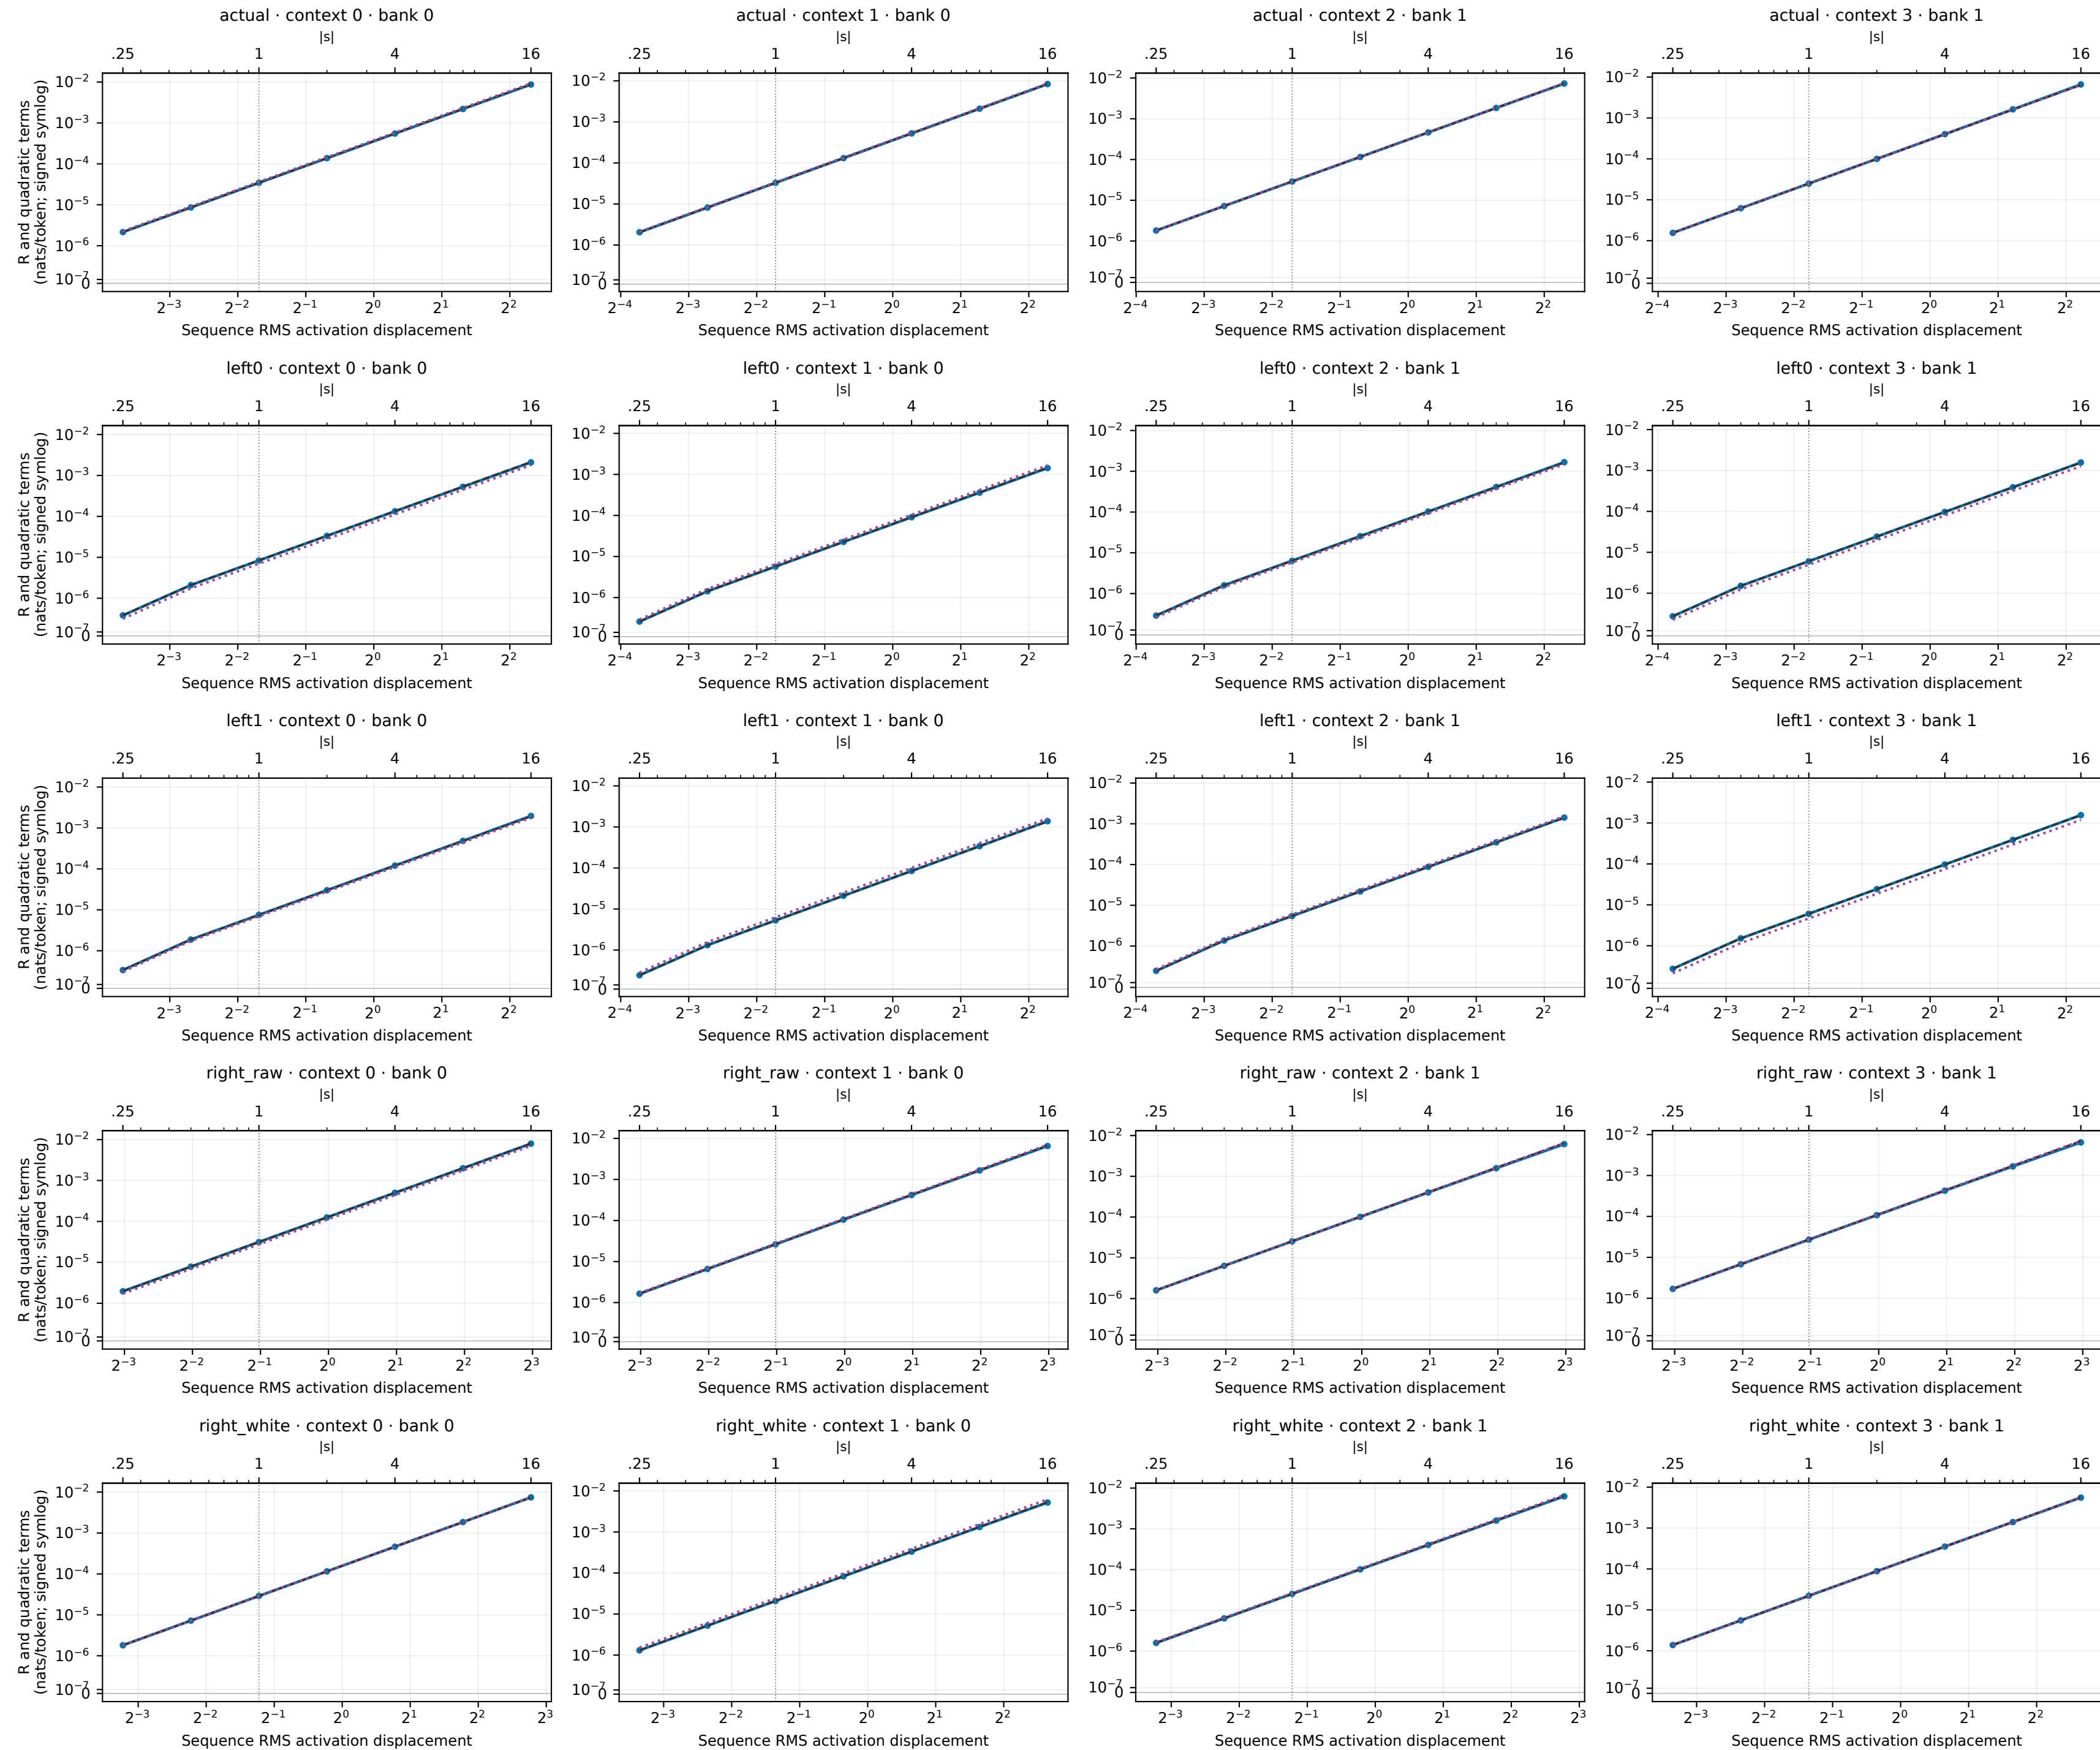

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 500 · block 4 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

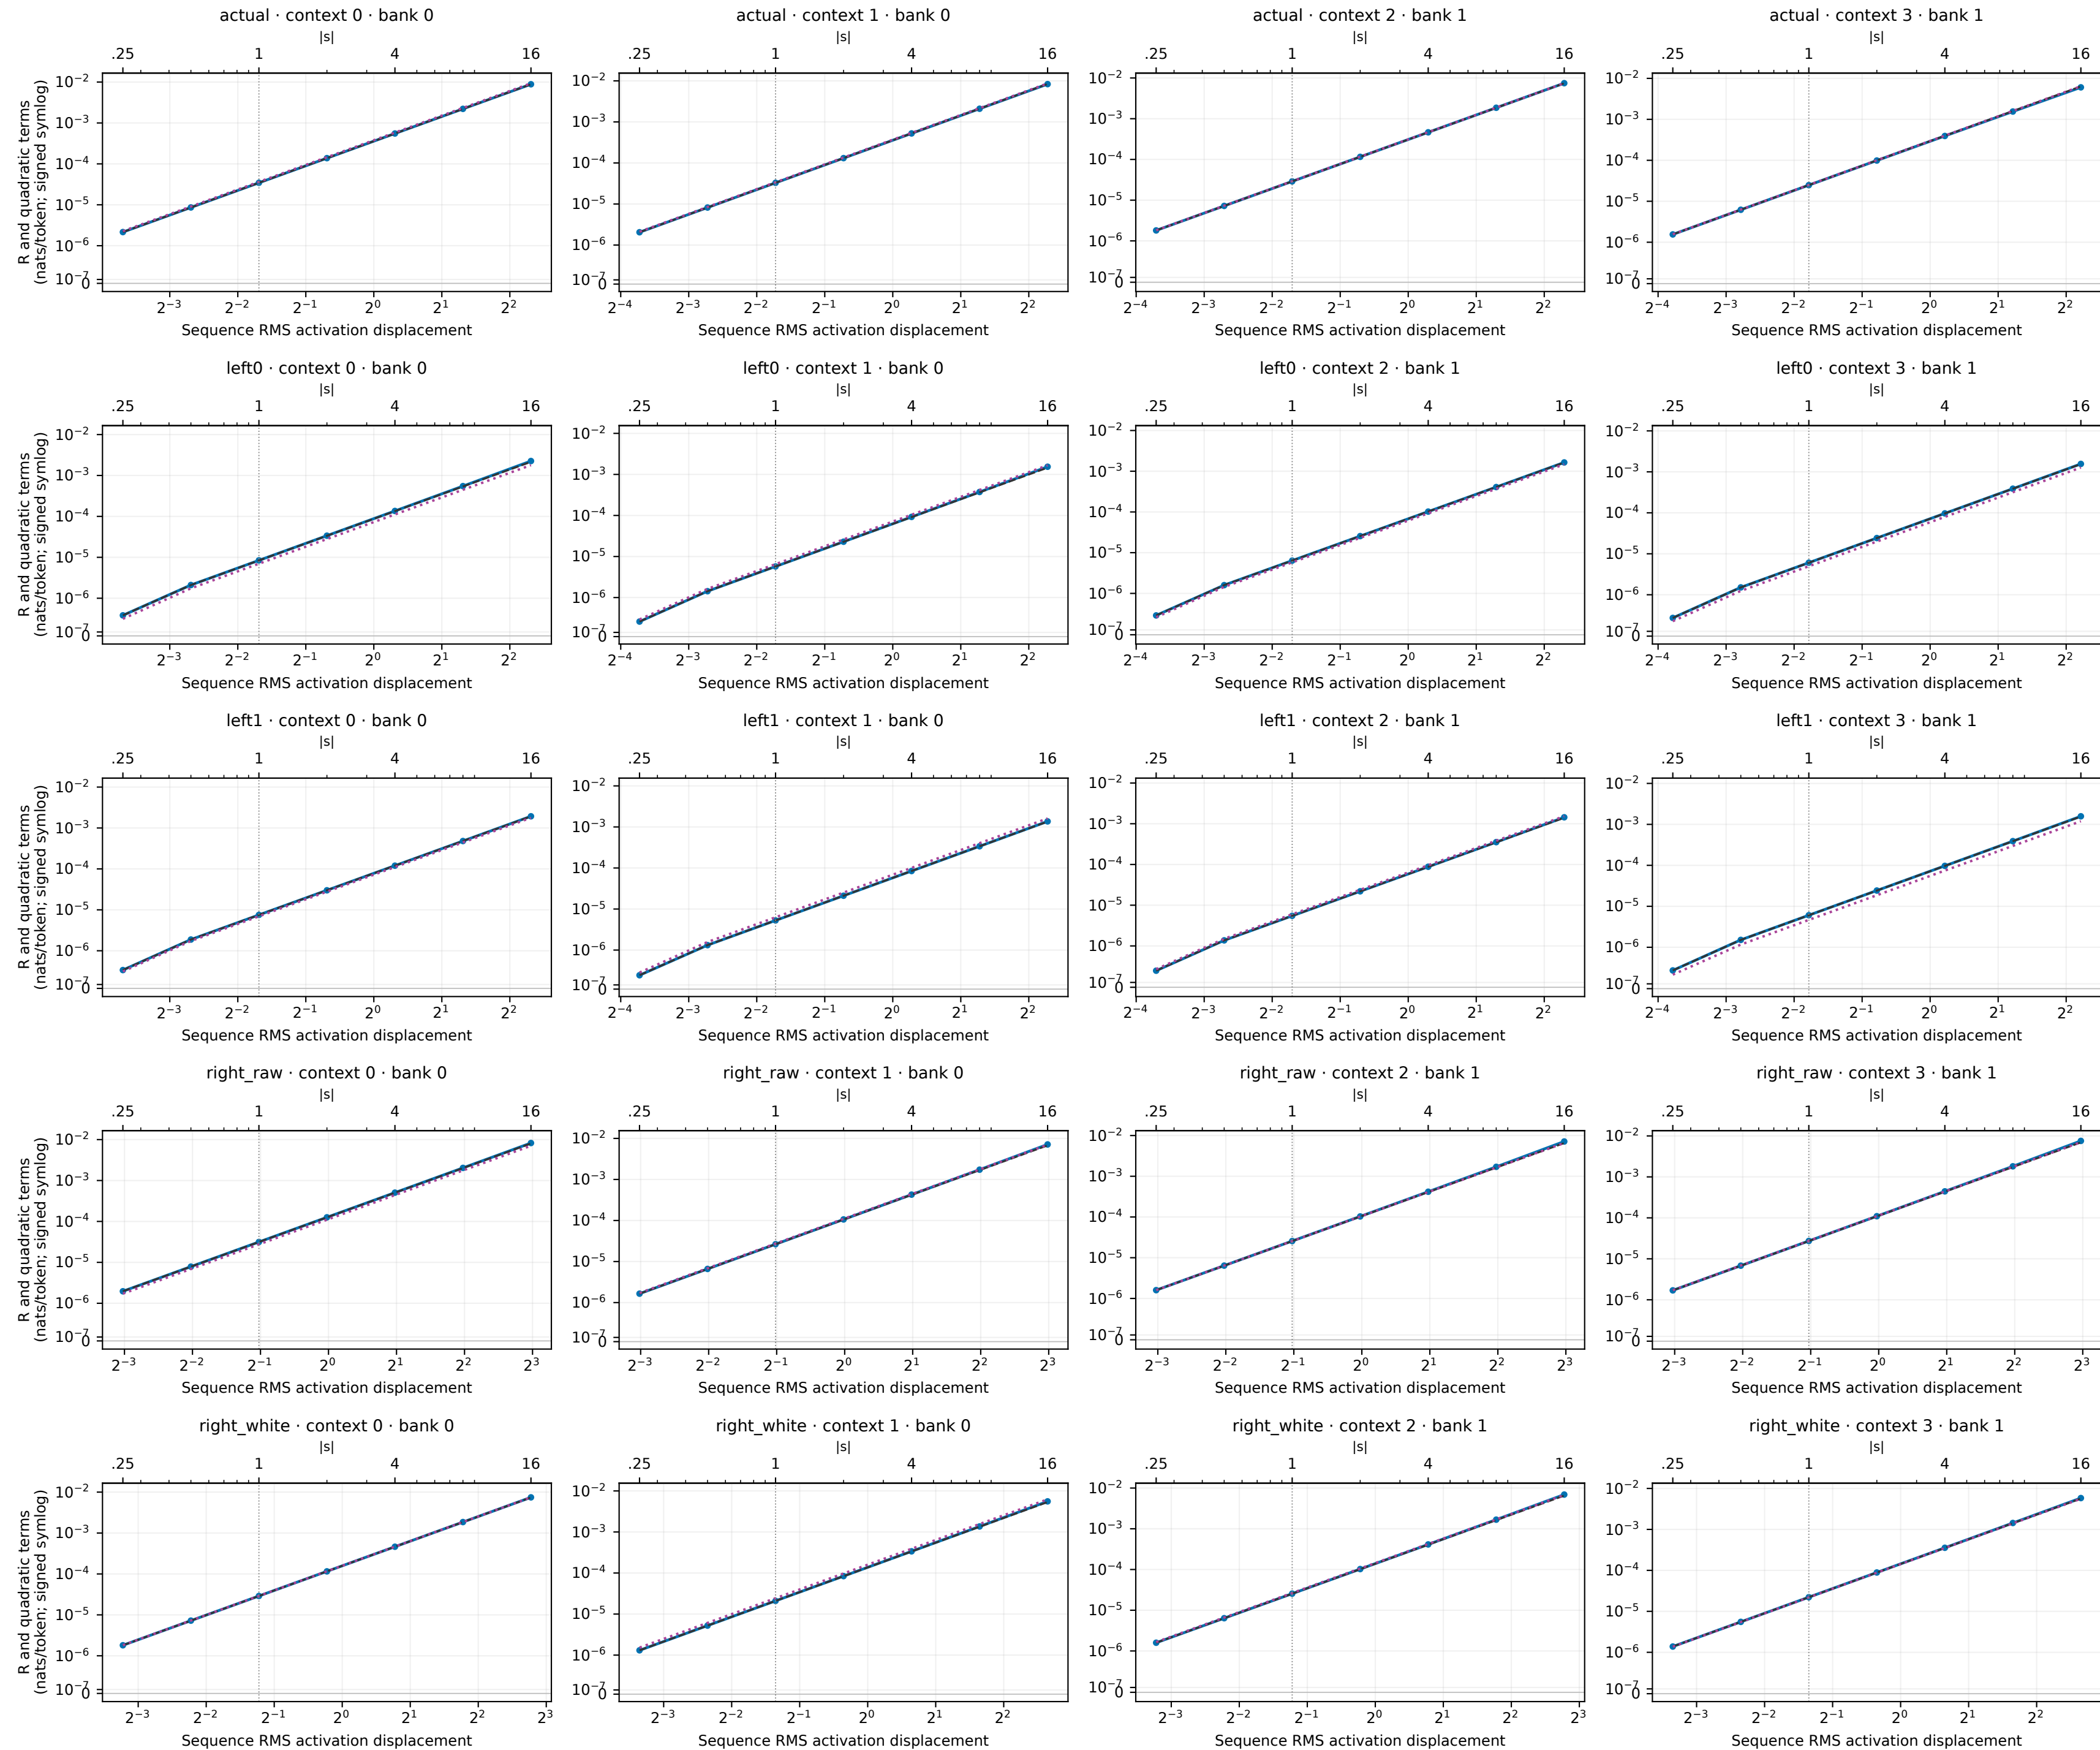

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 500 · block 8 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

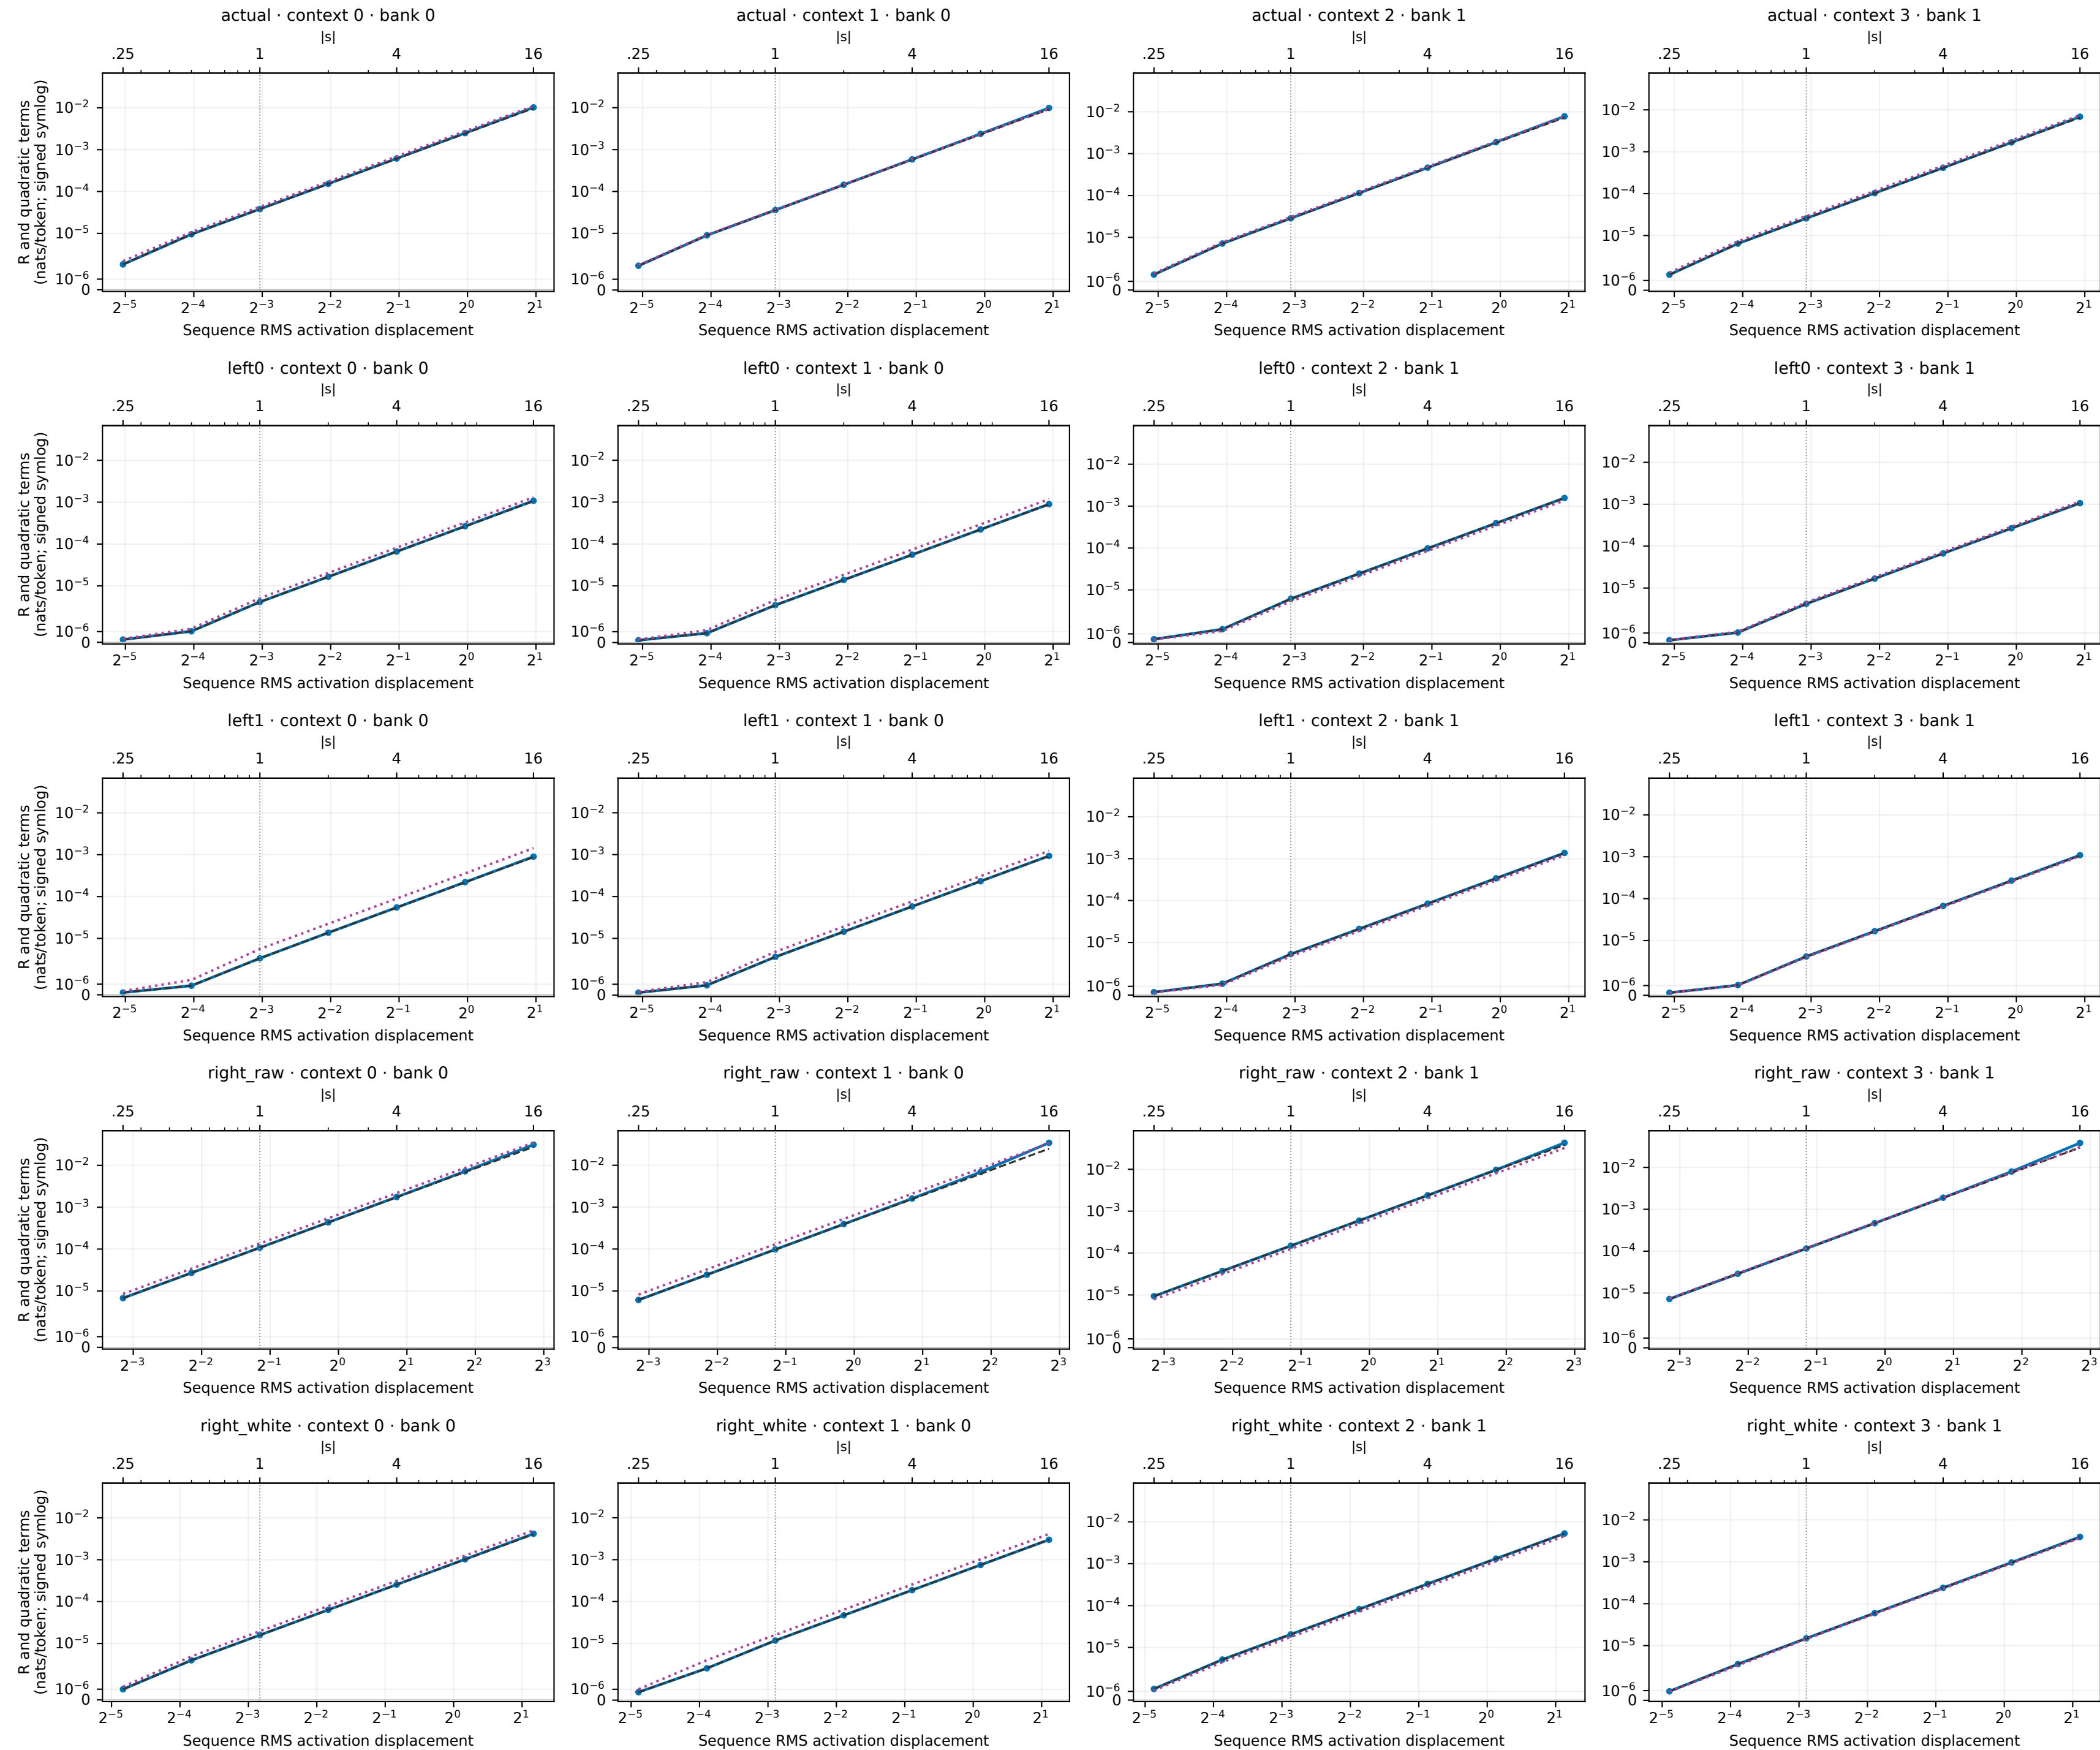

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 500 · block 8 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

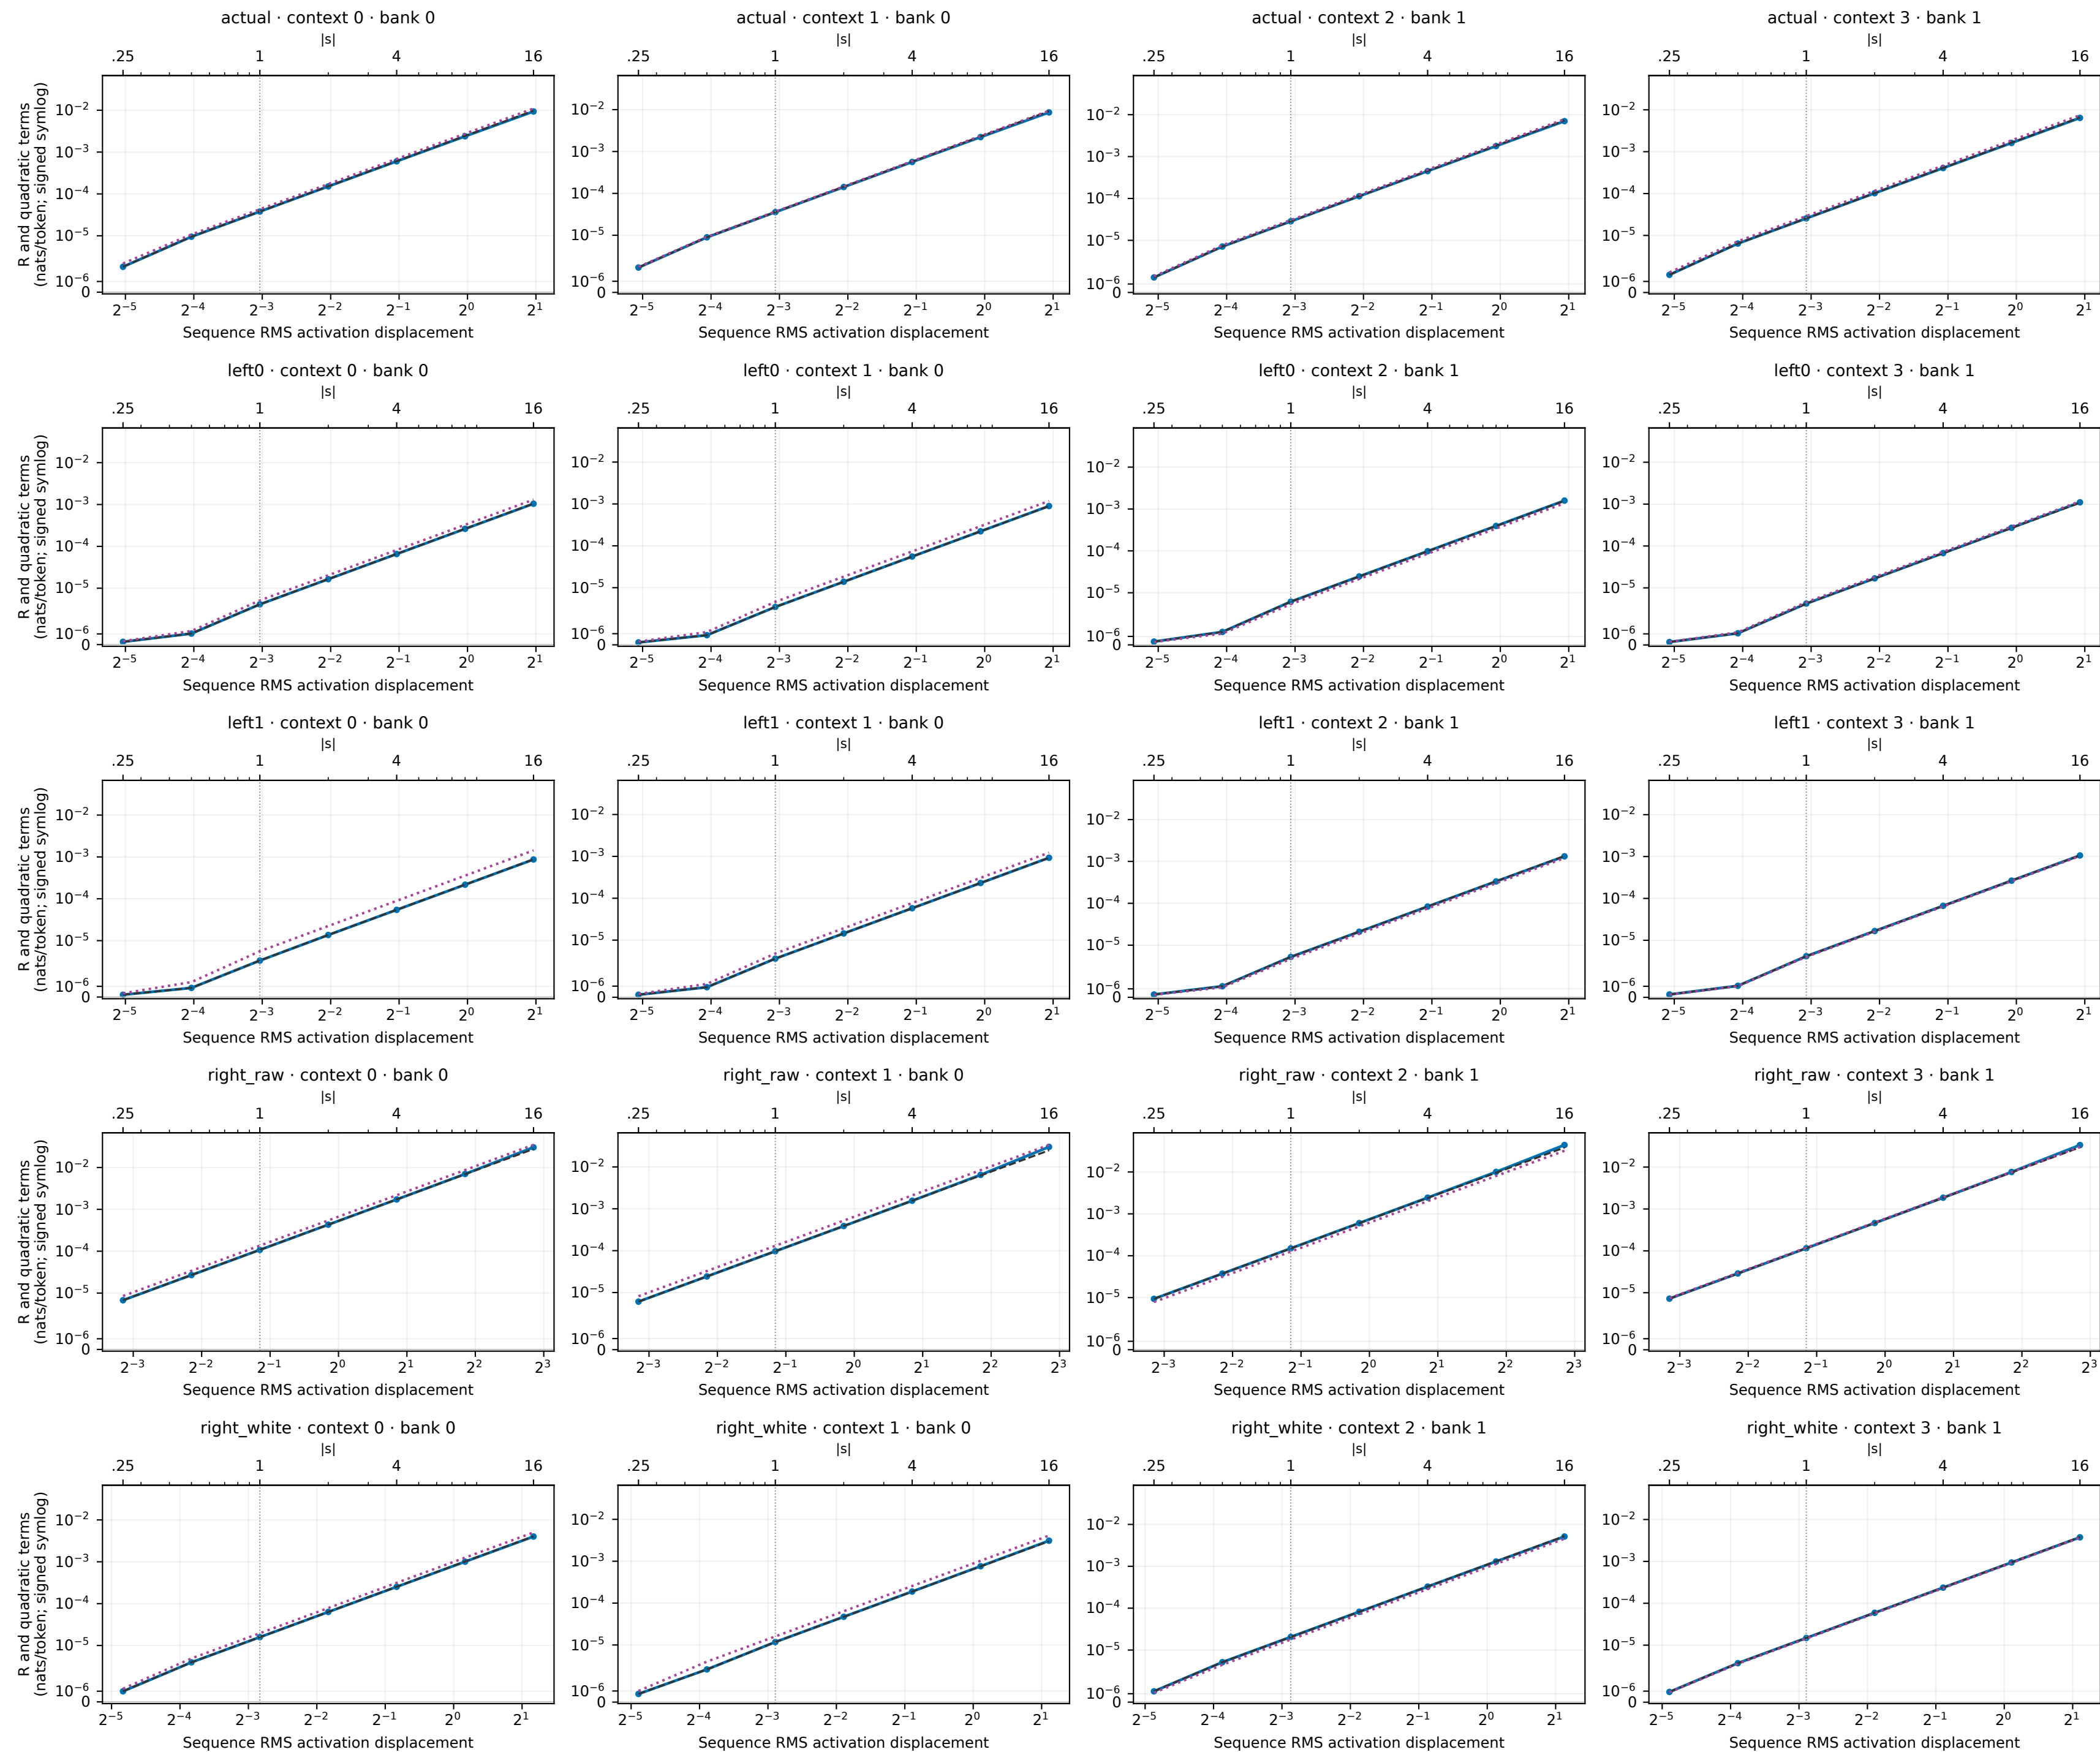

PD · state 1300 · block 1 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

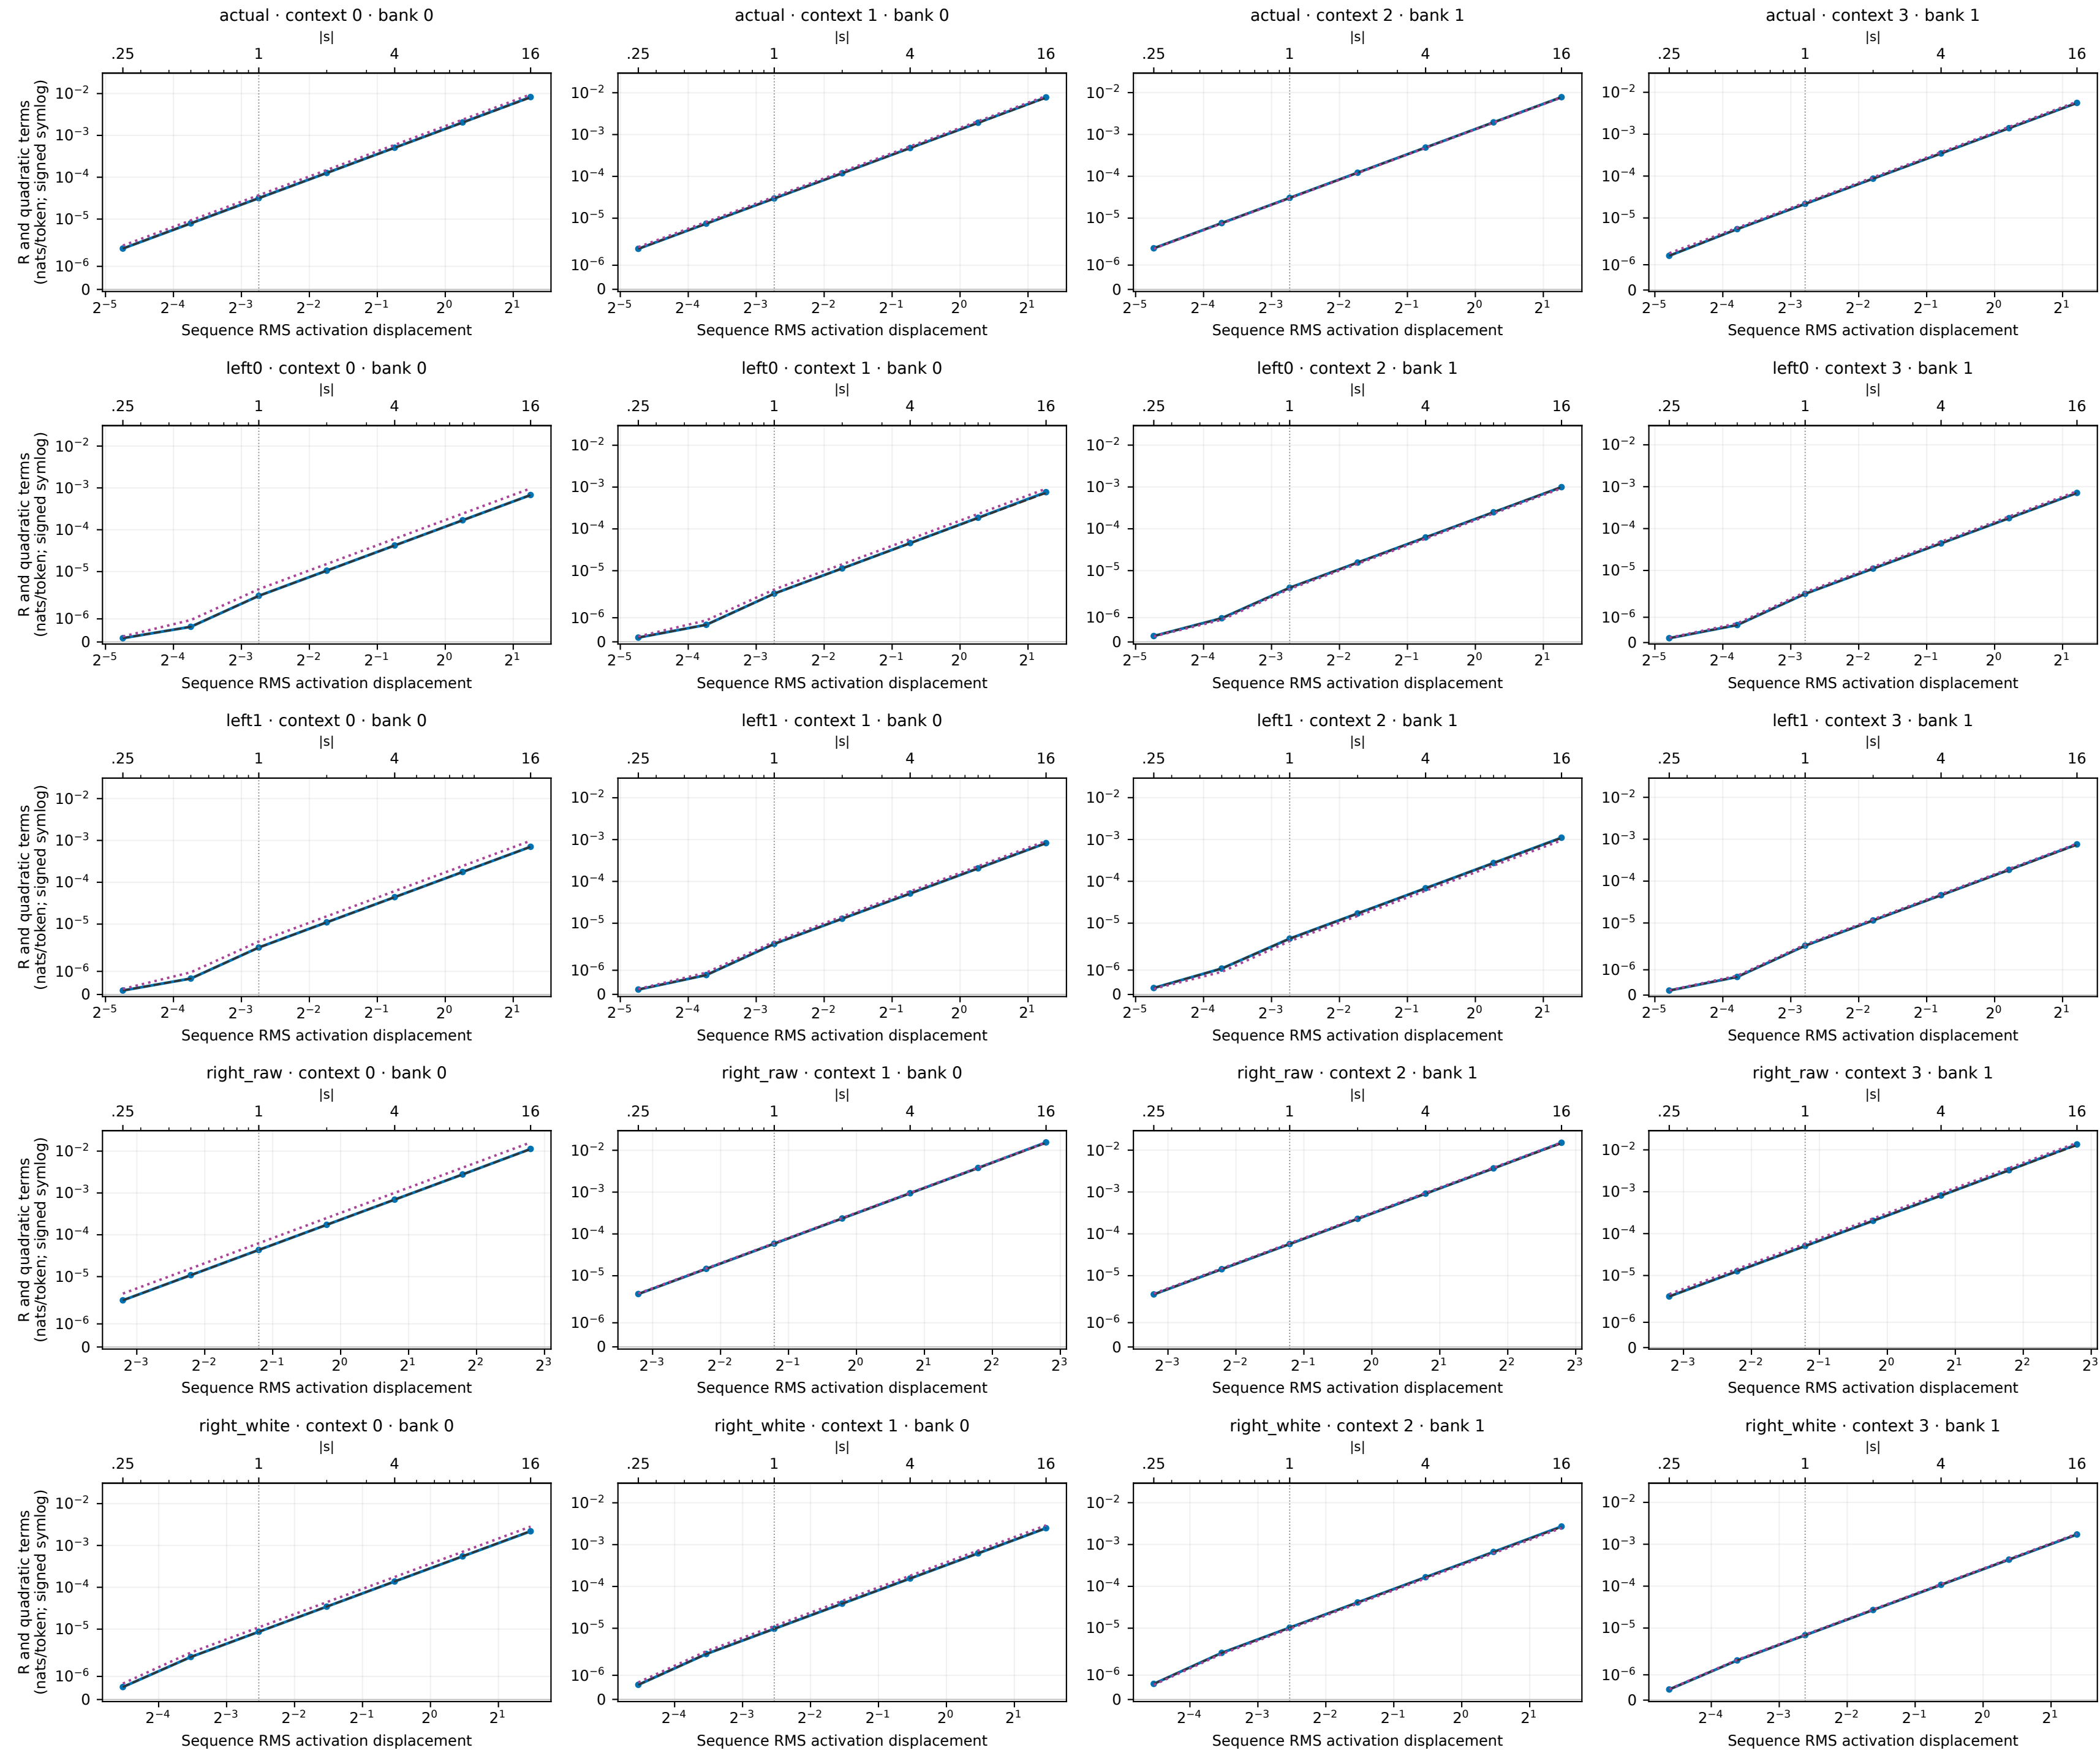

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 1300 · block 1 up · positive multipliers
 Full-context loss; shared y scale within each context; radius summarizes all injected positions

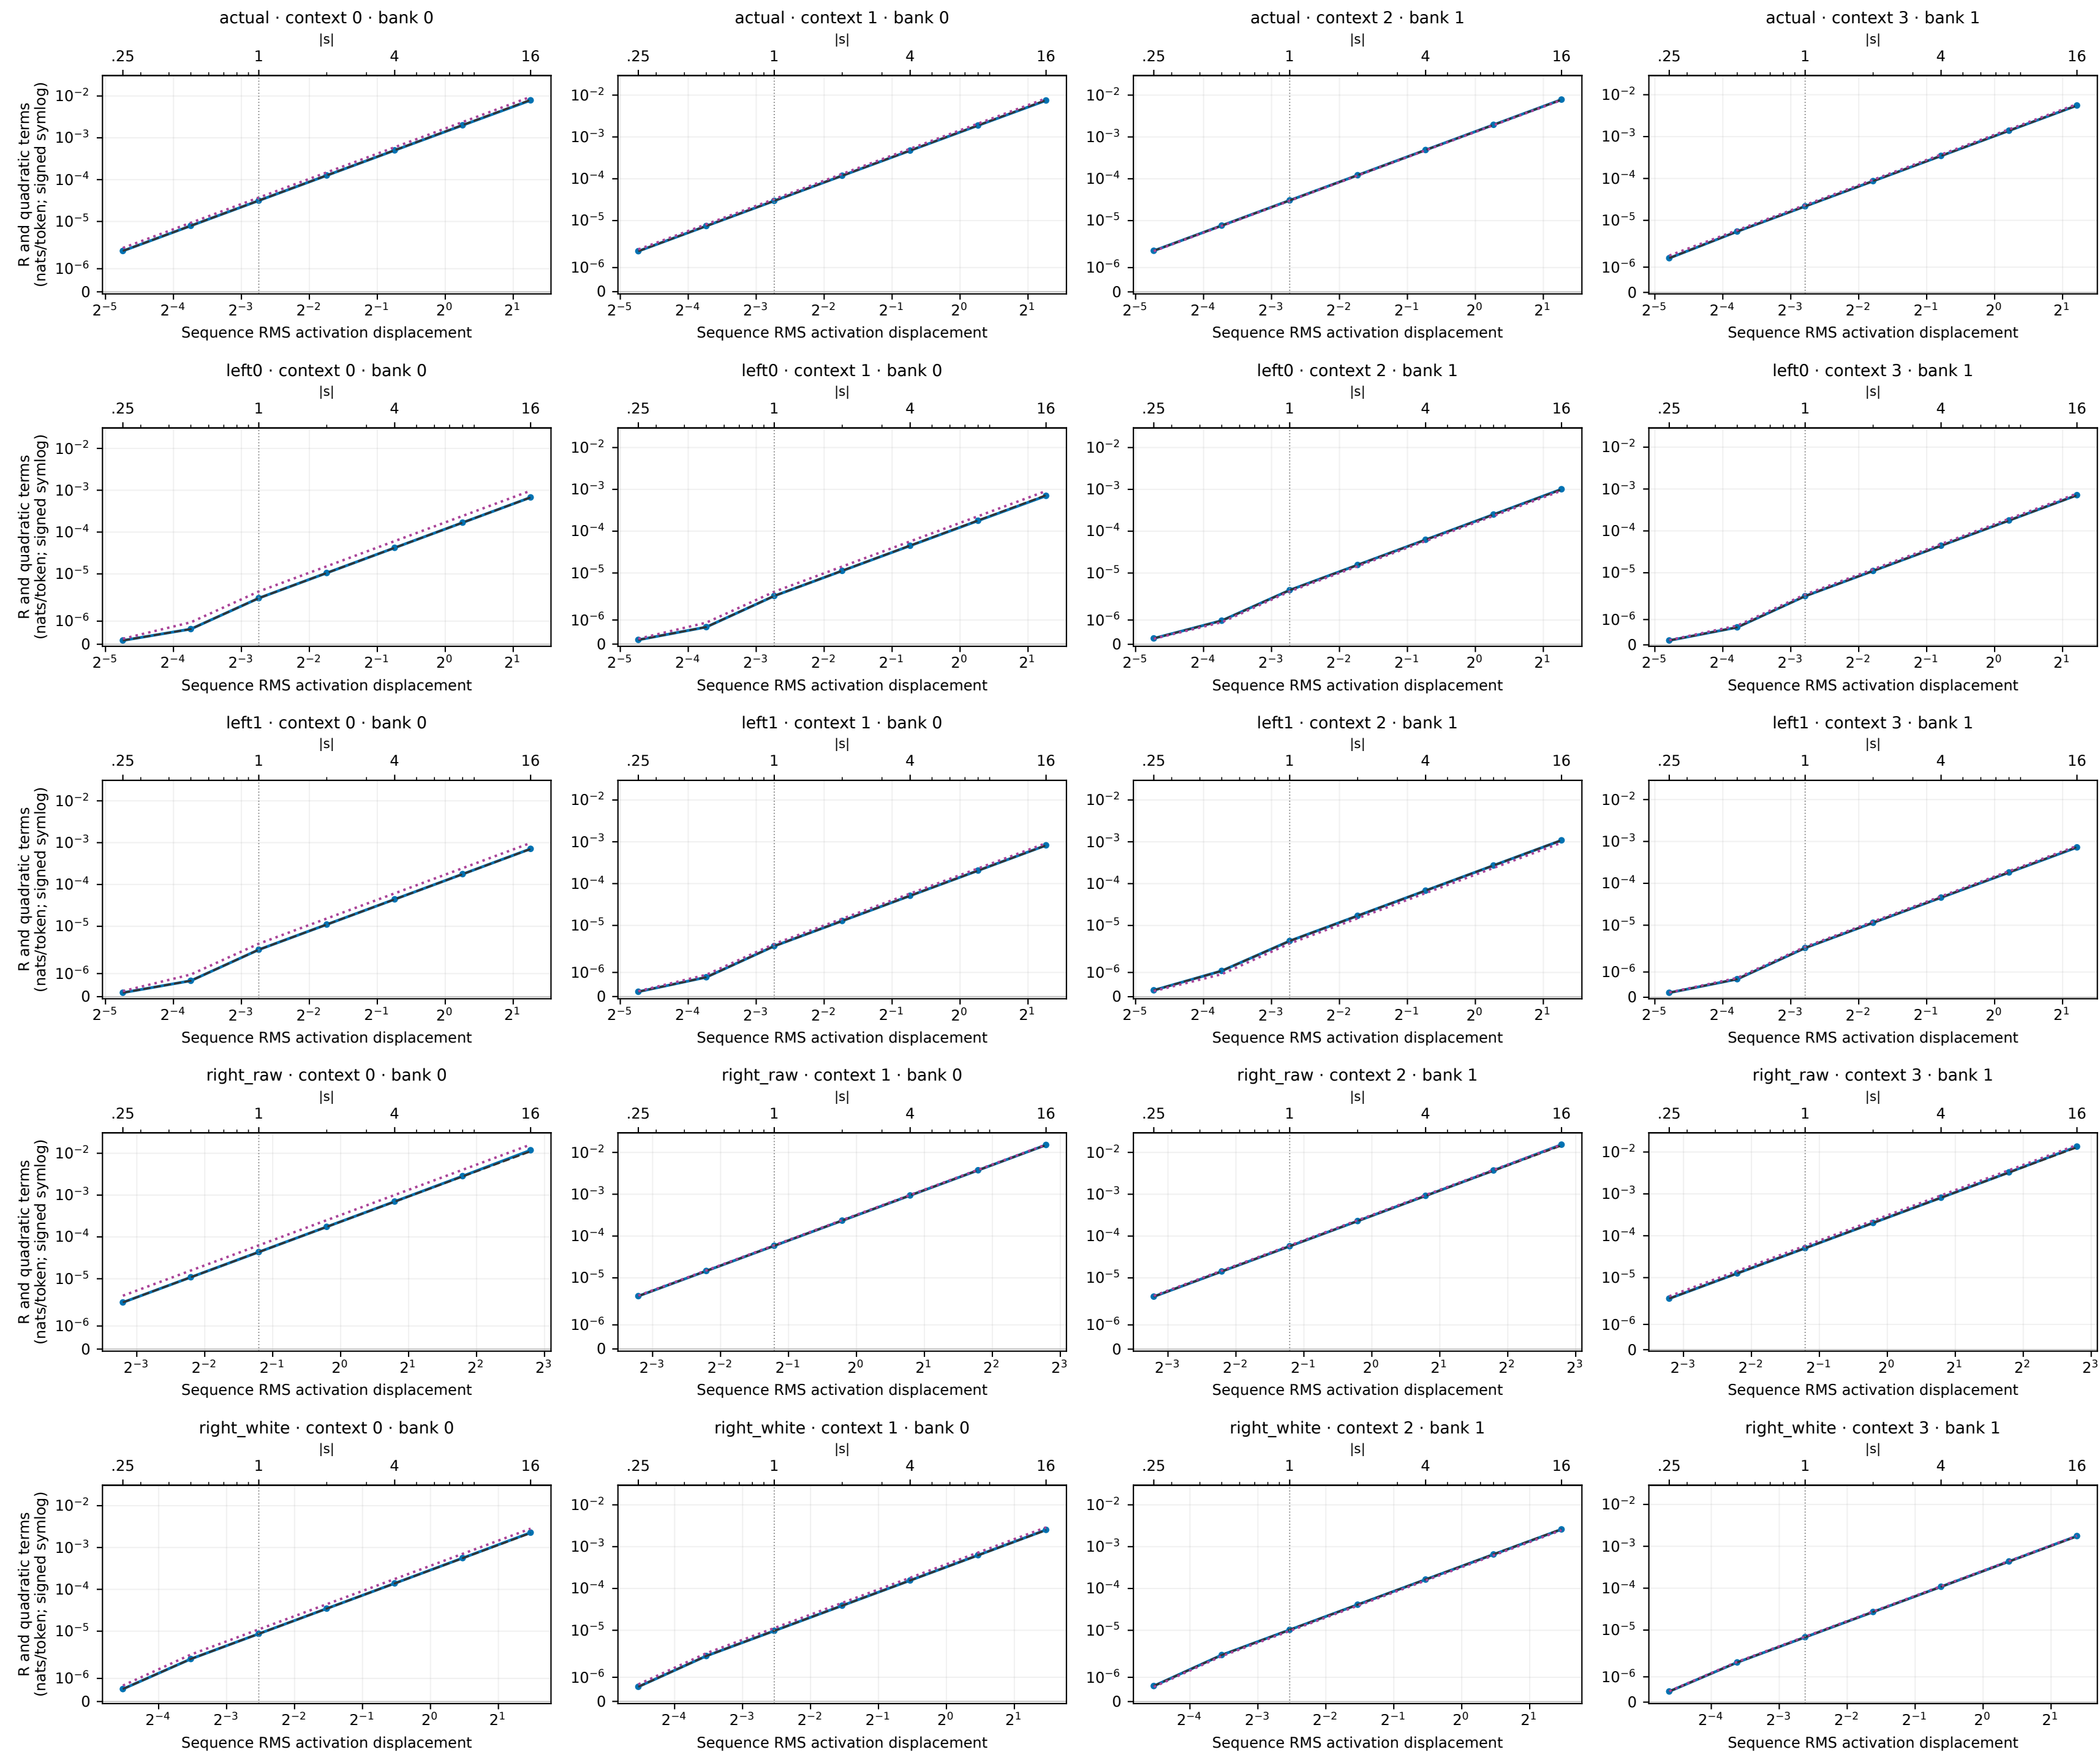

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 1300 · block 4 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

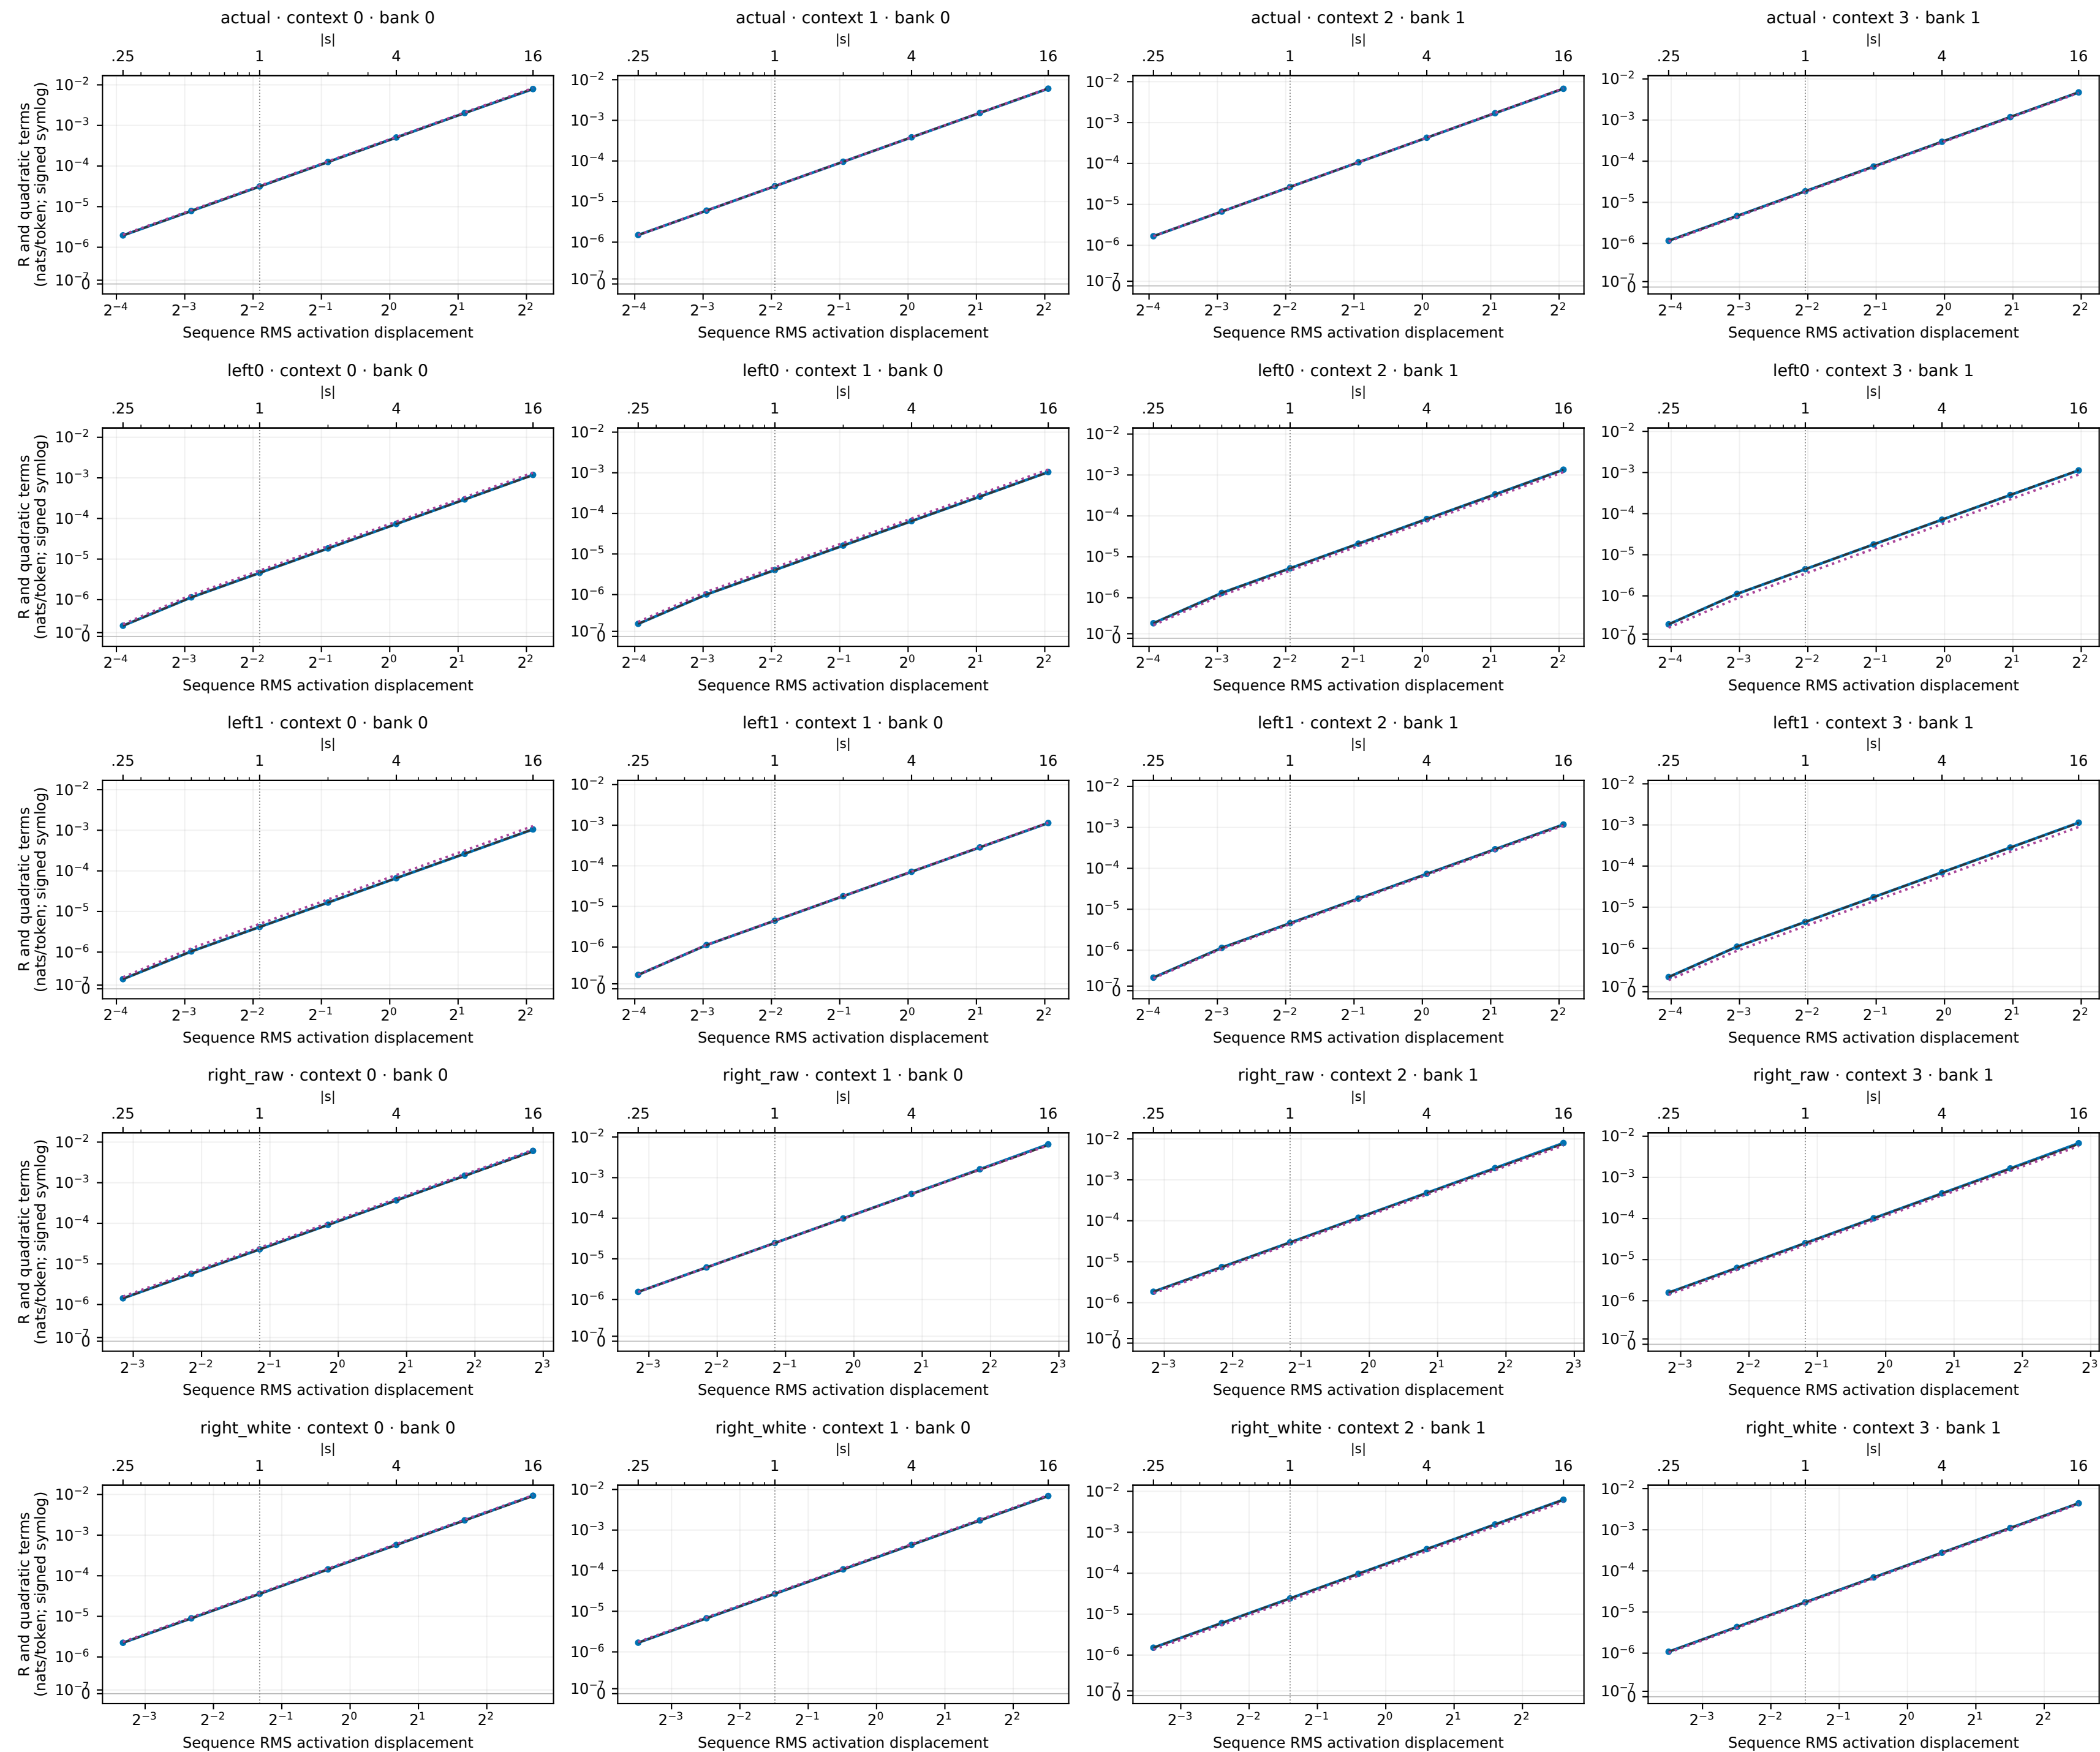

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 1300 · block 4 up · positive multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

PD · state 1300 · block 8 up · negative multipliers
Full-context loss; shared y scale within each context; radius summarizes all injected positions

— finite remainder R - - $\frac{1}{2}s^2$ true H ···· $\frac{1}{2}s^2$ predictive GN

PD · state 1300 · block 8 up · positive multipliers
 Full-context loss; shared y scale within each context; radius summarizes all injected positions
